

AC43

Four-door controller

Overview

The AC43 Four-Door Controller is an easy-to-install, cloud-managed door controller. It supports up to four doors, two AUX inputs, two AUX outputs, and a fire alarm interface (FAI). With just an Ethernet connection to Command, the AC43 provides admins with centralized visibility and control from any location.

Built for flexibility, the AC43 features a sleek design and supports a wide range of third-party door hardware, peripherals, and Verkada or third-party OSDP and Wiegand readers. It also allows teams to seamlessly mount the ACC-CEL-LTE-2 Cellular Backup Communicator directly onto the chassis to minimize connectivity disruptions, and is designed to support both traditional SLA batteries as well as next-generation lithium iron phosphate (LiFePO4) battery technology.

The AC43 leverages edge processing and locally caches access configurations to maintain door operations, even in the event of network outages. Automatic firmware updates additionally protect hardware and eliminate the need for manual updates and security patches.

Key features

Centralized, remote management

Manage all deployments from a single platform, accessible from anywhere.

Offline operations

Maintain door operations during network outages with a local cache of access configurations and P2P communication for cross-device functionality.

Fire alarm integration (FAI)

Enable faster egress and firefighter access by automatically removing power from maglocks when a fire alarm occurs.

Automatic firmware updates

Keep devices up to date and secure with no manual effort.

LTE backup

Seamlessly mount the ACC-CEL-LTE-2 Cellular Backup Communicator directly onto the chassis to minimize connectivity disruptions.

Integrated power supply

Deliver power directly to door hardware through an integrated power supply and flexible wet relay options.
