

Bonded Tube Mounts – 22000 series

22000 Series mounts are designed to withstand the rigors of heavy-duty vehicular applications, off-the-road equipment, large trucks and construction equipment. The standard neoprene elastomer is resistant to oil, and other materials are available on special order.

Cable Mounts

Cable mounts are designed to perform efficiently without material or performance degradation in extremely hostile environments. They are operational under wide extremes of temperature ranges and resist chemicals, oils and abrasives.

Bonded Tube Mounts 500 Mount Series

500 Series mounts are low cost isolators that provide high load carrying capacity, compact size and stability. These all attitude mounts are perfect for isolating truck, bus and marine engines.

dB Engineering

dB Engineering is your authorized value-added dealer for all Barry Controls products. We have been in business for over 25 years and supply a variety of industries the parts to help with their sound suppression or vibration control issues. Contact us with any questions or to request a sample.

Marine Mounts

Barry Controls Marine Mounts are designed to provide effective noise and vibration isolation of marine engines up to, but not limited to, 1,000 hp.

Machinery Mounts – 633A Series

Barry 633A Series Mounts are medium weight mounts normally used for vertically applied loads to prevent transmission of noise and vibration caused by rotation of imbalanced equipment (i.e. generators, blowers, pumps, etc...)

Machinery Mount – SLM Series

Barry SLM Series Mounts are pneumatic elastomeric mounts, ideal for applications requiring higher deflection isolators. The SLM's mechanical bond design incorporates a positive locking system to ensure performance and safe operation.

Bonded Tube Mounts – 22000 series

22000 Series mounts are designed to withstand the rigors of heavy-duty vehicular applications, off-the-road equipment, large trucks and construction equipment. The standard neoprene elastomer is resistant to oil, and other materials are available on special order.

Applications

Large and small diesel engines are protected by "Bonded Tube Mounts" and their rugged design.

Cable Isolators greatly reduce shock inputs in "off road" military applications.

"ME Series" High Deflection Mounts protect this laptop from Shock & Vibration in emergency vehicles.
