

Exposure Management Business Theory Course On-Demand Training

Tenable University

Course **overview**

This course is delivered as On-Demand Training (ODT) and focuses on the foundational business theory behind exposure management programs. Learners explore how exposure management helps organizations shift from reactive vulnerability response to a proactive security posture focused on reducing real business risk.

Course modules guide learners through the key stages of exposure management, including defining program scope, discovering assets and exposures across the attack surface, prioritizing risk using contextual intelligence, validating exploitability and mobilizing remediation efforts across security teams. Eligible for CE credit.

Audience

This course is for cybersecurity professionals and stakeholders seeking the strategic framework behind exposure management and risk reduction. It is ideal for **Security Engineers, SecOps, Risk and Compliance,** and **Security Program Leadership.**

Prerequisites

None.

Key **benefits**

- **Exposure Management: Strategic Approach**
Transition from reactive vulnerability management to a proactive, risk-driven model aligned with business priorities
- **Prioritize by Business Impact**
Identify mission-critical assets and leverage contextual analysis and threat intelligence to focus on high-priority exposures
- **The Exposure Management Lifecycle**
Master the continuous stages of scoping, discovery, prioritization, validation, and mobilization to reduce organizational risk
- **Connect Operations to Outcomes**
Translate security metrics into business terms to enable data-driven decision-making across the organization
