

File & Folder Erasure Software

Wipe Files from Windows®, Mac®, Linux® Systems, & Servers to enforce Data Retention Policies

BitRaser File Eraser Corporate securely erases files, folders, & other sensitive data from machines running Windows®, macOS®, & Linux®; ensuring data is permanently removed beyond recovery. The software generates tamper-proof reports that help meet compliance with data protection laws like GDPR, CCPA. BitRaser File Eraser allows you to erase unnecessary, redundant, obsolete data & streamline your data retention policies thereby helping maintain data security & ISO 27001 guidelines.

Tested , Approved & Certified

Software with Excellent Capabilities

Secure Erasure

Permanently deletes files, folders, passwords, & other sensitive data from Windows®, macOS®, & Linux® systems using certified algorithms - ensuring data is unrecoverable.

Email & Browser History Erasure

Wipes emails, browser history, and archives residing in any machine, hard drive, media, or server without leaving any data traces.

Tamper-proof Erasure Report

Generates digitally signed reports of erasure to help meet statutory & regulatory compliance. Save reports locally or on secure cloud console in PDF & XML formats.

Removes Cookies & Application Traces

Permanently erases cookies along with most recently used application traces that track your behavior pattern.

Cloud Console

Allows saving of erasure reports on secure BitRaser cloud server for anytime access. Software provides option to give auditor access in cloud console to verify reports.

Erases Volumes

Safely erases logical drives or volumes without harming applications & operating system files on a windows machine.

Schedule & Automate Erasure

File & folder wiping tasks can be automated & scheduled at regular intervals to erase confidential data permanently.

No System Downtime

Erasure of multiple files can be performed without any need for system downtime during the erasure process.

Benefits of Data Erasure

HELPS MEET COMPLIANCE

PREVENTS DATA BREACH

PROLONG DEVICE USAGE

MAINTAIN DATA SECURITY

Other Specifications

✓ Certified File Erasure

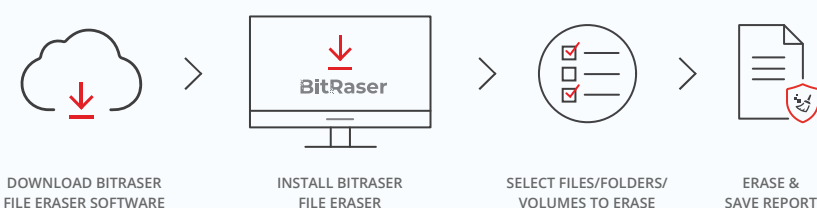

- Permanent erasure of single or multiple files beyond recovery
- Erases volumes & application traces
- Permanently erase files in recycle bin, temporary files & unused space
- Erases system usage & internet history
- Erase stored password on your system
- Erases data from mapped drives in system
- Remote erasure of files & folders on servers & storage devices across the network
- Supports 18 global erasure standards
- Verifies erasure using random & total verification methods

✓ Automation & Scheduling

- Schedule erasure tasks at regular intervals
- Implement rules to erase selected files on workstations or servers on local area network
- Search a specific file using its name & erase
- Create your own erasure list that can be erased in a single click
- Save erasure reports on cloud or download in PDF format on local machine
- Detail report includes list of file with the names that were erased
- **Network Variant** available to wipe files on domain connected computers
- File Eraser Linux variant is compatible with - Ubuntu® (24.04, 22.04, 20.04, & 18.04), Red Hat Enterprise Linux® (10 & 9), CentOS® (10, 9, & 8), BOSS® (v10)

BitRaser Deployment

Download & install the software on Windows, Mac or Linux to erase files, folders, traces permanently.
