

You must be connected to the BASIC module and have a command prompt (> sign) in the 'Command Window' before you can upload a program (Save BASIC program from module to disk). Double click in the 'File Name' field in the bottom portion of the window.

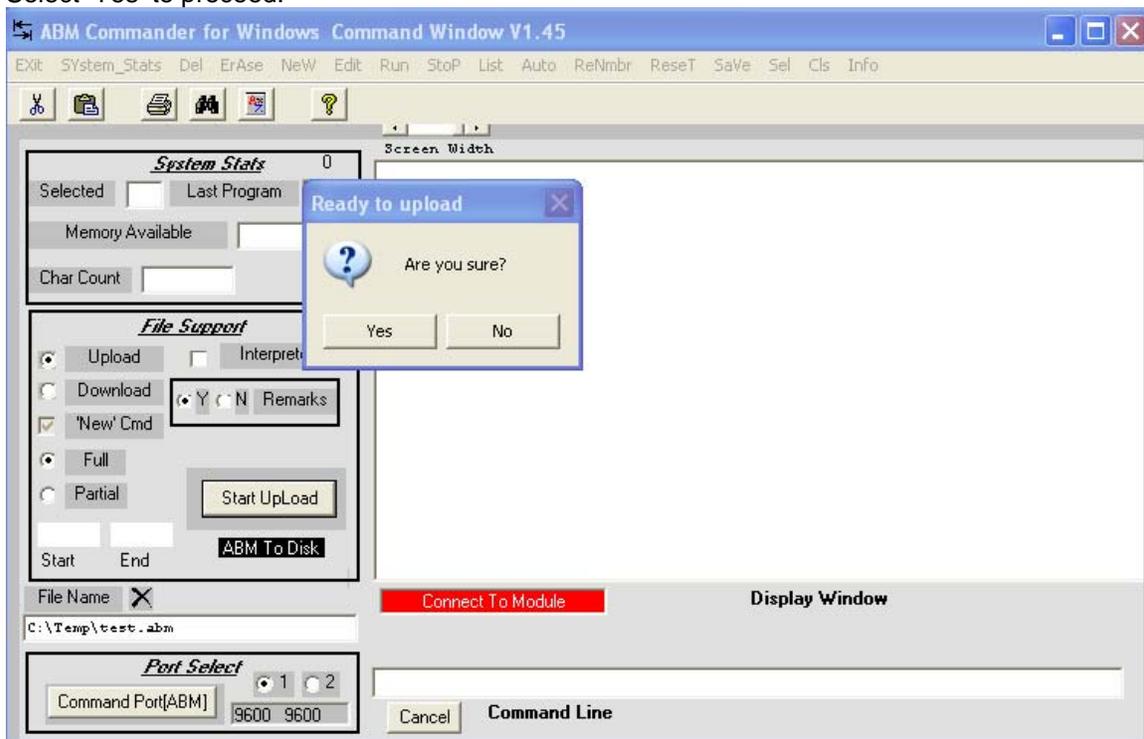

Use the window's browse dialog to browse to where the file that you want to download is located then select it and click 'Open'.

Select the 'Upload' radio key then click on the 'Start Upload' button to begin the upload.

Select 'Yes' to proceed.

When the upload is complete select 'OK'.
