

V-SAFE Reports with VIVID DREAM

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN (<https://icandecide.org/v-safe-data/>) who pursued the CDC through the courts until they finally conceded and began to release this data in January 2024.

Data is from all 4 releases, up until June 2024, reported by 1,092,715 Covid <<vaccine>> recipients.

I did not get an alert to check in the past two days. But would like to add that my headache persisted into Sunday, stopped by Sunday afternoon. I believe I took 4 full doses of extra strength Tylenol over the course of the weekend. My baby, who is exclusively breastfed had a couple vomiting episodes the evening feeding after coming home from work. He developed a diaper rash on Saturday and we are still treating it (this is Tuesday). I also

didn't realize strange / vivid dreams could be a side effect. That occurred Friday into Saturday. I also had tenderness under my armpits - had a prior dx of HS (mildest stage, just under arms) - last flare was in 2017. The tenderness gave me pause to think I might be having another one but there was not a lump, just tender to touch.

Severe, vivid nightmare. This was bad enough to be quite disorienting. I have NO history of unusual nightmares. I have NO history of unusually vivid dreams. At 73 years of age I have never had dreams that left me disoriented. I am a retired clinical psychologist and I can say with authority that I do not have a history of mental illness beyond transient adaptations to difficult life circumstances. This was quite frightening. I thought I was having a fever dream. I checked and my temp was 98.2.
