RESEARCH INTERESTS

I am interested in foundational machine learning research with applications that promote human flourishing, particularly the life sciences. I wish to understand and design self-directed intelligent systems that automatically collect and incorporate the necessary information to make difficult decisions in consequential online settings. Applications of my work include control algorithms for robotic systems, efficient data collection strategies for public health surveillance, lab-in-the-loop experiment design for antibody engineering, clinical stage asset due diligence and clinical trial design at Coefficient Bio, and most recently AI for scientific discovery at Anthropic.

PROFESSIONAL BACKGROUND

• Anthropic <i>Member of Technical Staff, Life Science Research</i>	New York City, NY <i>Apr. 2026 - Present</i>
• Coefficient Bio (acquired by Anthropic) <i>Co-Founder</i>	New York City, NY <i>Sept. 2025 - Apr. 2026</i>
• Prescient Design, Genentech Research and Early Development, Roche <i>Principal Machine Learning Scientist</i>	New York City, NY <i>June 2022 - Aug. 2025</i>
• Amazon Web Services <i>Applied Science Intern</i>	Remote <i>June 2020 - Aug. 2021</i>
• Secondmind <i>Machine Learning Research Intern</i>	Cambridge, U.K. <i>June 2019 - Sept. 2019</i>
• U.S. National Security Agency <i>Data Science Intern</i>	San Antonio, TX <i>May 2017 - Aug. 2017</i>

ACADEMIC BACKGROUND

• New York University <i>Ph.D., Data Science, Thesis: Probabilistic Machine Learning for Online Decision-Making.</i>	New York City, NY <i>Aug 2019 - Sept 2022</i>
• Cornell University <i>M.S., Operations Research</i>	Ithaca, NY <i>Aug 2017 - May 2019</i>
• University of Colorado Denver <i>B.S. summa cum laude, Applied Mathematics</i>	Denver, CO <i>Aug 2013 - May 2017</i>
