SERVICES TO SHAPE YOUR TOMORROW

Managed IT services

Our expertise in managed services gained over a number of years has now been concentrated to address infrastructure, application and security IT operations requirements comprehensively in an integrated or a stand- alone mode. Be it increasing efficiencies or improving quality of service,

Professional services

Our IT staffing services are aimed at supporting and providing experienced as well as skilled technology professionals when enterprises experience skill shortage or when they want to compensate the peak time demands necessary for project completion.

Consulting services

Improved productivity is increasingly achieved by automating infrastructure, workflow, release and continuous measurement of application performance through integrated developer and operation teams. Prodevans helps you create a sustainable, multidisciplinary team that can design, build and operate your service.

Consult, Conceptualize, Implement, Manage & Grow

OUR CAPABILITIES

OpenShift Kubernetes

Deploy, Manage, Maintain, Monitor Infrastructure & logging tools, application

- Build CI/CD Pipeline
- Scale & Maintain Clusters
- OpenShift on Microsoft - Single Click Deployment
- Implement VMware Tanzu

Ansible Terraform

Ansible Tower deployment and automation

- OpenStack, OpenShift, Kubernetes Deployment using Ansible
- SysOps Day-2 Operation and Storage, Network Automation using Ansible

Terraform Implementation : Accelerating Cloud Adoption in the Highly Regulated Public Sector

OpenStack

Assessment & Planning, Migration & Deployment

- Neutron SDN network design and deployment
- Cinder and Swift enterprise storage integration
- Ironic bare metal and Heat automation
- RHN upgrades and deployments

API Management Development

Installation of 3Scale API Management on OpenShift Container Platform

- Integration with Single Sign-On
- API configuration with 3Scale gateway
- Developer portal configured for internal and external users
- HTTPS configuration for all 3Scale components
- 3Scale configuration and validation

Open Source Development

- Assess
- Plan
- Design
- Support

- JBoss Decision Manager
- Serverless / Java / Microservices
- Spring/Angular/React
- Python/R

OUR CAPABILITIES

ESB

Installation of JBOSS Fuse ESB on OpenShift Container Platform

- Fuse configuration and validation
- Apache Camel integration

Azure, AWS, Virtualization

Assessment & Planning, Migration & Deployment

- Config Management
- Automation, DevOps on Azure & AWS

Managed Database Services - Azure & AWS

- Hybrid Cloud Management - Azure, AWS, GPC
- Cluster & Performance Analysis

Config, Manage & Maintain - Hyper-V, KVM infrastructure

Vmware - Private & Hybrid Cloud Management

RH SSO Keycloak

Setup and configure RH-SSO

- RH-SSO integration with Active Directory
- Key Clock Open Source Customization
- JWT Token encryption.
- User deactivation, activation & deletion
- User call to action on deactivation, activation & deletion
- Social Media Login
- Multifactor Authentication

DevOps Tools & Services

Atlassian

- Jirra, Confluence

DevOps Tools

- Ansible
- Terraform/Puppet
- Git, GitHub
- Splunk
- Jenkins
- Zabbix, Nagios
- Prometheus, Grafana, Kibana

Consult, Conceptualize, Implement, Manage & Grow

INFRASTRUCTURE & CLOUD SERVICES

Managed Service

- Remote Infrastructure Services
- Desktop Support
- Resource Configuration
- Network Management & Monitoring
- Backup
- OS Management & Patching
- Database Management
- Security Endpoints
- Asset Management
- 24/7 Service Desk

Cloud Management - Azure, AWS, GPC

- Architecture Support
- 24/7 Monitoring
- Data Backup and Restore Activities
- Operating System Management
- Security Groups Management
- Network Management
- Cloud to Cloud - Cluster, Backup & Restore

DevOps Services

- IaaS & PaaS
- App Deployment
- Automation
- Auto-scaling & Clustering
- CI/CD Automation
- Containerization
- App Modernization

Migration

- Cloud to Cloud
- Lift & Shift
- Re-Platforming
- Re-Architecture

Support

- 24x7 Support Hours
- Per Call Support
- Per Device Support
- Per Workload Support

Consult, Conceptualize, Implement, Manage & Grow

PROFESSIONAL SERVICES

Contract To Hire

Short-term or long-term contractual roles with flexibility of hiring

Time & Material

Pay only for time and resources engaged on your project

Project Based

A smart approach to staff your project with right skill sets and achieve timeline and quality goals

PROFESSIONAL SERVICES

1. AWS Workflow Automation using **Ansible & Ansible Tower** for Global Consumer Company, India
2. **OpenShift** 4.2 Cluster Set up & App Deployment across Dev, UAT, Prod & DR at Life Insurance Major, India
3. Red Hat **Quay Container and Docker DTR** Registry Set up and Configuration at Life Insurance Major, India
4. Red Hat **JBoss & SSO** with multi-tenancy for Embedded Solution Engineering Industries, India
5. **Kubernetes** Managed Support for Canadian Client
6. **Openstack** upgrade in Telecom, Singapore
7. Application Engineering & Transformation at **Global Bank** in Australia & Singapore
8. **Openstack** cluster upgrade and Integrate **ELK** Government Digital Services in Singapore
9. Cloud In A Box "**PDCloudEX**" implementation using Openstack for GMRIT Academy in India
10. International Trading **Openstack** deployment in Singapore
11. Telecom Research **Openstack** and Red Hat Virtualization implementation in Malaysia
12. Telecom **Openstack** environment IT Enhancement GPS Implementation in Malaysia
