

Your Security and Protection is key to PepsiCo

Mobi runs on
Artificial Narrow Intelligence
which means it only knows how to do
one task – manage PepsiCo products.

Mobi works for you, and you
no longer need to manually manage
our products' images, names, description, and
presence in your POS and Online Menu Systems.

How to initiate Mobi

- ☞ Select from **App Store** your POS, Order Aggregator, and Online Menu systems.
- ☞ Enter your **login credentials** directly on those apps.

Mobi protects your Privacy

- ✓ **Mobi does not have access** to your login credentials.
- ✓ Use **Admin credentials** when initiating the login process so that your
Mobi automations work seamlessly.

How Mobi Automation works

- ↻ Once you have logged into your Systems from the App Store,
Mobi recognizes our PepsiCo products.
- ↻ If we need to change any PepsiCo Trademark protected images, descriptions,
or names, **Mobi seamlessly updates** your systems without disrupting you.
