Verkada

Enhanced Entryway
Security with Verkada

Overview

Entryways are the first line of defense for any property, serving as critical checkpoints that determine who is allowed inside. Poorly secured entry points can lead to unauthorized access, creating vulnerabilities that put people, assets, and sensitive information at risk.

Today, many front desk and security teams lack the tools to properly identify potential threats, track lost or stolen credentials, and see through the noise to detect problematic activity.

With Verkada, organizations can bring intercom, visitor management, access control, and video security capabilities together in a powerful, cloud-based platform to improve their entryway security.

They can thoughtfully balance rigorous screening of visitors with convenient and secure access for their employees or other authorized parties. With cutting-edge analytics and intuitive software, organizations can also proactively monitor their entryways and respond to emergencies swiftly.

Featured Entryways

Building doors

Facilitate easy entry across perimeter and interior doors with video intercoms and access readers. Screen visitors at entrance lobbies with check-in flows customized by visitor type.

Parking garage and entryway gates

Unite video security and access control to automatically unlock gates when LPR-enabled cameras detect approved license plates. Use intercoms to verify visitors before granting entry.

Loading dock areas

Centrally route intercom calls to remote SOC teams and reduce burden on local guards. Scan and capture driver's license details with Guest.

Rigorously Screen Visitors

- Understand who is in an entryway and the purpose of their visit before they enter with a clear video intercom.

- Deny entry by flagging in real-time if an intercom caller is a person of interest.

- Check if a visitor is a known criminal or sex offender by automatically scanning visitor IDs against relevant databases and registries.

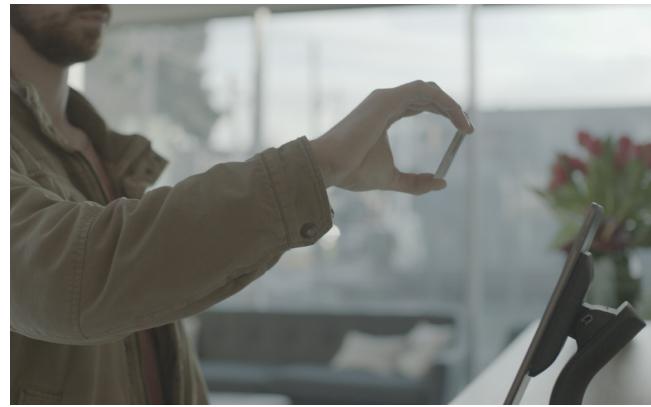

Enable Secure and Convenient Access for Authorized Parties

- Reduce friction with a modern, secure unlock experience, featuring encrypted keycards, mobile NFC credentials, license plate recognition, and more.

- Easily organize and manage users at scale with role-based access configurations.

- Keep users and credentials up-to-date with SCIM integrations, APIs, and scheduling of predetermined end dates.

Proactively Monitor Entryways

- Capture a cohesive view of entryways by combining video security cameras with eye-level intercom cameras.

- Receive automated alerts for problematic activity, including employee tailgating, credential passback, and forced entry.

- Expedite entryway investigations with cutting-edge analytics, including AI search of intercom call transcripts and video footage.
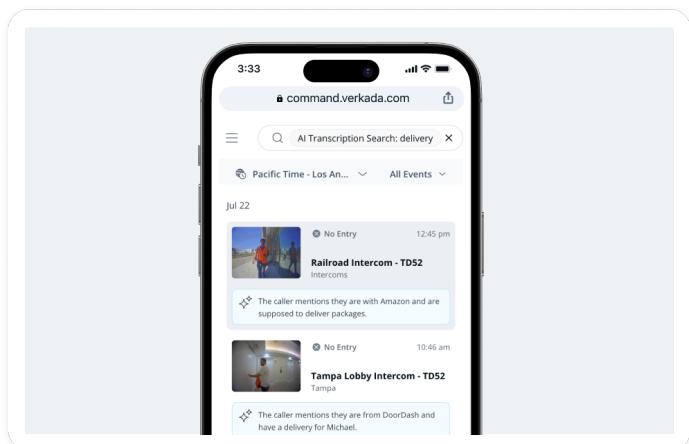

Accelerate Emergency Response

- Activate building lockdowns with one tap to protect buildings from active threats.

- Easily share floor plans and relevant video footage to authorities via live links.

- Know who is safe or missing during an emergency evacuation with pre-built roll call reports, badge readers at muster stations, and automated visitor logs.
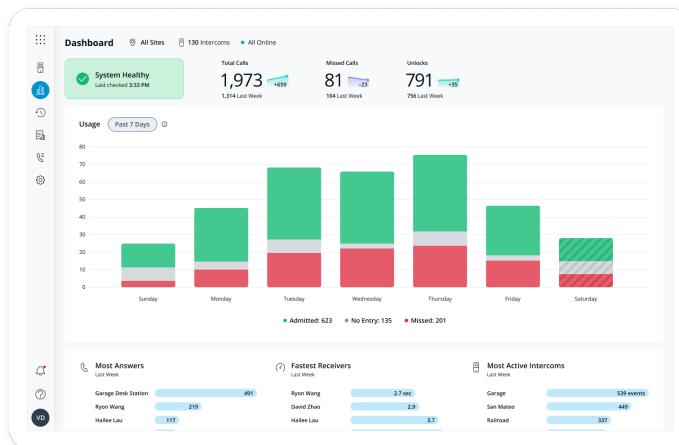

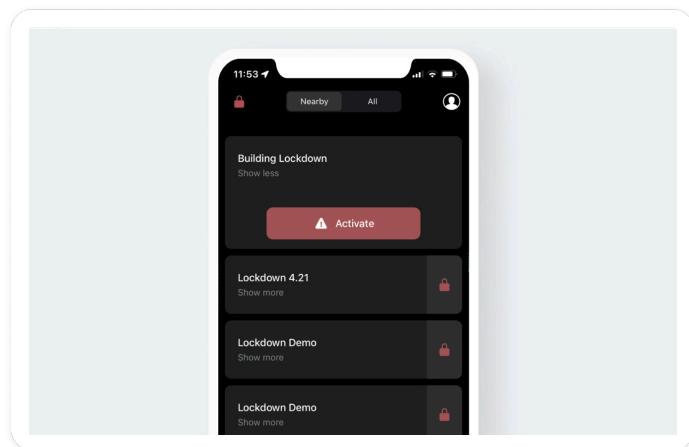

Simplify Management with the Cloud

- Unite video security, intercom, access control, and visitor management capabilities for enhanced control over entryways.

- Manage users, credentials, and schedules at scale in seconds - from any device, anywhere.

- Access detailed global audit trails capturing door events, intercom calls, and visitor logs with integrated video context.

La Canada Unified School District

"The integration between products is powerful, we have a single pane of glass where we can
remotely take calls, gain visual context, manage visitors, control access, and call for help
if needed."

Jamie Lee Lewsadder,
Associate Superintendent
of Technology Services

Blackcomb Helicopters

"Just like how video meetings revolutionized working from home, Verkada has done the same for our physical security. Managing everything remotely saves so much time; it takes seconds
to see and investigate what's happening at any door."

Chris Haslock,
Director of Operations

Resources

Intercom

Answer calls, grant entry, and secure entrances from anywhere with Verkada Intercom.
