*The perfect blend. Every time.*

On the fly  
Color Changes. PDQ.

There are a lot of features that distinguish a Plastrac blender, but none greater than the ability to change colors as often and as quickly as customer orders demand it. The secret is our patented level-sensing vane switch (standard on every single blender). Harried processors can hurry up color changes by swapping top castings without any need for cable removal.

“Eco-Pro will keep your cooling lines clean and your molds running better!”

Steve Johnson, President, MoldTrax Maintenance Solutions

## Eco-PR 360

The Eco Pro 360 is quickly becoming a “shop favorite” tool due to its ease of use and cleaning performance. Many of our course molds arrive with water lines that are plugged with rust, mineral deposits and just general crud. The Eco Pro makes quick work of these no matter the level of contamination. We highly recommend the Eco Pro as a “must have” shop tool that will keep your cooling lines clean and your molds running better!
