

Quick Notes for Today's News

By Anna Von Reitz

Palantir is another DARPA -CIA Project.

Both Owners of Palantir are on the Steering Committee of the Bilderburger group.

Trump's sale of the contract to surveillance Americans is a privatization of the old Total Information Awareness surveillance program.

It's a betrayal and gross invasion of your privacy in exchange for money and coercive power.

Think of it as the Ultimate Data Pfishing Scheme and oppose it.

Oppose all "government" invasions of your privacy.

Reclaim your Constitutional protections NOW.

Yes, Israel IS guilty of war crimes in Gaza. Read the Geneva Conventions.

They are flat out guilty and getting away with it because Donald Trump and other politicians get millions upon millions of dollars in campaign kickbacks from the Israeli Arms Industry funneled through AIPAC. And because Trump is aligned with Israel on the new canal and oil development projects.

The crazy part is that Trump and the Jewish influenced Congress think they have a leg to stand on. JD Vance believes that because he thinks Israeli doesn't mean to murder all Palestinians (just a few million standing in the way of Israel's economic plans) it's all okay.

His logic circuits and Trump's are not functioning.

Again— just like privatizing illegal surveillance operations, Trump is going for the money and to Hell with decency. He doesn't care about war crimes. He does not care about your privacy. He cares about power and money.

People ask — is Trump a good guy?

Nobody at his level is "good".

Here's an example:

The phony U.S. Congress needs to be arrested and put out of business. It should have been done in 1865.

Will Trump and his Alliance do what needs to be done?

Only if it results in more money and power for him.

So yes, he might do the right thing, but for the wrong reasons.

Trump is consistently motivated by the wrong reasons — money grubbing and power mongering reasons — every time. So that is what you can expect from him and that is — according to his own actions — what he cares about.

DARPA spent a lot of time and money developing Total Information Awareness — think about it as a "product".

The government was prevented from using this product directly by the Constitution, so Trump sells it off to a "private" corporation that has no scruples and no limitations.

Giving Palantir control of "Total Information Awareness" is like giving Bibi Netanyahu a new kind of Super Bomb.

Both Palantir and Netanyahu will do whatever Trump wants and let him make a blivet load of money — so sure, he is using Third Parties to evade the U.S. Constitution on one hand and the Geneva Conventions on the other.

Congress has been doing the same thing for decades—- using Third Party incorporated Agencies and more recently, NGO's, to do their illegal and unconstitutional Dirty Work.

It's time for this to stop and time for these "government" corporations to be dissolved.

And from now on, if you see a climate change hit piece or an over-population "news" story, realize that the person writing it has been PAID to do it.

Literally.

I know you are wondering why Granna isn't resting and taking a day off as planned. It's because I forgot an important meeting this morning and had to be up anyway. Despite my good intentions. And since I am up — I am passing on useful insights that will stand you in good stead when you need to predict what Donald Trump and/or JD Vance will do. And why they will do it.

They will always do what is best for them and their corporate bottom line. Whatever increases profit and gives them more power is what they will do, regardless of the Constitution (as demonstrated by the Palantir deal) or human decency and Law (as demonstrated by Gaza).

These are not "good" men and they are not particularly "American" in their outlook. About the most that can be said is that they aren't Joe Biden. And they do know what a service contract is, even if they use the same old tricks to evade their Constitutional obligations when it suits them.

Time to remind them that we are in fact Americans - not United States citizenry — and they are supposed to be protecting our privacy.

Also, despite their lack of moral principle related to the situation in Gaza— we are keeping count and holding them responsible. What goes around comes around. They are misrepresenting America — again.

America doesn't commit or condone genocide.

The purloined United States Corporation and its managers are doing that.

So be realistic about Donald Trump and JD Vance who is a carbon copy of Ulysses S Grant. These are venal men in a venal business.

Granna
