AI-Powered Security That Is Intelligent, Proactive, and Scalable

When every second matters, do your security systems work together to help you respond faster? With Verkada, unify cameras, alarms, access control, and intercoms under a single pane of glass. See incidents unfold in real time and detect threats proactively with AI — all while supporting HIPAA compliance.

Trusted by Top Hospitals

ECRMC
El Centro Regional Medical Center
An Agency Of The City Of El Centro

83% reduction in workplace violence incidents*
15-minute investigation time (reduced from several hours)*
$25,000 to millions avoided in potential compliance fines*

NHS
Liverpool Heart and Chest Hospital
NHS Foundation Trust

Minimized system maintenance costs*
Instant response to health, safety, and security issues*
Serving a catchment area of **2.8 million people**

Protect Staff and Patients with AI-Powered Security

Onsite active threats

Whether it's an agitated patient or an armed threat, security teams can instantly access footage with duress calls to address the situation with real-time awareness and live floorplans.
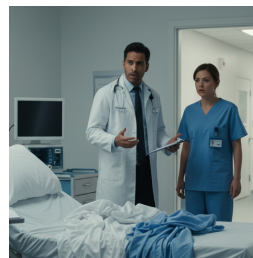

Infant abduction prevention

Instantly view footage tied to RTLS infant alerts or lock down doors via Verkada Access Control, giving your team real-time control to help prevent abductions.

Emergency lockdown

Quickly lock down doors right from your smartphone or desktop. Secure a single door, a department, or an entire campus with customizable scenarios in Verkada Access Control.

Missing patients

Use AI search to rapidly find missing or wandering patients by using photos or descriptions. Reconstruct event timelines in seconds to guide response and recovery.

Unauthorized access

Get instant alerts for tailgating, secure sensitive units with badge or biometric access, and deter shared credentials with anti-passback.

High-risk person alerts

Notify security the moment a known person of interest or their vehicle returns to your hospital, enabling teams to respond before situations escalate.

Perimeter security

Protect parking lots and hospital perimeters with IR cameras that are easy to install, solar-powered, and LTE-connected, providing clear visibility even in low light conditions.

After-hours monitoring

AI-enabled talk downs, integrated with cameras, create a proactive security presence, deterring loitering and car break-ins while helping onsite guards cover more ground.

*As estimated by the customer. Prior results do not guarantee outcomes.

Detect, Alert, and Resolve Threats Faster with AI

Centralize alerts and response

Centralize alerts from your hospital and outpatient clinics in Verkada, using a ticket-based system to track, investigate, and resolve incidents across sites.

Rapidly investigate with AI

Quickly investigate incidents or security threats in real time using license plates, reverse image search, or plain-text queries. Extend Verkada's powerful AI analytics to even non-Verkada cameras.

Maintain patient privacy

Support HIPAA compliance with features like live face blur, selective face blur on archived footage, configurable privacy regions, and tiered user permissions that limit access to live or recorded video.

Stay ahead of known threats

Customize alerts and get immediate SMS or push notifications when a person of interest, like a previous unruly visitor or known offender, appears at any of your sites.

Simplify video sharing

Instantly share video clips and live feeds without waiting on IT or thumb drives. Empower your team to quickly coordinate with internal personnel or local authorities to respond to incidents.

Deliver value beyond security

More than security — Verkada uses video analytics to help hospitals detect health and safety risks, streamline audits, and improve patient experience and operations.

Why Verkada?

Easy multi-site
from any internet-connected device

Rapid investigation
in minutes, not hours

Built-in automations
for faster incident reporting

Early threat detection
powered by AI

Instant alerts with video context
for faster response

Reduction in guard costs
through smarter alternatives

Remote deployments
via LTE, Starlink, and solar power

Unlimited cloud archiving
and user seats

No NVRs or DVRs
– up to 365 days of on-camera storage

Up to 10-year warranty
and predictable renewal costs

Connect with us for a custom quote, consultation, or free 30-day product trial.

Our team will work with you and everyone involved to find the right solution for your security goals and beyond.
