50 pt

TT Norms® Pro is an all-purpose geometric sans serif. In 2025, we took another step forward by adding support for the Arabic script.

20 pt

TT Norms® Pro is universal and suitable for any area: a modern streaming service or a banking system, a stylish clothing brand or the automotive industry. Equally convenient for use on the web and in print. In addition to the TT Norms® Pro family, we have created the TT Norms® Pro Serif. The fonts blend perfectly with each other, making up a font pair. The

TT Norms® Pro sans serif has already become the signature font of brands such as Cartoon Network, Intercom, Inc., Sartorius AG, CSN, CBSN, Shieldex and many more. Upon request, TT Norms® Pro can be customized by making changes to fit your project. More details about customization can be found in the corresponding section.

**Black ExtraBlack + Italics**

50 p

TT Firs Neue is a Scandinavian sans serif that combines expressive graphic elements with the versatility of use. The font includes 23 styles.

20 pt

The visual elements of the font are now logically coherent. We got rid of the ones that did not suit the font's concept and kept the most attractive ones. The changes affected letters with diagonal strokes “M, N, И”, and figures “2, 3, 6, 9”. All round characters' shapes have been standardized for all font styles. In the previous version, all glyphs looked different:

more square or oval, depending on the font's weight. We made the shapes consistent for the font to feel more integral. Glyphs containing bowls have also changed. We have worked on the balance, altering the height and shape of the bowls. Like rounded ones, we aspired to make the glyphs more balanced for all font styles.

# TT Neoris

**Black + Italic**

50 pt

TT Neoris is an elegant Neo-Grotesque with unlimited potential and a font that encompasses all modern requirements and user desires.

20 pt

TT Neoris has been in development for two and a half years. To begin with, we carried out extensive research, analyzing the market and asking users to share their wishes and preferences. Then, using the information we collected, we defined the task for ourselves—to create a simple and convenient Neo-Grotesque that would have neutral features and be distinctive and fresh at the same time.

TT Neoris turned out to be—it is technological, functional, all-purpose, and ultra-modern. And also highly versatile and adaptable. Due to its huge number of features, this font can easily replace multiple others! You can dramatically transform the mood of TT Neoris so it becomes a powerful tool for your projects.

# TT Runs

TT Runs

18 Styles 1 Variable 917 Glyphs 31 OT Features

Example

# Workout

18 styles

Thin ExtraLight Light Regular  
**Medium DemiBold Bold**  
**ExtraBold Black + Italics**

50 pt

TT Runs is a font designed for the sports industry. A unique yet elegant modern font well-suited for the sports sector.

20 pt

TT Runs has unusual proportions that are different from traditional ones. It is because of the reversed contrast, which refers to the distinction between the upper and lower parts of letters. The uppercase letters have distinctive inverted proportions, particularly noticeable in characters like K, C, S, and

T

R. This design choice gives the font an original personality and makes the letters look stylish and suitable for both athletic and casual sportswear. While updating the font, we kept its distinctive characteristics and preserved the graphical look of the majority of the characters.

# TT Commons™ Pro

**Black ExtraBlack** + *Italics*

50 pt

The story of TT Commons began in 2017 with our internal need for a versatile font. We had no idea back then that it would resonate so strongly with our audience.

20 pt

Two trial styles quickly grew into a full-fledged typeface—and that's how the first version of TT Commons was born. Since then, we have never stopped improving it: seven years of painstaking work, redraws, adding new subfamilies, and expanding language support. And in 2025, we took another step forward by adding support for the Arabic script. The success of TT Commons™ Pro is

no accident. It's used by tech startups and fashion brands, charitable foundations and food producers—and these are just a few examples. This is the kind of font that is equally at home in an interface, on packaging, and in a brand book. New language support: Algerian Arabic, Baharna Arabic, Libyan Arabic, Moroccan Arabic, North Mesopotamian Arabic, Sanaani Arabic, Standard Arabic and more.

50 pt

TT Hoves Pro has a neutral yet recognizable character suitable for use in any project. The font has a large character set and a large number of styles.

20 pt

TT Hoves Pro was already perfect, but we made it even more functional! Updated TT Hoves Pro: supports more than 200 languages, including Vietnamese; contains 4 widths: Compact, Normal, Condensed, Expanded; consists of 83 styles, 20 of which are new Compact fonts; includes upright and italic Outline fonts, each with 672 characters; contains an improved variable font

that varies in weight, width and slope; includes 1573 characters in each style, except for Outline versions; contains 41 OpenType features, including many ligatures and stylistic alternatives. The geometry of the TT Hoves Pro has remained unchanged. The font lacks pronounced contrast, all terminals are on the same level, and there are wide horizontal strokes in triangular characters.

50 pt

A Fresh Take on the Symbiosis of Geometric and Humanist Styles. We've added a 5% touch of friendliness and uniqueness. A legendary sci-fi shooter.

20 pt

The main idea behind the TT Turns font family was to create a new, universal typeface that could be used with equal effectiveness in virtually any field. The font is meticulously calibrated and built on a foundation of strictly balanced proportions, making it a worthy alternative to classic grotesques. The font's character remains neutral while still feeling contemporary. During

the design process, unique elements were added to the font: special terminals in the letters 'a' and 'g', as well as specific forms characteristic of a broad-nib pen in the Cyrillic 'Дд' and 'Лл'. These details give the typeface a slight display quality—about 5%—which becomes its key feature and helps it stand out from other fonts.

50 pt

TT Bluescreens Pro—a modular sans serif with a distinctive character. Narrow, wide, geometric—any style you need.

20 pt

In 2015, we created this typeface family specifically for movie posters and film credits. Originally, it was a narrow modular sans serif, but over time, we grew to love TT Bluescreens for its distinctive, truly display-worthy character. In 2023, we released the third version of the font, updating it with an even narrower subfamily, expanded Cyrillic, and new kerning and hinting. However, we didn't stop there. We had an idea that seemed

crazy at first but turned out to be quite rational: what if we made TT Bluescreens as wide as possible? At first, we laughed at the idea ourselves, but we decided to experiment anyway—and the result truly surprised us. Now, in early 2026, we're introducing TT Bluescreens Pro—the fourth version of our legendary typeface. It includes three new subfamilies: Normal, Expanded, and Extended.

## TT Wellingtons

We

18 Styles 1 Variable 913 Glyphs 35 OT Features

Example

Metropol+

18 styles

Thin ExtraLight Light Regular Medium  
**DemiBold Bold ExtraBold Black**  
*+ Italics*

50 pt

TT Wellingtons is a Humanist sans serif with forms closely connected to the movement of the broad nib. TT Wellingtons looks fantastic.

20 pt

We have carefully examined the letterforms in all font styles to enhance the overall balance of the font. In the new version, we have improved the shapes of the terminals and cuts, for example, in the characters a, c, g, j, y, and figure 2. Additionally, we have standardized the contrast of the characters in all font styles. And to some characters, like b, d,

q, or p, we added Humanist features by working on ligatures. Some characters have been transformed entirely. For instance, the letters a and g now have the same logic in each font style, and the letter Q looks more elegant because of the new shape of its curved element.

## TT Firs Text

txt

22 Styles 1 Variable 898 Glyphs 31 OT Features

Example

# Universal

22 styles

Thin ExtraLight Light Regular Normal  
**Medium DemiBold Bold ExtraBold**  
**Black ExtraBlack** + *Italics*

50 pt

TT Firs Text's design was based on the TT Firs Neue typeface. We aspired to make it even more neutral with its own unique style.

20 pt

TT Firs Text turned out to be icy and elegant, strict and captivating, and, what is more, highly versatile. It is equally well-suited for websites, book printing, branding, packaging design, and various kinds of posters. There's almost no limit to how it can be applied. TT Firs Text includes 23 font styles: 11 roman, 11 italic, and 1 variable font. Each font style consists of 898

characters, counting in the characters of the expanded Latin and Cyrillic writing systems. The font has 31 OpenType features, among which are localization features for various languages, circled numerators, and stylistic alternate for the ampersand.

18 styles in each subfamily

Thin ExtraLight Light Regular Medium  
**DemiBold Bold ExtraBold Black**  
*+ Italic*

50 pt

The font can be used for headings or for text typesetting. Thanks to its soft character, it is suitable for decorating baby food and eco-products.

20 pt

TT Rounds Neue was released as a logical continuation of the TT Rounds and TT Rounds Condensed fonts, more modern and technically advanced. In the update, we have preserved the visual nature of the font, the proportions of the letters and the balance between bold and thin faces. We have made the typeface even more functional and convenient by fixing technical

flaws, expanding the character set and adding a full-fledged variable font. In the new version of TT Rounds Neue, you will find additional extended Latin and Cyrillic characters, updated kerning and hinting. The typeface is optimized for web, print and packaging design.

## TT Rounds Neue

# TT Fellows

featu

18 Styles 1 Variable 908 Glyphs 29 OT Features

Example

# Uniwidth

18 styles

Thin ExtraLight Light Regular  
**Medium DemiBold Bold ExtraBold**  
**Black + Italics**

50 pt

TT Fellows is a unwidth typeface.  
 It was important for us that the user  
 could change the styles, knowing that  
 the layout will not suffer.

20 pt

Meet TT Fellows, a new workhorse whose functionality allows you to comfortably use the typeface in a variety of projects. Calm and neutral at first glance, the mood of TT Fellows can change. Working with the typeface, you can reveal its soft and friendly nature, or even the brutal one, for example, by typing the text exclusively in capital letters in the bold

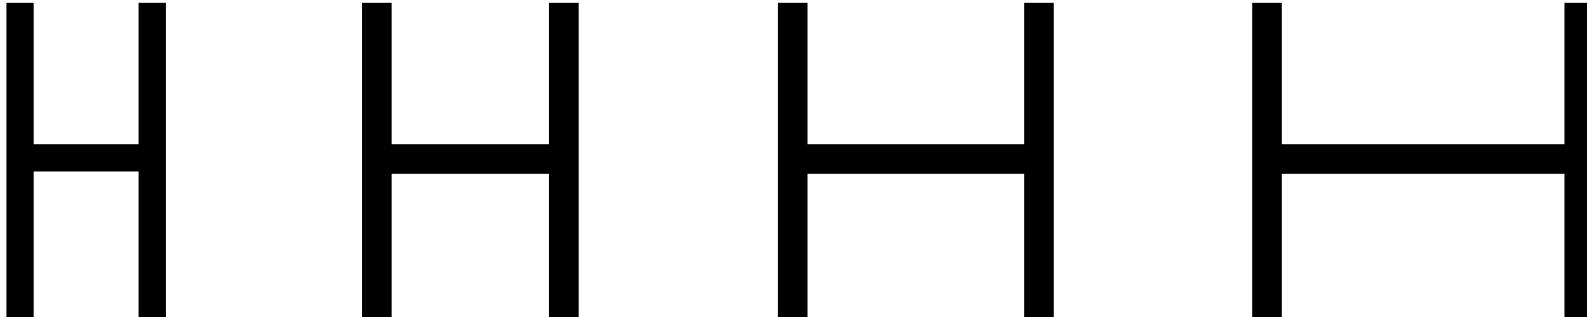

style. TT Fellows is a humanist sans serif with a mechanical touch. With its open shapes, the friendly neutral character of thin weights and an even softer character in bold weights, the new typeface differs in character from the classic TT Norms® and TT Commons sans serifs, while still offering the same functionality.

## TT Supermolot Neue

TT Supermolot Neue

TT Supermolot Neue

Condensed      Normal      Expanded      Extended

18 styles in each subfamily

Thin ExtraLight Light Regular Medium  
**DemiBold Bold ExtraBold Black**  
*+ Italic*

50 pt

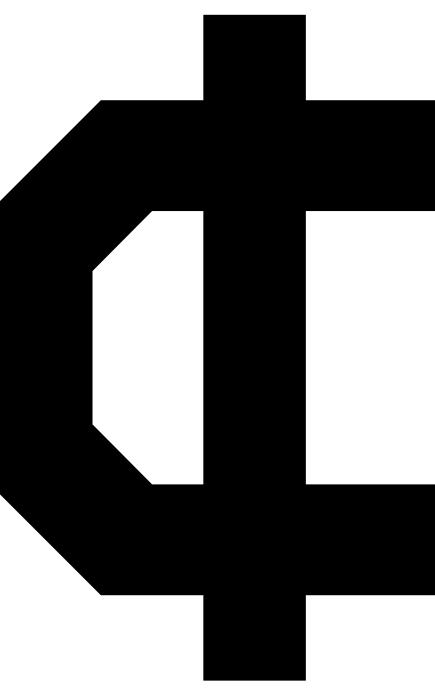

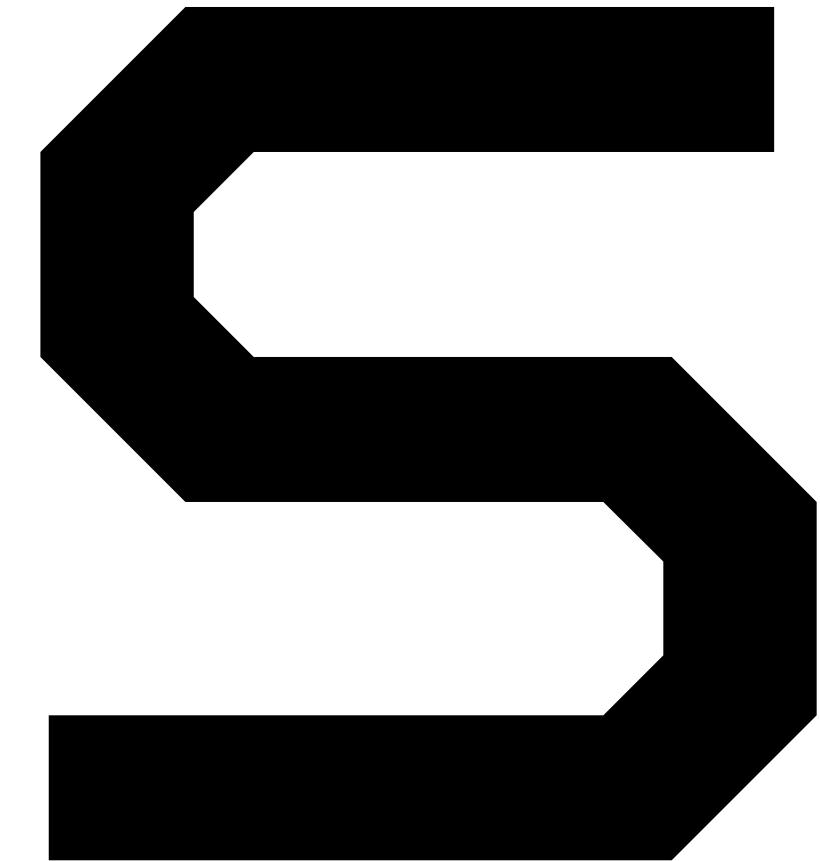

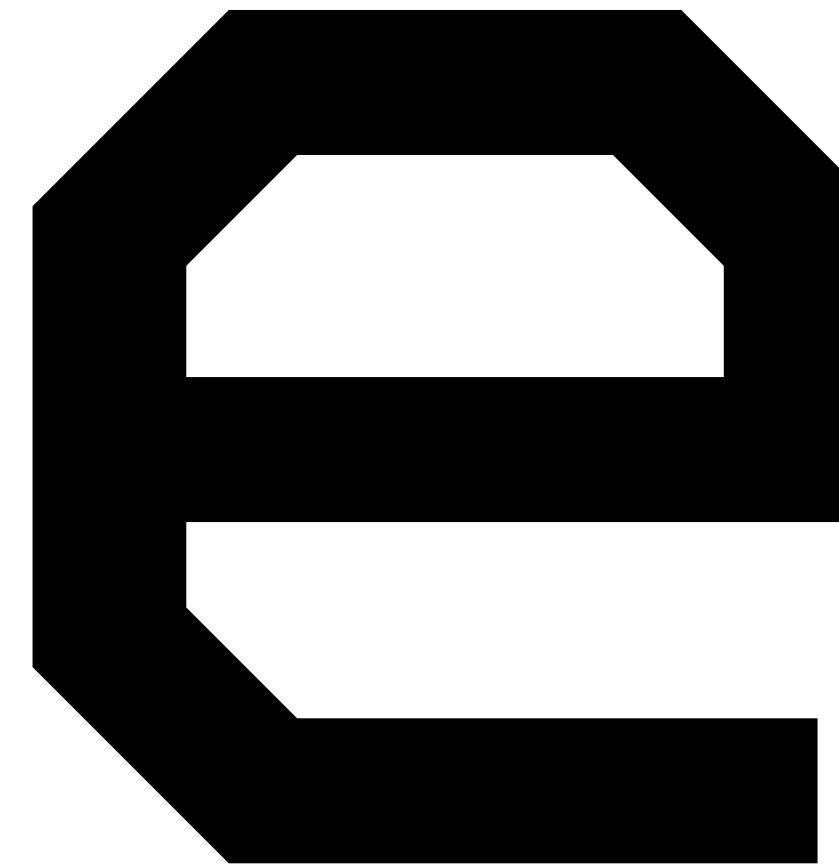

TT Supermolot Neue 2.0 is a redesigned, extended and greatly enhanced reincarnation of the popular TT Supermolot and TT Supermolot Condensed font families.

20 pt

During its existence, the hammers ('molot' in Russian) managed to get into the spotlight in a huge number of projects, for example, in popular video games, films, and branding. In TT Supermolot Neue, the design of all controversial grapheme forms was soothed and now the family can also be used in the text set. We have completely redrawn italics. It took us half a year to compensate for all the cir-

cles, to transform italic strokes, to work out the position of the diacritics, to make right the spacing, and to finish kerning. TT Supermolot Neue extensive support for useful OpenType features was added, and hinting was also improved. If we talk about visual features, we recommend paying closer attention to two stylistic sets: the first set [ss01] and the second set [ss02].

# TT Octosquares

Compressed Condensed Normal Expanded

H H H H

18 styles in each subfamily

**Thin ExtraLight Light Regular  
Medium DemiBold Bold  
ExtraBold Black + Italics**

50 pt

TT Octosquares is a fresh, revised, expanded, and improved version of our first commercial typeface TT Squares.

20 pt

In addition to working on the contours themselves and their design, we completely revised the composition of the typeface. First, we added two completely new widths: Compressed and Expanded. Secondly, we increased the number of weights in each of the subfamilies—while in the old versions there were 5

weights, now in each of the subfamilies there are 9 weights. At the stage of working with the contours of characters, we revised the roundings, changed the forms of shoulder and stem crossings, added noticeable shelves at the letters, removed the sharpness from the triangular characters and cut off all sharp endings.

# TT Fors

Thin ExtraLight Light Regular  
**Medium DemiBold Bold**  
**ExtraBold Black + Italic**

50 pt

TT Fors includes ligatures, circled figures, arrows, and other stylistic alternatives and features. TT Fors: A font created with you in mind!

20 pt

TT Fors is a geometric sans-serif with a neutral personality and refined proportions. The typeface complements TypeType's line of versatile sans-serifs, which already includes families like TT Norms® Pro, TT Commons™ Pro, TT Hoves Pro, TT Interphases Pro, and TT Firs Neue. The inspiration for creating TT Fors came from studying geometric sans-serifs from the

early to mid-20th century and analyzing their contribution to the visual environment of that time. At the same time, we aimed to create an advanced and highly adaptable font that can be used for any modern tasks—from branding and packaging to digital interfaces and apps. The name itself reflects its versatility: Fors derives from the word "for".

## TT Autonomous

Example

robot

24 styles

**ExL L Reg Med DB B ExB**  
**Outline + Reversed**  
**+ Italic**

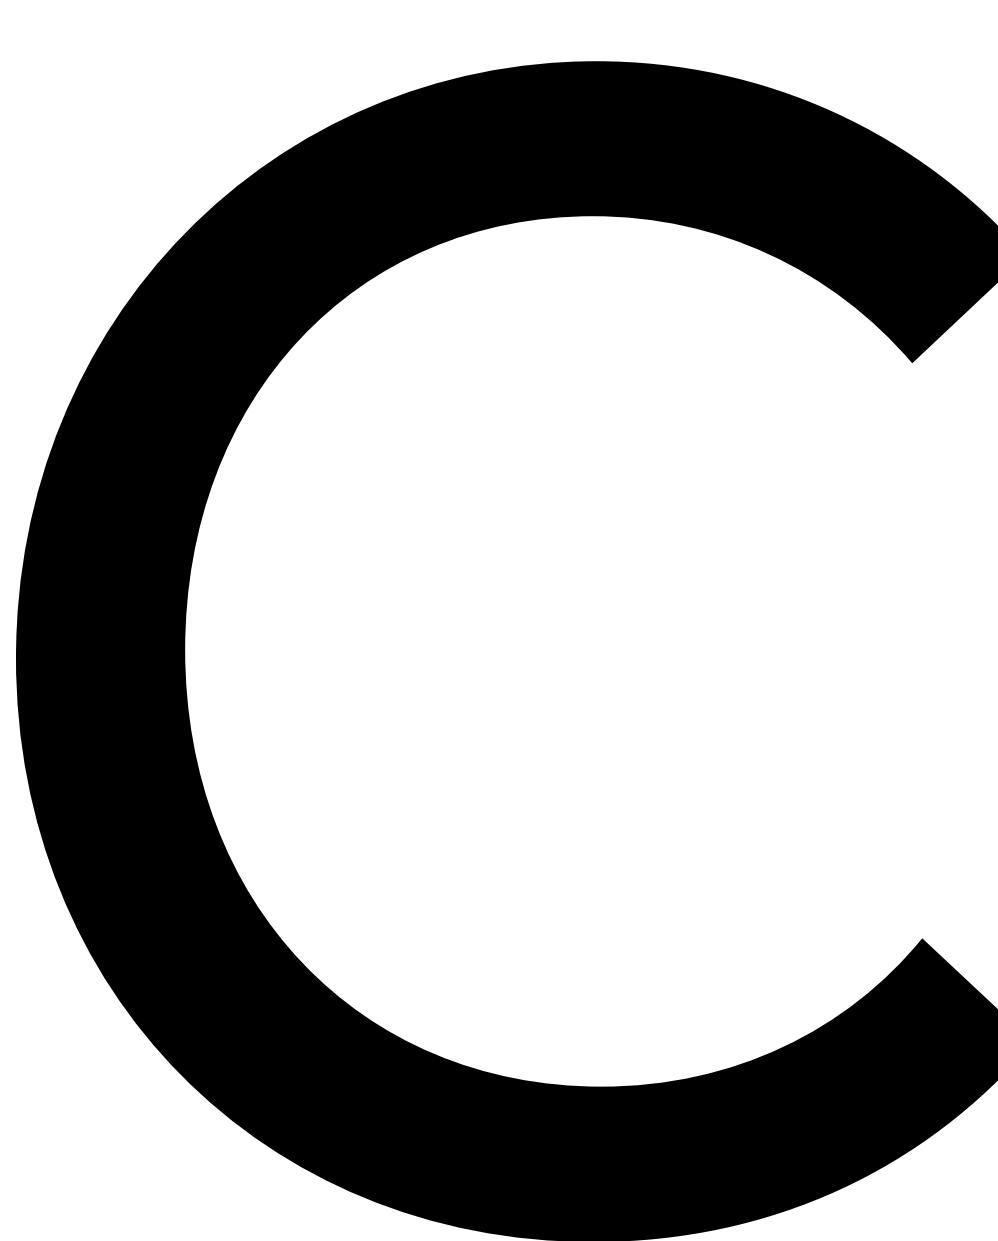

50 pt

TT Autonomous is a modern brutal technological sans serif. It is inspired by automobile logotype.

20 pt

The idea was born when one of our colleagues took the official electric taxi at the Schiphol airport. At the moment we were thinking about creating a new wide sans serif, and an interesting question emerged during the trip:

what font would be associated with autonomous electric transport. Then we thought it would also be nice to expand this theme visually.

50 pt

TT Chocolates is a perfect sans serif for confectionery products. The font family has already earned a reputation among users as an elegant sans serif for stylish de-

20 pt

The third comeback of the legendary TT Chocolates font family Our TT Chocolates font family has already earned a reputation among users as an elegant sans serif for stylish design. In 2023, we decided to redesign it completely following the information we gained a few years ago during our sans-serif market research. From the technical aspect, we refined the outlines and improved the

font's rhythm. We also added 35 languages based on the Cyrillic script and 16 languages based on the Latin script. TT Chocolate 3.0 now has 14 new Condensed font styles and a new variable font with three axes of variation: width, weight, and slope. The third font's version includes many OpenType features and stylistic sets. TT Chocolates is a perfect sans serif for confectionery products.

## TT Severs

18 Styles 1 Variable 720 Glyphs 27 OT Features

Example

# Muscular

18 styles

Thin **ExtraLight** Light Regular Medium  
**DemiBold** **Bold** **ExtraBold** **Black**  
+ *Italics*

50 pt

TT Severs is a geometric grotesque with emphasized elements of internal brackets. TT Severs has a strong character and is great for use in high tech.

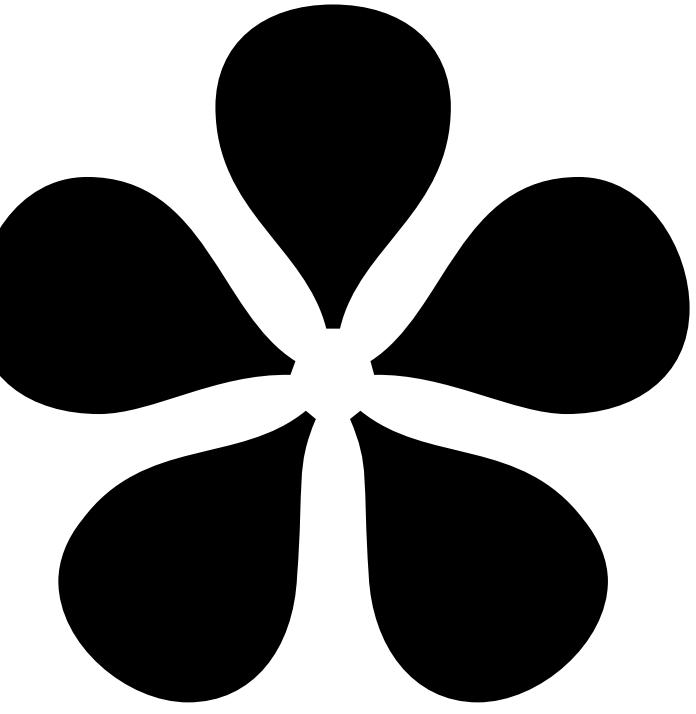

20 pt

TT Severs is two characters in one typeface. At large sizes, TT Severs works as an expressive display font, showcasing a strong character and individuality. At small point sizes and in running text, the counters become less noticeable, and the typeface confidently serves as a text font. This is made possible by the moderate stroke contrast and the meticulous-

ly calibrated balance of black and white within the characters. The typeface has a decisive and firm character, making it an ideal choice for the IT sector, computer games, and the sports industry.

## TT Travels Text

tt

Example

# Peculiar

20 styles

Thin ExtraLight Light Regular Medium DemiBold **Bold ExtraBold Black ExtraBlack** + *Italics*

50 pt

TT Travels Text – TypeType's new text font based. TT Travels Text is a geometric sans serif with wide proportions. TT Travels Next as a pair.

20 pt

TT Travels Text is a geometric sans serif with wide proportions. When creating this font, our goal was to maintain the central idea and recognizable features of the familiar TT Travels, making it cleaner and more modern. As a result, we have an independent typeface that perfectly complements TT Travels Next as a pair and equally excels

in solo work. The key visual features of TT Travels Text are wide proportions and slightly squared forms of ovals. To make the typeface readable, we increased the height of lowercase letters and opened the aperture more compared to the original TT Travels. We also worked on the proportions and contours, slimmed down the oval shapes.

## TT Backwards

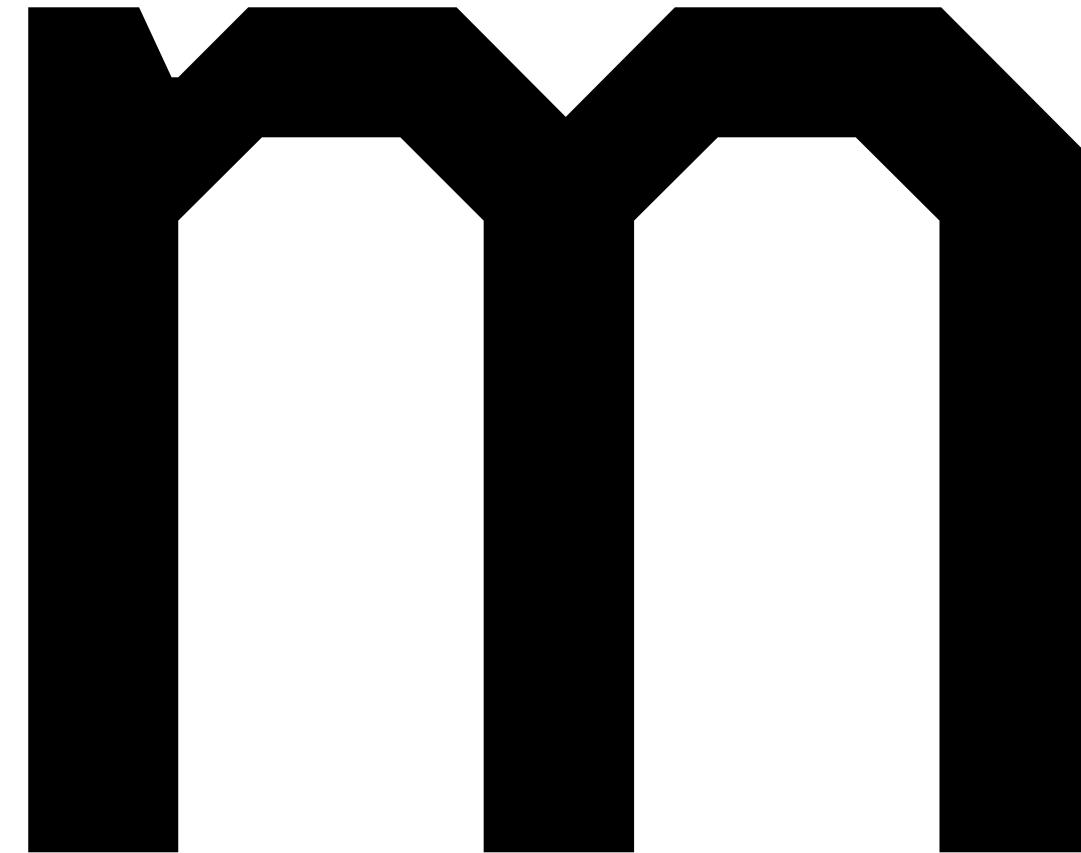

BaC

5 font styles: Thin  
Light Regular  
**Bold Black**

70s USSR

TT Backwards Sans is a narrow grotesque which takes us back to the book design of late 70s and early 80s with its ductile characters. It is created considering its use in the small text size.

## TT Mussels

36 Styles 544 Glyphs 14 OT Features

Example

# Manipulator

36 styles

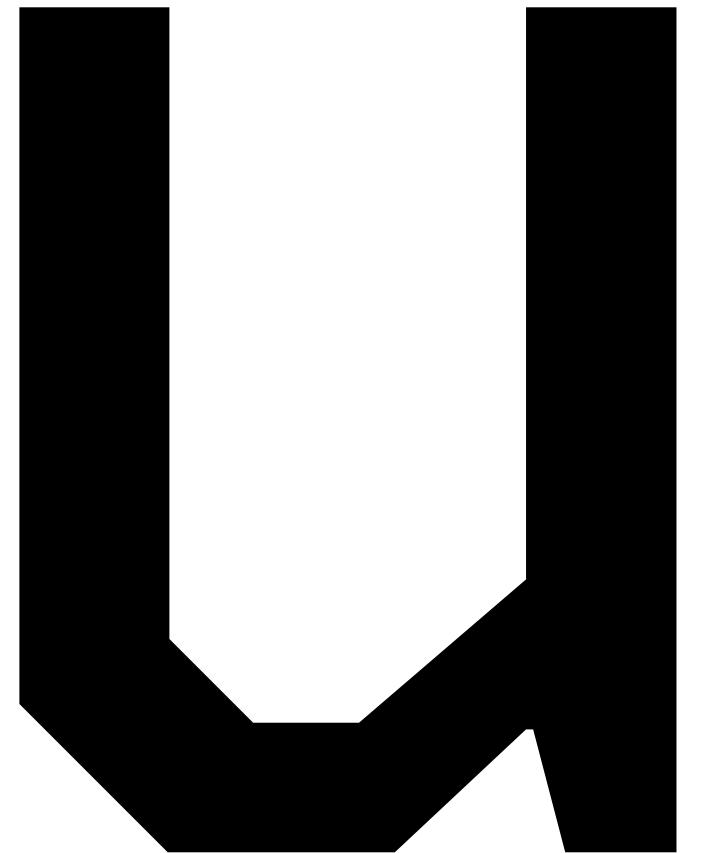

**Thin Light Regular Medium DemiBold**  
**Bold ExtraBold Black + Italics**  
**+ Stencil styles**

50 pt

In total, the TT Mussels font family consists of 36 faces, which include among other things stylistic alternatives, ligatures, and also implements a support for OT features.

20 pt

Dynamic contrast is widely implemented in TT Mussels. It is most noticeable in the Black typeface, where the ratio of the thickness of the vertical strokes to the horizontal strokes is approximately two to one. For the Thin typeface, the thickness of the vertical strokes is already consistent with the thickness of the horizontal strokes. You can also find other signs of respect for traditional text fonts in the

TT Mussels design, such as the trace of pen movement which is historically typical for antiques. For example, in the letter M from the Black face, we can first see a thin stroke, then a thick diagonal stroke followed by a thin diagonal stroke, and a finishing bold vertical stroke. As in the case of dynamic contrast, this effect gradually disappears when approaching thin faces.

## TT Knickerbockers

Knickerbockers

TT Knickerbockers  
has only one Regular  
font style

New York

TT Knickerbockers Grotesk symbolizes the monumentality of New York expressed in both its traditional historic architecture and skyscrapers. It is a narrow contrast sans-serif with characteristic elements sending us back to the 19th century.

## TT Hazelnuts

h a

h a

Example

# Decorative

18 styles

Thin ExtraLight Light Regular Medium  
**Bold ExtraBold Black Heavy**  
*+ Italics*

50 pt

TT Hazelnuts is a display sans-serif font family containing a set of elegant and delicate decorative elements. The font reflects a touch of human hand.

20 pt

Despite its geometric essence, TT Hazelnuts reflects a touch of human hand—you can take a calligraphic tool and, by turning it, draw pretty much the whole font. TT Hazelnuts font family is perfect for small text arrays, for instance, for fashion or advertising industries, and will also fit perfectly into layout of longer and more complex typographic systems thanks to a large

variety of font weights (Thin, ExtraLight, Light, Regular, Medium, Bold, ExtraBold, Black, Heavy) and its real italics. It has already become a good tradition to include broad support of OT features into our new fonts. TT Hazelnuts is not an exception, it uses a large number of useful features: ordn, sinf, sups, numr, dnom, tnum, onum, frac, case.

## TT Corals

h 90

Example

Humanistic  
Thin Light Regular Bold  
**ExtraBold Black + Italics**

12 styles

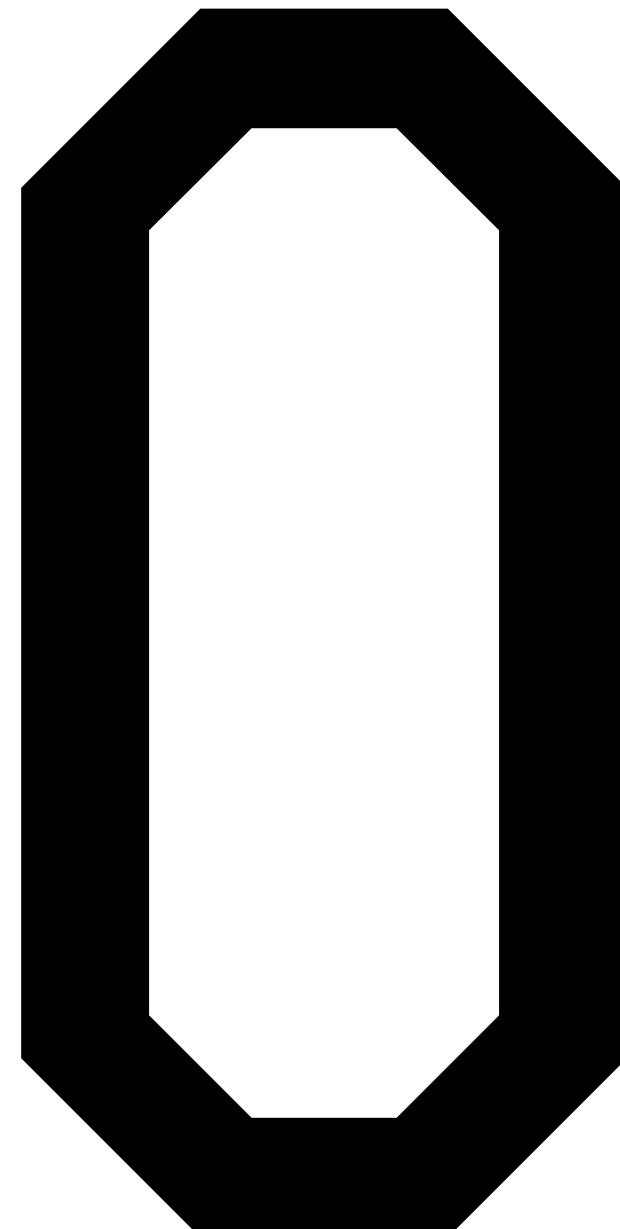

50 pt

TT Corals is a modern humanistic sans-serif which has many typical traits of the beginning of the 20th century. TT Corals has 6 typefaces of various weights.

20 pt

For an increased functionality of the font family, we have created six typefaces of various weights. The distinctive smoothness of the lines and separate elements allows using TT Corals for different design areas. For instance, it will perfectly fit for the topics of classical literature or music, and any other diverse creative areas of humans' activities. TT Corals inspires with its freshness and novelty and gives new ideas for your creativity and art.

## TT Octas

### Example

Angular & tech

10 styles

Thin Light Regular  
**Bold Black + Italic**

50 pt

TT Octas is a narrowly proportioned font family built upon the principle of octagonal forms: all circles in this font family are actually octagons. Thanks to small serifs, TT Octas has a saturated and vintage character to it.

20 pt

TT Octas is a narrowly proportioned font family. Thanks to small serifs, TT Octas has a saturated and vintage character to it. Simple depiction of the letters and the serifs make the family easily readable even in the smallest sizes. Narrow proportions allow for positioning of large text arrays even in small text fields. This font family is well fitted for brand visual identity and product labeling as well as for all digital media, such as web interfaces and game-plays. It is also great for mobile apps' interfaces.

# TT Bricks

Example

Construct

16 styles

Hairline Thin Light Regular  
**Medium Bold ExtraBold Black**  
*+ ItalicS*

50 pt

Regardless of its Soviet past, TT Bricks is a very fresh and visually powerful font family that perfectly fits the contemporary media landscape.

20 pt

Do you love the early Soviet visual culture as much as we do? We've tried going back a hundred years and rethinking the constructivist era. We've created an extensive font family that consists of the simplest triangle and rectangle forms. TT Bricks font family includes 16 faces: Hairline, Thin, Light, Regular, Medium, Bold, ExtraBold, Black and ItalicS. Regardless of its Soviet past, TT Bricks is a very fresh and visu-

ally powerful font family that perfectly fits the contemporary media landscape. TT Bricks is perfect for mobile apps and corporate websites, as well as for printed press layout. Thanks to the exaggeratedly simple forms of all signs, TT Bricks looks great in very small type sizes.

50 pt

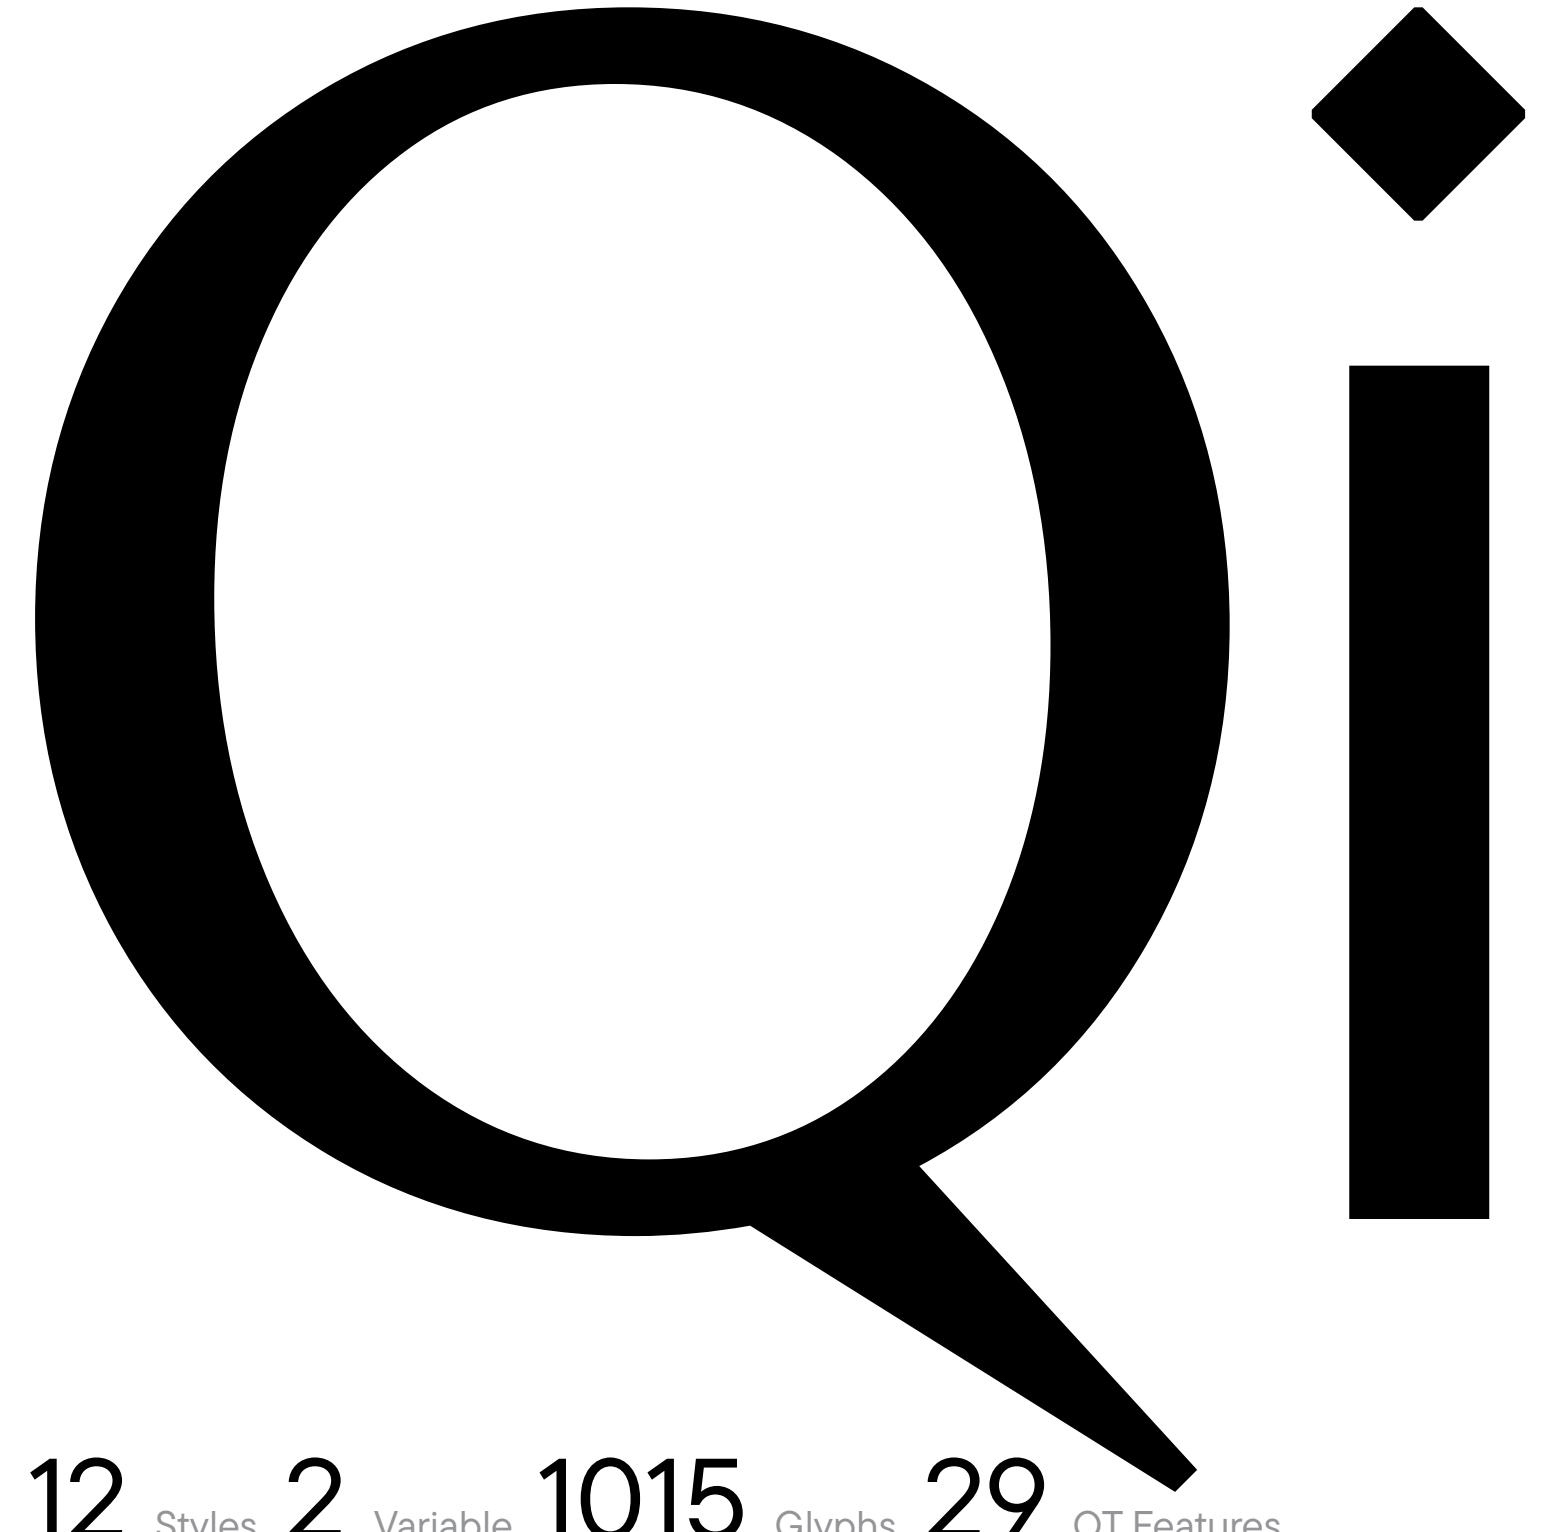

TT Drugs is a typeface that doesn't feature serifs but stands out for its high contrast. Due to narrow terminals, the font looks exquisite.

20 pt

The name of the typeface reflects the story of its creation: the font family was initially intended to be used for the pharmaceutical industry. However, in practical use, the font revealed its multiple dimensions and seamlessly blended with differently themed projects. After the update, the typeface has become even more versatile, so now only its

provocative title reminds us of the pharmaceutical past of TT Drugs. The updated font can easily become part of a skincare brand's visual identity, attract gazes on the cover of an interior design magazine, and shine on a healthy food restaurant sign or a classical music concert poster.

50 pt

TT Quaris—an exquisite and modern high-contrast sans. Before creating the TT Quaris, we conducted in-depth research into the archetypes.

20 pt

Based on this research, the key parameters and stylistic features of the future typeface were formulated, after which we began its development. The creation of this typeface took over two years and 2500 hours of painstaking work. The result is a modern, elegant display font. A key feature of TT Quaris is the "spiky stylistic set," SS01 (Serif Set), available via the OpenType menu in most

graphics software. This set radically changes the font's character: from refined and noble, it transforms the font into something daring and provocative, thanks to the appearance of sharp spurs and spikes on the letters. High-contrast sans typefaces are traditionally used in design fields such as branding for jewelry, cosmetics, and perfumes; art exhibitions in museums.

50 pt

TT Livret is an *elegant, modern and functional* serif font featuring a calm text and an expressive display subfamily. The font has a subfamily—Subhead.

20 pt

This font looks harmonious in books and other periodicals, on posters or on magazine covers. The scope is not limited to the printing industry, because TT Livret looks aesthetically pleasing wherever text is used. The text subfamily has uniwidth proportions and a calm spirit, oval round characters, free spacing and more open apertures. The glossy display subfamily is pro-

portional and has round signs that are as close to a circle as possible, the apertures are closed, and the spacing is dense. The font has an intermediate subfamily—Subhead, which can look more relaxed when used as text font, or be contrasting and used as a display font.

# Functional

22 styles

Thin ExtraLight Light Regular Normal  
**Medium DemiBold Bold ExtraBold**  
**Black ExtraBlack + Italics**

50 pt

TT Norms® Pro Serif is a functional text serif that will be the *perfect font pair* for TT Norms® Pro. TT Norms® Pro Serif has 11 upright styles and 11 true Italics.

20 pt

TT Norms® Pro Serif is easily recognizable by slight contrast in proportions, axis tilt in ovals, width dynamics and diagonal contrast. Other characteristic features of the serif are the small contrast of strokes, open apertures and brutal serifs, the length of which decreases in proportion to the decrease in boldness. True italics have been added to the functional

serif TT Norms® Pro Serif. The shape of glyphs in italic styles follows the shape of straight characters harmoniously, but differs enough from them to make printed text stand out. The font has good readability, so it can be used even in small sizes. It can be used on websites, in printed materials, and for packaging design.

Antiqua + *Italics*

Elzevir + Grotesque

50 pt

TT Marxiana is a project to reconstruct a set of pre-revolutionary fonts that were used in the layout of the Niva magazine, published by A.F. Marx.

20 pt

As part of the TT Marxiana project, we sought to adhere to strict historicity and maintain maximum proximity to the paper source. We tried to avoid any «modernization» of fonts, unless of course we consider this to be kerning work, the introduction of OT features and creation of manual hinting. As a result, with the TT Marxiana font family, a modern designer gets a full-fledged and

functional set of different fonts, which allows using modern methods and using modern software to create, for example, a magazine in a design typical of the late 19th century. The TT Marxiana project started in the late summer of 2018 and from the very beginning went beyond the traditional projects of TypeType because of the importance of preserving the historical identity.

## TT Tsars

TT Tsars is a collection of serif display titling fonts. The project is based on title fonts, that is, the fonts that were used to design book title pages. The idea for the project TT Tsars was born after a small study of the historical development of the Cyrillic type and is also based on Abram Shchitgal's book «Russian Civil Type». At the very beginning of the project, we had developed a basic universal skeleton for the forms of all characters in all subfamilies of the family, and later on we added styles, visual features, artefacts and other nuances typical of the given period.

Text

36 styles in each subfamily

Light *LightItalic* Regular *Italic* Medium  
*MediumItalic* Bold *BoldItalic* Ex.**Bold**  
**Ex.BoldItalic** Black *BlackItalic*

50 pt

The typical application for this typeface is in cultural institutions: branding for educational institutions, the visual identity of museums and exhibitions.

20 pt

The TT Regins font family belongs to the Neo-classical (Modern) serifs, in whose skeleton the traditional "pointed pen" is discernible. Although such fonts became widespread in the 19th century, they are still actively used in contemporary design. This category of fonts is also popular in glossy print publications and for the packaging of premium brands. The characteristic features

of the TT Regins family are high stroke contrast, enlarged lowercase characters, and hypertrophied serifs. The typeface consists of three subfamilies, divided by their degree of contrast. TT Regins Text, with the lowest contrast, is suitable for regular body text and is excellent for small captions. TT Regins Subhead is suited for large and short phrases, serving as a transitional style.

50 pt

TT Jenevers is a modern serif with Dutch flavor. The italics of the TT Jenevers are slightly narrower as compared to upright faces.

20 pt

TT Jenevers is a modern serif with Dutch flavor. The font family features the characteristic details peculiar to Dutch serifs—these are the asymmetrical shape of serifs and an irregular slant of ovals. For example, in the letter «o» there is no slant, but it is present in p-q. In TT Jenevers, both lowercase and uppercase characters are of a large size, which makes

it a rather display typeface. At the same time, the big half-ellipse of the lowercase characters does not allow the letters to stick, which allows the implementation of TT Jenevers in text arrays. The italics of the TT Jenevers are slightly narrower as compared to upright faces—this is done to ensure a greater density of the text array.

TT Bells

14 styles in TT Norms® Pro Mono: Thin, ExtraLight, Light, Regular, Medium, DemiBold, Bold and italics.

20 pt

In TT Norms® Pro Mono, all glyphs are inscribed in the same-width pin area, and there are no elements in the font that go beyond these boundaries. The font family made it possible to obtain an even and uniform set. We also implemented new kerning and hinting and specified the

names of all features for the users of Adobe graphic editors. TT Norms® Pro Mono includes 14 styles: Thin, ExtraLight, Light, Regular, Medium, DemiBold, Bold and italics duplicating them.

Thin ExtraLight Light  
**Regular Medium DemiBold Bold**  
 + *Italics*

50 pt

TT Hoves Pro Mono includes 15 font styles: 7 roman, 7 italic, and one variable font with 3 variation axes.

20 pt

The Mono subfamily in the new version was approached with a creative touch. Instead of only creating a monospaced font preserving the graphics of TT Hoves Pro, we modified the visual style of some glyphs. This allowed us to add a specific charm to TT Hoves

Pro Mono, making it look more expressive. Among interesting details is a set with a three-legged lowercase "t" and a serif in "6." The form of "Cc" in the Cyrillic and Latin character sets is different, helping to avoid confusion when the font is used in programming scripts.

## TT Interphases Pro Mono

TT Interphases Pro Mono consists of 6 weights: 2 uprights, 2 true italics and 2 variable fonts.

The subfamily of the more display sans TT Interphases Pro Mono with interesting glyph shapes and the same width of glyphs will also pleasantly surprise you. A monospace subfamily is suitable not only for use in coding, but also for creating design products. The monospace

subfamily consists of 6 weights: 2 uprights, 2 true italics and 2 variable fonts. It contains 18 functional OpenType features.

50 pt

TT Autonomous is a complex font family that consists of 6 fonts intended to solve a broad range of design tasks

20 pt

We could not disregard the fact that code lines in software for autonomous cars are traditionally typed using monospaced fonts and added a special monospaced subfamily to the TT Autonomous typeface. Thanks to the squareness of the characters inherited from the main

family and the real monospace properties, the character forms in the subfamily turned out very specific and interesting. *This is especially true for oblique monospaced fonts, which are true italics.*

300 pt

Clouds

50 pt

TT Celestina is a handwritten font with a free-spirited character. Light, cheerful, and slightly chaotic, it's like a drop of ink fallen on paper or delicate clouds.
