WINES VINES ANALYTICS

WINE ANALYTICS DATABASE
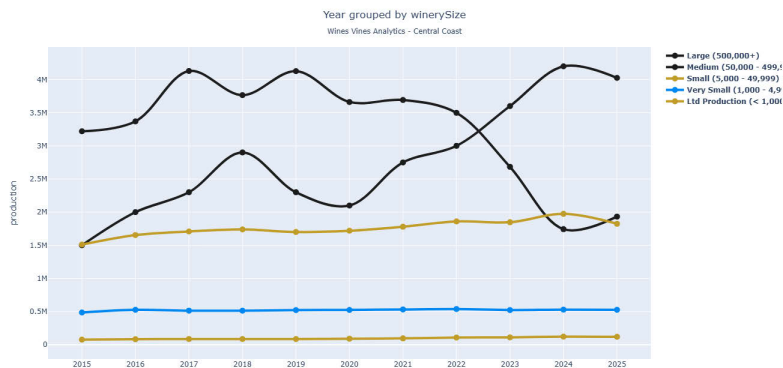

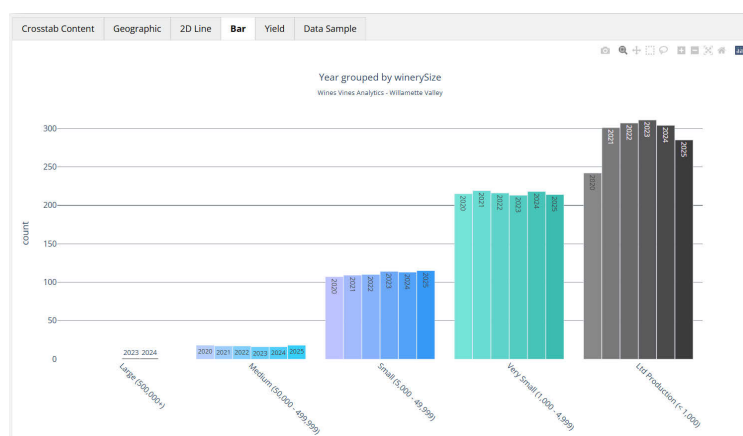

New in 2025

An Industry First: **Access multiple databases with time series capability in a single web application.**

The Wine Analytics Database features a data cube structure allowing users to easily access and interpret data from multiple sources measuring different dimensions of the North American wine business.

Analyze a more comprehensive view of the total wine market:

· Covering over 12,000 North American wineries

· Winery data with segmentations over time

· Time series data from 2010 to 2025 for multiple data sets, by month, quarter and year

· Extensive varietal data

· California Grape Crush data 2010 to 2025

· Visualization with charts, graphs and data tables

· More databases to be included soon
 (bulk wine and grape pricing, U.S. wine distributors and importers and winery direct-to-consumer shipments).
