

TRIPOD Quick Start Guide

Packing List

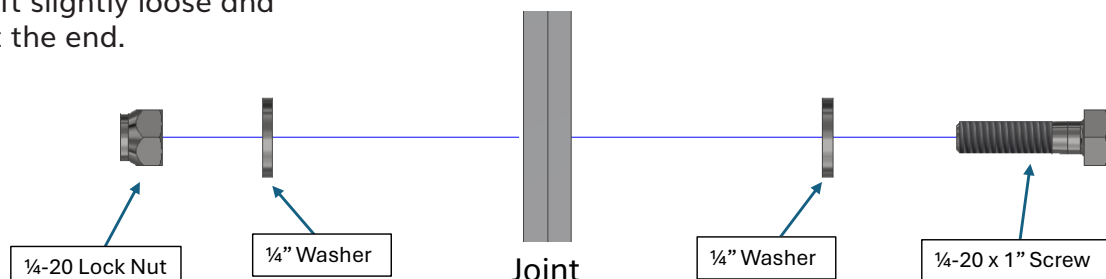

3 X Leg with anodes 	3 X Foot Spike 
1 X Mast 	3 X Foot Plate 
3 X Spreaders 	3 X Hydrophone Mount 

Hardware

		
1/4-20 Locking Hex Nut 316 Stainless Steel 50 INCLUDED	1/4-20 x 1" Hex Cap Screw 316 Stainless Steel 50 INCLUDED	1/4" Washer 316 Stainless Steel 100 INCLUDED

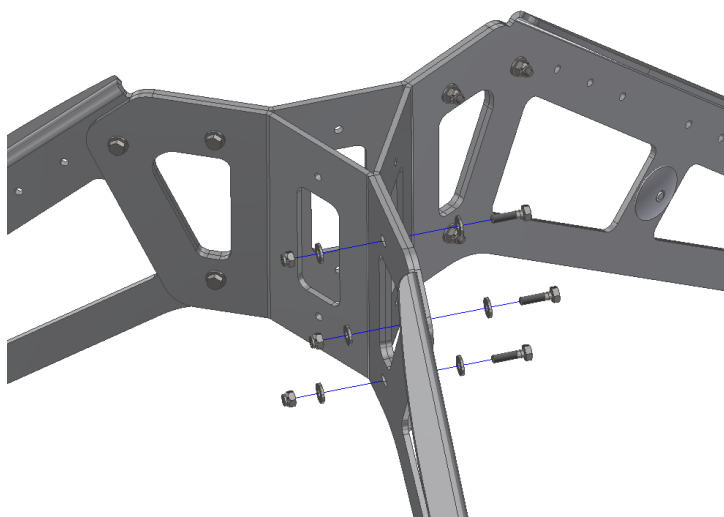

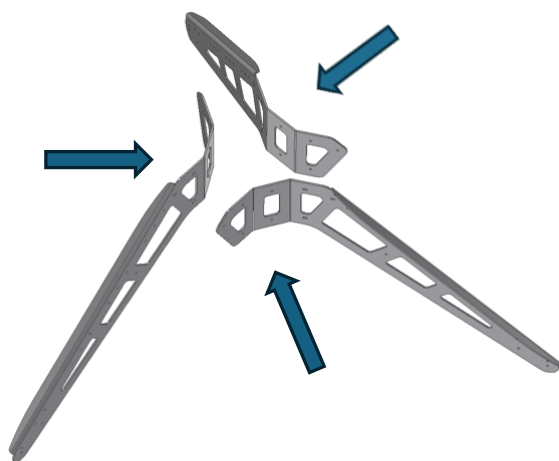

- Unless otherwise stated, all fastener joints are comprised of a 1/4-20 x 1" hex screw, two 1/4" washers, and a 1/4-20 Lock Nut.
- Torque fasteners to 10 N*m or firmly.
- If frequent disassembly of the system is required, it is highly recommended that marine-grade antiseize be used on the threads.

NOTE: It is recommended that the screws be left slightly loose and tightened at the end.

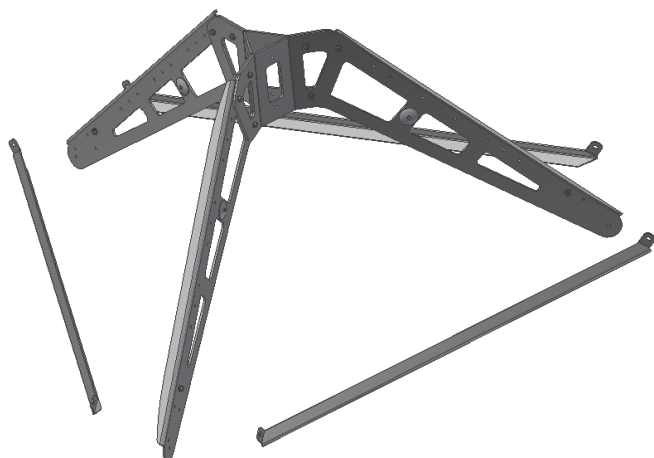

Step 1

Screw legs together.

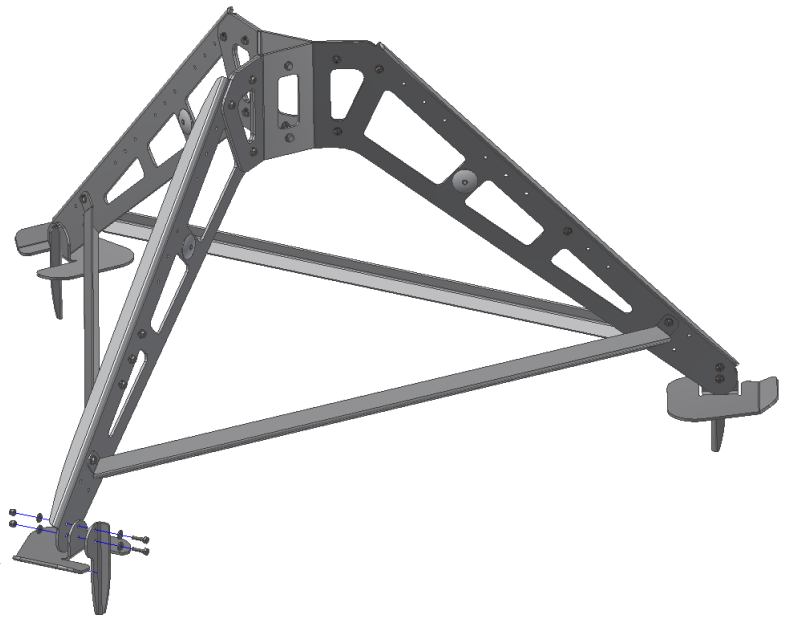

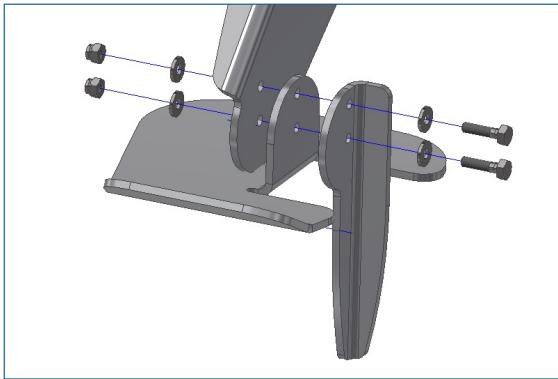

Step 2

Screw the braces between the legs.

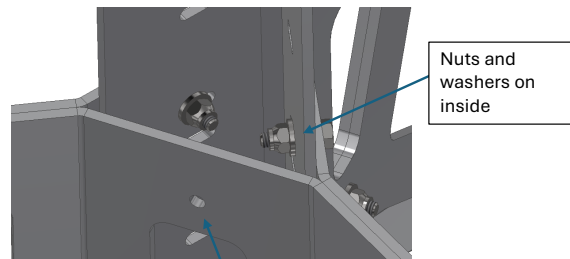

Step 3

Screw the foot spikes and foot plates to the end of each leg.

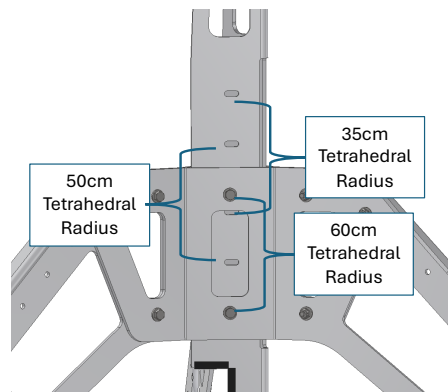

Step 4

Insert the mast down the tringular opening and screw into place. Note that the position of the mast determines the radius of the tetrahedron formed by the hydrophones.

Fasteners on two sides only

Step 5

Screw the Hydrophone holders to the legs. Note that the position of the hydrophone holders determines the radius of the tetrahedron formed by the hydrophones.
