

Modern Cloud-Based Security for Colleges and Universities

Protect students and staff in a privacy-sensitive manner with a unified physical security platform.

Leading Cloud-Based Physical Security

Legacy systems are falling short of the rising safety needs of today’s colleges and universities. Join a global network of academic institutions using Verkada’s cloud-managed physical security platform to raise the standard for campus safety. Unify complex, siloed security systems under one platform to speed up investigations, improve emergency response, and give IT and safety teams greater peace of mind – all while protecting student privacy and enhancing cybersecurity.

Verkada is #1

in Cloud Video Security &
Cloud Access Control**

**2023 Novair Insights market share data for video surveillance cloud solutions (world excl. China). 2024 Omdia worldwide market share data for cloud-native, access control solutions that push mission-critical services into the provider's cloud tenancy; excludes ACaaS solution providers that materially split the execution locus for analytics between on-premise hardware and cloud.

Why Colleges and Universities Choose Verkada

Experience a new level of simplicity with Verkada. All you need is the hardware and access to Command, our software platform, which updates automatically. Centrally manage all Verkada devices and users from any browser or mobile device. Gain actionable insights with information integrated across devices.

Accelerate investigations and monitor campus activity in real time

Investigate faster with AI-powered people and vehicle analytics and instant alerts

Instantly share live camera feeds with campus safety teams or police

Protect student privacy with live or selective face blur and privacy regions

Easy multi-site management with granular, role-based user permissions

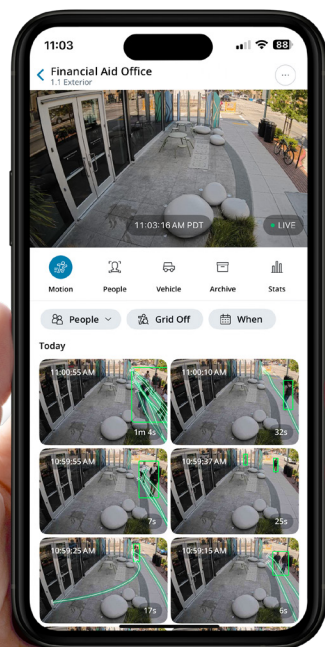

Deter cybersecurity threats with SSO, 2FA, and Enterprise Controlled Encryption

Empower campus safety with a user-friendly and intuitive system

IT-friendly with bandwidth-efficient cameras and zero servers or NVRs to manage

Up to 10-year warranty, predictable renewal costs, and unlimited user seats

Top-rated technical support — available 24/7 via email, phone, or live chat

Greenfield Community College

“Being able to say ‘I’m looking for a Honda Accord’ and have the system identify it makes footage retrieval so easy. It took me ten minutes to train campus police on how to use Verkada, and they were just floored by what it could do.”

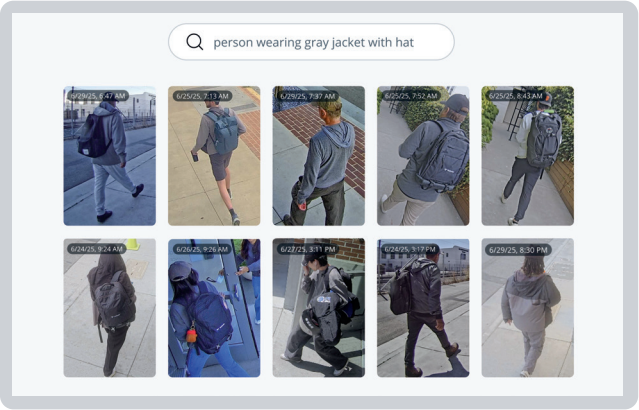

Alex Wiltz,
Associate Dean of College Life &
Executive Director of Campus Safety

Cumberland University

“Every feature we add — whether it’s intercoms, cameras, or access control — integrates seamlessly. It makes it simple for IT and security to stay ahead of potential issues while creating a safer environment for students and staff.”

Melissa Page,
Director of IT and Security

Safeguard Campus and Protect Students and Faculty

Fast track investigations with privacy in mind

- Quickly find critical footage across large campuses. Simply type a description or upload a photo to retrieve relevant video using AI-powered analytics.
- Trace a person's journey across multiple cameras and locations with AI-powered unified timeline, viewing their path on a floorplan for faster investigations.
- Protect student privacy with live face blur during real-time monitoring. Plus, easily blur the faces of uninvolved individuals when saving footage for review.

Mobile credentials simplify building entry

- Managing lost or misplaced keycards wastes time and resources. With mobile NFC credentials or the Verkada Pass app, students, faculty, and staff can use their smartphones to unlock select doors.
- For institutions using Atrium, a pre-built integration allows students to enter dorms that are Verkada access controlled with their Atrium ID cards.

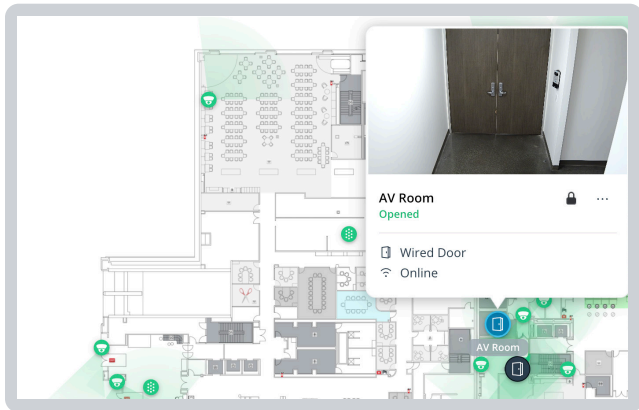

Stay ahead of perimeter threats

- Notify campus safety teams via SMS when AI-enabled cameras spot known offenders on campus for swift intervention.
- Verkada Alarms acts as a virtual extension of campus security, keeping watch over critical areas with 24/7 professional monitoring and video verification.

Monitor parking lots remotely

- Supervise parking lots at all times with cloud-based cameras powered by cellular gateways, enabling remote access to footage without costly cable runs.
- Easily set license plate of interest (LPOI) alerts to notify campus safety teams or local police when flagged vehicles approach parking lots.

Transform Emergency Response and Unify Security Systems

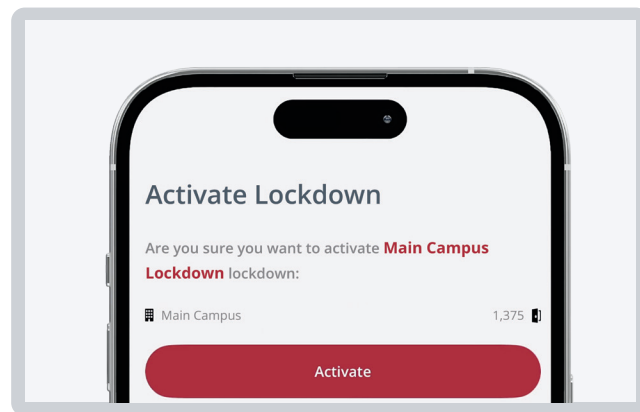

Power faster emergency response

- Stream camera feeds directly into campus security operations centers (SOCs), accelerating officer dispatch in response to critical incidents.
- Quickly send floorplans with embedded video feeds to campus safety teams or police via SMS or a direct link, guiding officers to the location of the threat.
- Remotely unlock doors to aid responders, while keeping the rest of campus safely locked down.

Trigger a one-tap lockdown

- Secure key building entryways with cloud-managed access control. Instantly lock down all critical exterior doors across campus with the press of a button from a smartphone or desktop, restricting access to select buildings.
- Set custom lockdown scenarios and specify which doors to secure, enabling a targeted response for a single building or the entire campus depending on the nature of the threat.

Centralize alerts and response

- Manage all physical security operations on one platform for connected, real-time campus intelligence.
- Transform security alerts into tickets, allowing teams to track, investigate, share, and resolve incidents — all from one place. Once tickets are closed, timestamped audit trails are created, supporting future security reviews.

Modernize blue light emergency stations

- Equip blue light stations with cloud-based cameras, video intercoms, and cellular or Wi-Fi gateways for reliable connectivity.
- Unlike traditional audio-only systems, Verkada video intercoms provide critical visual context — making it easier to assess the situation and respond directly to callers or route them to 911.

Optimize Campus Operations and Enhance Security

Enhance cybersecurity protection

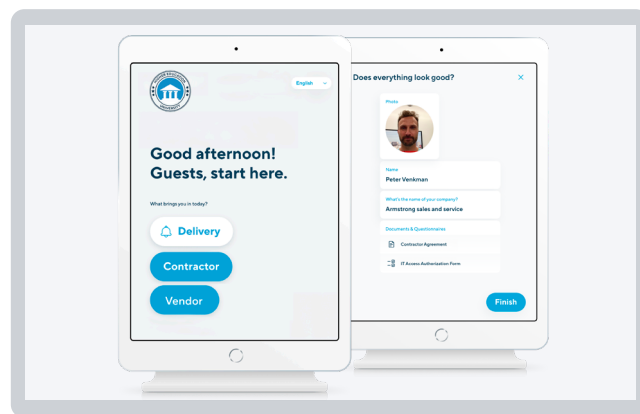

- Strengthen cybersecurity with granular, role-based user permissions, restricting camera viewing access to authorized users.
- Verkada encrypts data at rest and in transit. For added control, Enterprise Controlled Encryption lets your institution manage its own encryption keys, helping ensure video footage is accessible only to you.

Streamline access to campus services

- Simplify visitor check-in at residence halls, student services centers, and alumni offices with Verkada Guest, a digital visitor management system.
- Quickly issue temporary digital or physical credentials to visiting vendors or adjunct faculty, granting time-limited access to specific buildings.

Reduce burden on IT teams

- Take the pressure off IT with a cloud-native platform — no NVRs or onsite servers required, and 24/7 technical support to help devices run smoothly
- Simplify password management with support for single sign-on (SSO) and two-factor authentication (2FA).
- Automate user provisioning via SCIM integration or bulk CSV import to maintain up-to-date users and permissions.

Monitor temperature-sensitive environments

- Protect critical spaces — like IT closets, dining hall kitchens, and labs — with proactive alerts triggered when temperature or humidity exceeds set limits.
- Set HVAC systems to automatically respond to air quality readings via Verkada's BACnet integration. This helps maintain optimal conditions to prevent equipment failure, food spoilage, or other disruptions.

One Platform to Unify Higher Education Security

Video Security

Record 24/7 with AI-enabled cameras that store up to 365 days of footage. Choose from models that support privacy-sensitive features such as live or selective face blur.

Intercom

Protect entrances and modernize blue light stations with intercoms. Answer calls from anywhere with sharp video, clear two-way audio, and four smart receiver methods.

Mailroom

Optimize delivery management by tracking package drop-offs with a simple mobile scan and automatically notifying recipients upon delivery.

Access Control

Easily deploy cloud-based access control with Verkada wireless locks. Verkada Access Control allows you to remotely grant building access and automate door schedules.

Guest

Simplify visitor check-in at residence halls, student services centers, and alumni offices with a digital visitor management system. Issue digital or physical credentials for time-limited building access.

Connectivity

Easily deploy Verkada devices with cellular or Wi-Fi gateways in hard-to-wire locations like parking lots, gates, fields, and stadiums for reliable access to footage.

Alarms

Deter trespassing and vandalism with camera-based alerts after hours. Verkada Alarms acts as a virtual extension of campus security, with 24/7 professional monitoring and video verification.

Air Quality Sensors

Set custom alerts for temperature, humidity, and other air quality indicators to help prevent equipment failure, food spoilage, or disruptions to research environments across campus.

Viewing Station

Stream up to 300 live camera feeds from multiple sites into one centralized location and gain instant visibility across distributed campuses.

Try Verkada for free

Our 30-day free trial includes a device, two-way shipping, and full access to the Command management platform. Learn how we can support your smooth transition to the cloud by bridging non-Verkada devices to our cloud-based system.

Trusted by Colleges and Universities Globally
