# CASH MESH LINK

Cash Mesh LINK is an innovative multi-game system where linked titles build and **share progressive jackpots** - no extra jackpot server or separate accounting needed. All shared rewards are handled directly through the game math and delivered from the existing server. Games can be **added or removed anytime** without affecting their RTP or the shared jackpot values.

# CASHMESH LINK

## EXTRA VALUE

### TOP HIT GAMES

A portfolio built on proven player favorites.

### QUICK HITS

Fast-building Jackpots create the perception of frequent wins.

### FULL SUPPORT

Includes complete marketing and design support as part of the package.

### EASY IMPLEMENTATION

Fully server-based, requiring no additional systems or settlement processes.

### FAST-GROWING JACKPOTS

Combined contributions from all Cash Mesh Links make jackpots rise rapidly, boosting player excitement.

# CASHMESH LINK

## HOW IT WORKS?

The same base values allow us to share jackpots as well as the chance of winning between CashMesh Link games.

The current Jackpot presented is not an individual value for each game, but the amount of Jackpots from all CashMesh Link games with the same base values.

# CASHMESH LINK TOP GAMES

Carefully chosen games, including the Cash Mesh Link feature, covering the themes players love most. The games are based on our existing titles and selected from our most successful releases.

# CASHMESH LINK JACKPOT EXPOSITION

Make your jackpots stand out by displaying their live values directly in your casino lobby. We provide real-time updates on your jackpots' values and status — and you decide how to present them. Use animated banners, game labels, pop-ups — it's all possible.

With the Link option, we are happy to **offer full support for the implementation and development of banners, as well as additional promotional exposure.**
