SUMMARY

Full-stack developer specializing in frontend engineering with experience shipping production web and cross-platform applications. I build scalable interfaces, integrate APIs, and design developer-focused tools. My open-source work has collectively earned **430+ GitHub stars**, reflecting strong real-world adoption and code quality.

EDUCATION

BS Computer Science (CGPA: 3.96/4.0)　　　　　　　　　　　　　　　　Nov 2022 – Dec 2026
University of Sahiwal

PROFESSIONAL EXPERIENCE

Frontend Developer & UI/UX Designer　　　　　　　　　　　　　　　　Aug 2025 – Nov 2025
MyriadCode

- Led frontend development for multiple production platforms, translating product requirements into responsive, scalable interfaces using modern JavaScript frameworks.
- Integrated REST APIs and optimized client-side performance for data-heavy dashboards and real-time features.
- Contributed to live products including Socioaide, Talktrove, and Seotrove, focusing on UX, accessibility, and performance.

Open Source Developer　　　　　　　　　　　　　　　　　　　　　　Apr 2024 – Present
Independent

- Designed and shipped full-stack and cross-platform applications used by a global developer audience.
- Maintained projects with **400+ GitHub stars**, reflecting strong adoption, usability, and community trust.
- Handled end-to-end development including architecture, UI/UX design, state management, and deployment.
- Actively contributed to other open-source repositories through bug fixes, features, and documentation improvements.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS
Frontend: React, Next.js, Vue (Nuxt), Tailwind, shadcn/ui, GSAP, Framer Motion
Backend: Node.js, Express, Hono, Redis, Stripe (Polar), BetterAuth, PostgreSQL, SQLite, Deployment (Linux), Supabase, Drizzle ORM, REST APIs
Cross-Platform: Tauri, Flutter, Electron
Tools: Git, Docker, Vercel, GitHub Actions, Vitest, Figma, Digital Ocean, AWS

SELECTED PROJECTS

Fylepad | Nuxt, Tauri, TipTap　　　　　　　　　　　　　　　Open Source — 260+ Stars

- Developed a cross-platform smart notepad with multi-tab editing, rich text formatting, and support for diagrams, tables, and code blocks.
- Engineered lightweight native performance using Tauri while maintaining a modern web-based UI architecture.

Talaash | Next.js, OpenAI SDK　　　　　　　　　　　　　　　　　　　Open Source

- Built a multi-LLM chat platform with a responsive, component-driven interface and unified API integrations.
- Designed conversation-focused UX optimized for long-form interaction and productivity workflows.

Ozan | Flutter, SQLite　　　　　　　　　　　　　　　　　　　　　　　Open Source

- Created an offline-first knowledge base app with markdown editing and graph-based note visualization.
- Focused on local data reliability and distraction-free UX for structured thinking.

Muavin | Nextjs, BetterAuth, Polar, Resend, PostgreSQL　　　　　　　　　　　　Demo

- Muavin is a calm space for saving, organizing, and revisiting the ideas, links, and notes that matter to you.
