

TFORCE LOGISTICS FUEL SURCHARGE TABLE - US

- As the price of fuel changes from week to week, the below fuel surcharge shall be added to all charges
- The fuel surcharge will be determined using the price of fuel as published by the **DOE** on Monday afternoon of each week
 - This information is available at <http://www.eia.gov/petroleum/gasdiesel>
- Note: Fuel surcharge percentages and associated trigger points are subject to change without notice
 - The table below will be updated as the fuel surcharge changes

Frequency: Weekly
 From: Tuesday through Monday
 Fuel Type: Diesel or Gasoline

For every **\$0.12 increase in the cost of fuel**, the fuel surcharge will increase 0.25% with no cap

See applicable **PADD** table and map below. Additionally, find both instructions on how to pull the fuel rate from the EIA website and an example below

PADD Regions Table

PADD	Region
PADD 1	East Coast -or- U.S. Avg
PADD 1A	New England
PADD 1B	Central Atlantic
PADD 1C	Lower Atlantic
PADD 2	Midwest
PADD 3	Gulf Coast
PADD 4	Rocky Mountain
PADD 5	West Coast/California

Instructions to determine FSC by Region:

1. Open the following Link: www.eia.gov/petroleum/gasdiesel/
2. Find the correct region based on the PADD in the chart above
3. Find that region's fuel rate for this week
4. Find the fuel rate range on this sheet in the From/To chart and **it's** --> %
5. Take the percentage and multiply by the base rate to get the fuel surcharge \$

Example: (% x base\$ = fsc\$) Then (fsc\$ + base\$ = all in \$)

If the base delivery rate is \$4.00 **for Los Angeles.**
 If the region avg. fuel (from www.eia.gov/petroleum/gasdiesel/) is \$4.556.
 According to the chart \$4.460 to \$4.579 --> 18.25%.
 \$4.00 base rate x 0.1825 conversion = \$0.73
 All in rate = \$4.00 + \$0.73 = \$4.73
