Your home is a Period 9 house — it was built while that cycle ran, from February 2024 to January 2044. That is also the cycle we are in right now, so your chart and the wider energy are in step.

The nine sectors and what they govern

Each element feeds the next and checks another. Remedies work by adding the element that supports a sector, or the one that keeps a difficult star in check.

Here's a taste of how your report reads. This sample is written for a Period 9, south-facing home — yours will be written for your own chart, your floor plan, and the things you tell me about your home. — Kiah

Your wealth corner: where the 9 star lands

In this chart the current-period wealth star settles in the south sector — the same side as the front of the home. That is a genuinely fortunate arrangement: the energy that supports income and opportunity gathers where life already flows in and out of the house.

Keep this area open, well-lit and actually used. A dim, cluttered entry mutes the one star you most want active. If your dining or living space sits here, you are already living in the strongest part of the chart.

The quiet stars: health and sleep

The 2 star — the one classical texts treat with the most caution for wellbeing — sits as the mountain star in the north-east of this chart. Rooms there suit storage, guest use or short stays rather than the main bedroom.

If a bedroom must sit in that sector, the traditional remedy is metal: a round metal bowl, six coins, quiet metallic tones. Nothing dramatic — small, deliberate adjustments are the whole craft.

What your own report adds

Your report walks each palace of your actual chart room by room, using your floor plan overlay and the concerns you flag in the questionnaire — renovations, sleep, focus, a business run from home. Every recommendation is written for your rooms, not a generic house.

Remedies and enhancers

Place these only after the space is cleared and decluttered.

1	**Enhance — Career & Wisdom**	Keep the forms here beautiful and undisturbed.
2	**Suppress — Illness**	Suppress with a salt water cure or a calabash.

3	**Suppress — Conflict**	Suppress with a strong Fire form — red, candles, warm light.
4	**Enhance — Academic & Romance**	Keep the forms beautiful. Do not place a water feature here.
5	**Suppress — Misfortune**	Suppress with a salt water cure or a calabash. Avoid digging or renovating.
6	**Enhance — Helpful People**	Keep the forms here beautiful and undisturbed.
7	**Suppress — Speech & Gossip**	Suppress with a strong Fire form — red, candles, warm light.
8	**Activate — Wealth & Prosperity**	Activate with a real water feature or a mountain form.
9	**Activate — Future Prosperity**	Activate with a real water feature or a mountain form.

Bring it home — this week

1. Light the sector where the current wealth star lands — activity and light keep it working.
2. Move rest and sleep away from the 2 and 5 stars where the layout allows.
3. Front doors matter most: keep yours clear, working and welcoming.
4. Fix small broken things first — dripping taps and stuck doors drain more than they seem.
5. Re-check your chart at the annual shift each February; your report tells you what changes.

This sample shows the style and depth — your own report is written for your stars, your floor plan and your goals.
