Legal Disclaimer

PLEASE READ THE ENTIRETY OF THIS "LEGAL DISCLAIMER" SECTION CAREFULLY. NOTHING HEREIN CONSTITUTES LEGAL, FINANCIAL, BUSINESS, INVESTMENT OR TAX ADVICE AND YOU SHOULD CONSULT YOUR OWN LEGAL, FINANCIAL, BUSINESS, INVESTMENT, TAX OR OTHER PROFESSIONAL ADVISOR(S) BEFORE ENGAGING IN ANY ACTIVITY IN CONNECTION HEREWITH.

NEITHER KEEPSOLID CRYPTO LLC (KEEPSOLID), NOR ANY OF ITS AFFILIATES, OFFICERS, DIRECTORS, EMPLOYEES, AND AGENTS SHALL BE LIABLE FOR ANY KIND OF DIRECT OR INDIRECT DAMAGE OR LOSS WHATSOEVER WHICH YOU MAY SUFFER IN CONNECTION WITH ACCESSING THIS WHITEPAPER, THIS WEBSITE, OR ANY OTHER WEBSITES OR MATERIALS PUBLISHED BY KEEPSOLID ("WEBSITE").

Nature of the Whitepaper:

The information set out in this Whitepaper and the Website is provided on an "as is" basis for informational purposes only and does not constitute an offer or solicitation to sell shares, securities, or any regulated financial instruments. No person is bound to enter into any contract or binding legal commitment in relation to the acquisition of any $KSC token, and no virtual currency or other form of payment is to be accepted on the basis of this Whitepaper or the Website. Any agreement governing the sale or acquisition of $KSC tokens shall be governed by a separate set of Terms of Service. In the event of any inconsistencies between the Terms of Service and this Whitepaper or the Website, the Terms of Service shall prevail.

Project purpose:

$KSC is a utility token designed solely for access to specific features and services within the KeepSolid ecosystem only. It does not represent any ownership rights, equity interest, profit-sharing entitlement, or voting rights in KeepSolid and/or its affiliates. $KSC is not intended to be an investment. It is not structured or sold as a security, and has not been registered under any securities laws in any jurisdiction. Purchasing or using $KSC does not guarantee any return, income, or future benefit. The token's value and usability may fluctuate significantly depending on market conditions, technological development, and user adoption. There is no guarantee of liquidity, token availability, listing on exchanges, or continued platform functionality.

Representations and Warranties:

By accessing this Whitepaper or the Website (or any part thereof), you shall be deemed to represent and warrant to KeepSolid and its respective affiliates as follows: (i) in any decision to acquire any $KSC, you have shall not rely on any statement set out in this Whitepaper or the Website; (ii) you will and shall at your own expense ensure compliance with all laws, regulatory requirements and restrictions applicable to you (as the case may be); (iii) you acknowledge, understand and agree that $KSC may have no value, there is no guarantee or representation of value or liquidity for $KSC, and $KSC is not an investment product nor is it intended for any speculative investment whatsoever; and (iv) none of KeepSolid and/or its respective affiliates shall be responsible for or liable for the value of $KSC, the transferability and/or liquidity of $KSC and/or the availability of any market for $KSC through third parties or otherwise.

The distribution of this Whitepaper in certain jurisdictions may be restricted by law, and persons into whose possession this document comes should inform themselves about, and comply with any such restrictions. Any failure to comply with these restrictions may constitute a violation of applicable law. KeepSolid does not make and expressly disclaims all representations and warranties, express, implied, statutory or otherwise, whatsoever, including, but not limited to: (i) warranties of merchantability, fitness for a particular purpose, suitability, usage, title or non-infringement; (ii) that the contents of this Whitepaper and/or the Website are free from error; and (iii) that such contents will not infringe third-party rights.

Regulatory approval:

No regulatory authority has examined or approved, whether formally or informally, any of the information set out in this Whitepaper or the Website. No such action or assurance has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this Whitepaper or the Website does not imply that the applicable laws, regulatory requirements or rules have been complied with.

Interpretation:

This Whitepaper and the Website may be translated into a language other than English for reference purposes only and in the event of conflict or ambiguity between the English language version and translated versions of this Whitepaper or the Website, the English language versions shall prevail. You acknowledge that you have read and understood the English language version of this Whitepaper and the Website.

Third party references:

This Whitepaper and the Website may contain references to third party data and industry publications. As far as we are aware, the information reproduced in this Whitepaper and the Website is accurate and the estimates and assumptions contained herein are reasonable. However, we offer no assurances as to the accuracy or completeness of this data. Although information and data reproduced in this Whitepaper and the Website are believed to have been obtained from reliable sources, we have not independently verified any of the information or data from third party sources referred to in this whitepaper or ascertained the underlying assumptions relied upon by such sources.

Forward-looking statements:

This Whitepaper and the Website contain forward-looking statements or information (together "forward-looking statements") that relate to our current expectations of future events. Forward-looking statements are based on certain assumptions and analysis made by us in light of our experience and perception of historical trends, current conditions and expected future developments and other factors we believe are appropriate and are subject to risks and uncertainties. Although the forward-looking statements contained in this Whitepaper are based upon what we believe are reasonable assumptions, there are risks, uncertainties, assumptions,and other factors which could cause our actual results, performances, achievements and/or experiences to differ materially from the expectations expressed, implied, or perceived in forward-looking statements. Given such risks, prospective participants in the token sale should not place undue reliance on these forward-looking statements.

Changes:

KeepSolid reserves the right to modify or update the information in this Whitepaper at any time without prior notice.

Why we created KeepSolid

Free access to the Internet is a basic human right.

The Internet provides freedom of speech and the opportunity for self-expression, equal access to education, freedom of conscience and much more. We believe that every person on the planet should have a free, secure, stable and fast Internet connection.

For this reason, we have created and continue to develop and enhance a range of services that provide comprehensive security and anonymity online. This includes traffic encryption, two-factor authorization, protection and storage of personal data, and access from all major mobile and desktop platforms. The services are as simple, convenient and easy to understand as possible for both business and individual users.

Our mission is to make your Internet experience comfortable, secure and, if necessary, anonymous.

https://www.keepsolid.com/about

What goals we serve

Profit is not the only goal for us, it is only a measure of the effectiveness of our efforts. What is much more important is the feeling that users get when using our services. That's why our products do not require a lot of time to master, they are simple and intuitive.

VPN Unlimited - will provide security and anonymity of being on the Internet, will give you a sense of confidence when you are in an unknown environment in another country, city, neighborhood. It will provide access to all Internet resources where there are obstacles to it in the form of restriction of your freedom by the authorities.

Passwarden - will store your personal data, ensuring that it is accessible to you personally at any given time. Your passwords, keys, accounts, personal notes are always with you, but completely inaccessible to attackers.

MonoDefense is a bundle that combines VPN Unlimited, Passwarden and a number of other auxiliary products into a single complex of personal protection.

> **We are always on the lookout for your safety, peace of mind and anonymity**

Who we are and what makes us different

Our Products

🛡️ MonoDefence

MonoDefense is a comprehensive security bundle that provides all-around online protection. It includes traffic encryption, two-factor authentication, and privacy protection, allowing you to stay safe and anonymous online. MonoDefense offers strong security measures to protect accounts and sensitive information, making it suitable for both businesses and individual users. The Bundle includes: VPN Unlimited, Passwarden, DNS Firewall by KeepSolid, Authenticator by KeepSolid

🔵 VPN Unlimited

VPN Unlimited is a reliable VPN service with no limits on the bandwidth and connection speed available for all key platforms. In addition to regular AES 128-bit and 256-bit encryption, VPN Unlimited gives its users access to KeepSolid Wise technology which disguises VPN traffic as TPS traffic.

🔵 Passwarden

Passwarden is a modern password manager designed to protect sensitive data and provide convenient access to it. To achieve this, Passwarden employs client-side data encryption using AES-256 and EC p-384 protocols.
With it you can securely store, generate, and manage passwords in a protected vault, thus safeguarding your accounts from unauthorized access

🔥 DNS Firewall

DNS Firewall is a service that guarantees the security of your Internet network in real time. It monitors and filters incoming traffic, automatically blocking access to potentially dangerous websites and services, thereby protecting you from dangerous applications, phishing unwanted content, and other online threats.

👁️ Smart DNS

SmartDNS is KeepSolid's innovative solution that allows you to access geo-restricted content with ease. By masking your actual location, it enables you to bypass geographical blocks and access streaming services websites, and content from various regions. SmartDNS ensures fast and seamless streaming on any platform and device with an internet connection

🛡️ Authenticator

Authenticator is a two-factor authentication application designed to enhance the secuity of your online accounts. By generating time-sensitive one-time passwords (OTPS), our app ensures that only you can log in to your accounts, even if your password is compromised. This essential tool safeguards your digital identity

What we have achieved

Over the years, we have accumulated extensive experience and developed a range of technologies that are unique in the market for products similar to ours.

We provide strong protection for our users in countries where governments have less than democratic access to information. We have developed a number of protocols that provide stable connectivity in the face of stiff opposition and guarantee anonymity.

We own a number of trademarks - VPN Unlimited™, Passwarden™ - that protect our intellectual property rights in the US, UK and other countries.
We use strong AES-256 and EC p-384 encryption systems, which prevent intruders from accessing your personal data at Passwarden

More than 45 million users have registered with our services and have used and are using them to protect themselves.

Where we go from here in 25-26

The rapid development of Web3 technologies has led us to incorporate elements of these technologies into our products. VPN Unlimited provides the ability to see and work with Web3 domains without special tools, simply by enabling a VPN-connection. Passwarden will support the storage of all data related to cryptocurrencies, crypto wallets, keys and electronic signatures.

Authorization using crypto wallets and paying for our services using cryptocurrencies will allow you to remain completely anonymous within our services - this is our and your goal in these security-challenged times.

We have already implemented some features, our detailed intentions in this direction can be found in our roadmap.

Roadmap

Roadmap	Required budget	Why it's important
Support for crypto wallet authentication	**$500 000**	The first and most important step to ensuring complete anonymity of the user
DoubleVPN & RAM-based servers	**$800 000**	Increase security and speed of VPN connection
Renting residential IPs from users to access streaming and regional sites	**$1 300 000**	Users start providing services to other users - our VPN becomes a social network
Safe & free marketplace for residential IPs	**$1 600 000**	And start actively making money on security, not just spending money on it
Digital asset & information transfer via inheritance	**$1 900 000**	Passwarden is turning into a place of digital information storage and inheritance
End-to-end encrypted private messenger	**$2 400 000**	Users of our services have the opportunity to exchange messages in absolute privacy
Support for hardware crypto wallets & coin deposit boxes for user transfers	**$2 800 000**	Passwarden is gradually becoming your personal bank with support for hardware solutions and safe deposit boxes
Browser with VPN, anonymity & Web3 support	**$3 100 000**	A browser that absorbs all of the above technologies is a logical step in the development of our services infrastructure
Hardware router with VPN and Web3 support	**$3 500 000**	A compact and maximally mobile router that you can take with you on your travels and enjoy security with minimal setup efforts
Marketplaces for users to earn money	**$4 000 000**	Finally, users finally become our partners, with whom we make money together: spend or earn - the choice is yours alone

By purchasing our utility token, you are bringing closer the realization of our ambitious plans, the results of which you will be able to immediately use

What is our long-term vision

The world is changing rapidly. The proliferation of cryptocurrencies is leading to maximum freedom for people in the financial sphere. We see our task in providing maximum security for people who use this freedom. And we develop our products in the directions that are demanded by ensuring this security. Maximum security with maximum decentralization, freedom, anonymity - this is our way in this world

Why tokenize KeepSolid

We strive not only to earn money by providing the needs of our users. We want our users to be able to help each other within the framework of our services and earn money from it. At the same time, the token, providing mutual settlements of users with each other and with us, is intended to become a valuable asset in its own right, which will bring profit in time, and itself as a cryptocurrency

Token generation and distribution

Token generated on the Solana blockchain

Airdrop	Presale	Rewards	Stability	Marketing	Sale

Description of preICO and ICO

In the early stages of the token launch, users (as well as anyone who is not yet a user of KeepSolid services) have the opportunity to buy coins at a discount, at a lower price than they can be spent in our services. Use this opportunity to the maximum advantage for yourself and your friends

Pre-ICO - 50% discount
Pre-ICO - 30% discount
