## **(2) Payment Services**

We use third-party payment providers to bill you through an online account payment in lieu of directly processing your credit/debit card information. Your paid balance for one or more lessons is safe in your account as we use an integrated iframe for checkouts from our partners-payment providers (Braintree, Stripe, PayPal) and tutors get the payment for each confirmed lesson securely through third-party payment providers (Braintree, Stripe, PayPal, TransferWise). Correspondingly all transactions are secured as our partners-payment providers use SSL encryption protection. All payment information is stored encrypted and securely by Braintree, a PayPal service. We do not store your payment information on our servers.

We may also use your payment card transaction data as shared by third-party service providers to confirm a specific transaction occurred and that you qualify for a promotional offer; for example, the date and amount of your purchase and the last 4 digits of your card number so that we can verify your purchase with our records.

#### **(8) Identifying Influencers for Potential Collaborations**

We may use third-party services, such as Captiv8, Inc. and LiveRamp Holdings, Inc. to analyze the information you provide to us at the time of registration (such as your name and other identifiers), execute a matching exercise, and discover our most influential students for the purposes of proposing collaboration with us. In doing so, we may receive some of your

personal data from Captiv8, Inc. (such as your social media profiles) and form a joint controllership over your data. In case we discover that you are an influencer and decide to propose collaboration, we will provide you with a short privacy notice explaining this processing activity in detail.

#### **(9) Analytics and Development**

In order to establish new ways to improve the Preply Platform, find the points of interest in our Services and for the purposes of analytics, we monitor and analyze the personal data you provide us with, including information you provide upon registration, the web traffic, cookies and usage data, such as the parts of our Services you visit, the date and duration of your visit, your location, type of the device you used during your visit and other relevant data on the use of the Preply Platform. For these purposes, we use services such as Google Analytics for Firebase, Hotjar HeatMaps & Recordings, Amplitude Analytics, Branch.io, Braze, and Intercom, the use of which ensures compliance with our privacy commitments.

For the purposes indicated above, we may also run occasional research activities, including personalized “A/B” tests. During the tests, we will display different content to the users based on various criteria, such as their country. The purpose of such tests is to understand user engagement and satisfaction with certain features in order to improve the user experience, develop new useful features, and streamline our Services.

We may also carry out polls and surveys through Preply using external GDPR-compliant services. You are not obliged to respond to them and you may opt out of such polls and surveys through user settings. In order to inform, optimize and serve you relevant advertising based on your past use of our Services, we may process your usage data and cookies. Please, follow our [Cookie Policy](#) for additional information.

#### **(10) Tutor Verification and Program Preparation**

To ensure a high quality of lessons given by tutors on Preply, we collect and process tutor credentials to verify their eligibility to teach subjects claimed by them. Besides that, we cooperate with the tutors and use their information to help them develop learning programs.

In order to verify tutor identity and identify fraud, we process tutors’ biometric information and ID.

For the purposes of analytics, we additionally process tutors’ registration data to automate and improve the tutor verification process.

#### **(11) Improvement of Tutors’ Ranking Algorithm**

We gather and use various metric-based data to enhance the tutors’ ranking algorithm and improve your experience on the basis of our legitimate interest. This is done to increase the matching efficiency between students and tutors on the Preply Platform and allow tutors to connect with the optimal number of students who best fit their way of working.

Please note that this type of processing is necessary to provide our Services. To know more about this process and the logic involved, please refer to Section 3.6 of our [Terms of Service](#).
