CASH MESH

CashMesh is a special in-game feature triggered when the player lands the required number of Cash Mesh Scatter symbols (typically 5 or more COIN symbols), and by default, no technical setup is needed!

Upon activation, the player is awarded a specific number of bonus spins. The mechanics of these spins differ from those in the base game or regular free spins.

During each CASH MESH respin, any position containing a COIN symbol is held in place, while the remaining positions respin independently. CASH MESH spins continue until either all bonus spins have been used or all positions are filled with COIN symbols. The final payout is the total sum of the values of all COIN symbols.

CASHMESH VERSIONS

We offer two different versions of CashMesh games: Regular (e.g., Buffalo Trail) and Ultra (e.g., Buffalo Trail Ultra). Jackpots are united in this group of games with the same base value. Every CashMesh game includes:

- two **PROGRESSIVE** jackpots: Major (0.7% of the bet value) and Grand (0.8% of the bet value). Resulting in a total contribution of 1.5% taken from the initial bet, and included in the game RTP
- two **FIXED** jackpots: Mini (30 multiplier x bet value for regular, 10 x bet value for ultra) and Minor (50 multiplier x bet value for regular, 20 multiplier x bet value for ultra)

JACKPOTS BASE POT VALUES

VOLATILITY	VERY HIGH (REGULAR)	MEDIUM (ULTRA)	TYPE
GRAND	10 000	1000	PROGRESSIVE
MAJOR	5000	500	PROGRESSIVE
MINOR	50	20	FIXED
MINI	30	10	FIXED

(Example: Buffalo Trail - Regular and Buffalo Trail Ultra - Medium, Currency: EUR, Bet value: 1)

The **Progressive Jackpot** is a bonus game that accumulates from all bets placed on slot games provided by BF Games. The Progressive Jackpot system should be supported with a banner with the current value visible on the homepage.

Fixed paylines - unlike progressive jackpots, nothing is contributed by the player; it's just a standard multiplier.

GRAND

1000

MAJOR

500

MINOR

200

MINI

100

The same base values enable us to share jackpots and the chance of winning across CashMesh games. The current Jackpot presented is not an individual value for each game, but the amount of Jackpots from all CashMesh games with the same base values (jackpot sharing is configurable).

CM works for every real currency

CashMesh games have a limited set of allowed bet values:

(CM works for every real currency. Example: Buffalo Trail, and currency: EUR)

0.1	0.2	0.5	1	2	5	8	10	15	20	25	50
-----	-----	-----	---	---	---	---	----	----	----	----	----

The Cash symbol can also award a Jackpot. The following Jackpots may appear during a spin:

- The Grand and Major Jackpots can appear only once per spin.
- The Minor and Mini Jackpots may appear multiple times in a single spin.

Values appearing on COIN symbols:

- Bet multiplier
- Mini and Major bonuses, which are specific bet multipliers
- Major and Grand jackpots, which are progressive (as mentioned before) rewards that increase with contributions from every player on the casino server
