Access Control for

Higher Education

Access Control

Modern Cloud-Based Access Control to Protect Students and Staff

From classrooms to residence halls to IT closets, improve security and streamline access with a modern, hybrid-cloud access control system. Verkada provides critical insights that allow you to be more proactive about campus security, while making it simple to manage doors, schedules, users, and credentials at scale, from anywhere.

Benefits of Verkada's hybrid-cloud solution

Eliminate on-prem servers and enjoy easy installation and minimal maintenance, while ensuring maximum reliability

Remote, multi-site management lets you securely manage devices and users from a computer or phone, anywhere, any time

Native camera integration provides critical visual context on every door, helping to accelerate investigations

Seamlessly transition from your existing system and bring your readers, wireless locks, and credentials along, if desired

Real-time alerts let you respond to events as they happen, from a door propped open to a lost badge

Unlimited doors, sites, and users allow your access control system to easily grow with your campus

User-friendly and intuitive software is quick to learn - no training needed

Automatic firmware updates keep your system secure and up-to-date with no manual work

Deter cybersecurity threats with enhanced user security – SSO, MFA, and SAML authentication

Quarterly feature updates and a 10-year warranty included at no additional cost

International House at UC Berkeley

"The system handles the day-to-day access management tasks, giving our staff more time to focus on critical responsibilities. This has streamlined operations across the facility, allowing for more efficient and secure access control."

Luis Escamilla,
Vice President of Administrative Services

One integrated platform to strengthen campus security

Video Security

Gain visual context on door events, and get alerted to tailgating or if a person of interest tries to enter.

Intercom

Expand your access control deployment by using an Intercom as a standalone door controller and reader.

Guest

Provide mobile credentials to visitors in advance that give them access to the areas they need.
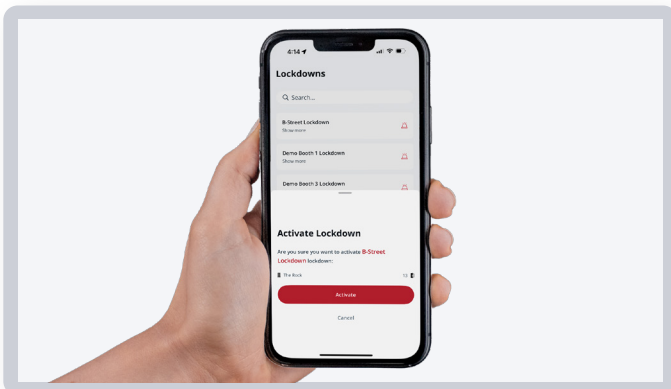

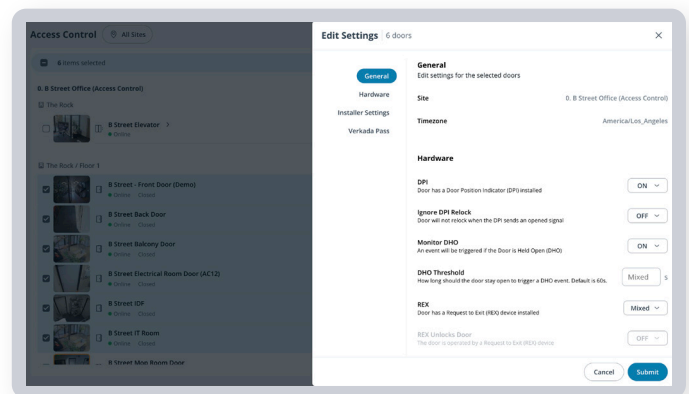

Key Features for Higher Education

Strengthen campus security

- Ensure only the right people have access to the right buildings at the right times with customizable role-based access control.
- Get instant alerts paired with camera footage for unexpected ingress or egress.
- Quickly revoke credentials upon staff or student departure.
- Provide visitors or contractors with temporary credentials that give them access to just the buildings they need.

Streamline system management

- Automate user management with SCIM and SSO integrations, or upload via CSV or API.
- Provision physical and mobile credentials in seconds, and design and print badges with a few clicks.
- Integrate with one-card providers, such as Atrium.
- Quickly adjust door access schedules in bulk for holidays, events, or unexpected closures.
- Further customize and automate your system with APIs, webhooks, and out-of-the-box integrations.

Accelerate emergency response

- Trigger a building- or campus-wide lockdown in a matter of seconds via desktop, mobile app, or a physical panic button, immediately restricting access.
- Instantly share floor plans and live camera feeds with first responders, and remotely unlock specific doors as they move through the building.
- Know who is safe or missing during an emergency evacuation with pre-built roll call reports and badge readers at muster stations.

Try Verkada free

Our 30-day trial includes access control devices and full access to the Command management platform.
