

Building Bridges Hackathon

BASICS

What is a Hackathon?

A sprint-like event where participants team up and create solutions to real-life challenges in an intense period of time. Using creativity, technology, and mentoring, the week results in prototypes, fresh new concepts, and innovation.

SEON Building Bridges Hackathon is tailored to bring you an opportunity to showcase your innovative ideas and to form the most burning questions personally, all in the form of a team-building experience.

Team up with your colleagues whom you don't usually get to work together with, get involved in the current innovative projects of the company, and enjoy the fantastic atmosphere of Gamerland.

You will have 24 hours to submit a solution to one of the challenges.

 **The top 3 projects are rewarded.** For more info see the Prizes page.
