

# EXTEND PARTNER PROGRAM BY LAYERX

LayerX is the only interaction security platform that secures all user and agentic interactions across any application, browser, and IDE. It provides customers control over every prompt and data exchange across any channel, without changing their network architecture or disrupting user experience.

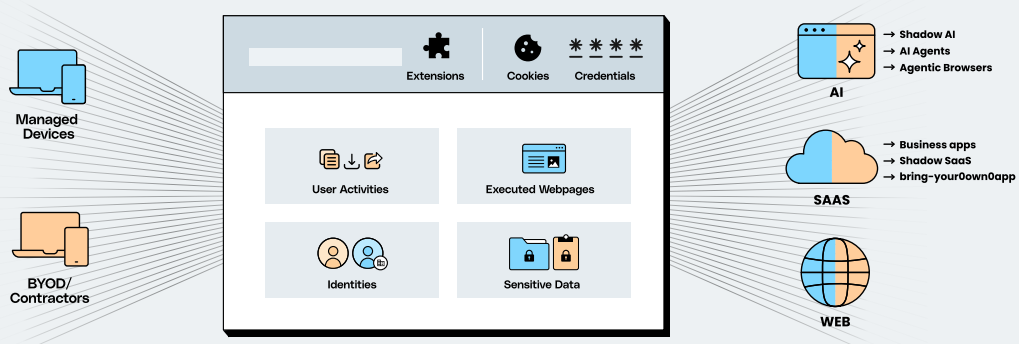

Partner ONLY organization ✖ Dedicated channel manager ✖ Tailored, collaborative partnership experience

## AI Interactions Is Your Organization's #1 Security Blind Spot

Employees now interact with AI and non-AI tools across a growing number of channels, including web and desktop applications, browsers, chatbots, and embedded AI assistants, creating new pathways for cyberattacks and sensitive data exposure. However, legacy network and endpoint security solutions can't see or control most real-time AI prompts, conversations, or agent-driven actions.

## LayerX: Protect All AI User and Agent Interactions

LayerX secures all last-mile user interactions with AI, SaaS & web applications and offers the most comprehensive visibility and enforcement capabilities for AI and browsing risks. Enterprises use LayerX to prevent shadow AI and SaaS discovery, data leakage prevention across GenAI, web, and SaaS channels, protection against malicious browser extensions, protection against zero-hour web attacks, identity governance over work and personal identities, and more.

LayerX Interaction Security Platform

## Unmatched visibility and control across any user and agent interaction with near-zero impact on the user experience

LayerX monitors and analyzes all last-mile interactions at the highest resolution, using deep session analysis. An AI-powered engine detects early indications of potential risks and enforces adaptive activities and access policies to prevent them. High-level granularity ensures that only risky activities are blocked, without violating users' privacy or disrupting their overall experience.

## Seamless deployment with zero infrastructure changes

LayerX can be easily deployed with no disruption to the user experience and no changes to existing network architecture. LayerX supports all common (and uncommon) web and AI browsers, as well as any native desktop application, so organizations can achieve full deployment without user pushback or IT headaches. This translates to effortless, rapid deployment that enables your customers to drive immediate value from the product within minutes.

# Complement your security offering by solving the most critical security gaps

LayerX offers the most comprehensive visibility and enforcement capabilities over AI and Browsing risks, including:

## AI Usage Control

### Shadow AI Discovery

Discover and enforce security guardrails on all AI apps

### AI Data Security

Prevent leakage of sensitive data on AI tools

### AI Access Control

Restrict user access to unsanctioned AI tools or accounts

### AI Threat Prevention

Protect against prompt injection, compliance violations, and more

### AI IDEs and Plugins

Discover and secure all AI IDEs and IDE plugins

### AI Browsers & Extensions

Protect AI browsers and extensions against attacks and exploitation

## Enterprise Browser Security

### Web/SaaS DLP & Insider Threat

Prevent data leakage across all web channels

### Browser Extension Management

Detect and block risky browser extensions on any browser

### Shadow SaaS & SaaS Security

Discover 'shadow' SaaS and enforce SaaS security controls

### Safe Browsing

Protect all browsing activity against web exploits

### SaaS Identity Protection

Discover and secure corporate and personal SaaS identities

### BYOD & Secure Access

Secure SaaS remote access by contractors and BYOD

## Key Benefits

### Eliminate critical blind spots

Gain the most granular visibility into all user and agent interactions, unsanctioned apps, shadow identities, and prevent data leakage risks across AI, web and SaaS.

### Real-time protection

Enforce access & activity policies to restrict user and agent activities that expose your apps, devices, and data to compromise.

### High-precision risk detection

Multilayered AI analysis of every user activity and web session flags anomalies that can indicate risk.

### Zero disruption

Hassle free deployment with no impact on the user experience or changes to the network architecture.

### Bring your own browser

Enable your users to keep on using their browser of choice for both work and personal use.

### Rapid deployment

Deploy across your entire environment and integrate with browser management tools and identity providers in a single click.

# Extend Partner Program by LayerX

Dear partner,

I am delighted to welcome you to the Extend Partnership Program by LayerX, with this partnership we can create a safe, secure and efficient workspace for businesses.

At LayerX we strongly believe in the power of collaboration and innovation, with a partnership program designed to fulfill our mission of being a partner led company, and a solution designed to address the ever-evolving threats and risks of the browser being the modern workspace and a critical organizational asset.

The Extend Partner Program is crafted to provide you with the tools, resources, and support you need to succeed, and is constantly evolving with more. From attractive financial incentives to comprehensive training and dedicated support, we are here to empower your business and drive mutual growth.

By joining our program, you become a part of a select group of partners who are at the forefront of cybersecurity innovation. We value your expertise and look forward to building a strong, collaborative relationship that delivers exceptional value to our customers.

Thank you for choosing to partner with LayerX. Together, we can achieve remarkable success and make a significant impact in the cybersecurity industry.

Welcome aboard, looking forward to a successful partnership.

**Jasmin Hami,**

Global Channels Director @LayerX

Partner ONLY organization ✖ Dedicated channel manager ✖ Tailored, collaborative partnership experience

## Financial incentives

- Simple margin structure and volume discounts
- Partner promotions and competitive pricing
- Additional services revenue opportunities

## Technical

- Technical training and Lab POC and Demo license
- PS and Consultancy training
- Flexible training options: Online and In-Person

## Non-financial incentives

- Lead sharing and co-prospecting
- Early access to new features
- Joint study cases and partnership PR

## Marketing

- Co-marketing activities and campaigns
- Marketing plans, co-branding and MDF
- Industry webinars and events

## Sales

- AEs and SEs to support you win business deals
- Short sales cycles, focused on ease of sale
- Deal registration and protection

## Enablement

- Sales Kits: Brochures, presentations, and demo tools
- Planning: Account mapping, Business planning
- Enablement: Sales training, workshops and periodic meetings

## About LayerX

The LayerX Interaction Security Platform protects organizations against AI, SaaS, web, and data leakage risks across any browser, application, device, and identity, with no impact on user experience. It secures all last-mile user interactions with AI, SaaS & web applications and offers the most comprehensive visibility and enforcement capabilities for AI and browsing risks. Enterprises use LayerX to prevent shadow AI and SaaS discovery, data leakage prevention across GenAI, web, and SaaS channels, protection against malicious browser extensions, protection against zero-hour web attacks, identity governance over work and personal identities, and more.
