

# Modern Cloud-Based Security for Schools

Protect students and staff in a privacy-sensitive manner with a unified physical security platform.

## Leading Cloud-Based Physical Security

Legacy systems are falling short of the rising safety needs of today's schools. Join a global community of K-12 organizations using Verkada's cloud-managed physical security platform to raise the standard for campus safety. Unify complex, siloed security systems under one platform to speed up investigations, enhance emergency response, and give school leaders greater peace of mind — all while protecting student privacy and enhancing cybersecurity.

## School Safety Advisory Board

We're proud to work alongside some of the most dedicated minds in school safety. Each member of our advisory board brings a unique perspective and deep commitment to protecting students and educators. Together, we're continuing our mission to protect people and places, so every student can learn, every educator can teach, and every family can feel confident their school is safe.

**Frank DeAngelis**

Former Principal of Columbine High School and founder of the DeAngelis Foundation, a nonprofit organization supporting school safety

**Pat Hamilton**

Alliance Director for the "I Love U Guys" Foundation, a nonprofit standardizing crisis response and reunification

**Ben Fernandez, M.S. Ed**

Director of Mental and Behavioral Health Programs at Safe and Sound Schools, a nonprofit school safety advocacy center

# Why Schools Choose Verkada

Experience a new level of simplicity with Verkada. All you need is the hardware and access to Command, our software platform, which updates automatically. Centrally manage all Verkada devices and users from any browser or mobile device. Gain actionable insights with information integrated across devices.

**Accelerate investigations** with instant alerts and optional AI-enabled analytics

**Empower administrative staff** with a user-friendly and intuitive system

**Access footage from anywhere** and monitor campus activity in real time

**Instantly share live camera feeds** with first responders and generate incident reports

**Protect student privacy** with live or selective face blur and privacy regions

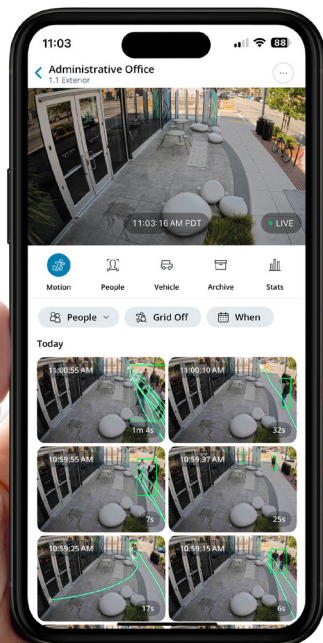

**Deter cybersecurity threats** with enhanced user security — SSO, 2FA, and SAML authentication

**Easy multi-site management** with granular, role-based user permissions

**IT-friendly** with bandwidth-efficient cameras and zero servers or NVRs to manage

**Up to 10-year warranty**, predictable renewal costs, and unlimited user seats

**Top-rated technical support** — available 24/7 via email, phone, or live chat

## Mountain View Los Altos Union High School District

“The ease of use has been transformative, and ultimately, this helps us keep our campuses safe across multiple cities.”

**Bob Fishtrom,**  
Director of  
IT Services

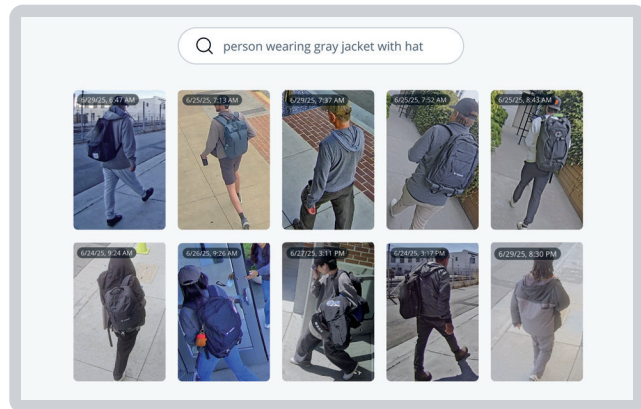

## Andrews Independent School District

“Not only is Verkada bandwidth-friendly, but we are able to share the footage with first responders really quickly and give them access to live camera feeds by simply sharing a link.”

**Dennis Haynie,**  
Executive Director  
of Technology

# Empower Safer Campuses for Students and Staff

## Search across bus video feeds in real time

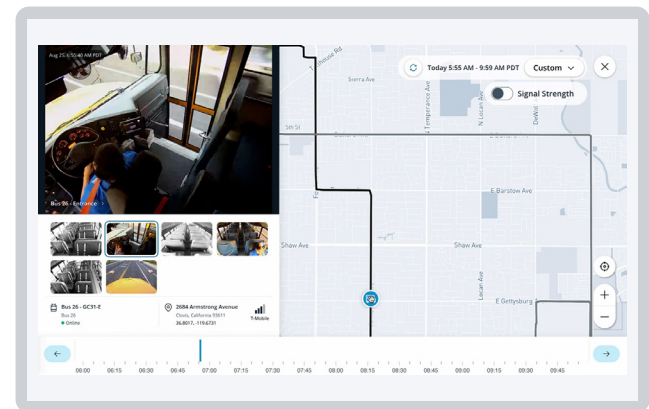

- Monitor your entire bus fleet with cloud-based cameras featuring on-device storage, powered by cellular gateways — no NVRs or servers needed.
- Easily track a vehicle's route on a digital map during a chosen timeframe and pull up footage from any point along the way using GPS video search.

## Stay ahead of perimeter threats

- Quickly spot unsafe visitors at school entrances and deny entry with Verkada Intercom in-call (POI) alerts.
- Once admitted, screen visitors against sex offender and criminal databases using Verkada Guest.
- Further enforce after-hours security with 24/7 live agent monitoring and video verification through Verkada Alarms.

## Speed up investigations with privacy in mind

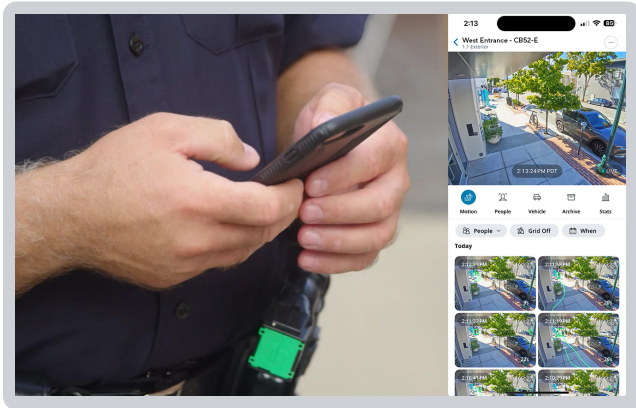

- Quickly find critical footage across campus. Simply type a description or upload a photo to retrieve relevant video.
- Trace a person's journey across multiple cameras and locations with AI-powered unified timeline, viewing their path on a floorplan for faster investigations.
- Protect student privacy with live face blur during real-time monitoring. Plus, easily blur the faces of uninvolved individuals when saving footage for review.

## Deter student vaping with proactive alerts

- Receive instant SMS alerts when air quality sensors detect vaping on campus.
- Deploy video monitoring in school hallways to provide visual context around vape alerts and the students involved. School leaders can track vaping trends to identify patterns and guide solutions.

# Accelerate Emergency Response and Enhance School Safety

## Coordinate faster with law enforcement

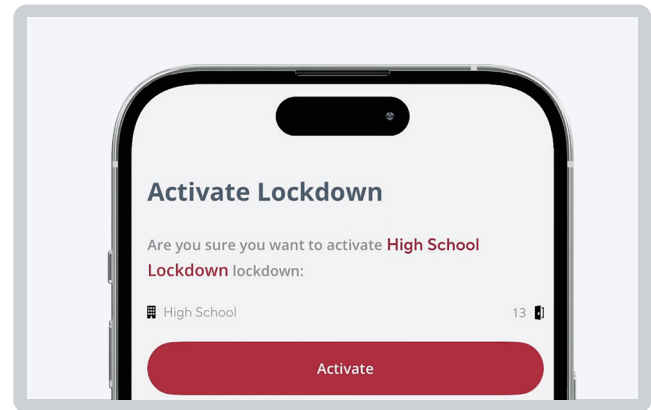

- Reduce incident response time by granting user access to law enforcement agencies or streaming camera footage directly to their Real-Time Crime Centers (RTCCs) through Verkada's Real-Time Streaming Protocol (RTSP).
- School leaders can share live floorplans via SMS or a direct link to reveal campus activity hotspots and assist responding officers onsite.

## Trigger a one-tap lockdown

- Initiate a campus-wide lockdown in a matter of seconds via desktop, mobile app, or a physical panic button, immediately restricting access to school buildings and classrooms.
- Reduce delays by remotely granting door access to law enforcement personnel, unlocking specific doors while keeping other doors locked.

## Monitor school air quality

- School administrators can analyze historical data from cloud-managed air quality sensors and apply these insights to reduce indoor air pollutants.
- Receive instant alerts for abnormal spikes in noise or temperature on campus, signaling a potential large gathering or student fight.

## Standardize post-emergency reunification

- After an active threat or natural disaster, educators can easily see a list of their students and mark them as accounted for on their smartphones.
- Next, guardians can check in at the front office via Verkada Guest, where first responders or staff will verify their identities and facilitate student reunification.

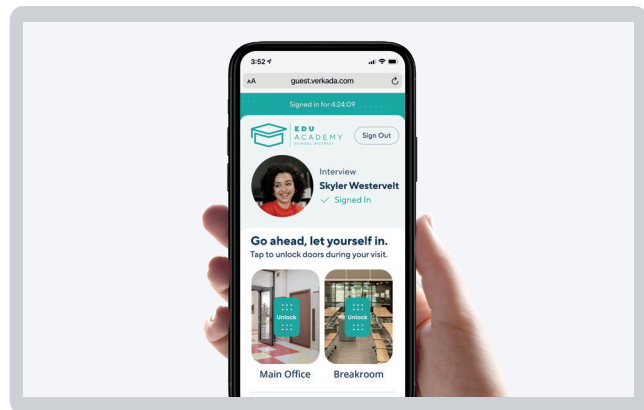

# Maximize Efficiency for Optimal Campus Operations

## Manage security operations with ease

- New staff members can download the Verkada Command mobile app and find, save, and share footage in minutes.
- An intuitive user interface and plug-and-play installation simplify maintenance and empower IT teams with simple cloud-based management.

## Streamline visitor check-ins and early dismissals

- Streamline student tardy tracking and early dismissal sign-outs with Verkada Guest, a digital visitor management that integrates with SIS platforms like PowerSchool, Clever, and ClassLink.
- Easily add returning visitors to approved guest lists for faster check-in via QR code or facial recognition.

## Increase safety during pick-ups and drop-offs

- Keep watch over parking lots and nearby streets.
- Capture license plates of unsafe drivers with powerful license plate recognition (LPR) technology and easily share this information with local law enforcement.
- Notify school resource officers when flagged vehicles approach the school for fast intervention.

## Simplify badge and keycard management

- Save time provisioning badges with cloud-based access control. Automatically issue physical badges, EV3 fobs, and mobile keycards to new staff — or instantly revoke them when someone leaves the organization.
- Quickly generate temporary mobile access credentials or physical badges for visitors using Verkada Guest.

# One Platform to Simplify School Security

## Video Security

Record 24/7 with AI-enabled cameras that store up to 365 days of footage. Choose from models that support privacy-sensitive features such as live face blur and privacy regions.

## Intercom

See who's at the school entrance. Grant building access to visitors remotely from the front desk. Know if a suspect returns to campus with in-call person of interest (POI) alerts.

## Mailroom

Optimize delivery management by tracking package drop-offs with a simple mobile scan and automatically notifying recipients upon delivery.

## Access Control

Automatically provision or revoke staff credentials via SCIM and SAML integrations. Remotely grant building access and automate door schedules with cloud-based access control.

## Guest

Streamline check-ins and screen visitors against sex offender and criminal databases. Track student tardiness and early dismissals via integrations with Powerschool, Clever, and ClassLink.

## Connectivity

Easily deploy Verkada devices with cellular or Wi-Fi gateways in hard-to-wire locations like parking lots, gates, fields, and stadiums.

## Alarms

Deter trespassing and vandalism with cloud-managed alarms and intrusion detection. Reduce false alarms with built-in professional monitoring and video verification.

## Air Quality Sensors

Set custom alerts for noise, vape, CO2, TVOCs, particulate matter, formaldehyde, and other air quality indicators to detect potential health hazards on campus.

## Viewing Station

Stream up to 300 live camera feeds from multiple sites into one centralized location and gain instant visibility across your campus or district.

## Try Verkada for free

Our 30-day free trial includes a device, two-way shipping, and full access to the Command management platform. Learn how we can support your smooth transition to the cloud by bridging non-Verkada devices to our cloud-based system.
