

For Manufacturers

# Smarter Entry Starts in the Cloud

## Visibility and Control at Every Door

### Facility doors

Facilitate easy entry across perimeter and interior doors with video intercoms and access readers. Screen visitors at entrance lobbies with check-in flows customized by visitor types.

### Entryway gates

Unite video security and access control to automatically unlock gates when LPR-enabled cameras detect approved license plates. Use intercoms to verify visitors before granting entry.

### Loading dock areas

Centrally route intercom calls to remote SOC teams and reduce burden on local guards. Scan and capture driver's license details with Guest.

## Trusted By

## Why Verkada

### Centralize management

Unite video security, intercom, access control, and visitor management capabilities for enhanced control over entryways.

### Manage access at scale

Manage thousands of doors, users, and credentials from any browser. Provision and revoke access automatically with SCIM.

### Support compliance

Access detailed global audit trails capturing door events, intercom calls, and visitor logs with integrated video context.

### Protect critical access points

Restrict access to sensitive areas like labs, IT rooms, and raw material storage with role-based permissions and anti-passback. Any violations or tailgating trigger instant alerts.

### Keep track of on-site visitors

Offer a seamless check-in experience that includes built-in photo ID capture, required safety videos, color-coded badge printing, and electronic document signing.

### Enhance perimeter security

Catch trespassers the moment they cross a fence or virtual boundary with instant SMS alerts or push notifications for motion, loitering, and line crossings.

## Recommended Solutions

### Intercom

Answer calls, grant entry, and secure entrances from anywhere with Verkada Intercom.

### Guest

Welcome and screen visitors appropriately with Verkada's visitor management system, Guest.

### Alarms

Minimize false alarms and maximize visibility into every alarm with a cloud-based alarm system.

### Access Control

Manage doors across facilities and create a modern unlock experience with Verkada Access Control.

### Video Security

Gain valuable visual context into entryway activity with FY2019 NDAA/TAA-compliant cameras.

## Par Pacific

"Now, we can monitor sites 24/7, and the system automatically alerts us if something goes wrong. It's like having an extra layer of security without needing to add more personnel."

**Nathan Peters,**  
Director of Technology  
Par Pacific

## Signify

"We transformed our approach to security, achieving a fivefold increase in the speed of our investigations and reducing our reliance on on-ground patrols."

**Kfir Atias,**  
Head of Global Security Operations
