

Currency of Real World Assets

Empowering global investors through
blockchain-powered real-world assets

Marketed by Mark Properties

01. Abstract

RWAMP is a next-generation utility token designed to make real-world asset investing simple, transparent, and accessible for everyone. It bridges the gap between traditional real estate and modern blockchain technology, allowing investors to buy, hold, and trade digital representations of real properties and tangible assets from anywhere in the world.

02. Founder's Note- The Architect

When I began my journey in real estate more than a decade ago, I saw a clear problem: great opportunities existed, but only a few could access them. You needed the right network, high capital, and a lot of patience. I wanted to change that." RWAMP is born out of that vision to make investment in real-world assets as easy as shopping online. My experience in Dubai and Pakistan's real estate markets showed me that blockchain could bring fairness, transparency, and speed to an industry that needed it most."

03. The Real-World Asset Revolution

Across the world, trillions of dollars are locked inside buildings, factories, farms, and infrastructure. Until now, investing in these assets meant paperwork, lawyers, agents, and long wait times. Tokenization changes that by representing a real-world asset as a digital token that can be divided, traded, and tracked transparently on blockchain.

04. Understanding Tokenization in Simple Words

Let's imagine an apartment building in Dubai worth AED 10 million. Traditionally, one investor would buy it — but through tokenization, the property can be divided into 1 million digital tokens worth AED 10 each. Now, anyone — from Karachi to London — can own a share of that property. That's the power of tokenization.

05. Why Blockchain Changes Everything

Think of blockchain as a record book that everyone can see but no one can fake. Every transaction and ownership change is timestamped and stored forever. In the real estate world, blockchain becomes the ultimate digital land registry.

04. The Birth of RWAMP

RWAMP was created by real estate experts who have closed millions in property sales across Dubai and Pakistan. We saw how buyers wanted faster, global, digital options. RWAMP combines real-world experience with blockchain efficiency.

09. RWAMP Ecosystem Explained

The RWAMP ecosystem includes

- > Marketplace for tokenized properties
- > Hosted Wallet
- > Builder Dashboard
- > Investor Dashboard
- > Affiliate System
- > Staking Pool

10. Use Cases (Real Examples)

Example 1

Dubai: An investor in Karachi buys RWAMP to reserve fractional tokens of a Dubai townhouse project. As demand rises, those tokens can later be sold.

Example 2

Pakistan: A builder in Karachi tokenizes a project and attracts buyers globally.

Example 3

Staking: Holders lock RWAMP and earn monthly rewards.

11. Benefits for Everyone

- > **For Investors:** Access verified projects globally and earn rewards.
- > **For Developers:** Raise funds faster.
- > **For Brokers:** Earn digital commissions.
- > **For Holders:** Enjoy staking pools and early listings.

12. RWAMP Token Utility

RWAMP powers every function: transactions, early access, staking rewards, discounts, governance, and referrals. Just like oil powers cars, RWAMP powers the property economy.

13. Tokenomics for Beginners

Max Supply: 1,000,000,000 (1B)

Initial Circulating Supply at Listing: 30,000,000 (3%)

Locked Supply: 970,000,000 (97%) for 6–48 months

Blockchain: BSC (BEP-20)

Initial Price Rs.3/ 0.001 usdt

Allocation: Public Presale 30%, Liquidity 20%, Ecosystem 20%, Team 10%, Marketing 10%, Staking 10%

TOKEN DISTRIBUTION · TOTAL SUPPLY · 1 BILLION

14. Understanding RWAMP as a Utility Token

RWAMP is not a share or stock. It's a digital key that gives access to the RWAMP platform, staking, governance, and discounts. You are a participant, not a shareholder.

15. Presale & Growth Stages

Stage 1

Private Round —
Sold Out

Stage 2

Public Presale —
Active @ Rs 3

Stage 3

Exchange Listing
— Within 12
months of TGE.
