About Somco Software

Somco Software (previously Scythe Studio) is an embedded and cross-platform software development company specializing in Qt, QML, C++, and embedded systems.

We specialize in the regulated industries with a special focus on medical devices.

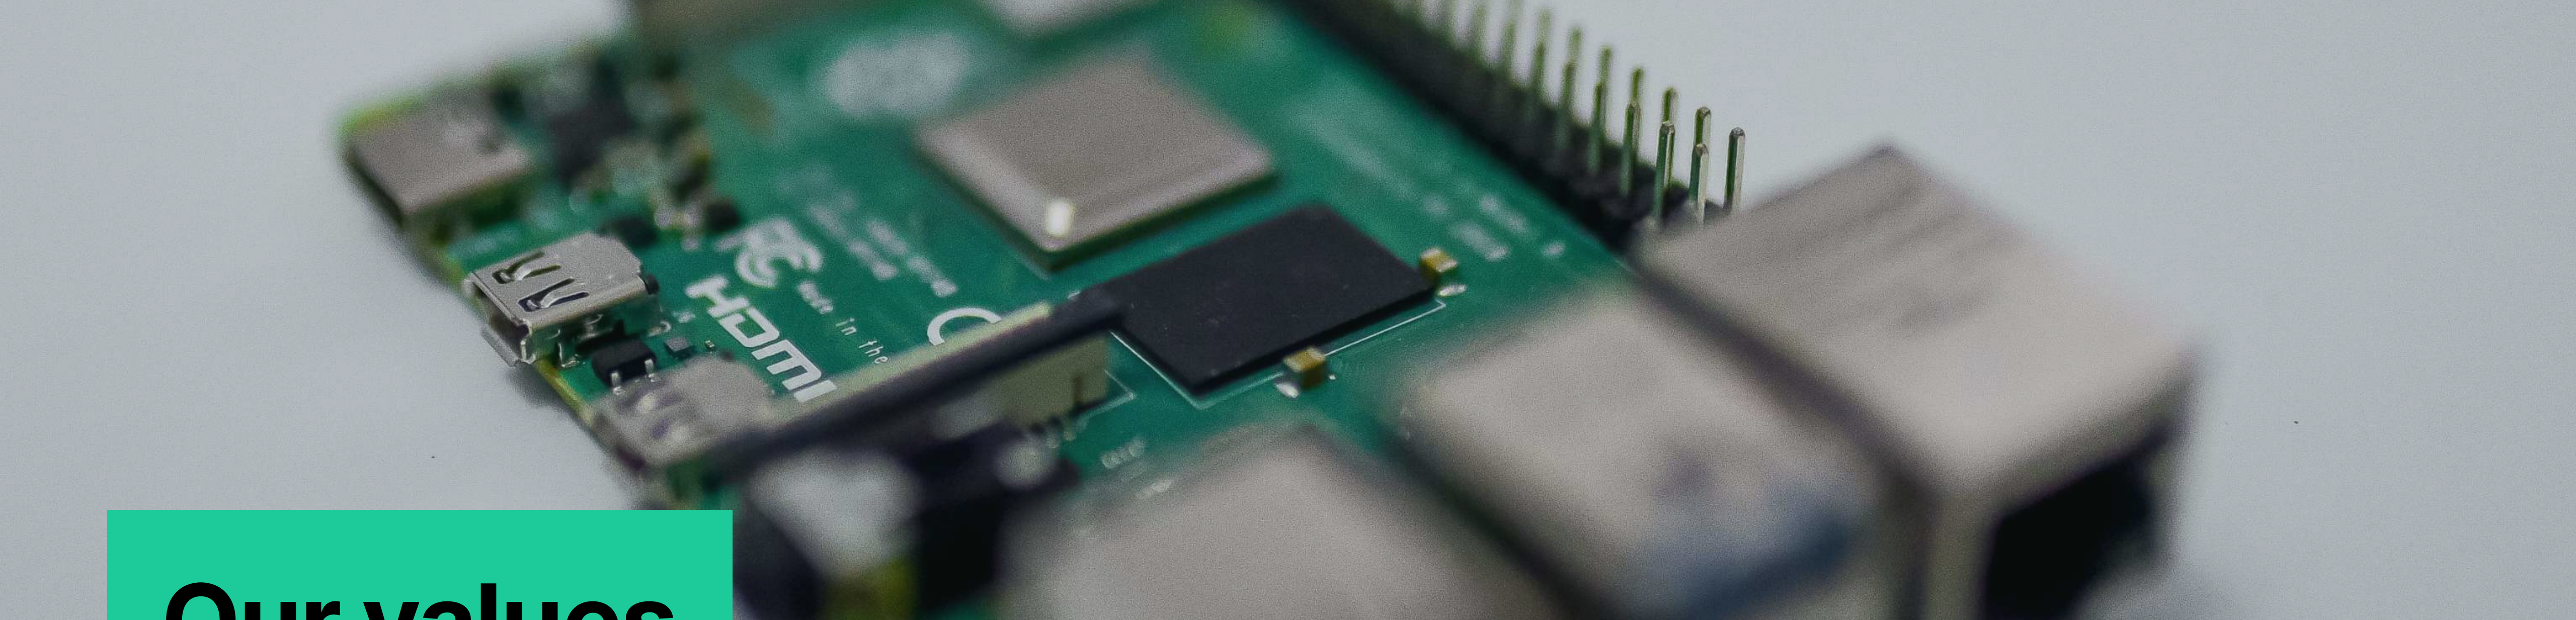

We build reliable software and hardware that power real products, from HMIs and embedded Linux devices to fully integrated cross-platform applications.

Operating globally
with focus on
**DACH, Nordics
and USA**

We employ **20 Qt C++**
experts working mostly
from Poland

Our values

01

All the skills under roof

You work with certified partners skilled in GUI development, firmware, application software, cloud development, architecture, testing and UX/UI design. We keep all the skills in-house.

02

We help meeting deadlines

With our senior expertise and proven end-to-end project experience, we deliver software fast and reliably - helping you meet deadlines without compromise.

03

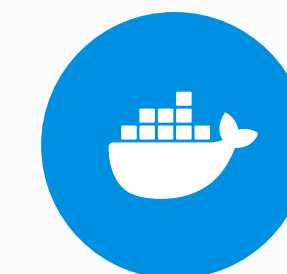

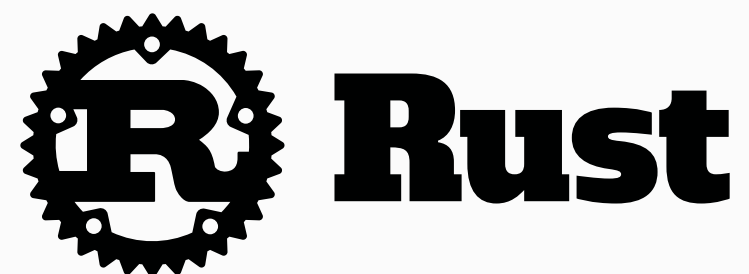

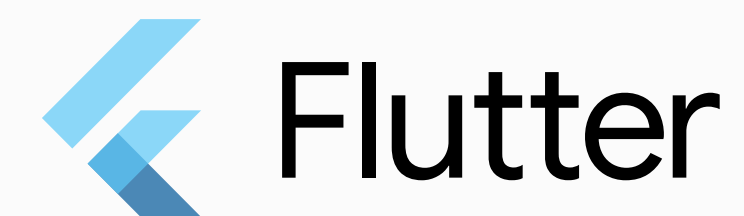

We start new projects fast

Not enough manpower is a common issue in many companies. Our average time to start a project with team of 2-3 developers is just two weeks.

Members of

SERVICE

HMI Systems Development for Embedded Devices

We are experts in developing both graphical and low-level components of modern HMI screens.

SERVICE

Embedded Systems Development

We build reliable, high-performance embedded solutions. From low-level firmware to modern device interfaces.

Core expertise

- Advanced connectivity
- Custom Yocto Linux images
- Firmware development
- Embedded GUI / HMI

Medical Devices Software Development and Regulatory

As the complete design house we develop comprehensive medical projects consisting of both software and hardware components.

With strong regulatory experience we undertake all necessary measures to meet not only customers' but also legal requirements.

CERTIFIED

Cybersecurity & Compliance

We secure embedded products across the full lifecycle - identifying risks, implementing protections, and ensuring ongoing compliance.

Core expertise

- Threat modelling & risk assessment
- Cybersecurity controls implementation
- Security documentation & compliance support
- Post-market monitoring & incident response

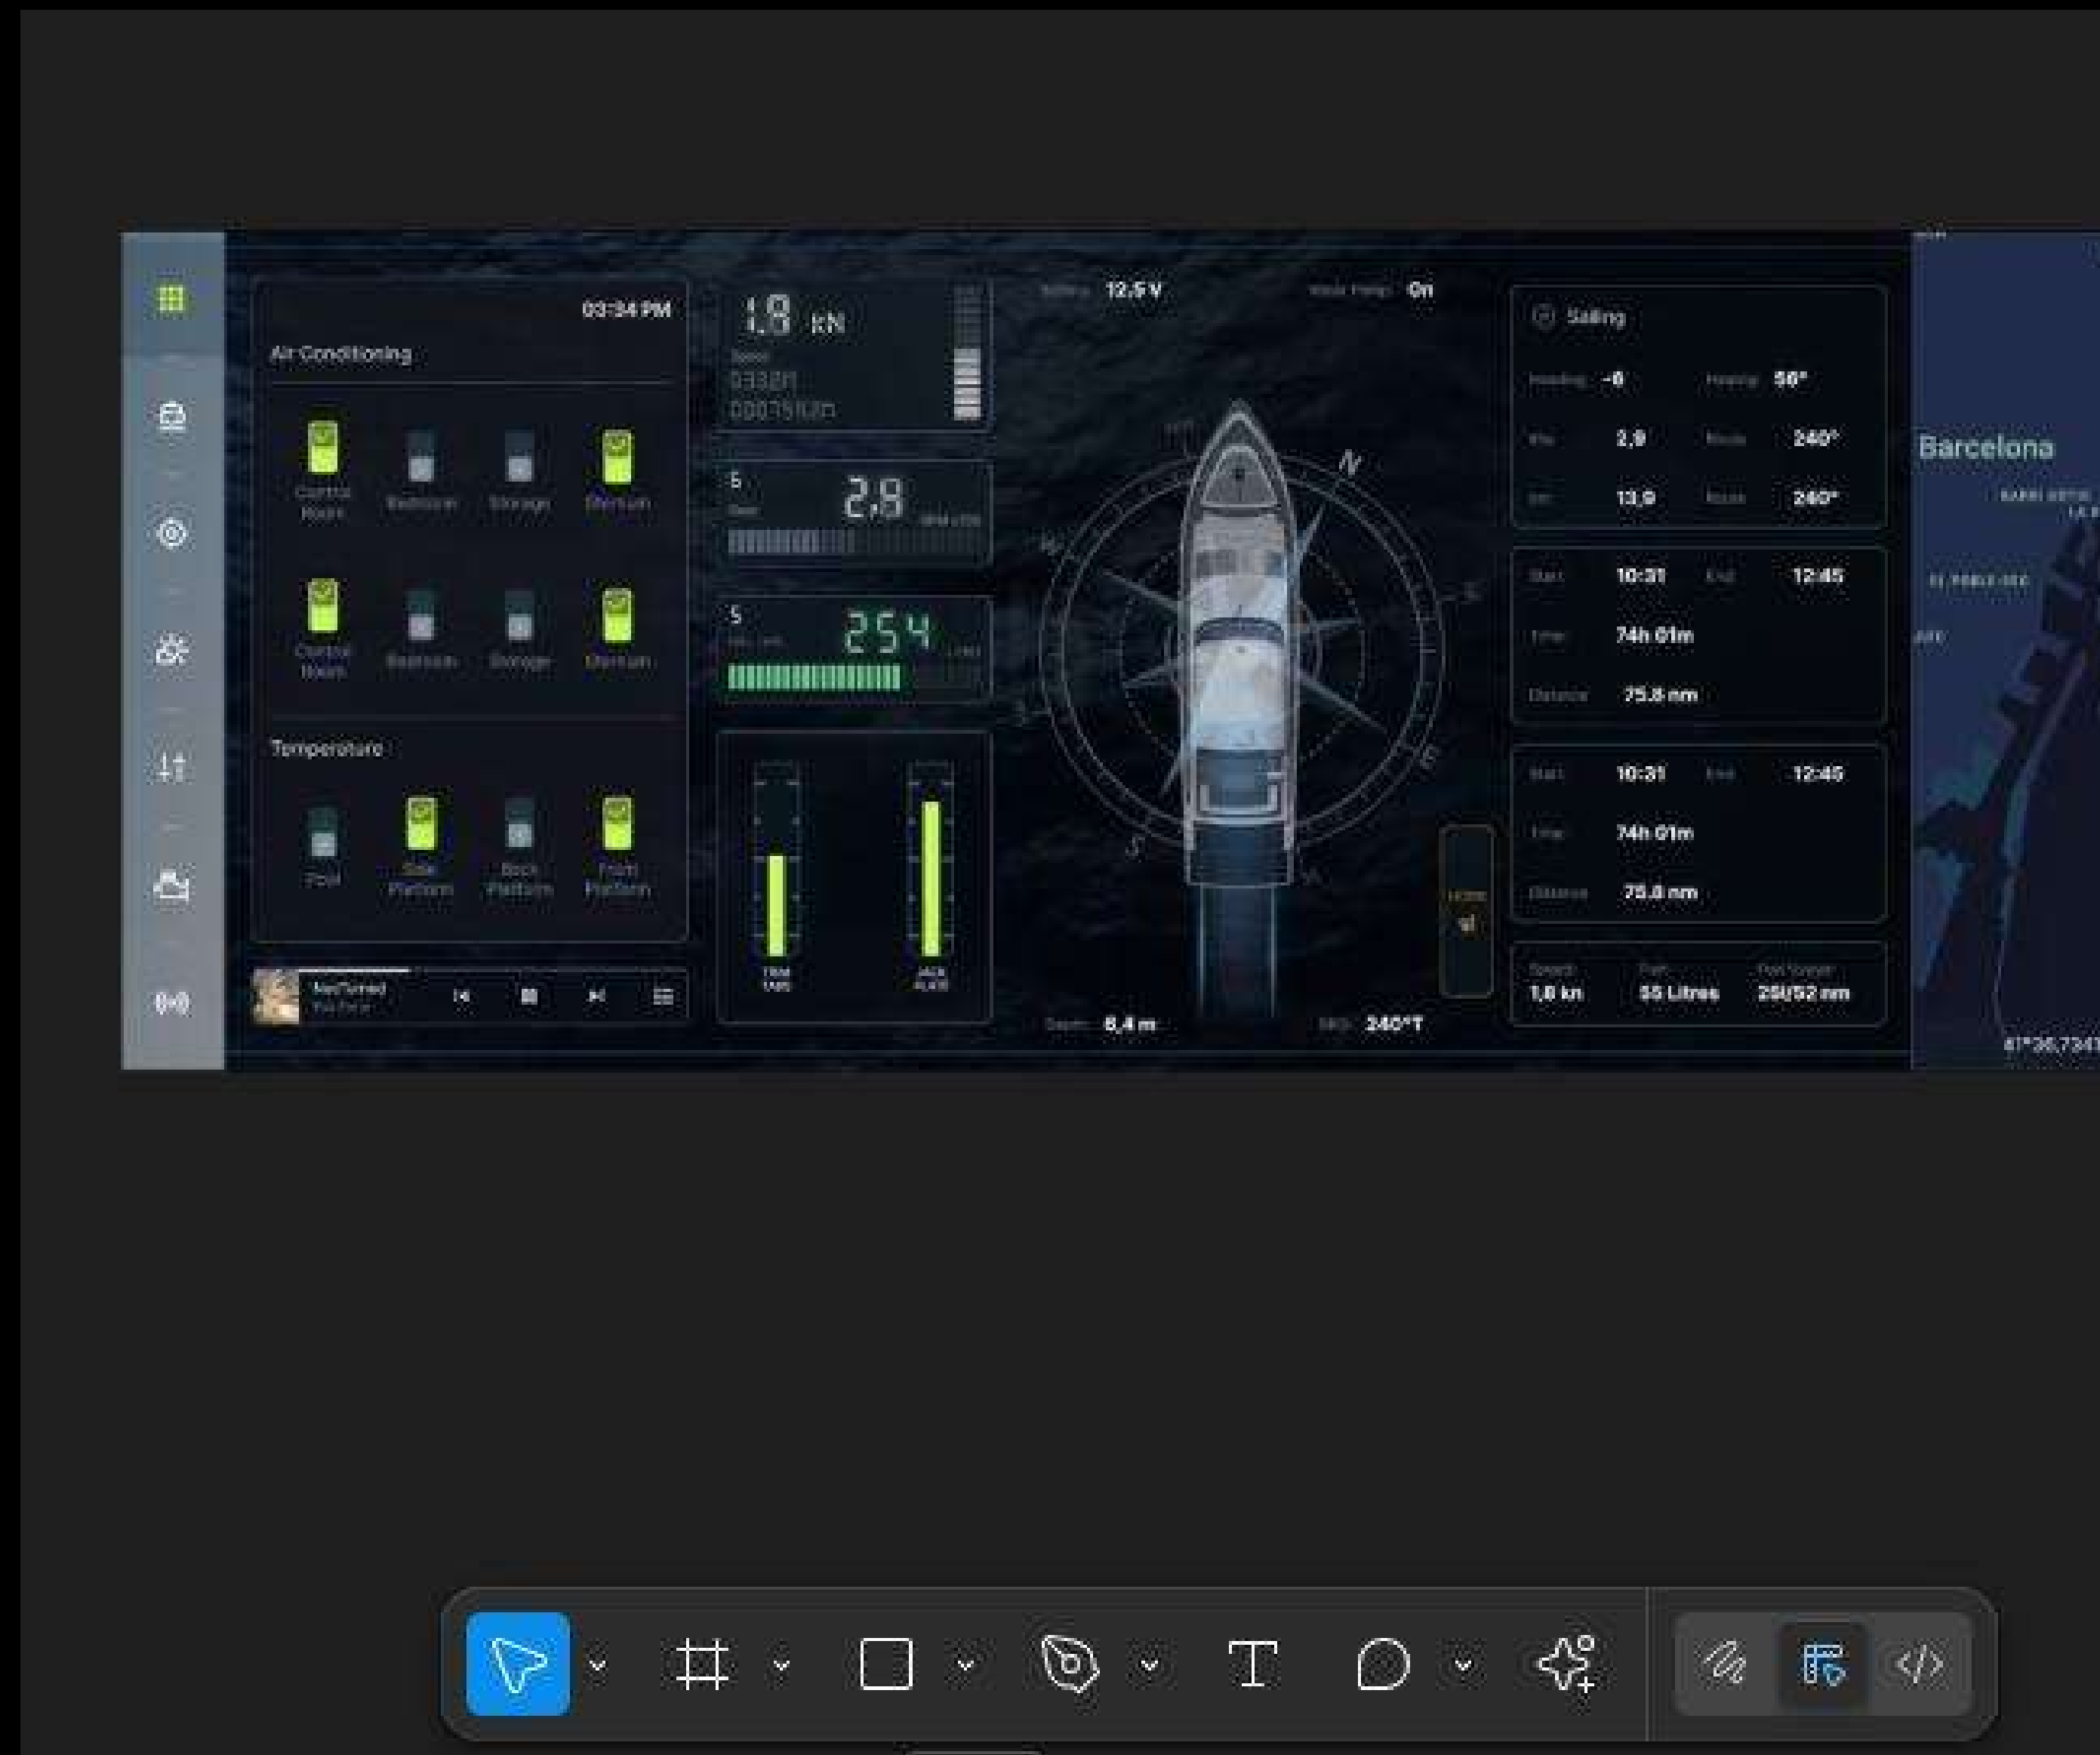

Design and User Experience

Paying attention to details is what makes us unique.

Ensure that your application will follow modern UI trends by using our designing services.

Together with our partners, we created an effective cooperation workflow between developers and designers.

Trainings and Consulting

Our specialists can consult your software product at any stage. We can help you with analysing, reviewing, and debugging projects and their architecture.

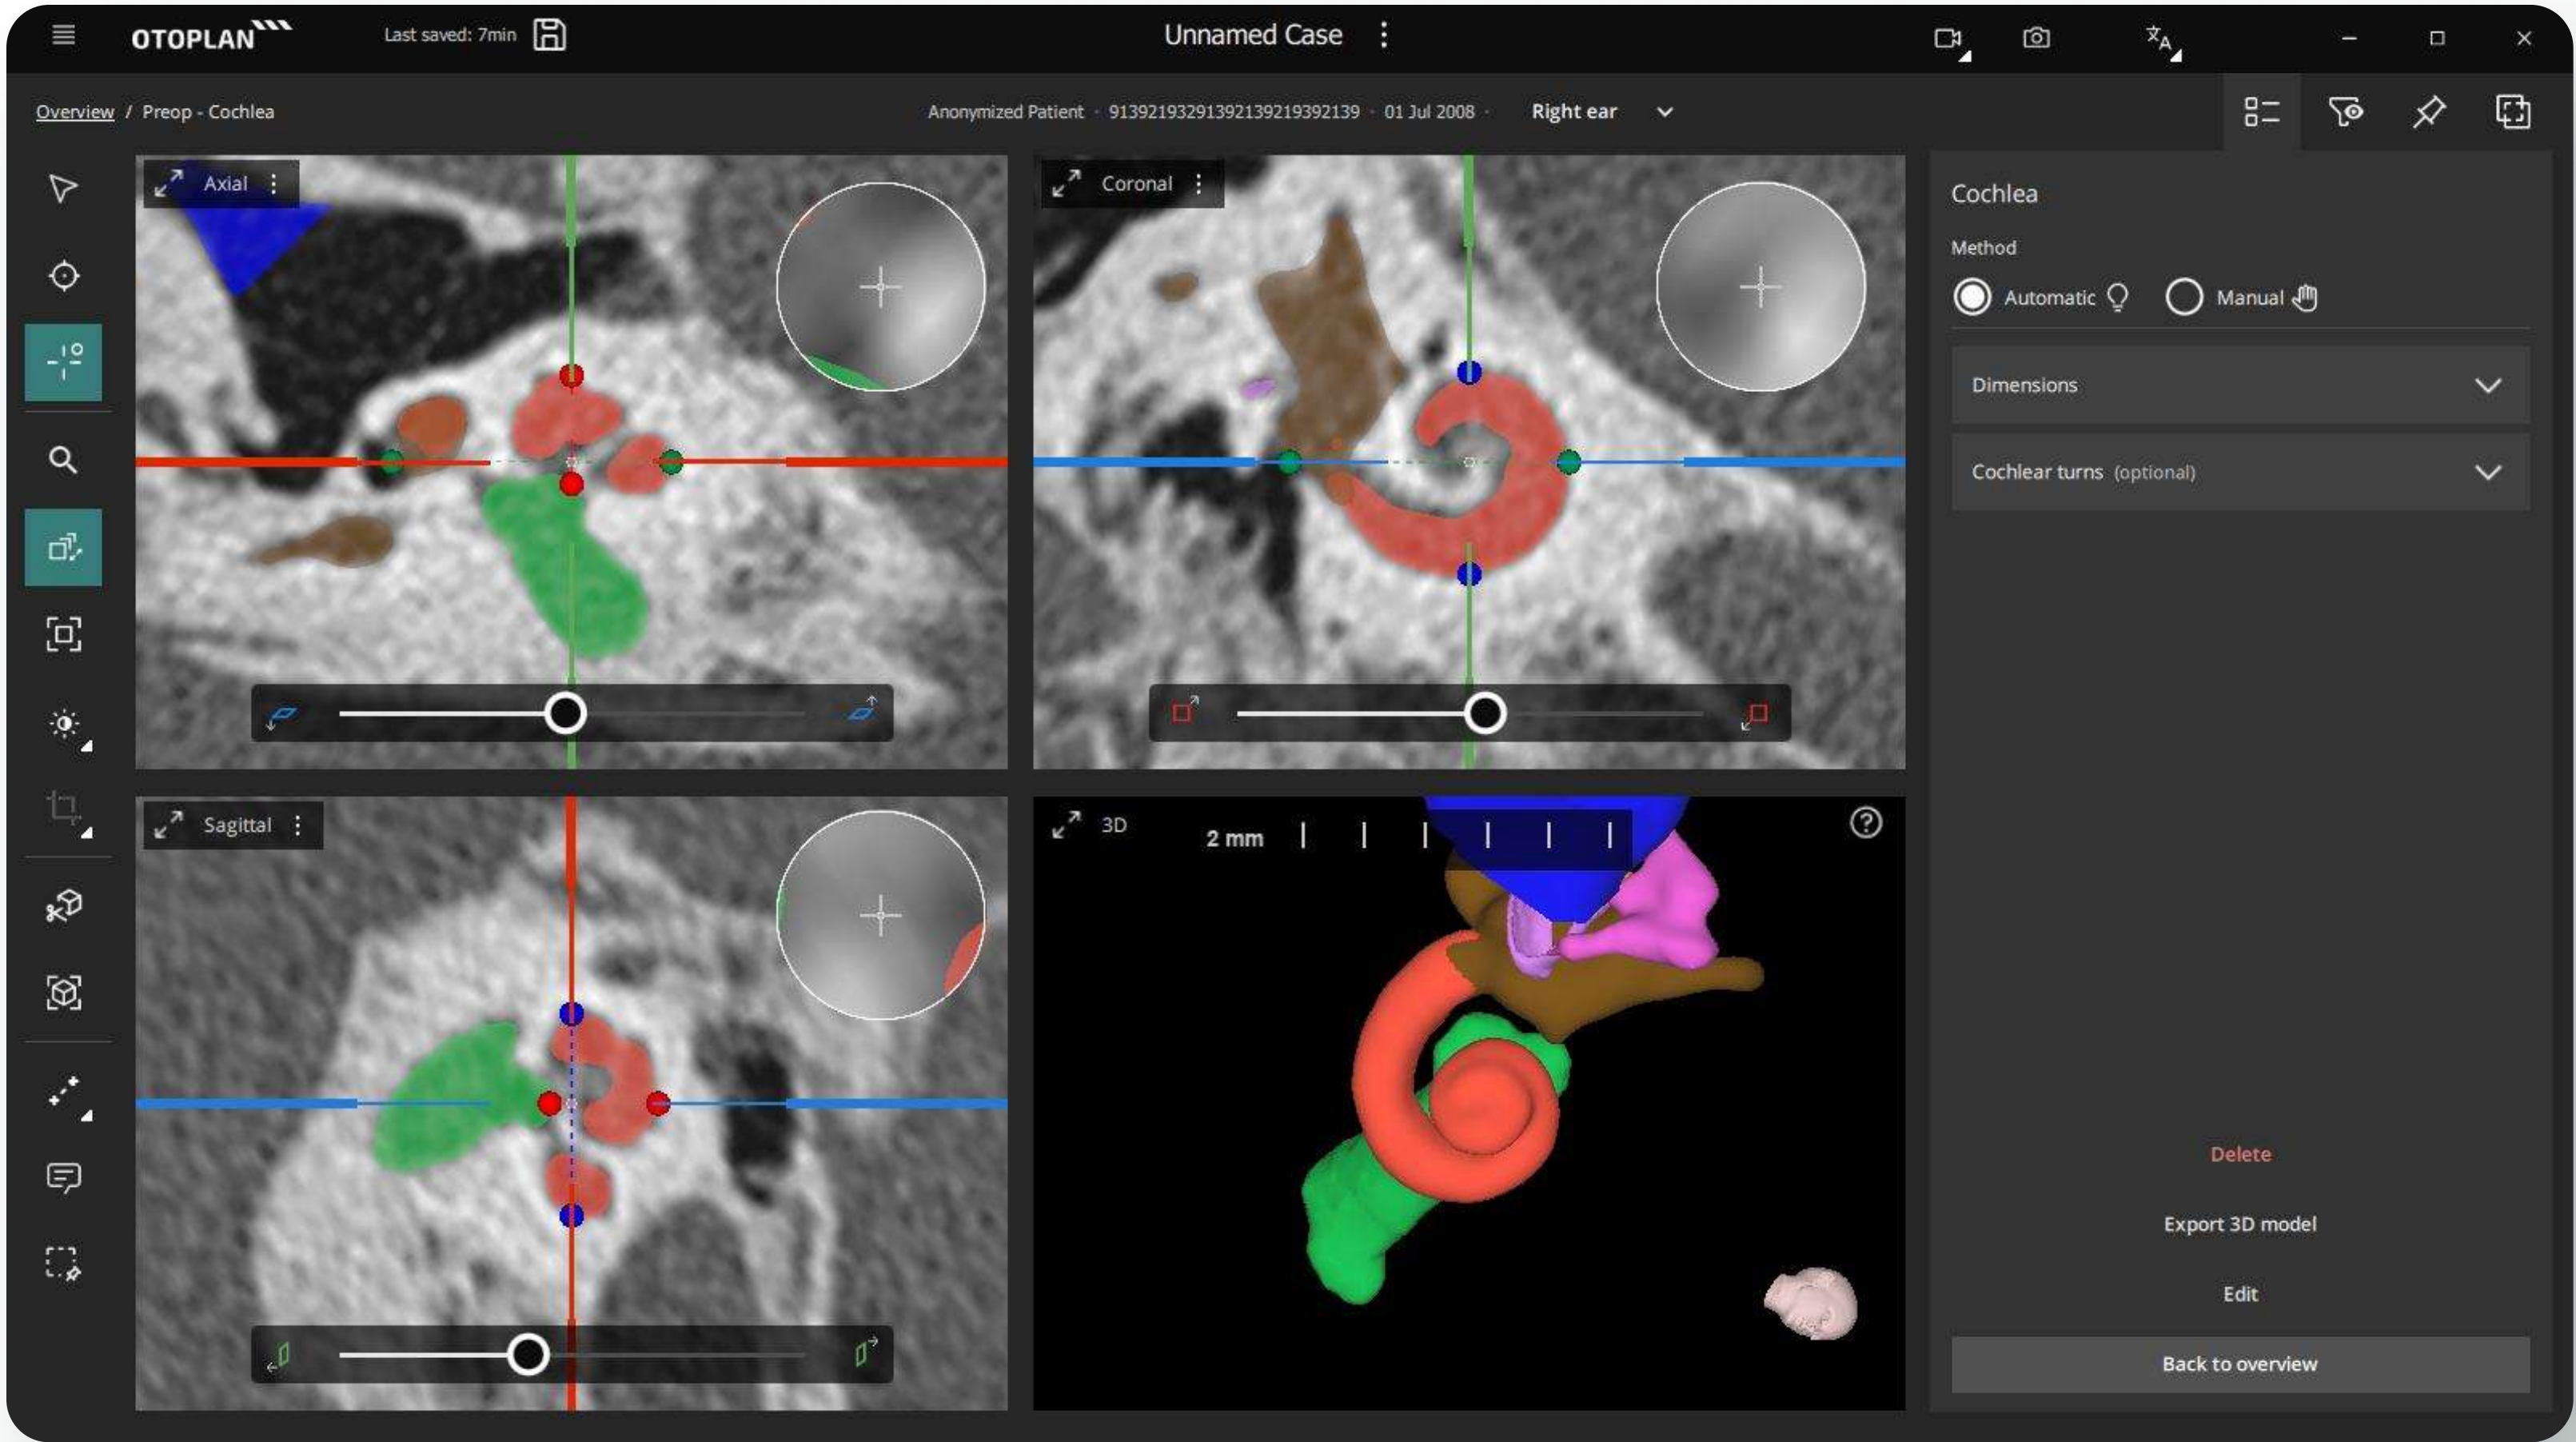

Thanks to the experience with we can monitor the performance of your Qt QML and C++ code and propose solutions to potential problems.

We offer wide range of workshops and trainings that can help you increase the skills of your team.

THE PROJECT

Game Launcher for Video Game Development Company

 Custom Software Development

 \$10,000 to \$49,999

 Jan. 2021 - Jan. 2022

Project summary:

Scythe Studio developed a multi-game launcher connected to a remote server for a game development firm. The team developed features like automatic updates and logins. Around 4–5 teammates worked on the project.

THE REVIEW

5.0 ★★★★★

"The overall development process was 10/10."

OCT 24, 2022

Quality: 5.0

Schedule: 5.0

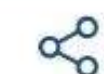

Cost: 3.5

Willing to refer: 5.0

Feedback summary:

The launcher exceeded the company's expectations, thanks to Scythe Studio. The team was on top of everything, resolving any issues they encountered and providing feedback on the implemented changes. They consistently met timelines and had amazing communication skills, making the engagement easier.
