INTRODUCTION

In September 2012, a Task Force comprised of counsellors from the Counselling Special Interest Group (CSIG) of the Canadian Fertility & Andrology Society (CFAS) began compiling a resource list on topics related to disclosure to donor-conceived children. It is our hope that this document provides reliable information to parents and to children of all ages who are donor conceived. The collection of books, articles, and websites was chosen to provide individuals using third-party reproduction, with information and a starting point for conversations with their families, friends, and children. While it is not an exhaustive list, it contains information for parents from a variety of family configurations. It is also our hope that these resources will serve as an educational guide for professionals working in the area of Assisted Human Reproduction and Third-Party Reproduction.
