

Verkada Alarms

Protect Your Employees and Inventory with an Alarm System That Actually Works

Detect intruders quickly and stop crimes in progress with Verkada's integrated cameras, alarms, and professional monitoring solution.

The solution

Detect suspicious activity early

Using advanced AI, Verkada cameras identify specific behavior, like a person crossing a line or loitering on your property, while your site is armed. For extra protection, you can tie in your existing wired intrusion sensors, or add wireless motion, door, and glass break sensors. Employees can also raise an immediate alarm by pressing a wireless panic button.

Verify the threat

If an alarm event is triggered by a camera or intrusion sensor, our team of professional monitoring agents can review footage to verify that there is a real person present, helping you avoid false alarm fines.

Take immediate action

Agents will dispatch police and share camera footage with them. This helps the police prioritize that event, and gives them access to a live feed of what's going on around your property. Agents can also talk down to the intruder through a powerful speaker to try to scare them off before they do damage.

“

Verkada Alarms is a game-changer... We recently had an incident where the cameras detected two intruders and alerted professional monitoring. The agent video verified the threat and dispatched police, who arrested the intruders before any damage could be done.”

Jamin Horton,
Director of IT, Camping World

Key benefits

Cut back on expensive in-person guards

Verkada's detection and response capabilities reduce the need for live guards patrolling your property or watching cameras.

Keep employees safe and improve retention

Give staff peace of mind with wireless panic buttons and the ability to view live nearby camera feeds straight from an alarm keypad.

Get priority police response

Video-verified alarms help the police know that they should respond quickly, and helps you avoid false alarm fines.

Easily manage multiple locations

In a single dashboard you can remotely view every site and incident, as well as manage devices, users, key codes, and more.

Continue using your wired alarm devices

Third-party wired intrusion sensors, sirens, and strobes can be easily integrated into the Verkada system.
