

Tenable One Exposure Management Platform Introduction Course

On-Demand Training

Tenable University

Course **overview**

The Tenable One Exposure Management Platform Introduction consists of a series of short, on-demand lessons providing the fundamental building blocks for implementing Continuous Threat Exposure Management (CTEM) and the Tenable One Exposure Management Platform to identify exposures, prioritize remediations and reduce risk across your modern attack surface, as well as assess and improve the success of your organization's exposure management program. This Introductory-level course is available for no cost at Tenable University.

This course is available as an On-Demand Training (ODT). Tenable presents the components of Tenable One and navigation within the workspace. Content includes basic overviews and demonstrations of the features and capabilities of Tenable One: inventory, third-party connectors, aggregated risk-view analytics, and breach and attack path mitigation.

The course features a blend of lectures and demonstrations, all designed to promote active engagement and enhance learning outcomes.

Audience

The Tenable One Exposure Management Platform Introduction Course is suited for professionals interested in learning the basic operational use of Tenable One.

Prerequisites

None.

Key **benefits**

- **Product-based demonstrations**
View practical, real-world demos showing Tenable products in realistic scenarios
