

#scienceFTW: Building Card Games

Learn about science by playing card games with Museum scientists
and then collaborate to design a new game!

This program is for high school students
20 sessions, October 28, 2013 - January 22, 2014, 4:30-6:30pm
\$1,100 (\$1,050 for members)

FULL fee waivers available based on need.

Have you ever thought to yourself: “Hey, where can I find scientists to play card games with me?” Or how about: “Where can I go to design science-based card games?” If so, then #scienceFTW is the place for you!

In #scienceFTW (that is, Science For The Win!) you will play (and take home copies of) card games about such topics as paleontology, scatology, parasitology, astronomy, and biodiversity. Playing with both Museum experts and game designers, you will learn about the science topics AND how to design educational games.

Working with your peers and professionals, you will collaborate on the development of a prototype for a new Trading Card Game (think Pokemon or Magic: The Gathering) for the American Museum of Natural History that you will be able to play with friends and family.
