

# Use Arduino for Projects

## Advanced View Arduino Projects List

### List of Projects using arduino with advance view:

- 

1.

[HID Attack Over WiFi Using Arduino MKR1000](#) Arduino MKR1000 as a HID, for performing HID penetration testing over WiFi networks. Things used in this project Hardware components Arduino MKR1000 × 1 Story Arduino MKR1000 Today I have an Arduino MKR1000 which is a board with built-in wifi chipset specially designed for IOT..... Listed under: [Arduino Programmer Projects](#), [Wifi - Wlan Projects](#)
- 

2.

[Dash Button Santa with Arduino MKR1000](#) Send information to Santa Claus about the status of the gift request. Things used in this project Hardware components Arduino MKR1000 × 1 SparkFun Pushbutton switch 12mm × 1 Jumper wires (generic) × 1 Resistor 10k ohm × 1 NeoPixel strip × 1 Software apps..... Listed under: [GPS Based Projects](#), [Internet – Ethernet – LAN Projects](#)
- 

3.

[Add SSL Certificates To MKR1000](#) Cannot connect to your favourite https site with your MKR1000? Follow this guide to install SSL certificate in a easy way using the GUI. Things used in this project Hardware components Arduino MKR1000 × 1 Software apps and online services Arduino IDE Arduino Firmware updater..... Listed under: [Arduino Programmer Projects](#)
- 

4.

[NTP Clock](#) In this project, we will learn the basics of User Datagram Protocol (UDP). We will request and receive time from the NTP server using the above communication protocol. The 4Duino display is utilised to print the received time in both, digital and analogue clock format..... Listed under: [Clock – Timer Project Ideas](#)
- 

5.

[Water Quality Monitoring Using MKR1000 and ARTIK Cloud](#) Water quality data monitoring for swimming pools, fish aquarium and more! Things used in this project Hardware components Arduino MKR1000 × 1 Jumper wires (generic) × 1 DFRobot pH Meter × 1 Resistor 4.75k ohm × 1 Temperature probe × 1 Software apps and online..... Listed under: [Temperature Measurement Projects](#)
- 

6.

[Servo Control Using 4Duino](#) In this project, we will control the angular position of the DC Servo Motor via an I/O port (with PWM output capability) and touch knob. The 4Duino resistive touch display is used as a means for a graphical interface to control the angular position of..... Listed under: [Arduino Motor Project Ideas](#)
- 

7.

[Electronic Piano](#) In this project, we will learn how to use an Active Buzzer and a 4Duino to create an Electronic Piano. An active buzzer is an electric piezo device which is commonly used to produce sound. When subjected to an alternating electric field, a piezo ceramic..... Listed under: [Sound – Audio Project Ideas](#)
- 

8.

[LED Matrix Controller](#) In this project, we will use the digital pins and screen of the 4Duino to create a 5×7 LED matrix controller with a user graphical interface. An LED matrix is essentially many LEDs packaged in a dot grid format in order to produce pictures or..... Listed under: [Arduino LED Project Ideas](#)
- 

9.

[4Duino LED Brightness Control](#) In this project, we will learn how to control the brightness of LED via an I/O port (with PWM output capability) and a touch display slider. The 4Duino resistive touch display is used as a means for a graphical interface to control the intensity of..... Listed under: [Arduino LED Project Ideas](#)
- 

10.

[Weather Dashboard with MKR1000 and Losant](#) This project is about building a simple weather dashboard using MKR1000 and Losant platform. Things used in this project Hardware components Arduino MKR1000 × 1 DHT11 Temperature & Humidity Sensor (4 pins) × 1 Software apps and online services Arduino IDE Losant Platform Story Introduction..... Listed under: [Sensor – Transducer – Detector Projects](#), [Wifi - Wlan Projects](#)
- 

11.

[LED Control Using Touch Button](#) In this project, we will learn how to turn an LED ON or OFF via the 4Duino I/O port (D13) and a button widget from 4D Workshops. The 4Duino's resistive touch display is used as a means for a graphical interface to control state of..... Listed under: [Arduino LED Project Ideas](#)
- 

12.

[IoT Smart Socket Arduino And Cayenne](#) A really smart IoT socket. Switch ON/OFF your device by the smartphone using Cayenne Dashboard and Arduino MKR1000. Things used in this project Hardware components Arduino MKR1000 × 1 RobotGeek Relay × 1 9V 1A Switching Wall Power Supply × 1 Software apps and online..... Listed under: [Projects](#), [Tutorials](#)
- 

13.

[Build A LDR Sensor Monitoring The Room Temperature](#) In this project we will monitor the room temperature using a LDR\_NSL19\_M51 light dependent resistor (LDR) and 4Duino. The resistance of the LDR varies significantly with ambient light hence it can detect surrounding light intensity changes in real time. In this project 4Duino's resistive touch..... Listed under: [Sensor – Transducer – Detector Project Ideas](#)
- 

14.

[4Duino Ultrasonic Sensor](#) In this project we will measure the distance of the nearby object using TS601-01 Ultrasonic sensor and 4Duino. An ultrasonic sensor has a transmitter (sends ultrasonic signals) and a receiver (receives the ultrasonic signal after it bounced off nearby object).

15.

[Using Python and Arduino MKR1000 for Secure IoT](#) Getting started with Python and Arduino MKR1000 for secure IoT projects. Things used in this project Hardware components Arduino MKR1000 × 1 Software apps and online services Zerynth Studio Story Arduino MKR1000 meets Python With the last release, Zerynth officially supports Arduino MKR1000, a device specifically designed..... Listed under: [Development Board – Kits Projects](#)
16.

[Obstacle Detection Using 4Duino](#) In this project, we will use several ultrasonic sensors to create a robot car with obstacle detection feature. The sensors will help us estimate the distance of the car from the nearby obstacles. Thus allowing us to create routines that we can execute when the..... Listed under: [Robotics – Automation Project Ideas](#)
17.

[Home Automation with Arduino MKR1000 and Windows 10](#) Home Automation through Wi-Fi connectivity (Arduino MKR1000) and Windows 10. Things used in this project Hardware components Arduino MKR1000 × 1 Relay (generic) Input: 3V × 1 General Purpose Transistor NPN × 1 1N4007 – High Voltage, High Current Rated Diode × 1 Resistor 10k..... Listed under: [Home Automation Projects](#)
18.

[MP3 Player using 4Duino and SOMO-II](#) The Sound Module-II or the SOMO-II is a small and efficient audio module from 4D Systems that is able to play .mp3 or .wma audio files in the convenience of accessing it within a microSD card or a USB Flash drive (by using external components)..... Listed under: [Sound – Audio Project Ideas](#)
19.

[Intelligent Buggy featuring 4Duino-24](#) 4Duino Intelligent Buggy project demonstrate how does uCAM-II works. This project also utilized two 4duino communicating using Server-Client architecture over TCP. It also uses a buggy car which carry the 4duino server and uCAM-II. By using built-in ESP8266, 4duino client sends a request to 4duino..... Listed under: [Wireless Projects](#)
20.

[GPIO Control from Web Browser featuring 4Duino-24](#) In this project, we will learn how to control the on board 4Duino LED via I/O port (D13) from web browser. In built ESP8266 Wi-Fi module is configured as server enabling the 4Duino to receive commands from a web browser (client). How it works Note:..... Listed under: [Security – Safety Project Ideas](#)
21.

[Send MKR1000 Data to Google Sheets](#) This project allows you to transmit DHT environmental data from your MKR1000 to your own customizable Google Sheet for data logging. Things used in this project Hardware components Arduino MKR1000 × 1 DHT11 Temperature & Humidity Sensor (4 pins) × 1 Jumper wires (generic) ×..... Listed under: [Other Projects](#)
22.

[Pet Food Dispenser featuring 4Duino-24](#) In this project, we will use a 4Duino and several IR sensors to create a simple pet food dispenser. 4Duino checks whether a food tray contains enough food or not. It is programmed to read IR values from each sensor. These values change depending on the..... Listed under: [Sensor – Transducer – Detector Projects](#)
23.

[DC Motor featuring 4Duino-24](#) In this project, we will learn how to control the speed and direction of a DC motor via I/O ports with PWM output capability, a L293D quad half-h drivers IC and 4D Workshop widgets. In its simplest form, a DC motor has two wires which..... Listed under: [Arduino Motor Project Ideas](#)
24.

[MKR1000 to Initial State DHT Visualizations](#) This demonstrates how to use your Arduino MKR1000 to connect to InitialState.com to produce colorful visualizations of your sensor data. Things used in this project Hardware components Arduino MKR1000 × 1 DHT11 Temperature & Humidity Sensor (4 pins) × 1 Breadboard (generic) × 1 Jumper..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#), [Sensor – Transducer – Detector Projects](#)
25.

[Assistance for Visually Impaired featuring 4Duino-24](#) Blind Assistance is a project designed to help visually impaired people detecting obstacles in their way. It uses 4Duino, three ultrasonic sensors, one vibration motor and an LED. These components are attached to a walking stick. Blind Assistance alarms the user if there's an obstacle..... Listed under: [Wireless Projects](#)
26.

[MKR1000 Surprise Room Decoration](#) This project is dedicated to my parents, but you can also use it for surprise events for someone special. Things used in this project Hardware components Arduino MKR1000 × 1 5V 4 Channel Relay Module × 1 Male/Female Jumper Wires × 12 Software apps and..... Listed under: [LED Projects](#), [Other Projects](#)
27.

[DJ Mixer featuring 4Duino-24](#) The 4Duino DJ Mixer is a fun and interactive project similar to a keyboard MIDI Controller that has the ability to play sample beats and songs. Before, DJ and music artist needs to use computers, recording and playback devices before they can mix and play..... Listed under: [Sound – Audio Project Ideas](#)
28.

[MKR1000 Servo Control Panel](#) A servo controller using the built-in WiFi abilities of the Arduino MKR1k. The panel consists of a MKR1k web listener and Javascript/ajax. Things used in this project Hardware components Arduino MKR1000 Servos (Tower Pro MG996R) Breadboard..... Listed under: [Arduino Programmer Projects](#), [Development Board – Kits Projects](#), [Projects](#)
29.

[WiFi Temperature Sensor featuring 4Duino-24](#) In this project we will quickly create a 'temperature monitor' that measures the ambient temperature of a room or an outdoor space. The temperature is measured by TMP35 temperature sensor and is displayed on the 4Duino screen. The data is also sent to Thingspeak IoT..... Listed under: [Temperature Measurement Project Ideas](#)
30.

[Voting Machine featuring 4Duino-24](#) The 4Duino Polling Machine is an inquiry project that involves two or more people and has implemented the ability to send and receive data on both ends. The Polling Machine Project works by sending and receiving Questions and Answers (from the Choices) in the form..... Listed under: [Security – Safety Projects](#)
31.

[MKR1000 Universal Remonster!](#) WiFi connected universal remote with smart phone webapp. Things used in this project Hardware components Arduino MKR1000 Arduino Nano R3 General Purpose Transistor NPN Triggers the PNP transistors of IR LED array Resistor 1k ohm pulls down NPN transistor IR transmitter (generic) IR LEDs. Get Listed under: [LED Projects](#), [Wifi - Wlan Projects](#), [Wireless Projects](#)

- 

32.

[Home Security featuring 4Duino-24](#) Home Security project is a password oriented security device. This uses 4Duino display as the user interface where the password can be entered. 4Duino is also used as the host device in this project. It handles a buzzer, an ultrasonic sensor, a uCAM-II and a..... Listed under: [Security – Safety Project Ideas](#)
- 

33.

[Stock Monitoring featuring 4Duino-24](#) In this project, we will use several IR sensors to check if an item from an inventory box is present or not. This project makes use of a 4Duino-24 to check whether an item is present or missing from the inventory. The 4Duino uses its..... Listed under: [Sensor – Transducer – Detector Projects](#)
- 

34.

[MKR1000 Robot Controlled Via WiFi Using Arduino](#) This project consists of a small robot controlled via WiFi using an Arduino MKR1000, MKR2UNO Shield Adapter and Arduino Motor Shield! Things used in this project Hardware components Arduino MKR1000 × 1 Arduino MKR2UNO Adapter × 1 Arduino MotorShield Rev3 × 1 Arduino Small DC..... Listed under: [Battery Projects](#), [Robotics – Automation Project Ideas](#)
- 

35.

[Wireless Pulse Rate Monitor featuring 4Duino-24](#) The Wireless Pulse-Rate monitor is a conceptual project made for hospitals and clinics, its main function is to minimise the time that nurses or doctors need to visit each patient in a hospital. Usually, Doctors and nurses visit each patient to check vital signs, by..... Listed under: [Sensor – Transducer – Detector Project Ideas](#)
- 

36.

[Arduino based Vehicle Tracker using GPS and GSM](#) In our previous article, we have learned about “How to interface GPS module with Computer and How to make a GPS updated Clock”. In this project we are going one step ahead with GPS and going to track a vehicle using GPS and GSM. This Vehicle Tracking..... Listed under: [Arduino LCD Project Ideas](#)
- 

37.

[Temperature and Humidity monitoring with DHT22 sensor Arduino Uno R3](#) The objective of this tutorial is to learn how to use the DHT22 sensor with Arduino uno. The room temperature and humidity will be printed to serial monitor and also will be displayed to the LCD 4×20 in Proteus ISIS. [caption id="attachment\_28379" align="aligncenter" width="300"] DHT22..... Listed under: [Temperature Measurement Projects](#)
- 

38.

[Controlling RGB LED using Arduino and Wi-Fi](#) In last tutorial, we explained controlling a Robot using Wi-Fi and Arduino, and in this article we are with our next IOT Based Project- RGB LED Flasher using Wi-Fi. Here we have used Arduino and ESP8266 Wi-Fi Module to control the colors of RGB LED, through a Android..... Listed under: [Phone Project Ideas](#)
- 

39.

[Getting Started with Arduino Due](#) ARDUINO DUE is an ARM controller based board designed for electronic Engineers and Hobbyists. ARM architecture is very influential in modern electronics. We are using the ARM architecture based controllers everywhere. For example we are using ARM controllers in our mobiles, iPods and computers etc. .... Listed under: [Arduino LED Project Ideas](#)
- 

40.

[PWM with Arduino Due](#) Arduino Due is an ARM controller based board designed for electronic engineers and hobbyists. ARM architecture is very influential in modern electronics, we use them everywhere like our mobiles, iPods and computers etc. If someone wants to design industrial systems it must on ARM controllers..... Listed under: [Arduino LED Project Ideas](#)
- 

41.

[Digital voltmeter using Arduino UNO Range:0-50 volt Using SIMULINO UNO](#) This is a simple project showing you how to make a digital voltmeter using Arduino where the readings are displayed in a Liquid Crystal Display LCD20x4. The proposed voltmeter design can read up to 50V. We are using analogue to digital conversion process. Arduino microcontroller..... Listed under: [Metering – Instrument Project Ideas](#)
- 

42.

[Servo Motor Control with Arduino Due](#) As discussed earlier, Arduino Due is an ARM controller based board designed for electronic engineers and hobbyists. This DUE board can be used for making CNC machines, 3D printers, robotic arms etc. All these projects have a common feature that is Position Control. Any of..... Listed under: [Arduino Motor Project Ideas](#)
- 

43.

[Make Arduino Based Home Automation Part-1 Using ARDUINO UNO R3](#) Hello every one welcome back . In this project tutorial I will show you how to make arduino based home automation , this means you can control all of your home appliances and devices using a single microcontroller . This Tutorial is divided into two..... Listed under: [Home Automation Project Ideas](#)
- 

44.

[Arduino Based Digital Clock with Alarm](#) This Arduino based Real time clock is a digital clock to display real time using a RTC IC DS1307 which works on I2C protocol. Real time clock means it runs even after power failure. When power is reconnected, it displays the real time irrespective to the time and duration..... Listed under: [Clock – Timer Project Ideas](#)
- 

45.

[Make Arduino Based Home Automation Part-2 \(wireless\) Using ARDUINO UNO R3](#) Hello welcome back . This is second part of the wireless home automation . In previous part we have connected home appliance with relay and controlled with arduino . In this part we are going to add wireless feature of that device . One arduino..... Listed under: [Home Automation Project Ideas](#)
- 

46.

[Smart Phone Controlled Digital Code Lock using Arduino](#) There are many types of security systems used all over the world and Digital Code Lock is one of them. We have already covered many digital locks with simple 16x2 LCD using Arduino, Raspberry Pi, 8051 etc. Here we are going to build a Smart Phone..... Listed under: [Security – Safety Projects](#)
- 

47.

[AUTOMATIC DOOR OPEN SYSTEM WITH VISITOR COUNTER PART-1 Using ARDUINO UNO R3](#) Hello every body welcome back . In today's arduino blog I am going to show you how you can make a automatic door opening system when some one wants to enter your room the PIR motion sensor detects the motion of moving body and sends..... Listed under: [Blog](#), [Home Automation Project Ideas](#)
- 

48.

[Create a Private Chat Room using Arduino, nRF24L01 and Processing](#) Creating a Local Network to share personnel and confidential data's has become almost impossible for a common man in our modern world. This is mainly because all common chat methods like Whatsapp, Facebook, Hangout and almost everything involves an internet connection. What if, we could..... Listed under: [Wireless Projects](#)

- 
50.  [Smart Phone Controlled FM Radio using Arduino and Processing](#) In this project we will use an existing FM radio which went repair a long time ago, to convert it into a Smart Wireless FM Radio controlled using Phone, with the help of Arduino and Processing. We can convert any manually operated electronic device into..... Listed under: [Wireless Projects](#)
51.  [Door Alarm using Arduino and Ultrasonic Sensor](#) Security has always been a major concern for all of us and there are many Hi tech and IoT based security and surveillance system are available in the market. Intruder or Burglar Alarm is one of the classic and popular project among the Electronics students..... Listed under: [Security – Safety Projects](#)
52.  [Real Time Home Automation Using Arduino Uno R3 and DS1307 RTC \(Part-1\)](#) Hello every one , welcome back . In this new arduino tutorial series I'm gonna show you how to control every thing in your home on time basis . After doing this project you will be able to control your home appiliences like TV ,..... Listed under: [Home Automation Projects](#)
53.  [0-24v 3A Variable Power Supply using LM338](#) Batteries are generally used to power up the Electronic Circuit and Projects, as they are easily available and can be connected easily. But they drained off quickly and then we need new batteries, also these batteries cannot provide high current to drive a powerful motor..... Listed under: [Motor Projects](#)
54.  [Connecting multiple I2C device on Arduino Uno R3](#) In this project, we will show how to connect multiple I2C devices to an arduino microcontroller. The I2C bus is a bus which enables high-speed two-way communication between devices while using a minimal number of I/O pins to facilitate communication. An I2C bus is controlled..... Listed under: [Arduino Programmer Projects](#)
55.  [Smart Phone Controlled Home Automation Using Arduino](#) Automation is the essence of today's world. Automation can make our life easy and secure. There are many ways to obtain automation. Automation can be achieved by Wi-Fi, IR, GSM, Bluetooth and many other technologies. Previously we have covered many types of Home automations using different technologies..... Listed under: [Security – Safety Project Ideas](#)
56.  [Arduino Radar System using Processing Android App and Ultrasonic Sensor](#) This is an interesting project in which we explore the power of an Arduino and Android to create a Surveillance device which uses Arduino and Ultra Sonic Sensor to broadcast the information to a mobile application (Android) using Bluetooth. Safety and Security has been our..... Listed under: [Security – Safety Project Ideas](#)
57.  [DIY Speedometer using Arduino and Processing Android App](#) In this project we make a Cool Speedometer for bikes or any automotives by using Arduino which broadcast the speed using Bluetooth to an Android application that we created using Processing. The complete project is powered by an 18650 Lithium cell and hence highly portable along with your vehicle..... Listed under: [Bluetooth Projects](#)
58.  [Virtual Reality using Arduino and Processing](#) This is a very interesting project in which we are going to learn how to implement virtual reality using Arduino and Processing. For most of us, the movie Iron man by Jon Favreau has always been an inspiration to build new things that will make..... Listed under: [Wireless Projects](#)
59.  [Arduino based Bluetooth Biped Bob \(Walking & Dancing Robot\)](#) Welcome to another project in which we will build a small Robot which can walk and dance. The project aims in teaching you how to make small hobby robots using Arduino and how to program your Servo motors for such applications. At the end of..... Listed under: [Robotics – Automation Project Ideas](#)
60.  [Real Time Face Detection and Tracking Robot using Arduino](#) Ever wanted to build a Face Tracking Robotic Arm or Robot by simply using Arduino and not any other programming like OpenCV, visual basics C# etc? Then read along, in this project we are going to implement face detection by blending in the power of..... Listed under: [Robotics – Automation Project Ideas](#)
61.  [Interfacing SSD1306 OLED Display with Arduino](#) Most of us would be familiar with the 16x2 Dot matrix LCD display that is used in most of the projects to display some information to the user. But these LCD displays have a lot of limitation in what they can do. In this tutorial..... Listed under: [Arduino LED Project Ideas](#)
62.  [How to Send Data to Web Server using Arduino and SIM900A GPRS/GSM Module](#) Today we are here with an interesting project in which we will Send Data to the SparkFun server using Arduino and GPRS. This is an IoT based project in which we will use GPRS, present on the GSM Module SIM900A board, to send some data to..... Listed under: [Wireless Projects](#)
63.  [Arduino Data Logger \(Log Temperature, Humidity, Time on SD Card and Computer\)](#) As Engineers/Developers we always rely upon the data collected to design or improve a system. Recording data and analyzing them is a common practice in most of the industries, here we are building Arduino Data Logger Project where we will learn how we can log..... Listed under: [Temperature Measurement Project Ideas](#)

[– Transducer – Detector Project Ideas](#)

65.

[Smart Knock Detecting Door Lock using Arduino](#) Security is a major concern in our day to day life, and digital locks have become an important part of these security systems. There are many types of security systems available to secure our place. Some examples are PIR based Security System, RFID based Security..... Listed under: [Security – Safety Projects](#)
66.

[Fingerprint Based Biometric Voting Machine using Arduino](#) We all are quite familiar with Electronic Voting Machines, where your vote gets registered electronically and you don't need to use ballot paper to vote in election. Today security is a major concern and it also needs to be ensured that someone can't vote twice,..... Listed under: [Sensor – Transducer – Detector Projects](#)
67.

[Arduino based Angry Bird Game Controller using Flex Sensor and Potentiometer](#) It's all started with a small game from the dark ages called "Mario", right from the time of being a tiny little guy jumping on ducks to save my princess till being a masculine handsome Prince roaming in Persia (Prince of Persia) fighting against darkness..... Listed under: [Game – Entertainment Project Ideas](#), [Game – Entertainment Projects](#)
68.

[Fingerprint Based Biometric Attendance System using Arduino](#) Attendance systems are commonly used systems to mark the presence in offices and schools. From manually marking the attendance in attendance registers to using high-tech applications and biometric systems, these systems have improved significantly. In our previous projects, we have covered few other electronic attendance system projects using..... Listed under: [Arduino LCD Project Ideas](#)
69.

[Arduino Motion Detector using PIR Sensor](#) Detecting motions or movements has always been important in most projects. With the help of the PIR Sensor it has become very easy to detect human/animal movements. In this project we will learn how we can interface a PIR Sensor with a microcontroller like Arduino..... Listed under: [Sensor – Transducer – Detector Projects](#)
70.

[DC-DC Buck Converter Circuit – How to Step Down DC Voltage](#) In this project we are going to make a Buck Converter Circuit using Arduino and N-Channel MOSFET with a maximum current capacity of 6 amps. We are going to step down 12v DC to any value between 0 and 10v DC. We can control the..... Listed under: [Motor Projects](#)
71.

[Arduino Based Digital Ammeter](#) Ammeter is used to measure current flow through any load or device. Here in this Arduino Ammeter, we will explain about measuring of current by using ohm's law. It will be quite interesting as well as a good application of basic science that we studied..... Listed under: [Sensor – Transducer – Detector Projects](#)
72.

[Control your Computer with Hand Gestures using Arduino](#) Recently Gesture controlled Laptops or computers are getting very famous. This technique is called Leap motion which enables us to control certain functions on our computer/Laptop by simply waving our hand in front of it. It is very cool and fun to do it, but..... Listed under: [Sensor – Transducer – Detector Project Ideas](#)
73.

[Arduino DC Motor Speed and Direction Control using Relays and MOSFET](#) In this project we control direction and speed of a 24v high current motor using Arduino and two relays. No power switches are needed for this circuit, just two push buttons and in Potentiometer to control the direction and speed of DC Motor. One push button..... Listed under: [Motor Projects](#)
74.

[Automatic AC Temperature Controller using Arduino, DHT11 and IR Blaster](#) An AC (Air Conditioner) which was once considered to be a luxury item and was only to be found in big hotels, movie halls, restaurants etc... But, now almost everyone has a AC in our home to beat out the summer/winter and those who have..... Listed under: [Temperature Measurement Projects](#)
75.

[Interfacing Hall Effect Sensor with Arduino](#) Sensors have always been a vital component in any Project. These are the ones which convert the real real-time environmental data into digital/variable data so that it can be processed by electronics. There are many different types of sensors available in the market and you..... Listed under: [Sensor – Transducer – Detector Projects](#)
76.

[Cell Phone Controlled AC using Arduino and Bluetooth](#) In today's modern world, where ever we go we have lots of electronic devices around us. But, out of all, there is only one device that we personally have in our pockets all the time. Yes, it is our mobile phones. Now Mobile phones have..... Listed under: [Phone Projects](#)
77.

[AnduinWiFi Getting Started](#) Consider this the "Blinky LED" of the anduinWiFi shield! Things used in this project Hardware components Anduin Anduin WiFi × 1 Arduino Due × 1 Arduino Zero & Genuino Zero × 1 Software apps and online services Arduino IDE Story Motivation Implementing an IoT prototype..... Listed under: [Projects](#), [Wifi - Wlan Projects](#)
78.

[How To Measure Distance Between Two Ultrasonic Sensors](#) Ultrasonic sensor (HC-SR04) is commonly used to find the distance of an object from one particular point. It has been fairly easy to do this with the Arduino and the code is also pretty simple. But in this article we are going to try something..... Listed under: [Calculator Projects](#), [Metering – Instrument Projects](#)
79.

[Temperature Controlled AC Home Appliances using Arduino and Thermistor](#) Suppose you are sitting in a room and feeling cold and you want your heater to be automatically turned on, and then off after some time when room temperature is increased, then this project help you to control your home appliances automatically according to the..... Listed under: [Battery Projects](#), [LCD Projects](#)
80.

[Arduino Relay Control Tutorial](#) LED Blinking is a very common and almost first program for every embedded learner or beginner. In which we blink an LED with having some delay. So today we are here with the same project but here we will use an AC bulb instead of..... Listed under: [Arduino Programmer Projects](#), [LED Projects](#)

- 

commonly measured..... Listed under: [Arduino Programmer Projects](#), [Phone Projects](#)
- 

82. [Arduino Metal Detector](#) Metal Detector is a security device which is used for detecting metals which can be harmful, at various places like Airports, shopping malls, cinemas etc. Previously we have made a very simple Metal detector without a microcontroller, now we are building the Metal Detector using..... Listed under: [Arduino Programmer Projects](#), [Battery Projects](#)
- 

83. [Smart Blind Stick using Arduino](#) Ever heard of Hugh Herr? He is a famous American rock climber who has shattered the limitations of his disabilities; he is a strong believer that technology could help disabled persons to live a normal life. In one of his TED talk Herr said "Humans..... Listed under: [Arduino Programmer Projects](#), [LCD Projects](#)
- 

84. [Arduino Calculator using 4x4 Keypad](#) Programming is always fun and Arduino is a wonderful platform if you are just getting started with Embedded programming. In this tutorial we will build our own calculator with Arduino. The values can be sent in through a keypad (4x4 keypad) and result can be..... Listed under: [Battery Projects](#), [Blog](#), [Calculator Projects](#), [LCD Projects](#)
- 

85. [Build Your FM Transmission Station With Arduino](#) Hi every body . Before A 3 months Ago , one of my friend ask me to build a Simple FM transmitter , he Would to transmit An Audio File from computer and PLAY it on any radio channel , By adjust the frequency of..... Listed under: [Radio Project Ideas](#)
- 

86. [Temperature and Humidity Data Logger using Arduino](#) In this project, we are going to make a temperature and relative humidity data logger. Arduino is the brain of this project. DHT22 sensor is used for sensing temperature and relative humidity. Arduino Uno is programmed to read temperature, humidity values from DHT22 sensor and..... Listed under: [Calculator Projects](#)
- 

87. [Digital Thermometer using Arduino and DS18B20 Sensor](#) In this project, we are going to make a Digital Thermometer using Arduino Uno. We will use DS18B20 temperature sensor to sense the temperature and Nokia 5110 LCD to display it. DS18B20 is a 1-Wire digital temperature sensor manufactured by Maxim Integrated and is capable..... Listed under: [Calculator Projects](#), [LCD Projects](#)
- 

88. [Laura: Emotional Compass Lamp](#) Story Laura Laura is a "counseling" lamp who is helping me to find myself and to understand where I want to go. For her great help, I wanted to give her a present that represents the work we are doing. The inspiration came from the..... Listed under: [Home Automation Projects](#)
- 

89. [ATtiny85 EMF Detector](#) Story This is a simple tutorial to create an EMF detector. You can use Arduino for this job, but is better use a microcontroller called Attiny85. It is possible program it throe the Arduino interface. What is a Magnetic Field [from Wikipedia] An electromagnetic field..... Listed under: [Sensor – Transducer – Detector Projects](#)
- 

90. [IoT Pet Feeder: Use circuito.io to build a smart food dispenser for your pet](#) Story This IoT pet feeder is our first IoT project with circuito.io! We are happy to share it with our community to demonstrate how simple it can be to make basic IoT projects with circuito.io. We are also excited to share this project with you..... Listed under: [Home Automation Projects](#)
- 

91. [Make your own gesture-controlled Wizard's Walking Staff](#) Story This project uses the Arduino 101, a battery and an LED strip to make a gesture-controlled Wizard's Walking Staff. We'll define three different light-display "spells" you can summon by moving the staff in one of three gestures. Tech: The code uses the Inertial Measurement..... Listed under: [Other Projects](#)
- 

92. [MorseCard – A Tiny Telegraph Station](#) Story Behold: the MorseCard! Fulfill your dreams of becoming a telegraph operator (or just make something cool to show your friends) with this weekend project. The MorseCard features a high-contrast OLED screen that will decipher whatever you tap out. I have written a variety of..... Listed under: [Other Projects](#)
- 

93. [Starry Night Prom: How did I stand out at prom? In a light up dress of course!](#) About So for my Junior prom, I really wanted a dress I had seen online that was blue with a sequin ombre, but it was out of my price range, and way too voluminous. My mom and I had made my Homecoming dress the year..... Listed under: [Other Projects](#)
- 

94. [DIY Voltmeter with Arduino and a Nokia 5110 Display](#) Story In this tutorial I am going to show you how to build a Voltmeter with a big Nokia 5110 LCD display using Arduino. Building a voltmeter is a great learning experience. When you finish building this project, you will have a better understanding of..... Listed under: [Metering – Instrument Projects](#)
- 

95. [Plant Monitoring System using AWS IoT](#) Story Picture this you are going on a vacation for a week or so and are worried about your house plant at home.Here is a great project to under take a week before you head out for your vacation. Build yourself a plant monitoring and notification system..... Listed under: [Home Automation Projects](#)
- 

96. [LedMatrix Tweet Visualization](#) Story Description Display tweets with a certain hashtag on a led-matrix using an Arduino/Genuino Yùn or Yùn-Shield. We will use a Python script to log into twitter and check for updates. Configuring the Yun101/YunShield In order to connect your board to internet you first have..... Listed under: [Other Projects](#)
- 

97. [Purdue ExoMIND Glove A Wearable Device](#) Description The ExoMind Glove is a wearable device equipped with 7 accelerometers that are used to quantify forearm, wrist, and finger angles. Additionally, an EMG with conductive fabric electrodes is secured into the sleeve of the device to monitor muscle activity. The glove houses an..... Listed under: [Medical – Health based Projects](#)

communicate with..... Listed under: [Other Projects](#)

99.
- [Arduino101 / tinyTILE BLE: Match-Making Sunglasses](#) Story Instead of using an app, what if you could send a signal to eye-contact someone you are interested in talking to, in a social setting, even from afar? I'm not proposing a different way to start a date. I'm exploring a new usage of..... Listed under: [Game – Entertainment Projects](#)

100.
- [Paint Your Dimmer Switch on the Wall](#) Motivation What to do you do when you have some Bare Conductive paint and some Philips Hue lightbulbs laying around? You paint a dimmer switch on your wall using conductive paint! Getting Started Some things you'll need to get started: Arduino Due (or Zero) AnduinoWiFi..... Listed under: [Home Automation Projects](#)

101.
- [Using Nokia 3310 84×48 LCD with Arduino](#) Story The Nokia 5110 is a basic graphic LCD screen for lots of applications. It was originally intended to be used as a cell phone screen. This one is mounted on an easy to solder PCB. It uses the PCD8544 controller, which is the same..... Listed under: [Phone Projects](#)

102.
- [Fidget Spinner RPM Counter](#) Hi everyone! This is my next project, Fidget Spinner RPM Counter or Arduino Tachometer with Hall-Effect Sensor. 1: Requirements Parts Required: Fidget Spinner neodymium magnet Arduino Uno LED + resistor 220 Ohm Hall-Effect Sensor - a3144 resistor 10 k Wires Breadboard LCD 1602 2: Hall-Effect..... Listed under: [Sensor – Transducer – Detector Projects](#)

103.
- [An Urban Plant Watering Solution](#) This device improves plant irrigation in urban environments. Powered by an Arduino 101, it uses on-board tools along with a few external sensors to calculate optimum conditions for watering plants in its own environment, and then waters the plant itself at the calculated time. It..... Listed under: [Home Automation Projects](#)

104.
- [Cycflix: Exercise Powered Entertainment](#) Now that the cheesy title has pulled you (Fitflix was taken and I didn't want to be sued) I'll tell you about the project, it uses a stationary exercise bike connected to an Arduino Nano to control the streaming of Netflix on a PC, I..... Listed under: [Game – Entertainment Projects](#)

105.
- [Controlling Robot Over Bluetooth Using Xbox Steering Wheel](#) So I'm guessing that I'm like a large amount of people on this site that are low key hoarders, keeping anything they could turn into a project or salvage for parts and this is an example of that. I have this old Mad Catz Steering..... Listed under: [Robotics – Automation Projects](#)

106.
- [Can I Use an Arduino Uno for This?](#) So back when I first started working with micro controllers, Arduinos mainly the most annoying this ever was when i would follow someones tutorial for a project and they would use the Arduino uno, I would be using the Arduino micro or something, i would..... Listed under: [Other Projects](#)

107.
- [Distance Measurement Vehicle via Websocket](#) Story When you measure distance between two point general way is to use a ruler. But you can use a lot of other ways: by laser, map, foot or walking meter. The walking meter is very useful when you are measuring curved (not straight) distance..... Listed under: [Metering – Instrument Projects](#)

108.
- [Reducing Arduino Power Consumption](#) Story When it comes to portable electronics, one of the most important features is how to maximize the battery life. The ATmega328P, used on popular boards like the SparkFun RedBoard, Arduino Uno, and Pro Mini are actually quite power hungry. The RedBoard and Arduino Uno,..... Listed under: [Other Projects](#)

109.
- [Arduino on Internal Oscillator Crystal as Clock Source](#) Story I have been working out ways to make a minimal Arduino to fit in the smallest space possible, and limit the power consumption of the microcontroller. (You can go through this project for more info about reducing power consumption at: Reducing Arduino Power Consumption)..... Listed under: [Clock – Timer Projects](#)

110.
- [RPi Serial Console Automation Using Arduino](#) Story A Continuation of One Button Restart of a Stalled Raspberry Pi In a recent article, I showed how an Arduino Pro Micro can be utilized to send characters to the serial console of the Raspberry Pi Zero W. The Pro Micro was chosen because..... Listed under: [Other Projects](#)

111.
- [Darby's not dead](#) Story In the future there is a bar where all the dead punk rockers hang out. They are each given a MiFare classic card programmed with their name and 666 credits. This is the device the bartender uses to keep track of their tab. This..... Listed under: [Internet – Ethernet – LAN Projects](#)

112.
- [2 Players Competition/Quiz Buzzer Box System Using Arduino](#) Story A bit of background. My brother came to me with an odd box that a friend of his asked someone to make so that they can determine the fastest contestant to push a button. The box consisted of some LEDs, two buttons, and two..... Listed under: [LED Projects](#)

113.
- [Congnitive GSM Autonomous Water Meter](#) Story Imagine you could administer remotely your water utility service in real time, turning on or off your water services according to your usage patterns or needs, and not just letting the water flow in all the time, you could prevent taps for leaking a..... Listed under: [Metering – Instrument Projects](#)

114.
- [Back-Saver: Backpack-carrying follower robot powered by Wunderbar](#) Hardware components: SparkFun RedBoard × 1 DC Stepper Motor 28-BY-J-48 × 1 MB 1010 IV-Max-Sonar F71 × 1 WunderBar × 1 Story A Sparkfun Red-Board utilizes a IV-Max Sonar component to iudge distances between the user and the robot

115.

[How to use the TFT display 2.2" QVGA with Arduino](#) Story The main purpose of this project is to build a system based on chip ATMEGA328P, Arduino compatible, and interface it with a 2.2" QVGA TFT display using the library ILI9341. As an alternative to the self-build system you can use an Arduino Pro 3.3..... Listed under: [Other Projects](#)
116.

[Easy Serial on the ATtiny](#) Introduction The Atmel tinyAVR MCU's are great little chips for projects but can prove difficult to debug. Some ATtiny chips do not have direct support for hardware based serial and therefore the Serial object is unavailable in your code, however, it is easy to add..... Listed under: [Other Projects](#)
117.

[CyDuino : An Arduino Dev Board with Lots of Goodies](#) Story We (most of us) really like Arduino because it's possible to make cheap clones, lots of libraries, examples, forum support and community out there. Outside Arduino world, I like Cypress PSoC for some of its cool features like Graphical IDE, APIs, great features and..... Listed under: [Sensor – Transducer – Detector Projects](#)
118.

[Trinket Firmware Exorcism](#) Story Warning: Digispark uses Attiny85 PIN#1 as I/O - remove RESET button functionality Notes FOR ADVANCED USERS ONLY The Trinket 5V and the Digispark share the same hardware design, right down to the LED being on PB1. Personally, I prefer the Trinket hardware over the Digispark,..... Listed under: [Other Projects](#)
119.

[A Semaphore for your Office Desk](#) Story This is a small semaphore you can put on your desk. You can use it to tell whatever you want to the people around it. For example, because you need some concentration and you'd like your colleagues not to disturb you. Or to tell..... Listed under: [Other Projects](#)
120.

[Hot Yet? This faucet water monitor will prevent plunging your hands into cold water](#) Hot Yet? Attiny85 Faucet Water Temperature Sensor Testing Real life testing in the kitchen sink! Note the tri-color LED. Blue is cold and fades into Green which then flips to increasing Red at 85F. Notes This project is an Attiny85 Arduino circuit and uses..... Listed under: [Metering – Instrument Project Ideas](#)
121.

[Chachka \(Trinket clone\)](#) Chachka is born! Chachka is an Adafruit Trinket CLONE built from the ATtiny85 microcontroller. Because it is a current Adafruit product, it has a training guide and its own support forum and lots of sample code. All of this means that like an Uno clone, the..... Listed under: [LED Projects](#)
122.

[Waterproof 10 Minute Timer](#) Story I went for a shower one day, was getting late for office. Running tight on time, but I didn't want to come out of hot shower in cold morning. Without any clock in my bathroom I was saying to myself "Lets enjoy the shower..... Listed under: [Clock – Timer Projects](#)
123.

[Build the Internet for your friend](#) Background A few years ago, a co-worker turned me on to this TV program called "The IT Crowd". The show revolves around a two-person IT team and their "Relationship Manager", Jen, who inadvertently landed the job by including some basic PC skills on her resume..... Listed under: [Internet – Ethernet – LAN Projects](#)
124.

[Arduino : Lead Acid Battery Capacity Tester \(Updated\)](#) Story Yosh ! At last, finished working on this project. I have been working on this project for a while, then got bored and left the remaining work ( mostly firmware ) for a couple of months, ah ! the longest project I ever did..... Listed under: [LED Projects](#)
125.

[ATTiny Joule Thief NeoPixel](#) Introduction I've been fascinated with joule thief circuits since I made my first one. It's amazing what all you can power from a single AA or AAA battery. The only problem is you can't do much beyond light up an LED because the current isn't..... Listed under: [LED Projects](#)
126.

[PicoDuino = Digispak + RGB LED + Button + Relay Driver](#) Hardware components: Atmel ATTiny85 × 1 DigiSpark × 1 Software apps and online services: Arduino IDE STORY StartFragment How to get FREE board Order 1pc Picoduino board Create project max. 30 days from order Write project steps on instructables ... Include link to my store..... Listed under: [Development Board – Kits Projects](#)
127.

[IR Thermometer, Stopwatch, Cooking Timer, Inactivity Tracker](#) Hardware components: Arduino UNO & Genuino UNO × 1 Adafruit MLX90614 × 1 Atmel AVR for Arduino 328P/168P/8A × 1 SparkFun 7-Segment Serial Display - Red 3 digit display used × 1 Breadboard (generic) 8x2 cm × 2 16 MHz Crystal × 1 Slide Switch..... 135.

[Easily run your ATtiny at 16MHz, without an external clock, from the Arduino IDE](#) Hardware components: Atmel ATTiny85 × 1 SparkFun Tiny AVR Programmer × 1 Software apps and online services: Arduino IDE STORY Introduction The Atmel tinyAVR MCU's (ATtiny) are a series of chips optimized for applications requiring performance and/or power efficiency in a small package. These have internal..... Listed under: [Arduino Programmer Projects](#), [Clock – Timer Project Ideas](#)
136.

[ATtiny85 for Simple Projects: Arduino Basics](#) Bare bones: The ATtiny85 on its Own The ATtiny is a small, inexpensive chip that can replace the Arduino in a project you have prototyped. This helps make the project smaller and more permanent, as well as freeing up the Arduino for more fun! The..... Listed under: [LED Projects](#)
137.

[OH HAI! on Windows 10 IoT Core](#) Oh, Hai Hai ('hi') is an integration point for several stand alone smart home technologies. Hai runs on the Raspberry Pi and can be adapted to optimize electricity consumption (lighting/HVAC) and water usage (irrigation/rain collection) in a number of ways. Hai was originally envisioned for..... Listed under: [Other Projects](#)
138.

[Persistence Of Vision](#) Persistence of vision is an optical illusion, it works on a simple phenomenon how our day to day television works. MY first pov was six months before with arduino uno and with motor. However it is best to have a small and portable device that..... Listed under: [LED Projects](#)
139.

[Cellular Data Logger](#) I have been collecting data from Raleigh's trails and parks for the last couple years. My primary platform has been a custom Arduino board I developed for low-cost (hey, these things may get damaged or stolen) and long battery life. I wanted a connected sensor..... Listed under: [Internet – Ethernet – LAN Projects](#)
140.

[AVR VideoBlaster](#) More VideoBlasting So why didn't the TV out library reach any higher resolution than 160x100? The answer is simple. They did not use any hardware on chip to push the pixels out. If you use the SPI to push the pixel you will gain an..... Listed under: [Video – Camera – Imaging Projects](#)
141.

[POV Cylinder with Arduino Due](#) Introduction This is my first Arduino project. My work was inspired by several maker projects that created Persistence of Vision Displays [2,3,4]. Persistence of vision (POV) refers to the optical illusion whereby multiple discrete images blend into a single image in the human mind and believed to be..... Listed under: [LED Projects](#)
142.

[Programming the ATtiny85 \(Using an Arduino Uno\)](#) Today, we are going to build a circuit to program an ATtiny85 with our Arduino. Supplies We are going to need the following: Some jumper wires 1 x 10 micro farad capacitor The ATtiny85 Chip A breadboard An Arduino For Extra visual's (that are not..... Listed under: [Arduino Programmer Projects](#)
143.

[OLED on the Cheap!](#) I like cheap electronics for playing. Cheap is good for budget conscious hobbyists and China is delivering lots of toys for playing - one being the inexpensive "mono" OLED displays. The single-color displays often come in a dual-color implementation where the top row of pixels..... Listed under: [LED Projects](#)
144.

[3D-Printed Prank Vibrating Cup](#) Picture the following: you have an nice white cup in front of you. It's filled to the brim with sparkling, cool, and refreshing H2O. Your fingers curl around the nicely curved handle, and you bring the cup to your lips. Suddenly, a strong vibration assaults..... Listed under: [Game – Entertainment Projects](#)
145.

[3D-Printed RGB Wallet](#) Stand out from the crowd with this unabashedly ostentatious excuse for a wallet. It's got plenty of space, RGB lights,

146.

[The Annoy-O-Bug: A Chirping Light-Up Throwie](#) Small enough to slip in a mint tin, yet loud enough to be heard across a house at only a few dollars per unit. A nice combination for a pretty good prank! Let's dive in! Step One: The Circuit You can purchase the printed circuit..... Listed under: [LED Projects](#)
147.

[nRF24L01+ with ATtiny85 3 Pins](#) This would be the continuation of my previous project Programming ATtiny85 with Arduino Uno. Now with cheaper ATtiny85 in place I was looking for cheaper ways to transmit the sensor data. Which brought me to nRF24L01+ a cheap, low power RF transceiver. This seemed to..... Listed under: [Other Projects](#)
148.

[A Strange Attraction: Various Hall Effect Sensors](#) I came pretty close to calling this one "Magnets, How do they work?" But I thought that might confuse more than it would amuse. All jokes aside, hall effect sensors are pretty cool, and also pretty simple to use, but there are a few types..... Listed under: [Sensor – Transducer – Detector Projects](#)
149.

[Simple Temperature With Thermistor + Arduino](#) A Thermistor is a thermal-resistor. It's just a simple device that changes it's resistance based on temperature. If the LRD/Photoresistor is day of of arduino class. The thermistor should be day 1.01. (Can I do that?). If you need precise temperature readings, this is not..... Listed under: [Temperature Measurement Projects](#)
150.

[Do You Have The Time? DS1307 RT Clock + Arduino](#) Most microcontrollers are time-agnostic, meaning they are unaware of the time around them, but that's ok as most things we make have no need for it. But... every once in awhile you come up with an idea that requires knowing the actual time. Mostly this..... Listed under: [Clock – Timer Projects](#)
151.

[How to Get Started with the ESP32](#) ESP32 is the hottest new wireless chip out there, offering both WiFi and Bluetooth Low Energy radios rolled up with a dual-core 32-bit processor and packed with peripherals of every kind. We got some review sample dev boards, Adafruit and Seeed Studio had them in..... Listed under: [Wifi - WLAN Projects](#)
152.

[Are we getting close? Proximity Sensors + Arduino](#) In past tutorials, we have covered temperature, color, time, direction, but never distance or proximity. I think I strayed away from this because most of the lower cost proximity sensors are pretty drop-dead-simple to use and thought it might not be that useful. But the..... Listed under: [Sensor – Transducer – Detector Projects](#)
153.

[Arduino: Individually Control Shift Register Pins](#) If you want an article on general 74hc595 shift register usage with detailed explanation on how it works/what it's doing, you want this article here: <http://bildr.org/2011/02/74hc595/> The following code and library are compatible with arduino software 1.0+ ONLY. You can download the newest version of..... Listed under: [Other Projects](#)
154.

[Quickly: KS0108B Graphic LCD 128x64 + Arduino](#) This is an incredibly quick post, and it is actually here simply because this thing was a pain to figure out how to hook it up. But, I wasn't able to do anything with it more than the Arduino library was able to do out..... Listed under: [LCD Projects](#)
155.

[L3G4200D Tripple Axis Gyroscope + Arduino](#) Before we begin, just note, that while this all works, I believe the output is scaled wrong. The noise floor is very high. But from everything I have found it looks like this is how it is. We have covered, accelerometers, GPSs, compasses... But no..... Listed under: [Sensor – Transducer – Detector Projects](#)
156.

[Sensing Barometric Pressure | BMP085 + Arduino](#) Light, location, temperature... What's next? Well, how about Barometric pressure? You know.. that thing that determines so much of our weather. Well the BMP085 Barometric Pressure sensor, available at SparkFun is a great little sensor capable of sensing such small changes in barometric pressure it..... Listed under: [Sensor – Transducer – Detector Projects](#)
157.

[A Slow Display... E-Paper + Arduino](#) Most notable for its inclusion in the Kindle and other E-Readers, E-Paper has recently become very popular. But until very recently been out of reach to being used in personal projects. Luckily for us, SparkFun started selling and E-Paper display, and breakout board finally bringing..... Listed under: [LCD Projects](#)
158.

[ESP32 Tutorials](#) The ESP8266 has become one of those ubiquitous parts that everyone knows. However, the new ESP32 has a lot of great new features, too. If you want to take the ESP32 for a spin, you should check out [Neil Kolban's] video series about the device. When we..... Listed under: [Wireless Projects](#)
159.

[ESP32 Hands-On: Awesome Promise](#) The ESP32 is looking like an amazing chip, not the least for its price point. It combines WiFi and Bluetooth wireless capabilities with two CPU cores and a decent hardware peripheral set. There were modules in the wild for just under seven US dollars before..... Listed under: [Wifi - WLAN Projects](#)
160.

[ESP32 Arduino: LED PWM fading](#) The objective of this post is to explain how to fade a LED with the ESP32, using the LED PWM functionalities. Introduction The objective of this post is to explain how to fade a LED with the ESP32, using the LED PWM functionalities of the..... Listed under: [LED Projects](#)
161.

[ESP32 With Arduino IDE](#) Christmas 2015 yours truly was one of the lucky few in the world to receive the ESP32 for experimenting. The board was not assembled, and it was quite intimidating to assemble the board with just a fine tip solder. The experiment is documented at this..... Listed under: [Development Board – Kits Projects](#)
162.

[Sensing color with the ADJD-S311 + Arduino](#) A year ago we had an article called Sensing color with the ADJD-S371. Well the ADJD-S371 is long gone, and its replacement is the ADJD-S311 (breakout board available from sparkfun). It is basically the same all around, so without shame, I will be copying a..... under: [LED Projects](#)

164.

[High Sensitivity Light Sensor TSL230R + Arduino](#) A while back we covered the TEMENT6000, a great little analog sensor for getting ambient light readings when you need something a bit more sensitive than a simple Photoresistor. Well in the spirit of documenting everything we can get our hands on, this week we..... Listed under: [Sensor – Transducer – Detector Projects](#)
165.

[Sensing Weight With A Flexiforce + Arduino](#) Flexiforce is a force sensor that is very similar to FSRs we just wrote about in principal. They change their resistance when you apply force to them. (The flexi part of the name is because they are flexible) Flexiforces are about twice as expensive as..... Listed under: [Sensor – Transducer – Detector Projects](#)
166.

[Touch Sliders With A Softpot + Arduino](#) You all know the potentiometer, you turn it, and you can read on your arduino where it was turned to. Well 3M makes a product called the softpot that is a linear touch potentiometer. So instead of turning a knob, you touch it. The really..... Listed under: [Sensor – Transducer – Detector Projects](#)
167.

[Can You ID This? ID-20 RFID Reader + Arduino](#) A few weeks ago we showed you how to control your arduino over serial. Well this week are going to do the same thing. Only this time instead of using the serial monitor to send the commands, we will be using the Innovations ID line..... Listed under: [Sensor – Transducer – Detector Projects](#)
168.

[Turn on a light, or 10. Arduino control over serial](#) This is something I use all the time, so I figured I would share it with you. Controlling an Arduino over serial can be extremely simple if you let it, and extremely useful if you know how to use it. Many languages such as Processing..... Listed under: [LED Projects](#)
169.

[Muxing Around With The CD74HC4067 + Arduino](#) Have you ever found yourself running out of pins to read an array of analog sensors? Don't worry, you're not alone, it happens to the best of us, and there is something you can do about it. An analog / digital multiplexer like the CD74HC4067..... Listed under: [Sensor – Transducer – Detector Project Ideas](#)
170.

[Tilt Sensing with the RPI-1031 + Arduino](#) Once in a while something comes out that I think is going to be really awesome, but when you get it, it is just so so. Im sure you all know what I mean... But yeah... This is one of those. The RPI-1031 available from..... Listed under: [Sensor – Transducer – Detector Projects](#)
171.

[Stable Orientation – Digital IMU 6DOF + Arduino](#) A while back we wrote an article on sensing orientation with the adxl335 accelerometer. In that article I mentioned all the drawbacks of trying to do this with just an accelerometer, and said that if you needed something stable, what you really needed was an..... Listed under: [Metering – Instrument Projects](#)
172.

[Controlling 2 motors with the TB6612FNG + Arduino](#) First off: I know... we went overboard with the motor illustration. In previous articles we have discussed how to control motors with simple transistors. And... with PWM you could control the speed. But that is just one motor, and you can only go one direction..... Listed under: [Motor Projects](#)
173.

[A Swarm of Xbees! Arduino Xbee Wireless & More](#) In the past we have covered a few things that interact through serial, from RFID readers to controlling an Arduino's pins using the serial terminal. Serial as we have talked about it is actually know as UART, and operates over 2 pins RX and TX..... Listed under: [Other Projects](#)
174.

[How's the weather? TMP102 + Arduino](#) The TMP102 is a very simple, yet accurate, ambient temperature sensor which is capable of detecting .0625°C changes between -25 and +85°C, with an accuracy of 0.5°C. And the real kicker... It does all of this while only consuming 10µA (10 millionths of an amp)..... Listed under: [Sensor – Transducer – Detector Projects](#)
175.

[One Wire Digital Temperature. DS18B20 + Arduino](#) I know... you are probably thinking "Another Thermometer! How many do you need to cover?" – Well... All of them. But really, they all have something different to offer. For instance this guy, the DS18B20, has a unique serial-number sent with it's data, so if..... Listed under: [Sensor – Transducer – Detector Projects](#)
176.

[Pin Control Over the Internet – Arduino + Ethernet](#) In a previous article we showed you how to control digital pins over over serial, and showed how such a simple thing can be so powerful. One major downfall with that is you need to be nearby to send commands... So today we are going..... Listed under: [Internet – Ethernet – LAN Projects](#)
177.

[Getting Data From The Web – Arduino + Ethernet](#) Yesterday we covered how you would go about controlling pins of your arduino over the internet using the Arduino Ethernet Shield set up as a server. Today we are going to take a look at using the shield as a client to get information off..... Listed under: [Internet – Ethernet – LAN Projects](#)
178.

[Get Touchy – Nintendo DS Touch Screen + Arduino](#) It seems like touch screens are plastered on every consumer electronic device from your phone to your refrigerator. And why not right? Well, even though those beautiful multitouch hi-res screens are a little pricy and crazy hard to develop with, doesn't mean we cant still..... Listed under: [Other Projects](#)
179.

[Proximity Sensing with the VCNL4000 + Arduino](#) I'm not really sure why, but proximity sensors are some of my favorite things in the sensor world. Maybe because there are so many of them? Who knows. Whatever the reason, the VCNL4000 is another proximity sensor that caught

180.

[Force Sensitive Resistor + Arduino](#) The Force Sensitive Resistor, or FSR is one of those parts that fills bins in interaction design labs across the world. It's a simple guy, a finicky guy, but it has its place in the maker toolbox. A FSR is just what it sounds like..... Listed under: [Sensor – Transducer – Detector Projects](#)
181.

[Controlling a ton of servos – TLC5940 + Arduino](#) This is something we have been asked a lot about. How do I control a ton of Servo motors with my arduino? Well... using the TLC5940 is one way. And this nice break outboard from sparkfun makes connecting a ton of servos easy. The output..... Listed under: [PWM Projects](#)
182.

[Sensing Orientation With The ADXL335 + Arduino](#) I know, I know, this one has such a simple name. Where's the pun? Honestly, the description was just to long to include one. Maybe it could have been "What's Up? Sensing Orientation With The ADXL335 + Arduino" – Ehhh... Probably not. A few weeks..... Listed under: [Sensor – Transducer – Detector Projects](#)
183.

[Triple Axis Magnetometer HMC5883L + Arduino](#) One of the first articles we did was on the hmc6352 digital compass. Well this is his older brother (or younger but smarter). I really don't know what to say about the HMC5883L other than it is a three axis magnetometer, so it is capable..... Listed under: [Metering – Instrument Projects](#)
184.

[Displaying on Paper – Thermal Printer + Arduino](#) The following code and library are compatible with arduino software 1.0+ ONLY. You can download the newest version of the arduino software here. Outputting data can be extremely useful, and typically when we look at doing this, it is either to the Arduino's serial terminal,..... Listed under: [Other Projects](#)
185.

[Long Distance Remote Light Sensor With RFM95W/RFM98W LoRa](#) There are many wireless communication options when connecting Arduino boards. One of the most popular ones is the Wi-Fi. It works well at small distances, and around Wi-Fi hotspots, however when the modules need to connect over long distance at areas where Internet is not..... Listed under: [Sensor – Transducer – Detector Projects](#)
186.

[Arduino Nano: Flame Sensor With Visuino](#) Recently somebody asked for tutorial on Infrared Flame Sensor. It took a while due to severe work overload, but finally I succeeded to make it. The Infrared flame sensors use infrared light to detect flame. While experimenting with my one I discovered that in direct..... Listed under: [Sensor – Transducer – Detector Projects](#)
187.

[Capturing IMU Data with a BNO055 Absolute Orientation Sensor](#) The Bosch BNO055 combines tri-axis accelerometers, gyroscopes, and magnetometers to provide orientation to users. About the Sensor The BNO055 uses three triple-axis sensors to simultaneously measure tangential acceleration (via an accelerometer), rotational acceleration (via a gyroscope), and the strength of the local magnetic field (via..... Listed under: [Sensor – Transducer – Detector Projects](#)
188.

[Ultrasonic range finder using arduino](#) Ultrasonic range finder using 8051 microcontroller has been already published by me in this website. This time it is an ultrasonic range finder using arduino. HC-SR04 ultrasonic range finder module is used as the sensor here. The display consists of a three digit multiplexed seven..... Listed under: [Other Projects](#)
189.

[Digital thermometer using arduino and LM35](#) This article is about a simple three digit digital thermometer using arduino. Range of this thermometer is from 0°C to 99.9°C. There is also a provision for displaying the temperature in °F scale. Three terminal analog temperature sensor LM35 is used as the sensor here..... Listed under: [Metering – Instrument Projects](#)
190.

[PWM motor speed control using Arduino](#) PWM or pulse width modulation is a very common method used for controlling the power across devices like motor, light etc. In PWM method the power across the load is controlled by varying the duty cycle of the drive signal. More the duty cycle more..... Listed under: [Motor Projects](#)
191.

[Interfacing LCD to Arduino – Display Text and Characters on LCD Screen using Arduino](#) A Liquid Crystal Display commonly abbreviated as LCD is basically a display unit built using Liquid Crystal technology. When we build real life/real world electronics based projects, we need a medium/device to display output values and messages. The most basic form of electronic display available..... Listed under: [LCD Projects](#)
192.

[Interfacing RFID with Arduino – How to Read RFID Cards using Arduino](#) In this tutorial, we are dealing with yet another interfacing technique. This time we are interfacing an RFID Reader which can read RFID Tags to Arduino. RFID is Radio Frequency Identification. An RFID reader is used to read RFID tags (which contain certain unique data..... Listed under: [Other Projects](#)
193.

[Burglar Alarm using Arduino and PIR Sensor](#) In this tutorial, we are building an interesting application using Arduino and PIR Sensor. A Burglar Alarm – is basically an intruder alarm or an anti theft alarm. So this project is all about building an anti theft alarm or an intruder alarm using Arduino..... Listed under: [Sensor – Transducer – Detector Projects](#)
194.

[Arduino and Soil Moisture Sensor](#) In this article, we are going to interface a Soil moisture sensor FC-28 with Arduino. This sensor measures the volumetric content of water inside the soil and gives us the moisture level as output. The sensor is equipped with both analog and digital output, so..... Listed under: [Sensor – Transducer – Detector Projects](#)
195.

[Interface Arduino and Color Sensor – RGB Sensor TCS230](#) In this article, we are going to read the colors using the TCS230 color sensor (RGB Sensor) and Arduino Uno. The TCS 230 color sensor senses the color light by using the photodiodes. The sensor converts the readings from the photodiode into a square wave by..... Listed under: [Sensor – Transducer – Detector Projects](#)
196.

[Pulse Sensor and Arduino – Interfacing](#) In this article, we are going to interface a Pulse Sensor with Arduino. The pulse sensor we are going to

197.

[Interfacing Accelerometer to Arduino](#) In this article, we are going to interface the GY-521 accelerometer with Arduino. The GY-521 has an InvenSense MPU6050 chip which contains a 3-axis accelerometer and a 3-axis gyro meter. This makes it a 6 DOF IMU (6 degrees of freedom inertial measurement unit). The chip..... Listed under: [Metering – Instrument Projects](#)
198.

[Home Automation using Arduino and GSM Module](#) In this article, we are publishing a highly useful home application – GSM based home automation using Arduino. The project consists of a 16x2 LCD module for displaying the status of the home appliances. The status (turn ON or turn OFF) of the connected devices can..... Listed under: [Home Automation Projects](#)
199.

[Robot using Arduino and Bluetooth Module \(Obstacle Avoidance Robot\)](#) This project is designed to build a robot that automatically detects the obstacle on its path and guides itself whenever an obstacle comes ahead of it. This robotic vehicle is built, using Arduino UNO board. An ultrasonic sensor is used to detect any obstacle ahead..... Listed under: [Robotics – Automation Projects](#)
200.

[Arduino Irrigation and Plant Watering using Soil Moisture Sensor](#) This project is about a moisture-sensing automatic plant watering system using Arduino UNO. The system reads the moisture content of the soil using soil moisture sensor and switches ON the motor when the moisture is below the set limit. When the moisture level rises above..... Listed under: [Sensor – Transducer – Detector Projects](#)
201.

[IOT based Home automation and Security system](#) IOT has become huge trend in the last couple of years. With growing needs in connected devices many companies have shifted the attention to iot market. Today we are going to share a simple project which we have built – IOT based home automation and..... Listed under: [Security – Safety Projects](#)
202.

[Build An Arduino Based Voting System](#) Voting systems are one of the finest examples of Embedded devices and applications. The complexity and robustness of a voting system depends on the number of voters involved. Here you could see a simple Arduino based voting system that would be a great fit for..... Listed under: [Security – Safety Projects](#)
203.

[Build A Simple Arduino Weather Machine](#) Arduino is a great hardware platform when comes to prototyping and building cool stuffs. Using this I have designed and developed a simple Arduino Weather machine which measures three important parameters Temperature, Light intensity and Humidity and predict the weather condition according to the measured..... Listed under: [Other Projects](#)
204.

[Visitor counter project using Arduino](#) People or Visitor counters are pretty famous embedded application that was widely used in places like theaters, malls, Transport stations and so. High end counters uses sophisticated hardware to do the process of counting. Today we are about to see building of simple Visitor counter..... Listed under: [Sensor – Transducer – Detector Projects](#)
205.

[Reflex test for your brain using Arduino](#) Arduino based games and consoles are quite popular around the web. And this article is going to bring out the Design, working and code part of a simple Reflex test / trainer using Arduino Uno. Reflex tests are usually carried out to determine how quick..... Listed under: [Other Projects](#)
206.

[Stunning RGB light effects using Arduino Nano](#) None of us could deny the fact that we would love with to play with LED's and lighting stuffs. I love to play with LED's and create attractive lighting effects. This project was a result of such attempt where i created a stunning RGB light..... Listed under: [Other Projects](#)
207.

[Fun DIY project – piano using Arduino](#) Here is yet another application you can put your Arduino to use. This will be an interesting DIY to make even though you are not very much into music. Though you cannot expect music out of this but still it will be a fun project..... Listed under: [Other Projects](#)
208.

[Keyless piano using Arduino uno](#) Keyless piano using Arduino is sort of sequel to the DIY fun piano i have published in this website. In this project i have eliminated the need of buttons involved to play the piano. Here i have used IR in place of buttons. Let's get..... Listed under: [Other Projects](#)
209.

[Project X – Smart home control using Arduino](#) Project X – Smart home control using Arduino is all about automating your home smartly. Imagine your home responding to external condition by altering itself and that's exactly what this project enables your home to do. Also this product features manual control just in case..... Listed under: [Other Projects](#)
210.

[Electronic Spinet – Musical instrument using Arduino](#) Spinet it is a vintage musical instrument which has similar looks of a keyboard. It always get better when Technology touches the vintage stuffs. So we decided to build a simple Electronic Spinet using Arduino without using any keys. This project use of ultrasonic sensor..... Listed under: [Other Projects](#)
211.

[Garduino – Automatic plant watering system](#) During summers, most people are too lazy to water the potted plants every day and plants will eventually wither if people go out on vacation. Here is a simple Automatic plant watering system that can water plants in your absence. It is an Arduino based..... Listed under: [Other Projects](#)
212.

[Wireless notice board using Arduino and GSM](#) Everyone would have known the use of notice board around our daily life. Even it plays a vital role in public places like bus stops, railway station and hospitals. But with a great shift in technology we could revolutionize this kind of notice board by..... Listed under: [Other Projects](#)

214.

[Smart Vehicle using Arduino Uno](#) Everything around us is getting smart shoes, watches glasses. Even you might have come across news regarding smart vehicles in newspaper. Likewise we attempted to create a prototype of smart vehicle using Arduino. Let’s get into the building part of our smart vehicle. INPUT PERIPHERALS:..... Listed under: [Other Projects](#)

215.

[Automatic Plant watering and Happiness monitoring system](#) The main motto of this project is to provide automatic water supply to plant when it feels thirsty. We intend to automate the watering of plants and deploy Arduino to do the job for us. This will take care of the water requirements of a..... Listed under: [Other Projects](#)

216.

[Voice controlled home automation using Arduino](#) Ever thought of controlling your home using voice. If you are the one who fascinated it as I do, this project might help you do it for real. Voice powered products are already taking over the market and this voice controlled home project will enable..... Listed under: [Home Automation Projects](#)

217.

[IQ Alarm clock using Arduino for heavy sleepers](#) Raising from bed can be the most painful thing you could ever do. We often set alarms to wake up but ends up in snoozing it out or even kick the alarms away. To address this we have come up with an Arduino project “..... Listed under: [Clock – Timer Projects](#)

218.

[Gesture controlled car using Arduino](#) Who doesn’t love playing with RC cars and Robots. Not only playing, engineers and enthusiasts like us love to build and experiment with these stuffs. Also its fair to say that RC’s and Robots have became more than just toys, they already have started..... Listed under: [Sensor – Transducer – Detector Projects](#)

219.

[How to use position wheels with your Arduino](#) Hello everyone, em here today with an interesting tutorial on using position wheels using your favorite Arduino. The whole idea behind this article is to explain the logic behind position wheels, the way it works and how to implement it in your project. If you prefer..... Listed under: [Other Projects](#)

220.

[How to Make Arduino Based Collision Detection Warning System](#) This is arduino based collision detection warning system. This kind of system is fastest growing safety feature in automotive industries. Such system enables vehicles to identify the chances of collision and give visual and audio warning to driver. So that driver can take necessary action..... Listed under: [LED Projects](#)

221.

[How To Simulate Arduino With Proteus](#) Some Arduino boards can added to the most common and powerful simulation software for electronics hobbies which is Proteus from Labcenter Electronics. Here are steps for adding Arduino library for Proteus ISIS. Step 1: Download the following zip file DOWNLOAD Step 2: Extract the zipped..... Listed under: [Other Project Ideas](#)

222.

[The BIG Arduino Piano! Use Pulse Width Modulation to Dance like Tom Hanks](#) This BIG piano will help exercise the mind and body! All you need is a few buttons, a speaker, and some dancing shoes. BOM: Arduino Uno CUI 8 ohm speaker x8 pushbuttons x8 10k resistors x1 220 ohm resistor Jumper wire Breadboard Foamboard or cardboard..... Listed under: [Other Project Ideas](#)

223.

[Arduino Real Time Clock Using DS1307](#) This topic shows how to interface Arduino with DS1307 real time clock to make a clock and calender. To understand the project and code easily you have to read the datasheet of the DS1307. DS1307 Pin assignment: The picture is taken from ds1307 datasheet and..... Listed under: [Clock – Timer Projects](#)

224.

[Arduino 4-Digit 7-Segment LED Display](#) 7 Segment LED displays are used in many applications as front panel number indicators. The most common applications are calculators, microwave ovens, electronic lab equipment like function generators and frequency counters. A 7 segment LED display consists of 7 LEDs arranged in such a way..... Listed under: [LED Projects](#)

225.

[Remote Controlled Robot Using Arduino and T.V. Remote](#) This remote controlled car can be moved around using practically any kind of remote such as TV,AC etc. It makes use of the fact that the remote emits IR(infrared). This property is made use of by using an IR receiver,which is a very cheap sensor..... Listed under: [Robotics – Automation Project Ideas](#)

226.

[Build A Cheapest Possible Arduino-Robot](#) The aim is to build cheapest possible Arduino-robot Step 1: Components Arduino UNO R3 x1 USB cable x1 Mini solderless breadboard x1 IR sensor x1 Continuous rotation servo x2 Battery holder x1 AA battery x4 Bunch of color wires Step 2: Getting Started With Arduino..... Listed under: [Robotics – Automation Projects](#)

227.

[Flash Freeze Photography with an Arduino](#) Freeze moments in time to easily produce extraordinary close-up pictures with your digital camera, an Arduino, and these simple circuits. I have always been impressed by high-speed photography. The photographic capture of what normally goes unseen, or at least unnoticed, is intriguing and oftentimes beautiful..... Listed under: [Game – Entertainment Projects](#)

228.

[Create a Motion-Sensing Alarm with an Arduino and IR Sensors](#) Infrared (IR) sensors are normally used to measure distances, but they can also be used to detect objects. By connecting a couple of IR sensors to an Arduino, you can make an intruder alarm. Overview Infrared (IR) sensors are normally used to estimate the distance of an..... Listed under: [Sensor – Transducer – Detector Projects](#)

229.

[Controlling a Stepper Motor with an SIRC TV Remote and a PICAXE: Infrared Capabilities](#) This is part one of a two-part project. For part one, we will focus on IR remotes and signaling, as well as IR reception and decoding. Using IR (InfraRed) radiation to control electronic devices is widely accepted and implemented. IR devices are routinely used in..... Listed under: [Other Projects](#)

I2C. Before continuing in this article, consider..... Listed under: [Sensor – Transducer – Detector Projects](#)

231. [Quark D2000 I2C Interfacing: Add a Light Sensor and an LCD](#) Get acquainted with using I2C with the Quark D2000 development board by interfacing an ambient light sensor and an LCD. Previously, we presented a general overview of the Quark D2000 development board. Subsequently, we explored the use of the board’s GPIO and PWM. In this..... Listed under: [Sensor – Transducer – Detector Projects](#)

232. [Building a simple digital light meter using Arduino and BH1750FVI sensor](#) A light meter is a device that measures the intensity of light. It finds applications in schools, hospitals, production areas, passageways and more to measure and maintain proper lighting levels. It is often used by photographers to determine the proper exposure for a photograph. Today..... Listed under: [Sensor – Transducer – Detector Projects](#)

233. [MCP9802 temperature sensor and Arduino](#) MCP9802 is a digital temperature sensor from Microchip that measures temperatures between -55°C and +125°C to a digital word. It provides an accuracy of ±1°C (maximum) from -10°C to +85°C. The MCP9802 sensor comes with user-programmable registers that provide flexibility for temperature sensing applications. The..... Listed under: [Sensor – Transducer – Detector Projects](#)

234. [High-voltage seven segment LED display driver with SPI interface](#) Seven segment LED displays are known to be resource and power hungry. But because they are visually so charming and readable from a far viewing distance and at a much wider viewing angle as compared to any other electronic displays, they are still hugely popular..... Listed under: [LCD Projects](#)

235. [PC-based heart rate monitor using Arduino and Easy Pulse sensor](#) The heart rate, also referred to as pulse rate, has been recognized as a vital sign since the beginning of medicine, and it is directly related to a person’s cardiovascular health. Today, we are going to make a PC-based heart rate monitor system using an..... Listed under: [Sensor – Transducer – Detector Projects](#)

236. [Arduino measures heart beat rate from fingertip](#) The PIC16F628A based heart rate meter is one of the most popular projects published on Embedded Lab. In this article, I am going to show how to replicate the same project using a simpler platform like Arduino. The Arduino heart rate meter will use Arduino..... Listed under: [Medical – Health based Projects](#)

237. [Using BMP180 for temperature, pressure and altitude measurements](#) The BMP180 is a new generation digital barometric pressure and temperature sensor from Bosch Sensortec. In this tutorial, we will briefly review this device and describe how to interface it with an Arduino Uno board for measuring the surrounding temperature and pressure. We will also discuss about..... Listed under: [Temperature Measurement Projects](#)

238. [Arduino Crowtail and Easy Pulse Plugin](#) Arduino Crowtail is a modular and ready-to-use building block set from Elecrow for rapid prototyping with Arduino. It consists of a base Arduino Uno shield to which various sensor and I/O modules can be conveniently interfaced through standardized connectors. In this example, I am going to illustrate..... Listed under: [Other Projects](#)

239. [Controlling relay switches with an infrared remote](#) The infrared (IR) communication technology, which existed long before WiFi and Bluetooth, is still a key component in implementing major components of a typical home automation system. For example, IR technology is still used in cordless headphones, for intrusion detection in home security systems, and in handheld..... Listed under: [Other Projects](#)

240. [Serial seven segment LED display shield](#) Seven segment LED displays are brighter, more attractive, and provide a far viewing distance as well as a wider viewing angle compared to LCD displays. This project describes a serial seven segment LED display shield for Arduino Uno or compatible boards. The shield consists of..... Listed under: [LED Projects](#)

241. [Wireless Serial using nRF24L01](#) This project is very useful in many application where wireless reliable serial communication is required. It give bidirectional communication, You need to have same code in both arduino, no need of separate configuration for receiver or transmitter. It is more advantageous and cost saving than using Xbee,..... Listed under: [Other Projects](#)

242. [GSM Based Home Security System With SMS Alert](#) This project has GSM technology and anti-theft system using PIR motion detection. Whenever Motion is detected it sends the SMS on predefined mobile number. We have connected PIR Motion sensor with this project. GSM based home security system with SMS alert, it uses PIR Motion Sensor,..... Listed under: [Home Automation Projects](#)

243. [pH sensor arduino](#) In this project, step by step tutorial we are discussing about how to interface pH sensor with Arduino. In chemistry, pH is the negative log of the activity of the hydrogen ion in an aqueous solution. Solutions with a pH less than 7 are said..... Listed under: [Sensor – Transducer – Detector Projects](#)

244. [Low cost continuous prcision liquid level measurement using arduino](#) The purpose of this tutorial is to demonstrate an innovative approach for low cost continuous liquid level monitoring based on MPX5010DP differential pressure sensor. Most of the traditional measuring systems were designed and implemented by complicated hardware circuitry. It made the product expensive, with low functionality..... Listed under: [Other Projects](#)

245. [LCD interfacing with arduino](#) In this tutorial we’ll be looking at how to connect interface parallel LCD to an Arduino. We are using 16 char x 2 Line LCD known as 16x2 LCD, you can usually identify this display by the 16-pin interface. You only need to solder 10 of..... Listed under: [LCD Projects](#)

246. [How to Make Your Own Arduino Clone Board](#) Want to save money by making your own Arduino clone boards? Or want to make a custom board specifically for your needs, then this project is for you! Make Arduino board from cheap electronic components available at your local store. Just follow these simple step..... Listed under: [Other Projects](#)

247.

[Create an Android Controlled Robot Using the Arduino Platform](#) Ever wanted to make an Android controlled robot or car? Control your RC car with a smartphone? Or wanted a tutorial about connected devices and getting started with it? Now you can do that with this simple DIY hack that even provides you with a..... Listed under: [Robotics – Automation Projects](#)
248.

[DIY Android Home Automation With Free Smartphone Application](#) Ever wanted to make your home automated? Wanted to control the lights, fan, and other appliances from your smartphone? Or wanted a tutorial about connected devices and getting started with them? Our DIY Android Home Automation project will show you how to make your home..... Listed under: [Home Automation Projects](#)
249.

[A Simple Guide to Using a Hall Effect Sensor With Arduino](#) Have you ever wanted to make a project that involved contact-less sensing? For example: to detect a door closing, to count the number of revolutions of a wheel, or make a speedometer? Then this Arduino Hall Effect sensor tutorial is for you! This project uses..... Listed under: [Sensor – Transducer – Detector Projects](#)
250.

[IMU Interfacing Tutorial Get started with Arduino and the MPU 6050 Sensor](#) In this post, I will be reviewing a few basic IMU (Inertia Measurement Unit) sensors that are compatible Arduino. I will also give a short tutorial for interfacing an Arduino with the best IMU sensor available. IMU sensors like the MPU 6050 are used in..... Listed under: [Sensor – Transducer – Detector Projects](#)
251.

[An Easy Way to Build an Arduino Powered Motion Sensor Alarm](#) Have you ever wanted to build a project that had could detect the presence of a person in a room? If so, then you can do this very easily using the PIR (Passive Infra Red) Motion sensor. This Arduino motion sensor can detect the presence of a..... Listed under: [Sensor – Transducer – Detector Projects](#)
252.

[DIY Music Keyboard: How to Make Sounds With Arduino](#) Making cool things with an Arduino is something, but making musical instruments out of an Arduino is something else! So behold, here comes the Musical-duino, an Arduino keyboard. To see what this does, check out the demo video at the bottom of this page. They say..... Listed under: [Sound – Audio Projects](#)
253.

[How to Make an Arduino Powered Lamp Dimmer](#) Ever wondered how to bring an Arduino board into your daily life? We often adjust the display brightness of our mobile phones to suit to our need. With this project, you can do that for your bedside lamps or any other lighting at home. We..... Listed under: [Other Projects](#)
254.

[How to Make Your First Robot Using Arduino](#) One of the simplest projects you can make for your first time using an Arduino is an obstacle avoiding robot. If you are a beginner to Arduino and want to learn more about it, this Arduino robot tutorial will teach you the basics while you..... Listed under: [Robotics – Automation Projects](#)
255.

[How to Shrink Your Arduino Projects: Making a Permanent Circuit Board](#) When you make a project using Arduino, it usually contains a lot of jumper connections on the breadboard and the project will not be a permanent one. If you want to make any other project using that Arduino, you will have to remove all the connections made on it and to..... Listed under: [Other Projects](#)
256.

[How to Make a POV Display Using LEDs and Arduino](#) Here is a simple project using an Arduino and some LEDs. What we are going to learn here today is how to make a POV display or Persistence-Of-Vision display. It is made out of just 6\$ worth of components. This tutorial gives will teach you..... Listed under: [LED Projects](#)
257.

[How to Build an Arduino Speaker That Plays Music in Minutes](#) The main thing which makes this project super simple is that this project requires only one extra component. If you are new to Arduino, this tutorial will help you get familiar with Arduino and learn the basics of Arduino programming. This musical project has a..... Listed under: [Other Projects](#)
258.

[How to Make a 8bit Dot Matrix Display Using Arduino](#) A simple project to display cool 8bit art and animation on your backpack! This is a quick and easy project you could finish off in minutes and show off to your friends. What it does is, when you move your backpack, a dot matrix display turns..... Listed under: [LED Projects](#)
259.

[Interfacing: How to Make an Arduino Uno UltraSonic Range Finder!](#) A range finder is a device used to find the distance from a point to the nearest obstacle. This device uses ultrasonic technology to measure the distance. You can consider it like an electronic, hassle-free version of a measuring tape with a measuring range of..... Listed under: [Other Projects](#)
260.

[How to Make an Audio Player with Speaker Using the Arduino Uno!](#) This Arduino project is a simple and fun project you can build in 10-15 minutes. The result of this make will be an Arduino audio player that plays “.wav” files. It consists of a speaker, a simple transistor acting as an amplifier, and a micro-SD card..... Listed under: [Other Projects](#)
261.

[Bluetooth Basics: How to Control an LED Using a SmartPhone and Arduino](#) Ever thought of controlling any of your electronic devices with your smart phone? How about a robot or any other device? Wouldn't it be cool to control them with your smartphone? Here is a simple tutorial for interfacing an Android Smartphone with Arduino via Bluetooth! Required..... Listed under: [LED Projects](#)
262.

[ESP8266 Tutorial: Programming the Onboard GPIO Pins](#) The ESP8266 is a great tool for enabling your project to access the internet. You can plug it into an Arduino easily as shown and allow your project to communicate through the internet. Or even more exciting, to control it from

263.

[Audio Amplifier Circuit on PCB Using LM386](#) In this project, we tend to area unit getting to create a Headphone/Audio electronic equipment by exploitation self-designed PCB. This project is especially designed for amplifying the audio signal from the headphones however we will additionally use it for amplifying the subwoofer or speaker output,..... Listed under: [Sound – Audio Projects](#)
264.

[Arduino Weather Station](#) How cool would it be to have your own Arduino weather station right in your backyard? Sounds fun? Geeky? Having your own weather station means that you don't need any more inaccurate results from the weather channel! You can even log the data and play..... Listed under: [Other Project Ideas](#)
265.

[How to Make a Water Level Indicator with Arduino 6 11](#) Knowing the amount of water in an overhead tank can be one tedious task. Usually, you'll end up climbing up the stairs to the tank and checking the level manually or you'll you hear the water overflowing from the top. But these days electronic water level indicators..... Listed under: [Other Projects](#)
266.

[How to make a Smart Cane for the Visually Impaired with Arduino](#) I wanted to make something for them to help the visually impaired become independent, so I created an open source Arduino project for a Smart Cane. This Arduino smart cane can assist with walking alone in new environments by taking inputs through an obstacle sensor..... Listed under: [Other Projects](#)
267.

[How to Make a Programmable Guitar Pedal With Arduino!](#) This DIY Guitar Pedal project is for guitarists, hackers, and programmers that want to learn about digital signal processing, effects, synthesizers, and experiment without deep knowledge of DSP, electronics, or hardcore programming. pedalSHIELD UNO is a lo-fi, programmable guitar pedal that works with the Arduino..... Listed under: [Other Projects](#)
268.

[ESP8266 Tutorial: How to Control Anything From the Internet!](#) In this ESP8266 tutorial, we are using an ESP-01 module to control an LED over the internet. The ESP8266 is a very cheap yet really effective platform for communicating over the internet. It is also easy to use with an Arduino. After going through this ESP8266 tutorial,..... Listed under: [Other Projects](#)
269.

[DIY Arduino Tutorial: How to Automate a Lamp for Ceremonial Inaugurations](#) “Knowledge removes ignorance, just as light removes darkness”, as it is wisely said. In India, the ancient tradition of lighting oil lamps has a special significance. Almost all auspicious ceremonies are commenced by lighting a lamp. Hence came the idea to merge our traditional culture..... Listed under: [Other Projects](#)
270.

[DIY Soil Testing with Arduino and FC-28 Moisture Sensor](#) In this article, we are going to interface an FC-28 Soil moisture sensor with an Arduino. This sensor measures the volumetric content of water in soil and gives us the moisture level. The sensor gives us both analog and digital output, so it can be used..... Listed under: [Sensor – Transducer – Detector Projects](#)
271.

[LazyMax 1000: Arduino Phototransistor and Haptics Project](#) The idea for this Arduino phototransistor project came to me based on an idea that was shared by one of my friends at the FabLab. He talked about how his lab only has stools for people to sit on. Being very uncomfortable, the person succumbs..... Listed under: [Other Projects](#)
272.

[Arduino and Processing IDE Communication Tutorial](#) In this tutorial, we will make the communication between the Arduino and Processing. We will make the communication in both the ways, from the Arduino to Processing and from Processing to the Arduino. We will change the color of the serial window in the Processing..... Listed under: [Other Projects](#)
273.

[How to Make an Arduino Temperature Data Logger](#) In this project, we are going to make an Arduino Temperature logger that will get the temperature value from the LM35 temperature sensor and the time from the DS3231 Real Time Clock module. Then we will store these values in the SD card file using..... Listed under: [Temperature Measurement Projects](#)
274.

[Revive Old Drive-In Speakers with a Modern LED Twist](#) When I was a kid we went to the drive-in theater to see movies like The Legend of Boggy Creek and Evel Knievel. I loved those movies but I remember just as vividly those retro-cool metal speakers that entered into our car for these campy..... Listed under: [LED Projects](#)
275.

[Build a Simple Cocktail Drinkbot with Arduino](#) Big parties need a conversation piece, and what's better than a drink-making robot? Not only is it a good conversation starter, it also frees up the party host who would normally be the bartender. It turned out that the drink robot was a really good idea. The..... Listed under: [Other Projects](#)
276.

[Extract DNA at Home with a 3D Printed Centrifuge](#) Biotechnology is powerful, but only for those with the tools to experiment with and utilize it. The DIYbio movement seeks to put the tools and techniques used in well-funded laboratories around the world into the hands of ordinary people who have an interest but not..... Listed under: [Other Project Ideas](#)
277.

[A Simple Arduino LCD Min/Max Thermometer](#) As a simple first Arduino experiment I interfaced a two line LCD (a Displaytech 162B) and an LM35DZ to make a simple Min/Max thermometer. Step 1 - Interfacing the Temperature Sensor This is really very simple. The LM35DZ has three pins, +5V, ground and a..... Listed under: [LCD Projects](#)
278.

[Digital Door Lock using Arduino](#) As thefts are increasing day by day security is becoming a major concern nowadays. In this project we will

279.

[Home Automation using Arduino and ESP8266 Module](#) In this project we are going to make a home automation system using ESP8266 WiFi module and Arduino Uno. Using this we will be able to control lights, electric fan and other home appliances through a web browser using your PC or mobile. These AC..... Listed under: [Home Automation Projects](#)
280.

[IoT Data Logger using Arduino and ESP8266](#) Today we are going to make an IoT WiFi data logger using Arduino, ESP8266 WiFi module and DHT22 temperature humidity sensor. Arduino is reading temperature and humidity sensed by DHT22 and sending it to an internet server using the ESP8266 WiFi module. Here we are using ThingSpeak as..... Listed under: [Other Projects](#)
281.

[Arduino Weather Station Web Server](#) In this tutorial we are going to make a weather station that will tell us temperature, humidity and heat index of a particular location. It will show these values in a web browser. You can monitor these data by entering the IP address in a mobile, computer or..... Listed under: [Sensor – Transducer – Detector Projects](#)
282.

[Temperature Controlled Fan using Arduino](#) Here we are going to make a temperature controlled DC fan. DHT22 sensor is used to sense the room temperature and then we adjust speed of a DC fan/motor accordingly using PWM (Pulse Width Modulation). Arduino Uno is the heart of this project and a L293D..... Listed under: [Other Projects](#)
283.

[Simple Android Bluetooth Application with Arduino Example](#) This article will detail how to make a simple bluetooth application using Android Studio and demo it using an Arduino to toggle an LED and send data back-and-forth. No prior knowledge of Android development is needed, however it will help to know some basics of..... Listed under: [Arduino Android](#)
284.

[Arduino Line Tracking Robot Car](#) This line tracking robot car was built base on the prototype mentioned in the previous knowledge item. You can find the details for the prototype: <http://www.rs-online.com/designspark/electronics/eng/knowledge-item/arduino-line-tracking-robot-car-prototype> Bills of Materials: PCB Geared Motor OSRAM Opto Semiconductors Photodiode (RS stock number: 654-8902) Nichia LED (RS stock number: 713-3996)..... Listed under: [Robotics – Automation Projects](#)
285.

[Johnny 6 is Alive!](#) Designing a custom plate for the Arduino Robot, adding jumbo LEDs and displaying readings from an ultrasonic distance sensor to the LCD. My previous post on the Arduino Robot described how I took the Runaway Robot sketch and modified it work with the PING ultrasonic..... Listed under: [LED Projects](#)
286.

[The Evolution of a Light Theremin](#) I started out a little over two years ago on work experience, before going on to become a trainee engineer, having decided that I would like to pursue a career in electronic engineering. At work I get to do a wide variety of things, such..... Listed under: [Other Projects](#)
287.

[Developing your own Flowcode 7 controlled weather station](#) This project details a Flowcode and E-blocks based weather station capable of reading local temperature and humidity with 2 remote thermo-hygrometer sensors. The local board also incorporates a real time clock. This article has been contributed by Flowcode user John Crow. Flowcode can be downloaded..... Listed under: [Other Projects](#)
288.

[Designing and building a coffee table](#) For a number of years, my colleague Andrew has had an old IBM mainframe CPU kept in storage, waiting to be transformed into something new. Hailing from a long-lost era of computing (the system in which this module was used was the 4381, first announced..... Listed under: [Other Projects](#)
289.

[How to build an Arduino Robocar Part 1](#) I've been meaning to put some content on here for a while and recently I got around to getting an Uno and motor shield. Given I also have access to a 3d printer and have a shedload of microswitches, semis and other goodies knocking around..... Listed under: [Robotics – Automation Project Ideas](#)
290.

[Connected coffee Machine](#) Quite a lot of coffee is consumed at work but real statistics are missing. For the coffee machines with a can it can be interesting to have a visualization with coffee left in can, water in machine, time left until machine is finished, estimated time..... Listed under: [CNC Machines Projects](#)
291.

[Wireless Motor Speed Control System with Arduino](#) ICStation team introduce you the NRF24L01 Wireless Motor Speed Control System.This system works under DC 5V voltage. It uses the NRF24L01 Wireless Module to transmit speed control data and the Hall Sensor to detect the real rotate speed. This design uses the PWM duty cycle..... Listed under: [Motor Projects](#)
292.

[Dish Shamer](#) Project Description DishShamer solves the age-old problem of getting your roommates to wash their dishes. The kitchen is a communal space. When one individual fails to keep this shared environment clean, there can be two outcomes: conflict and socially awkward confrontations, or placing unfair cleaning burdens..... Listed under: [Other Projects](#)
293.

[Chatty Coasters](#) Chatty Coasters are interactive coasters that listen for silences and insert provocative conversation starters into them. Chatty Coasters are interactive drink holders that listen for silences in conversation and insert provocative questions into them. In order to encourage healthy, thought-provoking conversation in kitchens, Chatty Coaster waits..... Listed under: [Other Projects](#)
294.

[A Smart Shop Window Experiment with Arduino](#) Smart Shop Window A SmartLiving Experiment where using a QR code to control a light in a shop window. For this experiment we use a Grove LED (representing the shop's light) and a Smart phone to access the control switch. It's an ideal starter project..... Listed under: [LED Projects](#)
295.

[Track and Control Your Car Remotely](#) Actually, many of us may suffer or afraid from being his car stolen. In this project, I will try to help you to protect your cars and even control them remotely. Basically, you have to leave a mobile phone in your car and when the..... Listed under: [Car Projects](#)

Listed under: [Other Projects](#)

297.  [Hot Water Solar Boiler Project](#) A solar boiler is great because it gives you hot water using free-sun-energy, but what if there is not enough sun or someone already used all the hot water ? This project helps you take the right decision. It warns you when you run out..... Listed under: [Solar energy project Ideas](#)

298.  [DIY Temperature & Humidity & Smoke Detector Alarm System](#) The working voltage of this system is DC5V. It can measure the current temperature, humidity and smoke. It can display real-time data by the 1602 LCD and can realize the sound and light alarm when in the dangerous temperature and humidity. It is a simply..... Listed under: [How To – DIY – Projects](#)

299.  [Fast Counter](#) Every once in a while there is a question in the Arduino forum on how fast you can toggle an IO pin. The answer to this question depends on your line of thinking / what you will allow as an answer. So here is my..... Listed under: [Clock – Timer Projects](#)

300. [Control a Parrot AR Drone with Linino](#) Performing the control of the AR.Drone with the iOS or Android apps is really difficult. The controls are very unstable because the app virtual joystick hasn't a good sensitivity response. The idea was to use a real joystick instead of the Parrot application itself: So,..... Listed under: [Drone](#)

301. [Universal Remote Control](#) The transmitter in the remote control handset sends out a stream of pulses of infrared light when the user presses a button on the handset. A transmitter is often a light emitting diode (LED) which is built into the pointing end of the remote control..... Listed under: [Other Projects](#)

302. [Arduino / Raspberry Pi Internet Radio](#) This is a project for Arduino and Raspberry Pi to make an Internet Radio, aimed at intermediate skill level. Some familiarity with Linux usage will be beneficial (or access to someone who can help out if required). Raspberry Pi runs mpd music player daemon to..... Listed under: [Other Projects](#)

303. [Useless Box](#) Story Fascinated by this humorous anthropomorphic idea on instructable that left me philosophizing deeply about the essence of art, I decided to make this a project after witnessing many ruthless battles between human and robot on YouTube. How does it work? The Arduino "listens" to..... Listed under: [Other Projects](#)

304. [Psychic Arduino](#) If life has been too serious for you lately, this weekend project will take some of the stress out of your life and create a really neat toy in the process; a delight for a child or for those children who gather around your desk..... Listed under: [Arduino Android](#)

305. [Provocation: Urban Encounters](#) Description Urban Encounters is our imagination of the future of interactive surfaces within our 5x5x5 site. The crosswalk "island" we chose at the corner of Shattuck and Center in downtown Berkeley promotes an interesting combination of isolation, stuck-ness and loneliness. To bring out these themes into the physical world,..... Listed under: [Other Projects](#)

306. [Kroebe Lights](#) Brainstorming Process After selecting Kroeber Fountain as our location of interest, we began to notice that it was a place at which people would congregate without interacting with one another. The fountain's shape - most notably, its tiered steps - affords it the ability to..... Listed under: [Other Projects](#)

307. [Paper Instruments](#) What are the paper instruments made of? Using Conductive Paint, we were able to create a paper piano & guitar that plays notes and changes graphics on a screen. Paper Piano Arduino Code Step by step - Paper Instrument Development Software needed Processing: <https://processing.org/> Capacitive Arduino..... Listed under: [Other Projects](#)

308. [Zeitfluss – Flow of Time](#) About this project Reasoning about time by printing onto the surface of a river Maybe you know situations when time's running up. In German there is a metaphor for that and translated it would be something like "time trickles away". Having this saying in mind..... Listed under: [Clock – Timer Projects](#)

309. [Raspberry Pi teams up with an Arduino](#) The principal behind ArduinoPi First a little clarification, the ArduinoPi isn't really a library or a command set or an out of the box controller, its more a proof of concept using already know programming languages. If you want to use it be ready for..... Listed under: [Other Projects](#)

310. [Cracking an electronic safe using brute force](#) Preface There's nothing nefarious here, nor is the information contained herein particularly helpful to thieves or the dishonest. A thief would just cut the dang thing open and be done with it. The story So I bought a fire safe to protect some documents that..... Listed under: [Security – Safety Projects](#)

311. [Drawing with a Laser – Hack-a-Day Logo](#) Reading Hack a Day I found an interesting challenge: drawing their logo somewhere. And the fact that was even more interesting: "preference will be given to the largest and smallest submissions". I started figuring out how to do something like that with the things I had around, and..... Listed under: [Other Projects](#)

312. [Arduino Astronomical Clock](#) This product allows you to set separate turn-on and turn-off times and those repeat every day. The disadvantage of this product is that, as the seasons change, you need to constantly adjust the turn-on and turn-off times. As illustrated in Figure 1, the variation over..... Listed under: [Clock – Timer Projects](#)

313. [Bike Across the Country While in Your Basement](#) About this project This is a very simple and easy-to-build project that provides a sensor on the pedal crank of

314.  [Arduino stick](#) Description Mystick is an innovative hiking stick that promote exploration and allows you to share your hiking experiences and special findings with other users. When picked up by a user, the Mystick already has a predetermined location to which it directs using a compass and..... Listed under: [Other Project Ideas](#)

315. [Arduino Based Distance Measurement using Ultrasonic Sensor](#) Ultrasonic sensors are great tools to measure distance without actual contact and used at several places like water level measurement, distance measurement etc. This is an efficient way to measure small distances precisely. In this project we have used an Ultrasonic Sensor to determine the distance of an obstacle from..... Listed under: [Sensor – Transducer – Detector Projects](#)
316.  [LPG Leakage Detector using Arduino](#) While LPG is an essential need of every household, its leakage could lead to a disaster. To alert on LPG leakage and prevent any mishappening there are various products to detect the leakage. Here we have developed an Arduino based LPG gas detector alarm. If gas..... Listed under: [Other Projects](#)

317. [Live Temperature and Humidity Monitoring over Internet using Arduino and ThingSpeak](#) Humidity and Temperature are very common parameters for measuring at many places like farm, green house, medical, industries home and offices. We have already covered Humidity and Temperature Measurement using Arduino and displayed the data on LCD. In this IoT project we are going to..... Listed under: [Temperature Measurement Projects](#)
318.  [Arduino Based Digital Thermometer](#) Thermometers are useful apparatus being used since long time for temperature measurement. In this project we have made an Arduino based digital thermometer to display the current ambient temperature and temperature changes on a LCD unit in real time . It can be deployed in houses, offices, industries etc..... Listed under: [Metering – Instrument Projects](#)

319. [Interfacing Arduino with Raspberry Pi using Serial Communication](#) Raspberry Pi and Arduino are the two most popular open source boards in Electronics Community. They are not only popular among Electronics Engineers but also among school students and hobbyists, because of their Easiness and Simplicity. Even some people just started liking Electronics because of Raspberry..... Listed under: [Other Projects](#)
320.  [Interfacing TFT LCD with Arduino](#) Today, we are going to Interface 2.4 inch TFT LCD Shield with Arduino. By using this color TFT LCD shield we can show characters, strings, blocks, images etc on the color TFT LCD. And we can use this TFT Shield in many applications like: Security..... Listed under: [LCD Projects](#)

321. [How to Send Data from Arduino to Webpage using WiFi](#) Wireless communication between Electronic devices and modules is very important, to make them 'Fit' in the World of Internet of Things. HTTP protocol and HTML language have made it possible to transfer the Data anywhere in the world, over the web. We have already covered..... Listed under: [Other Projects](#)
322.  [Sending Email using Arduino and ESP8266 WiFi Module](#) We are moving towards the World of Internet of Things (IoT). This technology plays a very important role in the Electronics and Embedded system. Sending an Email from any Microcontroller or Embedded system is very basic thing, which is required in IoT. So in this article,..... Listed under: [Other Projects](#)

323. [Wireless Notice Board using GSM and Arduino](#) Wireless notice board is very selective term for this project, as it has a very wide scope rather than just being a simple notice board. First we should understand the purpose of this project, in this system we can display a message or notice to..... Listed under: [Other Projects](#)
324.  [Pressure Sensor BMP180 Interfacing with Arduino Uno](#) In this tutorial we are going to design a Barometric Pressure Measuring System using BMP180 and ARDUINO. First of all for interfacing BMP180 to ARDUINO, we need to download a library specifically designed for BMP180. This library is available at: <https://github.com/adafruit/Adafruit-BMP085-Library> After attaching that library, we..... Listed under: [Sensor – Transducer – Detector Projects](#)

325. [Arduino 101 Curie iOS Pulse Sensor](#) I want use the Genuino 101 by Intel and Arduino for a project that regards health, but I want to use all the characteristics of the Arduino 101. One of most important characteristics of this board, I think, is the BLE connection. Then I want..... Listed under: [Sensor – Transducer – Detector Projects](#)
326.  [Build A Arduino Bluetooth Vehicle](#) Before I even began to think about how my final chassis was going to look like I became obsessed with the idea of eliminating all of the useless space that plagued my previous designs. I wanted to reduced the car to its most essential components..... Listed under: [Car Projects](#)

327. [Control Door Lock Remotely Using Smartphone](#) Introduction Hi, friends. I came to this idea of controlling a door latch/lock remotely using a smartphone when I saw many people many times forget to carry latch/lock keys when they leave the house for a short trip, or the door gets latched accidentally while..... Listed under: [Security – Safety Projects](#)
328.  [Quizmo](#) This project is related to developing a handy gadget to help kids practice basic arithmetic operations. I decided to make it as my kids were very lazy to look into the books and come back very soon saying that they have done it (specially multiplication..... Listed under: [Calculator Projects](#)

[Wireless Projects](#)

330.  [Arduino HackHD Time-Lapse Dolly](#) Story This project was inspired by someone else who made an Arduino time-lapse dolly (suprise surprise). However that project was published some years back and I have lost the link to it. Of course time-lapse is not that exciting anymore but 5 years ago it..... Listed under: [Clock – Timer Projects](#)

331.  [IoT Controlled Snow Machine](#) The most homemade snow machine you've ever seen. Made from a hairdryer, polystyrene and MKR1000. Controllable from anywhere in the world\* Things used in this project Hardware components Arduino MKR1000 × 1 USB-A to Micro-USB Cable × 1 Apple USB Powe Adapter × 1 Jumper..... Listed under: [Other Projects](#), [Projects](#)

332.  [Build A Grill & Deck-Door Monitor Using Arduino](#) Story We use our barbecue grill and our deck frequently. After once leaving the grill on all night, I wanted an easy way to check to make sure the grill is off before going to bed. This is especially important since our grill is tapped..... Listed under: [Other Projects](#)

333.  [Give Your BLEBot a New Name](#) At the Hackster Hardware Meetup Seattle, we had a bunch of BLE Bot 9000 robots. The problem was that all of the bots exposed the same services and names, so you can't choose the robot you want to control. The solution to controlling your bot..... Listed under: [Other Projects](#)

334.  [Tertiarm – 3d Printed Robot Arm](#) This is first version of my low cost 3d printed robot arm. It is based on Ikea Tertial lamp. I choose it because it has very good kinematic with using springs to unload servos. So you can use different number of springs to achive diffrent..... Listed under: [Robotics – Automation Projects](#)

335.  [Knock To Open Treasure Chest](#) Preface My daughter asked me to build her a treasure chest that she could use to store her most valuable things. Obviously she demanded it to have some kind of a locking mechanism so only she could open the box. First thought was to use..... Listed under: [Security – Safety Projects](#)

336.  [Arduino Bluetooth-controlled Mini-Lift](#) Story We love our workshop, but it has one downside (or maybe upside) - a large flight of stairs to the gallery. We constantly need to move parts and components between one floor and the other, so we've been plotting different ideas: drones, dogs, carrier..... Listed under: [Other Projects](#)

337.  [Build A Voice-Controlled Robot Using Arduino](#) Story Voice-controlled Robot Voice-controlled robot is both hardware and cloud solution in one piece. The main components are: 1. Alexa Skill - to interpret voice commands and translate them to Google Cloud Messaging messages - deployed to Heroku cloud 2. Android application - to receive..... Listed under: [Robotics – Automation Projects](#)

338.  [Humidity Display of Date, Time and Temperature](#) Story Have you ever wanted to make your own interface that can display the time, date, along with the temperature and the humidity? Well it's a lot easier than you'd think. A few important components are needed, as shown below. Arduino Uno/Nano Firstly we will..... Listed under: [Temperature Measurement Projects](#)

339.  [Serial Basic Hookup Guide](#) Introduction The Serial Basic is an easy to use USB to Serial adapter based on the CH340G IC from WCH. It works with 5V and 3.3V systems and should auto install on most operating systems without the need for additional drivers. It's a great lower..... Listed under: [Other Projects](#)

340.  [Arduino-Powered Water Bottle](#) Introduction: Drinking enough water is very important for our health. Drinking more water can lead to clearer skin, better overall health, improved productivity and brain function, increased energy levels, and even weight loss. In our busy lives, it is really hard to remember to drink..... Listed under: [Other Projects](#)

341.  [Complete Digital Clock including Alarm and Motion Sensor](#) I have done several designs of digital clocks for Arduino using LEDs and LCD displays, but this one is more special because I added other features like alarm and motion sensor (PIR). Main features PIR (Presence Infrared Sensor) RTC (real-time clock) Alarm Temperature Humidity Water..... Listed under: [Clock – Timer Projects](#)

342.  [Build A Wake Up Alarm Clock Using Arduino](#) Story After designing the "Clock Set Date Time" and hearing the suggestion of ArduPic , I thought it would be a good idea and also useful, add a "wake-up alarm." A small change to the code and adding a few components: Here's "the Alarm Clock"..... Listed under: [Clock – Timer Projects](#)

343.  [Digital Dice using Arduino](#) We all are familiar with dice and often played LUDO or SANP SIDI (Snake & Ladders) game by using dice. Dice is a squire type solid box which contains 6 different numbers on all of its sides. We throw dice on a surface to get..... Listed under: [Other Projects](#)

344.  [Automatic Door Opener using Arduino](#) You must have seen automatic door openers in shopping malls and other commercial buildings. They open the door when someone comes near the entrance and close it after sometime. A number of technologies are available to make such kinds of systems like PIR sensors, Radar sensors, Laser..... Listed under: [Other Projects](#)

345.  [Computer Controlled Robot using Arduino](#) After designing this line follower robot using arduino uno, I have developed this computer controlled robot. It can be controlled via the computer and we can use specific keyboard keys to move it. It runs over serial communication

346.  [DTMF Controlled Robot using Arduino](#) In present time almost all the people are familiar with robots. Robots play a very important role in human life. Robots are a machine which reduces the human efforts in heavy works in industries, building etc. and makes life easy. We are here with our next robot..... Listed under: [Robotics – Automation Projects](#)
347.  [DC Motor Control using Arduino](#) Here we are going to interface a DC motor to Arduino UNO and its speed is controlled. This is done by PWM (Pulse Width Modulation). This feature is enabled in UNO to get variable voltage over constant voltage. The method of PWM is explained here;..... Listed under: [Motor Projects](#)
348.  [Arduino Based LED Dimmer using PWM](#) This LED DIMMER is an Arduino Uno based PWM (Pulse Width Modulation) circuit developed to get variable voltage over constant voltage. The method of PWM is explained below. Before we get start building a 1 Watt LED Dimmer circuit, first consider a simple circuit as shown in figure below. Now..... Listed under: [PWM Projects](#)
349.  [How to Use Shift Register 74HC595 with Arduino Uno?](#) In ARDUINO we have 20 I/O pins, so we can program 20 pins of UNO to be used as either input or output. Although there are more pins on ATMEGA328P controller than on UNO, this is because while designing the board some pins are defaulted. Now..... Listed under: [Memory – Storage Projects](#)
350.  [Arduino Temperature Control – Adjust Fan Speed based on Temperature](#) In this Arduino based project, we are going to control DC fan speed according to the room temperature and show these parameter changes on a 16x2 LCD display. It is accomplished by the data communications between Arduino, LCD, DHT11 sensor Module and DC fan that..... Listed under: [Temperature Measurement Projects](#)
351.  [Interfacing 16x2 LCD with Arduino](#) To establish a good communication between human world and machine world, display units play an important role. And so they are an important part of embedded systems. Display units - big or small, work on the same basic principle. Besides complex display units like graphic displays..... Listed under: [LCD Projects](#)
352.  [7 Segment Display Interfacing with Arduino](#) In this tutorial we are going to interface a seven segment display to ARDUINO UNO. The display counts from 0-9 and resets itself to zero. Before going further, let us first discuss about seven segment displays. A seven segment display got its name from the very..... Listed under: [LED Projects](#)
353.  [Accelerometer Based Hand Gesture Controlled Robot using Arduino](#) Robots are playing an important role in automation across all the sectors like construction, military, medical, manufacturing, etc. After making some basic robots like line follower robot, computer controlled robot, etc, we have developed this accelerometer based gesture controlled robot by using arduino uno. In this project..... Listed under: [Robotics – Automation Projects](#)
354.  [How to Use ADC in Arduino Uno?](#) In this tutorial we are introducing concept of ADC (Analog to Digital Conversion) in ARDUINO UNO. Arduino board has six ADC channels, as show in figure below. Among those any one or all of them can be used as inputs for analog voltage. The Arduino Uno..... Listed under: [Other Projects](#)
355.  [Humidity and Temperature Measurement using Arduino](#) Humidity and temperature are common parameters to measure environmental conditions. In this Arduino based project we are going to measure ambient temperature and humidity and display it on a 16x2 LCD screen. A combined te mperature and himidity sensor DHT11 is used with Arduino uno..... Listed under: [Temperature Measurement Projects](#)
356.  [Color Detector using Arduino Uno](#) In this project we are going to interface TCS3200 color sensor with Arduino UNO. TCS3200 is a color sensor which can detect any number of colors with right programming. TCS3200 contains RGB (Red Green Blue) arrays. As shown in figure on microscopic level one can see..... Listed under: [Other Projects](#)
357.  [Automatic Room Light Controller with Bidirectional Visitor Counter](#) Often we see visitor counters at stadium, mall, offices, class rooms etc. How they count the people and turn ON or OFF the light when nobody is inside? Today we are here with automatic room light controller project with bidirectional visitor counter by using Arduino Uno. It is very..... Listed under: [Home Automation Projects](#)
358.  [Electronic Voting Machine using Arduino](#) We all are quite familiar with voting machines, even we have covered few other electronic voting machine projects previously here and here using RFID and AVR microcontroller. In this project, we have used the arduino controller to create an electronic voting machine. Components Arduino Uno 16x2..... Listed under: [Other Projects](#)
359.  [Arduino Based Heartbeat Monitor](#) Heart rate, body temperature and blood pressure monitoring are very important parameters of human body. Doctors use various kind of medical apparatus like thermometer for checking fever or body temperature, BP monitor for blood pressure measurement and heart rate monitor for heart rate measurement. In..... Listed under: [Medical – Health based Projects](#)
360.  [Arduino Based LED Chaser using Rotary Encoder](#) In this project we are going to interface a ROTARY ENCODER with ARDUINO. ARDUINO UNO is an ATMEGA controller based development board designed for electronic engineers and hobbyists. In ARDUINO we have 20 I/O pins, so we can program 20 pins of UNO to be..... Listed under: [LED Projects](#)
361.  [Keypad Interfacing with Arduino Uno](#) In this tutorial we are going to interface a 4x4 (16 key) keypad with ARDUINO UNO. We all know keypad is one of the most important input devices used in electronics engineering. Keypad is the easiest and the cheapest way to give commands or instructions to..... Listed under: [Other Projects](#)
362.  [Servo Motor Control using MATLAB](#) In this tutorial you will learn to make direct connection between your Arduino and Matlab, so that you can program your Arduino directly through Matlab. It is very useful when you are working on complex robotics like Robotic Hand, Humanoid etc. as you can process your..... Listed under: [PWM Projects](#)
363.  [Magnetic Field Strength Measurement using Arduino](#) In this project we are using the concept of ADC (Analog to Digital Conversion) in

have used here is UGN3503U. This..... Listed under: [Other Projects](#)

364.

[RFID Interfacing with Arduino](#) In this tutorial we are going to design a system to read the ID of RFID cards. RFID stands for Radio Frequency Identification. Each card has a unique ID embedded in it. These systems have many applications, like in offices, shopping malls and in many other..... Listed under: [Other Projects](#)
365.

[Servo Motor Control using Arduino](#) In this tutorial we are going to control a servo motor by ARDUINO UNO. Servo Motors are used where there is a need for accurate shaft movement or position. These are not proposed for high speed applications. These are proposed for low speed, medium torque..... Listed under: [Motor Projects](#)
366.

[Automatic Water Level Indicator and Controller using Arduino](#) In this Arduino based automatic water level indicator and controller project we are going to measure the water level by using ultrasonic sensors. Basic principal of ultrasonic distance measurement is based on ECHO. When sound waves are transmitted in environment then they return back to the origin as..... Listed under: [Other Projects](#)
367.

[Working of Force Sensor with Arduino](#) In this project we will be developing a fun circuit using Force sensor and Arduino Uno. This circuit generates sound linearly related to force applied on the sensor. For that we are going to interface FORCE sensor with Arduino Uno. In UNO, we are going use..... Listed under: [Sensor – Transducer – Detector Projects](#)
368.

[8x8 LED Matrix using Arduino](#) In this project we are going to design an 8x8 LED matrix display, for that we are going to interface an 8x8 LED matrix module with Arduino Uno. An 8x8 LED matrix contains 64 LEDs (Light Emitting Diodes) which are arranged in the form of a matrix, hence..... Listed under: [LED Projects](#)
369.

[RGB LED with Arduino](#) In this project we are going to interface 5 RGB (Red Green Blue) LEDs to Arduino Uno. These LEDs are connected in parallel for reducing PIN usage of Uno. The RGB LED will have four pins as shown in figure. PIN1: Color 1 negative terminal..... Listed under: [LED Projects](#)
370.

[Servo Motor Control by Flex Sensor](#) In this tutorial we are going to develop a circuit using FLEX sensor, Arduino Uno and a Servo motor. This project is a servo control system where the servo shaft position is determined by the flex or bent or deviation of the FLEX sensor. Lets first..... Listed under: [Motor Projects](#), [Sensor – Transducer – Detector Projects](#)
371.

[Variable Power Supply By Arduino Uno](#) In this tutorial we will develop a 5V variable voltage source from Arduino Uno. For that we are going use ADC (Analog to Digital Conversion) and PWM (Pulse Width Modulation) feature. Some digital electronic modules like accelerometer work on voltage 3.3V and some work on..... Listed under: [Other Projects](#)
372.

[PC Controlled Home Automation using Arduino](#) This project explains designing a home automation system which is controlled by a computer to switch On and switch Off various electrical and electronics devices. For demonstration we have used 3 zero watt bulbs which indicates LIGHT, FAN and TV. It uses Arduino Uno board as a..... Listed under: [Home Automation Projects](#)
373.

[Arduino Based Tone Generator](#) In this project we will develop a tone generator using Arduino Uno. We will have buttons interfaced with the UNO and each one of them generates different intensity of tone. The frequency of tone generated by the UNO is same at every internal. It's the intensity of the..... Listed under: [Other Projects](#)
374.

[Snake Game on 8x8 Matrix using Arduino](#) Snake Game has been very popular since the beginning of the Mobile phones. Initially it was come in Black and white cell phones, and soon became very famous. Then with the advancement of the Cellphones, this game has also changed a lot, and now many..... Listed under: [Game – Entertainment Projects](#)
375.

[Digital Code Lock using Arduino](#) Security is a major concern in our day to day life, and digital locks have become an important part of these security systems. One such digital code lock is imitated in this project using arduino board and a matrix keypad. Components Arduino Keypad Module Buzzer..... Listed under: [Other Projects](#)
376.

[GSM Based Home Automation using Arduino](#) Mobile phone is a revolutionary invention of the century. It was primarily designed for making and receiving calls & text messages, but it has become the whole world after the Smart phone comes into the picture. In this project we are building a home automation..... Listed under: [Home Automation Projects](#)
377.

[Prepaid Energy Meter using GSM and Arduino](#) Prepaid Electricity Energy Meter is a good concept in which you can recharge its balance, like we do in our mobile phones. In this project we are building a automated system by using Arduino and GSM module. You can recharge the electricity balance through this..... Listed under: [Metering – Instrument Projects](#)
378.

[Clap Switch using Arduino](#) In this project we are going to make Clapper circuit using the concept of ADC (Analog to Digital Conversion) in ARDUINO UNO. We are going to use a MIC and Uno to sense the sound and trigger a response. This Clap ON Clap OFF switch basically turns..... Listed under: [Other Projects](#)
379.

[IR Remote Controlled Home Automation using Arduino](#) Previously we have covered many types of Home automations using different technologies like DTMF Based Home Automation, PC Controlled Home Automation using Arduino, Bluetooth Controlled Home Automation. In this project, we are using IR based wireless communication for controlling home appliances. In this project, Arduino..... Listed under: [Home Automation Projects](#)
380.

[Bluetooth Controlled Toy Car using Arduino](#) After developing few popular robotic projects like line follower robot, edge avoiding robot, DTMF robot, gesture controlled robot, etc. in this project we are going to develop a bluetooth controlled robo car. Here we used a Bluetooth module to control the car and it is also..... Listed under: [Car Projects](#)

381.  [Servo Position Control with Weight \(Force Sensor\)](#) In this tutorial we will develop a circuit using Force sensor, Arduino Uno and a servo motor. It will be a servo control system where the servo shaft position is determined by the weight present on the force sensor. Before going any further let's talk..... Listed under: [Sensor – Transducer – Detector Projects](#)
382.  [How to establish UART communication between ATmega8 and Arduino Uno?](#) Here we are going to establish a communication between an ATmega8 microcontroller and Arduino Uno. The communication established here is UART (Universal Asynchronous Receiver Transmitter) type. It's serial communication. By this serial communication data can be shared between two controllers, which is a required in various embedded system..... Listed under: [Arduino Programmer Projects](#)
383.  [WiFi Controlled Robot using Arduino](#) There are many types of Robots, from the simple ones like a Toy car to the advanced ones like industrial Robots. We have already covered many types of Robots using different technologies, have a look at them: Line Follower Robot using 8051 Microcontroller Line Follower..... Listed under: [Robotics – Automation Projects](#)
384.  [Arduino Solar Day Night Controller](#) Introduction This is an Arduino controlled light sensing switching unit. Its main use is to control solar lights to turn on when it is dark outside, but it can work in many more applications. This guide will walk you through every aspect of the building..... Listed under: [Solar energy projects](#)
385.  [Capacitance Meter using Arduino](#) When we come across circuit boards which are previously designed or we take out one from old TV or computer, in attempt to repair it. And sometimes we need to know the capacitance of particular capacitor in the board to eliminate the fault. Then we..... Listed under: [Metering – Instrument Projects](#)
386.  [GUI Based Home Automation System using Arduino and MATLAB](#) We all are familiar with the word 'Automation', where the human interaction is minimal and things can be controlled automatically or remotely. Home automation is very popular and demanding concept in the field of Electronics, and we are also making our best efforts to make..... Listed under: [Home Automation Projects](#)
387.  [Arduino GPS Clock](#) There are many GPS satellites around the Earth which are used to provide the exact location of any place. Along with the location coordinates (Latitude and Longitude), it also provide other data like time, date, altitude, direction tracking angle etc. We have already learned to..... Listed under: [Clock – Timer Projects](#), [GPS Based Projects](#)
388.  [How to Use GPS With Arduino](#) GPS is a very useful device which is used in many electronics projects and applications like vehicle tracking system, GPS Clock, Accident Detection Alert System, traffic navigation and surveillance system etc. But question is how to use the GPS and read the data from GPS? We can..... Listed under: [Other Projects](#)
389.  [Arduino Propeller LED Display](#) You have seen Propellers in Aircrafts or in marine ships, if not in real then in movies for sure. In this session we are going to design a Propeller Display with Arduino, LEDs and a DC motor. In this Propeller Display, text will appear to..... Listed under: [LED Projects](#)
390.  [DIY LED VU Meter as Arduino Shield](#) VU Meter or Volume Meter is very popular and fun project in Electronics. We can consider the Volume Meter as an Equalizer, which is present in the Music systems. In which we can see the dancing of LEDs according to the music, if music is loud then equalizer..... Listed under: [How To – DIY – Projects](#), [LED Projects](#)
391.  [Call and Message using Arduino and GSM Module](#) Sometimes people find it difficult to use the GSM Module for its basic functions like calling, texting etc., specifically with the Microcontrollers. So here we are going to build a Simple Mobile Phone using Arduino, in which GSM Module is used to Make the Call,..... Listed under: [Phone Projects](#)
392.  [DIY Smart Vacuum Cleaning Robot using Arduino](#) Hi guys, are you a newbie to the world of Robotics or Electronic? OR Are you looking for a simple yet powerful project to make your friends and teachers impressed? Then this is the place. In this project we will use the power of Embedded..... Listed under: [How To – DIY – Projects](#)
393.  [Track A Vehicle on Google Maps using Arduino, ESP8266 & GPS](#) Vehicle Tracking System becomes very important now days, especially in case of stolen vehicles. If you have GPS system installed in your vehicle, you can track you Vehicle Location, and its helps police to track the Stolen Vehicles. Previously we have built similar project in..... Listed under: [Other Projects](#)
394.  [Make Your Own Homemade Arduino Board with ATmega328 Chip](#) Arduino is an open-source development platform for engineers and hobbyists to develop electronics projects in an easy way. It consists of both a physical programmable development board (based on AVR series of microcontrollers) and a piece of software or IDE which runs on your computer and used to write and upload..... Listed under: [Home Automation Projects](#)
395.  [Frequency Counter using Arduino](#) Almost every electronic hobbyist must have faced a scenario where he or she must measure the frequency of signal generated by a clock or a counter or a timer. We can use oscilloscope to do the job, but not all of us can afford an..... Listed under: [Metering – Instrument Projects](#)
396.  [Arduino Solar Tracker using LDR and Servo Motor](#) In this article we are going to make a Solar Panel Tracker using Arduino, in which we will use two LDRs (Light dependent resistor) to sense the light and a servo motor to automatically rotate the solar panel in the direction of the sun light..... Listed under: [Solar energy projects](#)
397.  [Smoke Detector using MQ2 Gas Sensor and Arduino](#) Smoke Detectors are very useful in detecting smoke or fire in buildings, and so are the important safety parameters. In this DIY session, we are going to build a Smoke Detector Circuit which not only sense the smoke in the air but also reads and displays the level..... Listed under: [Sensor – Transducer – Detector Projects](#)

under: [Medical – Health based Projects](#)

[Using the Android Platform to control Robots](#) The popularity of android devices is attributed to their powerful capabilities which include internet connectivity, open architecture, and several other kinds of built-in sensors. Students and other software developers are increasingly using the android platform since it utilizes Java programming language which can easily be..... Listed under: [Phone Projects](#), [Robotics – Automation Projects](#)

[Arduino based Automatic Plant Irrigation System with Message Alert](#) Whenever we go out of town for few days, we always used to worry about our plants as they need water on regular basis. So here we are making Automatic Plant Irrigation System using Arduino, which automatically provides water to your plants and keep you updated..... Listed under: [Home Automation Projects](#)

[IOT based Air Pollution Monitoring System using Arduino](#) In this project we are going to make an IOT Based Air Pollution Monitoring System in which we will monitor the Air Quality over a webserver using internet and will trigger a alarm when the air quality goes down beyond a certain level, means when..... Listed under: [Sensor – Transducer – Detector Projects](#)

[Scrolling Text Display on 8×8 LED Matrix using Arduino](#) In this tutorial we are going to design an 8x8 LED Matrix Scrolling Display using Arduino Uno, which will show scrolling alphabets. 8x8 LED Matrix contains 64 LEDs (Light Emitting Diodes) which are arranged in the form of a matrix, hence the name is LED..... Listed under: [LED Projects](#)

[IOT Based Dumpster Monitoring using Arduino & ESP8266](#) In this DIY, we are going to make an IOT based dumpster/garbage Monitoring System which will tell us that whether the trash can is empty or full through the webserver and you can know the status of your 'Trash Can' or 'Dumpsters' from anywhere in the..... Listed under: [Other Projects](#)

[The Big Easy Stepper Motor Driver](#) Stepper (or step) motors are really cool. They are perfect for automation or any time you need a motor to turn to a specific point, at a specific speed, in a specific direction. And, unlike typical motors, steppers are able to do all of this,..... Listed under: [Motor Projects](#)

[Sensing Humidity With The SHT15](#) The SHT15 is a digital humidity sensor that outputs a fully calibrated humidity reading. And... because what we are measuring is actually relative humidity, and relative humidity being relative to temperature, the SHT15 has a builtin digital thermometer. This makes things much easier to work..... Listed under: [Sensor – Transducer – Detector Projects](#)

[MQ-3 Alcohol Sensor, Breakout Board + Arduino](#) lot has happened since our last article was published and to celebrate the continuance of bildr we'll be playing with the MQ-3 Alcohol Gas Sensor. Coupled with the SparkFun Gas Sensor Breakout Board, connecting the MQ-3 to your Arduino is a breeze. The MQ-3 is..... Listed under: [Sensor – Transducer – Detector Projects](#)

[DIY 3X3X3 LED Cube with Arduino](#) In this project we are going to design a 3x3x3 LED CUBE and connect it to Arduino UNO to get different patterns. For a beginner we will start with a simple pattern. A typical 3\*3\*3 LED cube connected to UNO is shown in the image above,..... Listed under: [How To – DIY – Projects](#)

[Art-duino](#) We built a mini-crawler robot that draws a path behind it to make interesting designs. We chose this design for a variety of reasons. First and foremost, we experimented with attaching our other materials to the motors, and most of them were too heavy for..... Listed under: [Other Projects](#)

[Mobile Phone Controlled Robot Car using G-Sensor and Arduino](#) In this article, we are going to Control the Robot Car through the G sensor of our mobile phone and you will be able to move the Robot just by tilting the Phone. We will also use Arduino and RemoteXY app for this G-Sensor Controlled..... Listed under: [Car Projects](#)

[Interfacing MQ2 to Arduino- Gas Sensor for Smoke-Butane-CH4 and LPG](#) In this article, we are going to learn how to interface MQ2 Gas Sensor with Arduino. MQ2 is basically a general purpose gas sensor (similar to MQ5) which can sense a broad range of gases like LPG, Butane, Methane(CH4), Hydrogen and in addition to these..... Listed under: [Sensor – Transducer – Detector Projects](#)

[Interfacing PIR Sensor to Arduino – Connect Motion Sensor/Detector to Arduino](#) In this article, we are going to learn how to interface/connect PIR Sensor or Passive Infrared Sensor to Arduino. We have written a tutorial on how to interface PIR sensor to 8051 previously in CircuitsToday! So a PIR sensor which is also known as Pyroelectric..... Listed under: [Sensor – Transducer – Detector Projects](#)

[Arduino and 7 Segment Display – Interfacing Tutorial](#) In this article, we are publishing a tutorial on how to interface seven segment LED display to Arduino. Seven segment displays are used in many embedded system and industrial applications where the range of outputs to be shown is known beforehand. Basic 1 digit seven segment..... Listed under: [LED Projects](#)

[LM35 and Arduino – Temperature Measurement and Display on LCD](#) In this article, we are presenting a tutorial on how to interface LM35 and Arduino along with its program. Once we successfully interface arduino and lm35, we will go on to build a temperature display using arduino and a 16×2 LCD module which constantly monitors..... Listed under: [LCD Projects](#), [Temperature Measurement Projects](#)

Projects

415.

[How to Make an LED Scrollbar](#) In this tutorial, we are going to build an LED Scroll Bar as shown in the image given below. The project is designed to flash Ten LED strips ( by giving different lighting patterns for each strip) with the help of a control board. We..... Listed under: [LED Projects](#)
416.

[Interfacing MQ5 LPG Sensor to Arduino](#) In this guide, we learn how to interface MQ5 Gas sensor (which is a generic Gas Sensor more suited to detect and determine LPG concentrations) with Arduino. In this tutorial, we are using the MQ5 Gas sensor module (which is widely available in market) ..... Listed under: [Sensor – Transducer – Detector Projects](#)
417.

[Tachometer using arduino](#) Tachometer is a device used for measuring the number of revolutions of an object in a given interval of time. Usually it is expressed in revolutions per minute or RPM. Earlier tachometers purely mechanical where the revolution is transferred to the tachometer through mechanical coupling..... Listed under: [Other Projects](#)
418.

[Programming an ATtiny w/ Arduino 1.6 \(or 1.0\)](#) This tutorial shows you how to program an ATtiny45, ATtiny85, ATtiny44 or ATtiny84 microcontroller using the Arduino software. These are small, cheap (\$2-3) microcontrollers that are convenient for running simple programs. The ATtiny45 and ATtiny85 have eight legs and are almost identical, except that the..... Listed under: [Other Projects](#)
419.

[Temperature logger using arduino](#) Simple temperature logger using arduino (°C & °F). This project is about a simple USB temperature logging system using arduino uno and the serial monitor function in the arduino IDE. The system monitors the temperature every 2 seconds and shows it on the arduino serial monitor..... Listed under: [Temperature Measurement Projects](#)
420.

[Gas Leakage Detector using Arduino and GSM Module with SMS Alert and Sound Alarm](#) We have published lots of interesting arduino projects like GSM based Fire Alarm System , Line Following Robot, RFID Based Access Control System and many other useful projects. This time, we are publishing a highly useful home application – Gas Leakage Detector using Arduino and..... Listed under: [Sensor – Transducer – Detector Projects](#)
421.

[Arduino and Python](#) Talking to Arduino over a serial interface is pretty trivial in Python. On Unix-like systems you can read and write to the serial device as if it were a file, but there is also a wrapper library called pySerial that works well across all operating..... Listed under: [Other Projects](#)
422.

[Calibration](#) This example demonstrates one techinque for calibrating sensor input. The board takes sensor readings for five seconds during the startup, and tracks the highest and lowest values it gets. These sensor readings during the first five seconds of the sketch execution define the minimum and..... Listed under: [Sensor – Transducer – Detector Projects](#)
423.

[Arduino Resistance Data Logger](#) I was working on a project were I needed a cheap and efficient way to log the changing resistance of a sensor while simultaneously logging the temperature. This project is similar in many respects to the other data loggers on my site. Three prototypes have..... Listed under: [Memory – Storage Projects](#)
424.

[DS1631 – Arduino Code and Temperature Validation](#) Basic information The DS1631 is a low cost, I2C interface digital thermometer popular in the maker community. Capable of providing 12-bit temperature readings over a -55°C to +125°C range. I have need for a digital thermometer in many of my projects and thought it would..... Listed under: [Temperature Measurement Projects](#)
425.

[Live Action MATLAB – Arduino data logger.](#) Background I was in need of an affordable data logger for a project. I have access to MATLAB on all of my machines so it was an easy choice to build an Arduino based data logger that would easily interface with MATLAB R2014a. MATLAB is..... Listed under: [Memory – Storage Projects](#)
426.

[Dented Joystick](#) Goals:The project goals are: Adjustable number of detents Adjustable force threshold Software controlled damping Implementation: A brief overview: The team's design utilizes several components: Arduino Leonardo Firgelli L16-50-35-12-P actuators (2x) FSRs (4x) TI L293D H bridge MSU Eagle custom PCB print The..... Listed under: [Medical – Health based Projects](#)
427.

[Staircase Meets Piano](#) In November 2014, we displayed our first completed project as a club, the Staircase Piano. The idea for the project was given to us by Professor Barry Brown before the club was even formed. Throughout the semester we worked towards putting the piano together for..... Listed under: [Arduino Programmer Projects](#)
428.

[LTD SMRT Project \(Safe Monitored Rider Transit\)](#) The proposed new LTD public transportation system uses people counters on the bus system to get an accurate measure of rider tendencies across different routes at specific times. Each bus will be equipped with two sensors which will generate numeric data no larger than 4..... Listed under: [Development Board – Kits Projects](#)
429.

[Nodemcu arduino interfacing project](#) A guide to getting started with the ESP8266 with the Arduino IDE This assumes that yo have a NodeMCU type board with the Silicon Labs CP2102 USB to UART Bridge. These boards are convenient because they can be connected directly to your computer for proaamming..... Listed under: [Interfacina\(USB – RS232 – I2c -ISP\) Proiects](#)

430.

[Using an Arduino as a Latching Relay](#) I wrote this one hot week in July 2010. I've been leaving my front door ajar, to get some air through the house. Probably not a very good idea. So I thought I'd hook up an Arduino to ensure that no one takes advantage of..... Listed under: [LED Projects](#)
431.

[Arduino-based Graphical Heart Rate Monitor](#) Introduction: Like many out there, I enjoy a good exercise session, whether it be indoors or outdoors. As part of that I purchased a Polar branded heart rate monitor, which came with a "Wearlink" chest strap and RS300Xsd receiver watch. The watch is able to..... Listed under: [Medical – Health based Projects](#)
432.

[High-Power Control: Arduino + TIP120 Transistor](#) Up until now, we have talked about working with a lot of low-power devices. Sensors, LEDs, ICs, and the like are all capable of being powered directly from your Arduino, but as many awesome 5 and 3.3v components as there are, eventually you will find..... Listed under: [Sensor – Transducer – Detector Projects](#)
433.

[SunAir Solar Power Controller for Raspberry Pi and Arduino](#) Ever wanted to build your own Solar Powered Raspberry Pi or Arduino system? SunAir and SunAirPlus are 3rd Generation Solar Charging and Sun Tracking Boards designed by Dr. John C. Shovic at SwitchDoc Labs. You can use this board to power your projects and add..... Listed under: [Solar energy projects](#)
434.

[Using Arduino and Pd for musical live performance](#) Connecting an Arduino microcontroller to Pd is no big problem: You can just put Firmata on your Arduino and use the Pduino library for communication on the Pd side. But sometimes Firmata is not the answer to every problem: You may want to turn on..... Listed under: [Sound – Audio Projects](#)
435.

[Lab 8: Shift Register and Binary](#) Topics: First Build The Circuit The Code Hardware Theory Overview-"Rollover Rollover" What is a Shift Register How the Arduino Controls the Shift Register Software Theory The shiftOut Function Binary Numbers Other Functions in the Code Exercise References 1. First Build It would be a really..... Listed under: [LED Projects](#)
436.

[Knock Detector](#) Introduction For the third assignment, we decided to make a 'knock-detector' that is capable of informing the user/owner of specific events. We designed our system such that it can detect both casual knocks and knock patterns. Casual knocks could be used to inform the owner/user..... Listed under: [Sensor – Transducer – Detector Projects](#)
437.

[Arduino Yun SBC adds Wifi and Linux to Leonardo features](#) [Updated Sep 30] — Arduino announced the first open source Arduino hacker board with built-in WiFi, and also the first to run Linux. The \$69 Arduino Yun integrates the functions of an Arduino Leonardo, featuring an Atmel ATmega32U4 microcontroller and 14 GPIO pins, with an..... Listed under: [Wifi - Wlan Projects](#)
438.

[Internet Datalogging With Arduino and XBee WiFi](#) Introduction Are you looking to get your data gathering project hooked into the “Internet-of-Things”? Then check out data.sparkfun.com! It makes posting data to the web as easy as constructing a URL and POSTing it to a server. I wanted to create a quick project to..... Listed under: [Wifi - Wlan Projects](#)
439.

[Weather Monitor](#) This Instructable shows you how to build a micro-controller based weather monitoring device. Built on the Arduino Uno board it can easily be extended and modified should you have additional sensors at hand. Main requirements: - Measure temperature (accuracy +/- 0,5 degree Kelvin) - Measure..... Listed under: [Home Automation Projects](#), [Metering – Instrument Projects](#), [Sensor – Transducer – Detector Projects](#), [Temperature Measurement Projects](#)
440.

[Clear polycarbonate enclosures using Arduino](#) So about a year ago I decided that I wanted to get into AVR microcontrollers. After ordering an AVR pocket programmer from Sparkfun , I soon realized that it was too delicate to be sitting on a workbench full of wire clippings. I knew I..... Listed under: [Ideas](#), [Other Project Ideas](#)
441.

[Tutorial 15: Arduino Serial Thermometer](#) The Arduino reads temperature from a MCP9700 temperature sensor IC and displays the temperature in the Arduino IDE serial monitor window. Also see the Arduino LCD thermometer tutorial (tutorial 14). Prerequisites Complete Tutorial 9: Using the Arduino Serial Port before attempting this tutorial. Components Besides..... Listed under: [Sensor – Transducer – Detector Projects](#)
442.

[Solar-Oriented, Arduino-Powered Clock](#) This is a clock designed to keep accurate time (independent of atomic or GPS), display local sunrise, sunset and solar noon, and also adjust itself for daylight savings time. I wanted the clock to be easy to use and be flexible. The setting functions are..... Listed under: [Clock – Timer Project Ideas](#), [Ideas](#)
443.

[DIY Low Cost Arduino Mobile Development Platform](#) I have wanted to build my own robot for awhile now. But after many tried and failed attempts, I was losing hope that may ever happen. I discovered that there wasn't a small, robust, super easy to add-on to, robot that was within my budget to..... Listed under: [Development Board – Kits Projects](#), [How To – DIY – Projects](#), [Phone Projects](#)
444.

[APR9600 Voice Recording and Playback System with JRC286D Chip ICStation Mega 2560 Compatible Arduino](#) ICStation team introduce you this APR9600 voice recording and playback system used in elevator based on the ICStation Mega2560 compatible with Arduino. It uses DC5V voltage to work. When you press the

445.  [Magical Colour Copying Chameleon Lamp using Arduino](#) In this Instructable, I will show you how to make an Arduino powered lamp that detects the colour under it and then attempts to emulate that colour. All using easy to find parts (most can be found in the Dollar store with the exception of..... Listed under: [Game – Entertainment Project Ideas](#), [Ideas](#)

446. [Ultrasonic Dimmer \(Without Humming Or Buzzing Noise\)](#) I have been working on this project for a while and whilst it is still under development I decided to write a short guide after several requests to do so. The dimmer uses an interrupt driven XL-Maxsonar EZ1 ultrasound range finder to measure the distance..... Listed under: [Sensor – Transducer – Detector Projects](#)

447. [Rotary Emotiphone using Arduino](#) Introduction The Rotary Emotiphone is a vintage rotary phone that tweets mood emoticons. It has a predefined list of 10 emoticons, each assigned to a digit, so that when you are happy / sad / drunk / etc., you pick up the handset and dial..... Listed under: [Home Automation Project Ideas](#), [Ideas](#), [Phone Project Ideas](#)

448. [High Speed Photo Arduino : HighSpeeduino](#) Today is High Speed Photography day ! The concept is to take a 'long' exposure photograph, 4 seconds say, in a (very) dark room (a bathroom in our case). You end up with a completely black picture, right ? If you burst a flash (about..... Listed under: [Arduino Video – Camera – Imaging Project Ideas](#), [Ideas](#)

449. [Control Two LEDS with an Arduino and bitVoicer](#) So what I want to do here is do several things with two LEDs with speech recognition I'm using bitvoicer you can get it here Step 1: Part List So I'm doing this with as little parts as I can, here's the list: Green LED..... Listed under: [LED Projects](#)

450. [DIY Guide for Amblone LED Light](#) In this section we will explain exactly how you can create your own Amblone setup, consisting of 3 RGB LED strips and an Arduino Mega. What do I need? To create the Amblone setup described in this guide, you will need the following: Amblone software..... Listed under: [LED Projects](#)

451. [Earfingers: Hear with your hands using Arduino](#) First and foremost, I must acknowledge that I am standing on the shoulders of giants, and that every giant is standing on the shoulders of giants (such as all contributors to instructables). If it weren't for the unknowably many people who had the mindfulness to..... Listed under: [How To – DIY – Project Ideas](#), [Ideas](#), [Sound – Audio Project Ideas](#)

452. [Talking Pumpkin](#) So my boss came to me one last week and said he wanted to scare the trick-or-treaters who came to his home, and the kids who would come to work during a special Halloween Walk the community does. Thus was born the talking pumpkin. In..... Listed under: [Game – Entertainment Projects](#), [Home Automation Projects](#), [PWM Projects](#), [Sensor – Transducer – Detector Projects](#), [Sound – Audio Projects](#)

453. [Basics of Turning your Remote Controll Vehicle into an Autonomous System \(Drone\) Using an Arduino](#) I began this project with the objective of cheaply turning my RC helicopter into something of a UAV or at least to fit some sensors to reduce collisions and other "mis-haps." Now unfortunately at the beginning of the project i miscalculated my little helicopter's lift..... Listed under: [Wireless Projects](#)

454. [Super Amazing Button using Arduino](#) Hello Everyone. This is my very first Instructable so please go easy on me. This was more or less a test project to see if my new arduino board worked. Any friendly advice will be greatly appreciated so my future posts can be even better..... Listed under: [Game – Entertainment Projects](#), [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#), [Projects](#)

455. [Connect A 16×2 LCD Display To An Arduino](#) Welcome to my FIRST instructable, i will show you how to connect a 16x2 lcd display to an arduino, follow these simple step by step instructions and you will have it done in no time 😊 Tools Needed : Soldering Iron Wire Strippers Pliers..... Listed under: [LCD Projects](#), [Projects](#)

456. [How to tweet from an Arduino using the wifi sheild](#) Hey, I am a big fan of Instructables. I have consistently used it for the past 3 years and now its time for me to write one myself.Here we go. This instructable is for those who want to make some inanimate object tweet automatically. Like say for..... Listed under: [Wireless Projects](#)

457. [Interactive Child’s Mobile using Arduino](#) What can you make with fluorescent acrylic as the inspiration? We chose to make a glow-in-the-dark baby mobile, with an accompanying toy. This project was completed as a part of the Computing and Craft class at Olin College of Engineering. Materials: - Craft Materials: -..... Listed under: [Game – Entertainment Project Ideas](#), [Home Automation Project Ideas](#), [Ideas](#)

458. [Webserver for home appliances control](#) This instructable describes how a simple but powerful webserver used for controlling of home appliances can be done. The hart of the circuit is the ATmega328 microcontroller. I have chose this because I wanted to use all available Arduino libraries compatible with them. The Ethernet..... Listed under: [Home Automation Projects](#)

459. [Learning Arduino basics the easy way – Part 01 “Blink” or “The Internet”](#) You've bought your first Arduino or you're planning to get this great little device? Obi Wan would say: "That's good. You have taken your first step into a larger world." Same thing for me! Congratulations! You'll see, as soon as you master the basics, you'll..... Listed under: [Internet – Ethernet – LAN Projects](#)

460.

[Datura 6 home automation – 2015 improvements](#) News: In this latest months I've made some important fixes and improvements to the code and to the webserver of the project. See datura\_mega\_v19.ino for the latest code. The most functional project over internet – Use it as a complete irrigation system for your garden,..... Listed under: [Home Automation Projects](#)
461.

[Analog Read Voltage using Arduino](#) This example shows you how to read an analog input on Pin 0, convert the values from analogRead() into voltage, and print it out to the serial monitor. Circuit: image developed using Fritzing. For more circuit examples, see the Fritzing project page Connect the three wires from..... Listed under: [Metering – Instrument Projects](#), [PWM Projects](#)
462.

[Build A Firefighting Robot Using Arduino](#) For my project I created a robot with an attached water cannon. My mentor and I built it in a budget of around \$300 (not including the necessary equipment), and it functions quite well. For the motors we used drill motors, powered by the 18..... Listed under: [Robotics – Automation Projects](#)
463.

[An animation inside a water drop by Physalia](#) 2000 pictures compose this piece- that is, 2000 perfect different water drops into which we mapped an animation. Droplets that behave and look strangely similar at the stage of less entropy, and become more disorderly as they splash. The final result of the piece you..... Listed under: [Video – Camera – Imaging Projects](#)
464.

[PuttDuino putt-putt hole with Arduino](#) My company has annual events where we all get together for fun - to blow off steam and have a little competition. In the past we have had softball and bowling competitions. This year someone had an inspiration: each department would build a putt-putt 'hole'..... [RaspiDuinoRover – \(Yet another\) iPhone driven moving Raspberry Pi and Arduino rover](#) Architecture RaspiDuinoRover is made of three main parts: A Raspberry Pi which receives commands from a remote device through a TCP connection, and sends these commands to an Arduino Uno through an I2C connection. The same TCP channel is used to send back the remote..... Listed under: [Wireless Projects](#)
470.

[Hear your plant make music! – Ethernet version](#) This walk-through will show you how to build a sensor to monitor your plant's environment and use Stats in Sound's ERC-20 app to turn this data into music, allowing you to listen to your plant's reaction to it's environment. For more information on this project,..... Listed under: [Internet – Ethernet – LAN Projects](#), [Sound – Audio Projects](#)
471.

[Autonomous drone that you already have in your pocket!](#) In this tutorial i want to learn you something, maybe change your mind. And make autonomous drones available for everyone. Simple question is: What do you need to make your drone autonomous? . Answer: - GPS - Accelerometer - Gyroscope - Telemetry wireless system -..... Listed under: [Phone Projects](#)
472.

[Temperature Recording Arduino Robot](#) My son and myself made a little arduino robot that records temperature. He wanted me to draw a robot, I wanted to experiment with blinking LEDs relaying data so a plan was hatched. The way the LEDs work is as follows: Green = lowest temperature..... Listed under: [Ideas](#), [Robotics – Automation Project Ideas](#)
473.

[TiltKey- Write by Tilting](#) The TiltKey is a keyboard input device based on tilting. Based on the angle that it is tilted at, and the direction it is tilted in, you can write every letter of the alphabet, every number, and every symbol found on a standard US keyboard..... Listed under: [Sensor – Transducer – Detector Projects](#)
474.

[Gesture controlled robot using Arduino](#) This gesture controlled robot uses Arduino,ADXL335 accelerometer and RF transmitter-receiver pair. We will divide the entire robot into 3 parts the transmitter,the receiver and the robot. The different gestures that have been mapped to the direction of the bot are- Hand parallel to the ground-stationary..... Listed under: [Robotics – Automation Projects](#)
475.

[Fading an LED off and on using Arduino](#) Demonstrates the use of the analogWrite() function in fading an LED off and on. AnalogWrite uses pulse width modulation (PWM), turning a digital pin on and off very quickly, to create a fading effect. Circuit Connect the anode (the longer, positive leg) of your LED to digital output pin 9 on your..... Listed under: [LED Projects](#), [Projects](#)

477.
- 
- [Wing Tip Extensions for Arduino](#) Greetings, One late night of web surfing I came across some 45 Degree Extension boards. Thinking to myself "Wow!" that's cool and then I looked at the price...\$27.00 before S&H. "Yikes!" I've been looking for an excuse to learn Eagle PCB layout software and this..... Listed under: [Ideas](#), [Interfacing\(USB – RS232 – I2c -ISP\) Project Ideas](#)

490.
- 
- [Arduino Ultrasonic Parking Spotter](#) For my first instructable, I'd like to present The Parking Spotter. This is not a new concept, I know. However, this build was done specifically to suit my needs/wants/materials already in my possession. Typically, a project begins with an idea, parts are then gathered, and..... Listed under: [Arduino Car Project Ideas](#), [Ideas](#), [Sensor – Transducer – Detector Project Ideas](#)

491.
- 
- [ZIF socket Arduino-compatible board](#) In this tutorial we make an Arduino-compatible board that holds the microcontroller in a ZIF socket.

socket. Our reason for making this is..... Listed under: [Development Board – Kits Projects](#), [Projects](#)

492.
- [Bootload an ATmega Microcontroller & Build Your Own Arduino – 2](#) Since you lacked the USB interface in your own Arduino board, it becomes necessary to use a homemade/ready-made USB to Serial Converter Module as an efficient and economical solution. Inexpensive and easy-to-use USB to Serial Converter modules are now widely available, such as one shown..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)

493.
- [Simple Remote Data Plotting using Android / Arduino / pfodApp](#) Simple Remote Data Plotting using Android / Arduino / pfodApp This Instructable shows you how to plot Arduino sensor data on your Android mobile and capture it for later downloading to your computer. These instructions are also available at [www.pfod.com.au](#) No Android programming is required..... Listed under: [Arduino Android](#), [Arduino Programmer Projects](#), [Phone Projects](#)

494.
- [How To Make a Simple Variable Frequency Generator Using Arduino](#) A frequency generator is a very handy device in electronic design, development, testing and trouble shooting. It is such a kind of device which can generate the required frequencies which can be then applied directly to the target device for testing it. There are frequency..... Listed under: [Development Board – Kits Projects](#)

495.
- [Build A Fun Hackable Speaker Timer Using Arduino](#) This is a fun speaker timer I made for some upcoming conferences. It uses a 4-digit charlieplexed LED (pseudo 7-segment) display and is driven by a AVR ATmega328 or an Arduino. It allows a default time to be set, can be paused, and will put..... Listed under: [Clock – Timer Projects](#)

496.
- [How to Build a Vibration Detector Circuit](#) In this project, we will go over how to build a vibration detector circuit.This is a circuit which can detect and measure flex, touch, vibration, and shock.The sensor we will use to detect these movements is a piezo vibration sensor from Measuremenet Specialists (MEAS). The..... Listed under: [Sensor – Transducer – Detector Projects](#)

497.
- [Control an iPod with the Arduino](#) This tutorial will describe a way of controlling an iPod remote, and thus, an easy way of getting some music and sound out of your Arduino project. The remote we used was an unofficial remote I found on the worldwide auction site for around 10..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#), [Phone Projects](#), [Projects](#)

498.
- [DIY: Arduino Based Ohmmeter](#) This is a project based on Arduino board which can measure the unknown resistance values and perform diode test and continuity testing. When we connect the unknown resistor on the breadboard circuit, the 16x2 LCD displays the resistor value and when we connect a diode..... Listed under: [LED Projects](#)

499.
- [Arduino Powered Four Letter Word Generator](#) Build an Arduino-powered version of the "Four Letter Word Generator" (FLW). This version generates "words" on the fly - it does not use a list. The "original" version from the 1970's used B7971 nixie alphanumeric tubes. These tubes are getting hard to find and they're..... Listed under: [Game – Entertainment Projects](#), [LED Projects](#), [Projects](#)

500.
- [HSM-20G Interface with Arduino Uno](#) The HSM-20G is an analog humidity and temperature sensor that outputs analog voltage respects to relative humidity and temperature. However from this sensor relative humidity is found along with temperature. Relative humidity is the percentage of moistures of airs for a particular temperature [1]. Feature:..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)

501.
- [Real-time room temperature on your Website using Arduino](#) This is how to push high resolution real-time data from Arduino-based temperature sensor to your web page without any server-side coding. Arduino is a great device for collecting, storing and transferring data from various sensors but there are times you need to make your data..... Listed under: [Home Automation Projects](#), [Internet – Ethernet – LAN Projects](#), [Projects](#), [Sensor – Transducer – Detector Projects](#), [Temperature Measurement Projects](#)

502.
- [How To Make a PC Control Robot](#) Do you ever tried to control your robot using your PC or laptop? Controlling a robot using PC or laptop is often being a fun for the student or hobbyist. Thus during this article you will be tend to learn how to control your robot..... Listed under: [Robotics – Automation Projects](#)

503.
- [Arduino Controlled Nerf Vulcan](#) Yes, this is exactly what the title says it is. This instructable will teach you how to control any Nerf Vulcan, with your Arduino. The provided tutorial will just shoot for 2.5 seconds, stop for 2.5 seconds, and so on. It is like a "hello"..... Listed under: [Game – Entertainment Project Ideas](#), [Ideas](#)

504.
- [PSoC 4 Pioneer Kit Community Project#042 – Hangman Game](#) Hello! It has been our Friday tradition for the past few weeks to end with a game. This week we have the Hangman game. In this game the user will be using two Pmod boards, an LCD and Button board to display outputs and generate..... Listed under:

505.

[Build a big crane game using Arduino](#)

How to build a whole room crane game. Based on the arcade style 'Crane Game' or 'Claw Machine'. This is a continuation of a previus instructable titled CRANE GAME in which we built a 2-axis crane game in a door frame. We have now added a third axis and..... 506.

[Battery powered device hardware design tips](#)

I'm working on a prototype product(Wifi motion sensor) that will be powered from a battery source, it has a mega328(arduino bootloader, with sleep mode on and wake on interrupt,and WDT in case it hangs up), a PIR motion sensor , and a CC3000 break out..... Listed under: [Wireless Projects](#)

---
507.

[Accelerometer powered LED dress](#)

Let's be honest for a moment, doesn't everyone want a dress that lights up at your very whim? No? Alright, well I do. It's pretty straightforward, though the programming gets a wee bit tricky. So pick up your pencil, sketch out a design and then we'll..... Listed under: [LED Projects](#), [Metering – Instrument Projects](#)

---
508.

[Beacon](#)

In this tutorial you will learn how to turn any conductive surface into a capacitive touch sensor. This project illustrates how to use capacitive touch to turn on a motor (fan) and neopixel. In this example, all of the components were custom designed and built..... Listed under: [Sensor – Transducer – Detector Projects](#)

---
509.

[Digital thermometer using arduino](#)

Digital thermometer using arduino and LM35. This article is about a simple three digit digital thermometer using arduino. Range of this thermometer is from 0°C to 99.9°C. There is also a provision for displaying the temperature in °F scale. Three terminal analog temperature sensor LM35..... Listed under: [Metering – Instrument Projects](#)

---
510.

[Making sound \(noise\) machines using Arduino](#)

As a part of being an artist in residence at Instructables, I took it upon myself to build of couple of noise machines / music boxes. My interest lies in designing objects that would enable people to explore the world of sound synthesis and for..... Listed under: [Game – Entertainment Projects](#), [Home Automation Projects](#), [Projects](#), [Sound – Audio Projects](#)

---
511.

[Arduino powered voltmeter and temp gauge](#)

For a while I have been looking for a way of getting a reading of main and leisure battery voltage, and inside and outside temperature in the van. I spent ages on researching and found some bits here and there that might help, but nothing..... Listed under: [Sensor – Transducer – Detector Projects](#)

---
512.

[Play Music using Arduino Esplora](#)

This example shows how to play notes on the buzzer mounted on the Arduino Esplora. Buzzers can generate different audio signals in audible frequency ranges. A note is an audio signal at a specific frequency. If you know the frequency of the notes you want..... Listed under: [Projects](#), [Sound – Audio Projects](#)

---
513.

[Servo Feedback Hack \(free\)](#)

This Instructable brought to you by the kind folks a Rachel's Electronics Visit [www.rachelselectronics.com](#) for cool electronics kits and breadouts! This hobby servo hack will add shaft position feedback by tapping into the servo's own internal potentiometer. The only parts that need are wire and..... Listed under: [Sensor – Transducer – Detector Projects](#)

---
514.

[Make A Simple Object Tracking Robot Using Arduino](#)

In this tutorial I am going to post the step-by-step procedure to make a simple Object Tracking Bot. The main aim of this Bot is to follow the objects which are shown to it in 3D space i.e., x, y and z – axis (horizontal,..... Listed under: [Robotics – Automation Projects](#)

---
515.

[How to Send Message from GSM Module using Arduino](#)

The GSM stands for Global System for Mobile communications. This is a global standard which is followed by the GSM modules inside the cellular phones which enables them to be connected with any mobile network around the globe. In certain applications the microcontroller based systems..... Listed under: [Phone Projects](#)

---
516.

[RFIDuino – Using an Arduino & RFID Reader to make a puzzle GeoCache](#)

I enjoy both Geocaching and electronics and have made a couple of electronic puzzle caches using an Arduino. My latest creation (with the help of a fellow cacher for the code) is using an Arduino and RFID reader to make a puzzle geocache we call..... Listed under: [Ideas](#), [Interfacing\(USB – RS232 – I2c -ISP\) Project Ideas](#)

517.

[Servo Motor Simulation via Arduino UNO](#)

Hey everyone. I hope you will be fine. As you know that last time, we had started Arduino UNO course and given you

518.

[Web Client Repeating using Arduino](#)

This example shows you how to make repeated HTTP requests using an Ethernet shield. This example uses DNS, by assigning the Ethernet client with a MAC address, IP address, and DNS address. It connects to <http://www.arduino.cc/latest.txt>. The content of the page is viewable through your..... Listed under: [Internet – Ethernet – LAN Projects](#), [Projects](#)
519.

[Poor Man’s Robot Base](#)

I've been wanting to get into robotics for awhile now, but it can cost at the very least 20 dollars to build a decent motor base, and I wasn't willing to invest that much money into it, so I made a robot base using parts..... Listed under: [Robotics – Automation Project Ideas](#)
520.

[Temperature Display Using LCD](#)

Here is a Simple Temperature Display Circuit using LCD (Liquid Crystal Display). For Heat Sensor we have used IC LM35 (Precision Centigrade Temperature Sensors) whose Output voltage is linearly proportional to the Celsius (Centigrade) temperature. Output of LM35 IC is 10mv/degree centigrade for eg if..... Listed under: [LCD Projects](#)
521.

[Arduino Based Lie Detector](#)

We have previously posted the the project lie detector, now here is is also a lie detector using arduino. Here is a simple tutorial to build a simple lie detector which will give visual indication through LED arrangement whether the person speaks lie or truth. The project uses a..... Listed under: [LED Projects](#)
522.

[Build A Easy Home Surveillance Gadget Using Arduino](#)

Everyone wants to keep their home secure. If zombies have swarmed your house, you want to know it's not safe to return, RIGHT? What better way to do this than to set up a surveillance system? Now it's easier than ever to have. And, you don't..... Listed under: [Home Automation Projects](#), [Security – Safety Project Ideas](#), [Video – Camera – Imaging Projects](#)
523.

[Lambda Calculus in a Can using Arduino](#)

You can get soup in a can. You can get bread in a can (\*). Now the long wait is over! You can finally get Lambda Calculus in a can. Project LambdaCan is an amusing exercise in absurdity. It implements a reducer (interpreter) for the..... Listed under: [Development Board – Kits Projects](#), [Projects](#)
524.

[Fritzing – The Ultimate Tool For Sketching Out Electronics Projects \[Cross Platform\]](#)

Despite sounding like an alcopop, Fritzing is actually an incredible bit of free software you can use to create circuit and component diagrams for use with rapid-prototyping electronics boards such as the fantastic open-source Arduino. As such, it’s open source too, entirely cross platform and..... Listed under: [Development Board – Kits Projects](#)
525.

[Make A LCD Shifter for Arduino](#)

The original idea was to create a library that simplify the use of IC 74HC595 between Arduino and other hardware. In this Instructable I will share this to you using as example the control of a 16x2 LCD. The example will show on the LCD..... Listed under: [LCD Projects](#)
526.

[Arduino 7 Segment LED Display and Counter – Tutorial #8](#)

This is a simple 0 to 9 counter circuit constructed using Arduino! Here, a common cathode 7-segment LED display is connected to Arduino for displaying the digits. The code (Arduino sketch) allows push button increment of the counter from 0 to 9. The whole circuit..... Listed under: [LED Projects](#)
527.

[Temperature Sensor DS18B20](#)

Electronic Brick, Waterproof and other Versions NOTE: There are different-appearing versions but they work the same. This is an electronic thermometer which has high accuracy over a wide range (accurate to ±0.5°C over the range of -10°C to +85°C) (Workable from -55°C to +125°C). You..... Listed under: [Metering – Instrument Projects](#)
528.

[Playfield :: Hardware :: Flippers](#)

If you are contemplating building your own machine, then you probably already know a good bit about how pinball machines work. It’s basically series of electro-mechanical events where a steel ball activates a switch, which in turn fires a solenoid that drives a mechanism, sending the ball off in some other..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
529.

[StrobeDuino – Computer-controlled RGB strobe/lamp](#)

After experimenting with Arduino and Processing serial communication i wanted to do something cool. I had some RGB LEDs lying around so i thought about making something with them. I ended up with a strobe/lamp controlled by a Processing sketch that receives the commands from..... Listed under: [LED Projects](#)
530.

[Arduino – Theremin with 7 Segment LED Display](#)

In this instructable, I will show you how to make a simple toy that combination of the LEDs flash and Theremin.

531.

[Make A Air Cap-Sense Piano Using Arduino](#) I recently got my shipment of 10 buzzers I ordered about a month ago, so as soon as I got them I was eager to make something fun with them, so I looked around a bit and searched for what to do with them, and..... [RS-232](#) In this tutorial you will learn how to communicate with a computer using a MAX3323 single channel RS-232 driver/receiver and a software serial

544.

[Arduino \(Optic Fibre\)](#) I just brought a new lamp and after a week, I'm tired of looking at it randomly change colours between red, blue, green. What can you expect from a cheap lamp brought at 5\$ . Looking at the lamp I realized that I could make..... Listed under: [Home Automation Projects](#), [LED Projects](#)
545.

[Arduino 2.4 GHz Spectrum Analyser](#) This article describes a simple spectrum analyser for the 2.4 to 2.5 GHz Wi-Fi band. It's based on the Cypress CYWM6935 Wireless Radio Module. Although the manufacturer doesn't recommend it for new commercial projects, it is still widely available from eBay suppliers and Farnell here..... Listed under: [LCD Projects](#)
546.

[Arduino Laser Show \(adapted from NothingLabs' Instructable\)](#) This project uses an Arduino, a pair of speakers, and a laser pointer to create a laser projector able to trace out designs in a dark room. To power it, I've cannibalized a PC ATX power supply capable of delivering plenty of current for the..... Listed under: [Game – Entertainment Projects](#), [LED Projects](#)
547.

[How to Deal with Noisy Neighbors with Arduino device](#) My next door neighbors have recently been playing their music really loud so that I can hear it through the walls. I've gotten tired of having to bang on the walls each time to get them to quiet down, so I decided to automate some..... Listed under: [Home Automation Project Ideas](#), [Ideas](#)
548.

[Build a cat litter box fan with Arduino](#) A hideaway cat litter box is a great way to make your apartment look like a residence for adults instead of crazy cat ladies. A hidden litter box in a cabinet, under a sink, or built in to some other furniture does a lot for..... Listed under: [Game – Entertainment Project Ideas](#), [Ideas](#)
549.

[A Simple Bat Detector based shield for the Arduino Uno](#) I've built a number of projects that have interfaced the output of the Simple Bat Detector with a microprocessor. The most recent was the BatLogger II. But I hadn't come up with an easy way for others to experiment with this idea ... until now..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
550.

[How to make \(and connect\) a soft potentiometer](#) This instructable will tell you how to make and connect a soft potentiometer to a microcontroller, in particular we will connect it to a Lilypad Arduino. In our case soft potentiometer means a potentiometer made of a textile conductive ribbon. What you need: 1. soft..... Listed under: [Metering – Instrument Projects](#)
551.

[Arduino UNO Tutorial 8 – NightLight](#) In this Arduino UNO tutorial, we are going to use a Light Dependent Resistor (LDR) to create a simple childrens bedroom nightlight which turns on automatically when it gets dark and turns off when it gets light. An LDR's resistance changes depending upon the amount..... Listed under: [Sensor – Transducer – Detector Projects](#)
552.

[1 LED Game with Arduino Uno and an RGB LED](#) Sometimes I just have those days where I really want to make something neat with the Arduino I have lying around, but I know I don't have the patience for a more involved project that'll take more than a day or so. This is for..... Listed under: [LED Projects](#)
553.

[LED aquarium lighting with an Arduino based PWM timer](#) I bought a small aquarium (54l) as an impulse buy and I needed some lights for it, so naturally I wanted to use LEDs. I also needed a timer for the lights. I also wanted the lights to fade in and out when they were..... Listed under: [LED Projects](#)
554.

[Ground Tracking LED Longboard Mod](#) This mod uses a custom designed encoder on one of the wheels to track where the longboard is on the ground and light up the LEDs so that the light pattern remains stationary on the ground as the board moves over it. To make doing..... Listed under: [LED Projects](#), [Sensor – Transducer – Detector Projects](#)
555.

[Arduino Clock using Standard Clock Display](#) This is a relatively simple clock to build, in terms of the hardware required and in terms of hooking up all the wires. The complexity lies in the software, which I've conveniently included as part of this instructable 😊 This instructable illustrates a few things:..... Listed under: [Clock – Timer Projects](#), [Projects](#)
556.

[Getting Things to Talk: Arduino + LCDs](#) I spent the better part of the day on Saturday doing some more basic research into connecting an Arduino and LCD for this ongoing project. For the most part, it's pretty basic and following the wiring diagrams and tutorials online is fine. I ran into..... Listed under: [LCD Projects](#)

557.

[TV Volume Loudness Guard using Arduino](#) UPDATES Mar 05, 2013 Featured on WonderHowTo <http://goo.gl/fpeVC> Feb 14, 2013 Featured on LifeHacker <http://goo.gl/tx4QG> Feb 13, 2013 I have updated the Arduino program in step 4 to support additional remote controls. Feb 13, 2013 Featured on Dangerous Prototypes <http://goo.gl/DJcwe> Feb 12, 2013 Featured on Semageek <http://goo.gl/EH58K> Feb 12, 2013 Featured on..... 558.

[Arduino ISP – Lazy Old Geek \(LOG\)](#) Arduino ISP - LOG So this Lazy Old Geek (LOG) has had a lot of trouble getting Arduino bootload on Atmega chips. I couldn't get either of these to work with Arduino UNO Rev3. <http://arduino.cc/en/Tutorial/ArduinoISP> <http://letsmakerobots.com/node/35649> So I developed a couple that worked for me:..... Listed under: [Arduino Programmer Projects](#)
559.

[Home Automation with Android and Arduino Yún](#) The Arduino Yún is a WLAN capable development board featuring an ATmega microcontroller, as well as a separate chip running a small Linux distribution, making it a perfect candidate for home automation projects like in the picture below! This basic tutorial will show you how..... Listed under: [Home Automation Projects](#)
560.

[Make an Atom Synchronised Clock from a 1950's Slave Dial using Arduino](#) One day while exploring the bric-a-brac at the markets, I stumbled across an old, Bakelite slave dial from the 1950's. Slave Dials are clock movements without the actual time keeping circuit. All they contain is the mechanism to drive the hour and minute hands, which..... Listed under: [Clock – Timer Projects](#), [Projects](#)
561.

[Make Electronic Dice using Arduino](#) In this project we make electronic dice. Updated 18/03/2013 In this article you can learn how to make an electronic die (die is the singular of dice), using an ATmega328 with Arduino bootloader and a few inexpensive components. The reason for doing this is to introduce another..... Listed under: [Other Projects](#), [Projects](#)
562.

[Arduino Knob](#) Control the position of a RC (hobby) servo motor with your Arduino and a potentiometer. This example makes use of the Arduino servo library. Hardware Required Arduino Board (1) Servo Motor (1) Potentiometer hook-up wire Circuit Servo motors have three wires: power, ground, and signal..... Listed under: [Motor Projects](#)
563.

[Prototyping shield for Arduino Mega](#) This is a down and dirty prototyping shield that will work for Arduino Mega's and there pin compatible clones. This is the first time i have made this board, but i have other projects i think this would be handy for. [box color="#985D00" bg="#FFF8CB" font="verdana" ..... Listed under: [Development Board – Kits Projects](#)
564.

[LED Sun rise/set Arduino Proj](#) I've been slowly working on this project for the past month or so. I finally have some time to share and post-up what I'm working on. I know there are commercial products available, but then what's the fun in that! What I want is a..... Listed under: [LED Projects](#)
565.

[Orange mePod](#) Firstly, why would I make a music player when one can be purchased for so little and Apple iPods are so great? Well, I'll tell you. After several cheap MP3 clones have died due to their Lipo batteries and my cracked, inoperable screen on my..... Listed under: [Sound – Audio Projects](#)
566.

[Remotely Controlled VGA Camera – Overview](#) The idea behind this project was very straightforward: design an inexpensive remotely controlled system capable of taking still pictures and uploading them to a remote file storage with a camera to be activated by either remote commands or sensor events. And after numerous brain storms..... Listed under: [Wireless Projects](#)
567.

[Introduction: T.A.B.U. A Robot using Arduino](#) To all other teens (I'm 16) who have begun to pick up an intrest in robotics and electronics the following project will give you a great user-system to get started with. This is not for complete beginners, but after only 6 months of teaching myself..... Listed under: [Projects](#), [Robotics – Automation Projects](#)
568.

[CustomKeys using an Arduino](#) CustomKeys is a customizable, Arduino-based, polyphonic synthesizer. The CustomKeys keyboard uses capacitive touch sensing - each key is made of a conductive material which, when touched, signals the synthesizer to emit a tone from the speaker. The CustomKeys library allows the user to choose an..... Listed under: [Projects](#), [Sound – Audio Projects](#)
569.

[Nerd++: Controlling Dioder RGB LED Strips with Arduino, Pt. 1 – Getting Started](#) A few weeks ago, it came to my attention that IKEA do a set of colour-changeable LED strips. I've been looking for a decent way of providing some lighting behind my computer to reduce eye-strain for a long time, and these seemed perfect: I was..... Listed under: [LED Projects](#)
570.

[DIY- G-force measurement system](#) So this time around, it's another fun and functional microcontroller based DIY, a g-force measurement system with data

571.

[Autonomous Robot Part 3: Ghosty](#)

Introduction Ghosty is an autonomous little robot who is adventurous and loves to explore his surroundings. However, unlike a normal ghost, he doesn't like to scare people. Instead they actually scare him! In our most current version of Ghosty, his vision line is based on..... Listed under: [Motor Projects](#)
572.

[Animatronic Stargate helmet using Arduino](#)

I love the movie Stargate and when I first saw it I immediately knew I wanted to make one of the super cool Horus guard helmets. I had sketched multiple designs over the years and figured out several different methods for building it but rejected..... 573.

[Arduino BICMOS Curve Tracer](#)

Draw curve traces for both Bipolar and CMOS transistors using this hardware and free online software. Step 1: Upload and Plot Curve for NPN, PNP, NMOS, and PMOS The data for the transistor curves gets uploaded into any computer and can be plotted using SciLab..... Listed under: [Sensor – Transducer – Detector Projects](#)
574.

[Arduino Laser Security Shield](#)

\*\*\* I AM THIRTEEN. I REALLY ENJOY PUTTING TOGETHER THESE INSTRUCTABLES. PLEASE SHOW SUPPORT BY VOTING FOR ME IN THE LASER CUTTER CONTEST - <http://www.instructables.com/contest/epilog3/>\*\*\* I started thinking about this project a couple of months ago now. A laser tripwire that can log when the..... Listed under: [Projects](#), [Security – Safety Projects](#)
575.

[Arduino-based AVR High Voltage Programmer](#)

Update 01/02/09: A PCB version of this circuit is in the design stages – some preliminary information is here. Update 03/11/09: Kits based on this design are now for sale! Update 12/14/10: The original AVR HV Rescue Shield kit has been replaced by the new..... Listed under: [Arduino Programmer Projects](#)
576.

[SP0256-AL2 Speech With Arduino](#)

Here's the Arduino version of a project to use the General Instruments (GI) SP0256-AL2 vintage speech synthesis chip to say "hello world". I'd previously shown how to do this with a Basic Stamp 2. Here's what it sounds like saying, "hello world" 20101215\_164333.mp3 How it..... Listed under: [Development Board – Kits Projects](#)
577.

[Si4707 Hookup Guide](#)

Introduction Weather-band radio is an awesome public service provided in the US, Canada, and Bermuda. With hundreds of transmitting stations dotting the country, weather radio acts as the "voice of NOAA" (National Oceanic and Atmospheric Administration). In addition to spouting out weather forecasts, weather radio..... Listed under: [Development Board – Kits Projects](#)
578.

[Arduino UNO Tutorial 6 – Rotary Encoder](#)

We have written a tutorial for Rotary Encoders using a Microchip microcontroller but now would be a good time to make an Arduino UNO version. With a rotary encoder we have two square wave outputs (A and B) which are 90 degrees out of phase..... Listed under: [Other Projects](#)
579.

[Arduino LEDs](#)

Description In this tutorial you will set up and turn on a single LED. Note that this code can actually be executed with just the Arduino and no other components as in Figure 5. If you notice, next to pin 13 is a tiny LED..... Listed under: [LED Projects](#)
580.

[Arduino Leonardo AVR Development Board](#)

Arduino Leonardo AVR Development Board is a microcontroller board based on the Atmel ATmega32u4. It offers 20 digital IOs (of which 7 can be used as PWM outputs and 12 as analog inputs), a 16MHz crystal oscillator, a micro USB connection, a power jack, an..... Listed under: [Development Board – Kits Projects](#)
581.

[Android Phone Controlled Robot using Arduino](#)

The Android phone that stays in your hand most of the time is useful in many other applications apart from Whatsapp, Facebook; appliances; monitor your health parameters. How it would be if it can control a Robot, which can assist in your daily work. With..... Listed under: [Phone Projects](#), [Robotics – Automation Projects](#)

582.

[Sending MIDI Messages](#)

Introduction If you completed any of the buzzer projects, you will know by now that there is much fun to be had in making the Arduino create noises. The only issue you might have had is with the quality of the sound. Since MIDI is..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)

583.

[Servo powered peristaltic pump controlled by Arduino](#)

This instructable shows you how to make a pump using a servo motor and an Arduino Uno to transfer small amounts of liquids. The pump is a peristaltic pump which consists mainly of a motor, flexible tubing and a circular pump casing. Two rollers attached.....

[Use A Simple Cheap Webcam To Make DIY Microscope](#)

This Project Is A Part Of The Afrimakers Event <http://www.afrimakers.org/> Introduction We used a simple cheap webcam to make a microscope. In short, a small hack to the optics of a standard webcam with an adjustable focus-lens, allows to create video data, with a magnification..... Listed under: [Video – Camera – Imaging Projects](#)
585.

[Temperature Sensor v2.0](#)

Overview This board allows you to use a thermistor to measure the temperature of something. It is designed to be used to measure things in the range of 100C - 300C, but with the proper calibration and resistors, it can be adapted to any temperature..... Listed under: [Temperature Measurement Projects](#)
586.

[PhysComp: Mid-term Project – Instagram TUI – prototyping the interactive elements using Arduino](#)

The physical interface will consist of a 3×3 grid of push buttons that will correspond to a 3×3 grid of images in the Processing program. Instead of a creating a 2D array of variables to correspond to the buttons’ postions in the grid, each location..... Listed under: [Other Projects](#)
587.

[Brushless DC \(BLDC\) motor with Arduino – Part 2. Circuit and Software](#)

In this post I will describe the hardware and the software part of a project involving the use of BLDC (Brushless DC) motor salvaged from a broken Xbox 360. This is a second installment in the series of posts related to Arduino and brushless DC..... Listed under: [Motor Projects](#)
588.

[Digital to Analogue Converter \(DAC\) DAC Theory](#)

A digital to analogue converter takes a series of digital inputs (a string of 1s and 0s, in our case there will be 8 of them like 10011001) and converts it into an analogue output. You see DACs in every digital audio device (MP3 players,..... Listed under: [Sound – Audio Projects](#)
589.

[Remote Controlled Switching](#)

Vision The aim of our project is to be able to control a electrical switching process using a remote. The idea is to come up with an alternative to the conventional electric switch boards, using a wireless control mechanism, in an economic way. In other..... Listed under: [Wireless Projects](#)
590.

[Make An Motor Shield For Arduino](#)

We are not the first to make an Motor Shield for Arduino. But could be that we are the first that make a Motor Shield with a minimum of flexibility. We are studing a WiFi robot with camera controlled by Arduino. The robot will be..... Listed under: [Motor Projects](#)
591.

[Mobile Controlled Automation Using Arduino](#)

By this mobile controlled automation using Arduino you can perform switching operation of any load or device which is connected with the circuit. Before some days i posted about DTMF tone in mobile communication. Here i am using DTMF tone in this project. Visit following..... Listed under: [Phone Projects](#)
592.

[Toaster Oven Reflow Technique](#)

Introduction This page describes how to reflow solder surface mount printed circuits using a cheap toaster oven. It owes a great deal to Nophead’s Cooking with Hydraraptor blog post. The picture shows Sally Bowyer (Director, RepRapPro Ltd) preparing components for soldering in the oven. For..... Listed under: [Sensor – Transducer – Detector Projects](#)
593.

[Control a Furby with Arduino \(or other microcontroller\)](#)

The Million Dollar Furby: We can rebuild him. We have the technology. Continued from the previous Instructable where we excised Furby’s primitive brain , it’s now time to replace it with something greater. This Instructable will detail how to install a new microcontroller in place..... Listed under: [Robotics – Automation Projects](#)
594.

[Arduino Tri-colour LED Flasher Circuit](#)

This simple tri-colour LED flasher circuit is great for beginners. The three pin tri-colour LED is controller by an Arduino Uno and changed between three colours. This video shows the Arduino running a sketch that controls the tri-colour LED. Circuit Diagram for the Arduino Tri-colour..... Listed under: [LED Projects](#)

595.

[Tutorial 19: Arduino Dice Circuit And Sketch Using A 7-Segment Display](#)

In this tutorial you will build a dice that is shaken by holding the button in and thrown by releasing the button. The shake, throw and number thrown are animated and displayed on a seven segment display. A 74HC595 IC is used to interface the..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)

596.

[Blink An LED Using Arduino](#)

This example shows the simplest thing you can do with an Arduino to see physical output: it blinks an LED. Hardware Required

634.

[Midi VU meter, LM3914, Arduino, PWM](#)

Hello everybody, I've been working on a midi controller for some time now, Midi OUT hasn't been a problem, but for Midi IN i had to take some more time. i've used this circuit for midi input but i've used a 4n25: original thread @..... Listed under: [Metering – Instrument Projects](#)
635.

[Arduino Event-Driven Universal AV Remote](#)

TL;DR - I wanted all of my AV components to turn on and change inputs as soon as I started Airplaying music to my Apple TV from my iPhone, so I popped open the Apple TV, wired up a photocell sensor to an Arduino Uno,..... Listed under: [Wireless Projects](#)

fields,..... Listed under: [Development Board – Kits Projects](#)

637. [Safe and simple AC PWM Dimmer for arduino / Raspberry\\_pi](#) Dimmer With MOSFET This circuit shows that dimmers intended for use at mains voltage do not always have to contain a triac. Here, a MOSFET (BUZ41A, 500 V/4.5A) in a diode bridge is used to control the voltage across an incandescent bulb with pulse-width modulation..... Listed under: [PWM Projects](#)

638. [Ultrasonic sensor arduino mega with code](#) This is a simple guide on how to make a Ultrasonic sensor arduino mega with code, an HC-SRO4 Ultrasonic Sensor, a Buzzer, and some leds. The ultimate goal of this tutorial is to use the buzzer and LEDs to display how far the object is..... Listed under: [LED Projects](#)

639. [Displaying Arduino data](#) Arduino temperature display I've had an Arduino-based weather station since June 2009, but one problem with it has been that there hasn't been any easy way to display the data in real time without going to the database (or the raw import files) to see..... Listed under: [LCD Projects](#)

640. [Arduino – Cannot get ECG readings from heart, but I do when I poke at the leads](#) down vote favorite I have a minor issue with my ECG. When I poke at the leads, I get a reading. But when I hold the leads or place it near my heart, I don't get anything. I'm pretty sure this is hardware related, but..... Listed under: [Medical – Health based Projects](#)

641. [Pololu Wixel Shield for Arduino User's Guide](#) 1. Overview The Wixel shield seamlessly enables a wireless link (with a typical range of ~50 feet) to replace your Arduino's USB interface, which means you can use the standard Arduino computer software to: wirelessly program the Arduino (this feature is not available with the Arduino..... Listed under: [Wireless Projects](#)

642. [Stepper Motor Control System Based On Arduino With ULN2003 Chip](#) Project Summary: This project uses ULN2003 chip to drive. The working voltage is DC5V. It is widely used on ATM machine, inkjet printer, cutting plotter, fax machine, spraying equipment, medical instruments and equipments, PC peripheral, and USB Mass Storage ,precise instrument, industrial control system, office automation, robot areas, etc. Bill of..... Listed under: [Motor Projects](#)

643. [How to make a Arduino LED Scroll Bar](#) Today I want to make a LED Scroll Bar as the above picture showed. Ten LED strips can flash in different effects by using a control board. Required Components LED strip, Arduino Nano, Dupont line and a control board. So, how to make a LED..... Listed under: [LED Projects](#)

644. [Traffic light and pedestrian crossing implemented with an Arduino](#) This video shows the Traffic light and pedestrian crossing I've implemented with an Arduino. It's a reproduction of the crossing near my home, timings taken from a video of it. Incidentally, I produced the diagrams for this using a product called Fritzing. It's a nifty piece of..... Listed under: [Development Board – Kits Projects](#)

645. [Build A Rain Alarm Project Using Arduino](#) Water is basic need in every one's life. Saving and proper usage of water is very important. Here is an easy project which will give the alarm when there is rain, so that we can make some actions and save the rain water. As a..... Listed under: [Home Automation Projects](#)

646. [RC Quadrotor Helicopter](#) This project is a RC quadrotor helicopter (quadrocopter, quadcopter, quadricopter, etc). It's a RC helicopter that uses 4 rotors. You need some pre-requisite skills: How to use Arduino, enough to get started Soldering, wiring, basic electronic skills Basic hand tool operation A quadrotor helicopter flies..... Listed under: [How To – DIY – Projects](#)

647. [\[FTC\] Open Feathercoin ATM](#) Open Fethercoin ATM is an open-source automated teller machine for education and experimentation. Based on John Mayo Smith's OpenBitcoinATM which can be seen in action here A "voucher" is printed containing a private key QR Code that has been pre-loaded with the correct value of..... Listed under: [Other Projects](#)

648. [Scooterputer](#) I spend a fair amount of time zipping around town on my scooter, and thought it would be cool to add a voltage monitor to warn when the battery might need recharging. Waiting until the electric starter no longer works is somehow lacking. So after..... Listed under: [LED Projects](#)

649. [Arduino Tutorial – Chapter 2.3: Schematic and Breadboard Diagrams](#) Schematic Diagram You may remember, if you studied electronics as part of your science course at school, that there is a specific way of drawing circuit diagrams. Each component has a particular symbol (which may vary slightly depending where in

650.

[Web Server with Two Temperature Gauges](#) This project consists of two temperatures that are measured by the Arduino using two MCP9700 temperature sensors An Arduino Uno and Ethernet shield are set up as a web server that hosts a web page to display the two temperatures on two gauges. The web..... Listed under: [Temperature Measurement Projects](#)
651.

[How to Text Yourself when your DSC PC1550 Home Security System Alarms](#) I have a home security system that was installed when my home was built in the early 1990's. It is, or was until I modified it, a wired perimeter system with a single wired motion detector. The system is a DSC PC1550 and originally was..... Listed under: [Security – Safety Projects](#)
652.

[A lightning flash counter](#) Many years ago, I think it was in 1997, I stepped into an interesting circuit on a book about high voltage [1]. It was the diagram of a simple "lightning flash counter" intended to help in designing lightning protections on power lines. The description was..... Listed under: [Other Projects](#)
653.

[Using an Arduino as a garage car parking sensor](#) "M-my lord, it-it's impossible to locate the ship. It's out of our range." – Nute Gunray We recently moved into a new house and as always the first problem to address was finding the optimal place to park cars in the garage. Ideally, we wanted..... Listed under: [Sensor – Transducer – Detector Projects](#)
654.

[Gesture control car\(robot\) with Arduino and Android\(bluetooth\)](#) Hi folks, Here's an interesting project for all you creative minds out there. We are going to build an android phone controlled RC car. Nothing could be more fascinating than remote controlled cars. This one uses Bluetooth for communication and accelerometer of the mobile device..... Listed under: [Bluetooth Projects](#), [Robotics – Automation Projects](#)
655.

[GSM Home Security Alarm System with Arduino](#) This project deals with the design & development of a theft control system for home, which is being used to prevent/control any theft attempt. The developed system makes use of an embedded system (comprises an open hardware microcontroller and a gsm modem) based on Global..... Listed under: [Home Automation Projects](#), [Security – Safety Projects](#)
656.

[Arduino RFID Reader RC522 + Access Control System](#) I just received my RC522 RFID reader and made this simple Arduino access control system that uses the reader, a buzzer for the alarm and a relay shield for the security system. The relay can be used to open a door lock and if you..... Listed under: [RFID - NFC projects](#)
657.

[Rotary Encoder & Arduino](#) I am not sure, but it was in year 1999, a non-stop (360 degree rotation) potentiometer found in a stereo music system confused me a lot. At that time, I failed to keyed out the strange potentiometer manufactured by ALPS. Later, I learned that it's..... Listed under: [Other Projects](#)
658.

[Arduino based Bi-color LED Matrix Flappy Bird Game](#) We have built quite a few projects using the Bi-color (Red and Green) LED Matrix Driver Module kits from jolliFactory and have published them as instructables here. Each of these modules uses two MAX7219 Display Driver ICs to drive a Bi-color LED Matrix. These ICs..... Listed under: [LED Projects](#)
659.

[Arduino based Electronic Queuing System](#) This is a Queuing System project requested by a clinic asistant which allows the doctor enter number from a keyboard and display it on a 32x16 LED panel. This project uses two Arduino, the first Arduino functioned as a SENDER which included a PS2 keyboard..... Listed under: [LED Projects](#)
660.

[Digital Arduino Voltmeter with Temperature](#) Step 1: The case I dug out an appropriate case from the dumpster, milled out a rectangular hole for the lcd, and drilled holes to mount the LCD and the Arduino. I used brass standoffs and fiber washers to prevent shorts. Then I gave the..... Listed under: [Metering – Instrument Projects](#)
661.

[Learning Sequential Logic Design for a Digital Clock](#) This instructable is for two purposes 1) to understand and learn the fundamentals of sequential logic 2) use that knowledge to create a digital clock. Digital clocks have been built by countless electronics hobbyists over the world. So why have I chosen to implement that?..... Listed under: [Clock – Timer Projects](#)
662.

[Homebrew Arduino Pulse Monitor \(Visualize Your Heartbeat\)](#) Movies look cool with those EKG (electrocardiogram), the one that beeps and detects heart activities. A few months ago, we had to shoot a hospital scene for our school project. We needed an EKG instrument. To keep the movie authentic, we didn't want to fake..... Listed under: [Medical – Health based Projects](#)
663.

[How to Build a \(Piezo\) Knock Sensor Circuit](#) In this article, we go over how to build a piezo knock sensor circuit. A knock sensor is a sensor which produces a voltage in response to some type of physical stress such as a knock or vibration. This is why it's called a knock..... Listed under: [LED Proiects](#). [Sensor – Transducer – Detector Proiects](#)

664.

[Simulating Logic Gates](#)

Introduction This project is a simple way of using the Arduino to simulate the behaviour of logic gates. Logic gates are explained on this page. The project does not actually carry out the function of the logic gate, just turns a light on or off..... Listed under: [LED Projects](#)
665.

[Tri-State Logic](#)

Introduction So far we have sent one of two values to any Arduino output pin, either HIGH or LOW. This project shows how we can exploit a third state of the Arduino pins to reduce the number of pins needed to control LEDs. In the..... Listed under: [LED Projects](#)
666.

[Make A Coin slot detector Using Arduino](#)

When your coin slot is exposed, this wearable hip-pack vibrates that area to make you aware of it. You decide to cover up, or let it all hang out. The coin slot detector is a simple way to tackle the complicated modern problem low-rise jeans..... Listed under: [Sensor – Transducer – Detector Projects](#)
667.

[Polargraph Drawing Machine](#)

This machine, a variation on the hanging-pen plotter is a conspicuous and wilfully naive attempt to break out of the pristine, pixel perfect, colour-corrected space that exists inside our computers. It's a drawing machine, that takes a pen (a human tool) and uses it to..... Listed under: [Robotics – Automation Projects](#)
668.

[Turn your Arduino into a Magnetic Card Reader!](#)

Everyone has used a magnetic card reader, I believe. I mean, who carries cash these days? They're not difficult to get your hands on, either, and during a trip to my favorite local electronics shop, I found a bin full of these guys. So....of course,..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
669.

[Arduino Sous-Vide Cooker](#)

Sous-vide cooking allows you to precisely control the temperature of cooked food (how "doneness" is measured) by immersing it in a carefully controlled water bath. It's possible, but seriously difficult, to do this just with a thermometer and a pot on the stove... but if..... Listed under: [Temperature Measurement Projects](#)
670.

[Basic Projects using chipKIT Uno32](#)

Happy Tuesday, everyone! I tend to get excited about products that enable beginners to be really creative, and today's product highlight is one I think is worth getting excited about! [video width="380" height="285" id="\_63Mq6QMxxM&" type="youtube"] A few things that I really like about the shield:..... Listed under: [How To – DIY – Projects](#)
671.

[Arduino Laser Tag – Duino Tag](#)

Duino tagger- General introduction Duino tag is a laser tag system based around the arduino. Finally a laser tag system that can be tweaked modded and hacked until you have the perfect laser tag system for office ordnance, woodland wars and suburban skirmishes. Laser tag..... Listed under: [Game – Entertainment Projects](#)
672.

[Wii Nunchuck Adapter](#)

This tutorial is for all those people who have an Arduino and want to use there Wii nunchuck as an input device, but don't really feel like cutting open the cord and ruining the nunchuck FOREVER!!!!!!well you've come to the right place! Step 1: Supplies..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
673.

[Flamethrowing Jack-O'-Lantern](#)

A flamethrowing jack-o'-lantern keeps the trick-or-treaters a safe distance from your house and is a fine addition to any anti-Halloween arsenal. At the first sign of any sugar-obsessed imp, simply press the trigger button and wirelessly shoot a one-second burst of flames out of the..... Listed under: [Other Projects](#)
674.

[The EyeWriter 2.0](#)

The EyeWriter is a low-cost eye-tracking apparatus + custom software that allows graffiti writers and artists with paralysis resulting from Amyotrophic Lateral Sclerosis to draw using only their eyes. The original design, as shown here, featured a pair of glasses as the basis for the..... Listed under: [Development Board – Kits Projects](#)
675.

[N: how to make a multi-layered acrylic and LED sculpture with variable lighting levels](#)

Here you can find out how to make you very own n as made for the exhibition [www.laplandscape.co.uk](#) curated by art/design group Lapland.More images can be seen at flickr This exhibition runs from Wednesday 26 November - Friday 12 December 2008 inclusive, and had a..... Listed under: [LED Projects](#)
676.

[Power Laces- the Auto lacing shoe](#)

Also, check out Power Laces: Version 2.0 Why wait until 2015? Inspired by 'Back to The Future II', this project is less 'Practical' than 'Proof of Concept', but hopefully it'll tide you over until Nike comes out with something more polished. This was also the..... Listed under: [Other Projects](#)
677.

[On The Fly – Prototype II Final Report: Home Automation Framework](#)

Introduction: The Home Automation Framework project is a web application that can

678.

[LED Cube 8x8x8](#)

Create your own 8x8x8 LED Cube 3-dimensional display! We believe this Instructable is the most comprehensive step-by-step guide to build an 8x8x8 LED Cube ever published on the intertubes. It will teach you everything from theory of operation, how to build the cube, to the..... Listed under: [LED Projects](#)
679.

[Cloud Sensor Base-Station](#)

What I want to do I want to create a platform with the capacity to control a large number of sensors and actuators necessary for the hydronponics system outlined in this wiki, and to serve as the central gateway to a cloud-enabled dashboard. The basis..... Listed under: [Sensor – Transducer – Detector Projects](#)
680.

[Drawing on a 7×5 LED matrix with Arduino in C](#)

In my component drawers I have a LTP-7357AG, which is a matrix of 35 green LEDs conveniently packaged in a 12-pin display. I wanted to play with it so I began to hook it with my Arduino Uno. This post is part of a series about programming Arduino..... Listed under: [LED Projects](#)
681.

[The Viciously Simple Clap-ON Clap-OFF Circuit For Arduino](#)

Hi Everyone! I've had a few people ask about creating a simple clap-on/clap-off circuit using Arduino. Well those who are interested are now in luck. The software in this instructable is simple and well commented. The schematic is simple, and the components are easy and..... Listed under: [LED Projects](#)
682.

[Arduino car LCD display](#)

Here is a project I made a couple of years ago for my father’s car. The original dashboard’s info-panel which displayed current time, date and temperature was working only partly – and that only after a good cleaning and connector fastening. In other words –..... Listed under: [Car Projects](#), [LCD Projects](#)
683.

[Automatic Home surveillance system using arduino\(simple and cheap\)](#)

The goal of my project is to achieve Automatic home surveillance system without any manual interference. In general other surveillance system it is necessary to power ON TV and camera receiver every time. And also it needs to any user input to view who is..... Listed under: [Home Automation Projects](#)
684.

[GESTURE VOCALIZER FOR DUMB PEOPLE INTERACTIn ION](#)

To establish a communication or interaction with Deaf and Mute people is of utter importance nowadays. These people interact through hand gestures or signs. Gestures are basically the physical action form performed by a person to convey some meaningful information. Gestures are a powerful means..... Listed under: [Other Projects](#)
685.

[Solar Panel Battery Charge Controller Using Arduino](#)

This is an updated version of Solar Panel Charge Controller Using Arduino. Solar Panel Battery Charge Controller Using Arduino Pictures of Power box and Arduino solar charge regulator: Charge Regulator with Power Box Connections to Regulator Inside the Box The output voltage of the ACS712..... Listed under: [Solar energy\\_projects](#)
686.

[Make A LED firefly Jars Using Arduino](#)

There’s a nice charm to fireflies in a jar—except for, you know, all the dead bugs afterwards. I decided to make a bunch of fake fireflies in real jars for decoration at an outdoor event. The fireflies are yellow LEDs controlled by a small ATtiny45..... Listed under: [LED Projects](#)
687.

[Accelerometer Controlled Robot](#)

Most of industrial robots are still programmed using the typical teaching process, through the use of the robot teach pendant. In this paper is proposed an accelerometer-based system to control an industrial robot using two low-cost and small 3-axis wireless accelerometers. These accelerometers are attached..... Listed under: [Robotics – Automation Projects](#)
688.

[Construct A Bluetooth Controlled Robot Using Arduino](#)

In this proposed system we going to construct a basic DC motored robot which we are going to control with android app easily available on google play store named bluecontrol. With Basic mobility of robot like forward, Reverse, left, right we try to implement four..... Listed under: [Bluetooth Projects](#), [Robotics – Automation Projects](#)

689.

[Arduino Project: Intervalometer for Fuji cameras](#)

This post is about an arduino-based intervalometer I built for my camera, a Fuji S9600 dSLR. I decided to go for a very simple interface: a rotary switch in the middle of a plastic box which would allow me to select 12 pre-defined intervals. I..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#), [Video – Camera – Imaging Projects](#)

690.

[Build An Hygrometer Using Arduino](#)

I am building an automated irrigation system for my vegetable patch. This will be a system that monitors the soil moisture level and then turns on a pump to send water to my garden according to the detected moisture level. The water is coming from..... Listed under: [LED Projects](#)

691.

[Make a Web Connected Robot \(for about \\$500\) \(using an Arduino and Netbook\)](#) This Instructable will show you how to build your own Web Connected Robot (using an Arduino micro-controller and Asus eee pc). Why would you want a Web Connected Robot? To play with of course. Drive your robot from across the room or across the country,..... Listed under: [Robotics – Automation Projects](#)
692.

[How To Throw An Arduino Motor Party](#) In this instructable I will show you how to throw an Arduino motor party. I will also be giving away an Arduino Mega, Arduino Uno, and an Arduino Pro Mini. (Details at the end) Step 1: Assembly + Code You'll need a handful of motors..... Listed under: [Motor Projects](#)
693.

[Send SMS from Arduino over the Internet using ENC28J60 and Thingspeak](#) This Instructable explains how to send an SMS from an Arduino using the Internet. There are many ways to approach this and I will explain one of the different methods used to accomplish this task. Some major points needed for my project: I have a..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
694.

[Washer Dryer Laundry Alarm using Arudino & SMS Text Messaging Alerts](#) Have you ever wished there was a better way to be notified when your laundry was done? Have you ever forgotten a load in the washer because you couldn't hear the buzzer and your clothes became smelly and moldy from sitting there for too long?..... Listed under: [Home Automation Projects](#), [Wireless Projects](#)
695.

[Converting infrared to RF signals with Arduino](#) In this project we will show you how to switch on and off the power sockets box with an IR remote. Not only the power sockets box, but other RF receivers can be switched on and off with the same IR remote as well. We..... Listed under: [Wireless Projects](#)
696.

[How to Make a Wireless Path Tracking System Using Mouse, XBee and Arduino](#) The applications of microcontroller are not limited to control simple electrical or electronic device but they are widely used in robotics and automotive industries nowadays. From simple rear view mirror control to complex engine control functions are done by the microcontroller. The microcontroller can even..... Listed under: [Wireless Projects](#)
697.

[How to Transmit Mouse Data Using Xbee with Arduino](#) The PS2 mouse is an input device which can communicate with a host device using the PS2 protocol. It can be connected to a host device using the 6 pin mini DIN connector. The mouse will continuously give output which can be decoded to get..... Listed under: [Development Board – Kits Projects](#)
698.

[How To Save a Text In The EEPROM of The Arduino](#) A microcontroller might need to store its data like sensor value, or a particular count or image data for a long period of time. The most common type of memory used with the microcontroller based systems is EEPROM. The EEPROM stands for Electrically Erasable Programmable..... Listed under: [LED Projects](#)
699.

[Generate Random Number using Arduino](#) A random number generation is very important in computing devices which helps them to do task in random manner. The applications of random number generation can be found in shuffling the audio files in an audio player, in almost all kind of digital games, generating..... Listed under: [Development Board – Kits Projects](#)
700.

[Augment a Moog Etherwave Theremin](#) I'm going to go through my process of hacking a Moog Etherwave Theremin. I created a new acrylic top, partially sanded to be translucent in certain areas, and created my own circuit around an ATmega168 Arduino Bootloaded microcontroller which is stealing a control voltage from..... Listed under: [LED Projects](#)
701.

[Arduino based Drone Quadricopter](#) [gallery ids="19920,19921,19922,19923,19924,19925,19926,19927"] arduino based Drone Quadricopter It's a tiny quadrotor helicopter! Update Feb 25 2012: Warning, I may have discovered a bug inside the CadSoft EAGLE 6.1.0 software that may make the PCB look slightly different. My design files are meant for 5.11 so use..... Listed under: [Drone](#)
702.

[Project: Cleaner robot using Magician Chassis, Arduino, distance sensor and hand sweeper](#) This is a cleaner robot so you can give to your mommy or just use to clean your bedroom =P. Material List: 1x Arduino UNO R3 1x Magician Chassis 1x Shield Motor Driver (Shield 4Power) 1x Distance Sensor 1x Servomotor 1x Hand Sweeper 1x Battery 1..... Listed under: [Robotics – Automation Projects](#)
703.

[Arduino-Based Shadow Alarm](#) Arduino-Based Shadow alarms are usually used for protection against theft. A shadow alarm is a device that sounds an alarm

704.

[Arduino Bicycle Alarm and Lights](#) This alarm is a good way to alert you if somebody messes with your bike. I had a bicycle stolen a while back and decided there had to be a better way to keep my bike secure. When I searched for bicycle alarms, all I..... Listed under: [Security – Safety Projects](#)
705.

[How to Use IR Remotes with Arduino \(Current and Updated\)](#) I'm tired of these complicated tutorials on how to use certain things. I like simple, easy to understand, step by step instructions. My biggest problem was with IR and POV\*. I've finally mastered how to control my project with any TV remote in a few..... Listed under: [Wireless Projects](#)
706.

[ARDUINO Burglar Alarm Using Infrared Emitter-Detector pair](#) In this tutorial i will show you , how to make a simple Inexpensive Intrusion Detection(Burglar alarm) using an Arduino Uno board . This project uses the Infrared Emitter-Detector pair to detect intrusion and triggers an alarm as soon as the object crosses the infrared..... Listed under: [Wireless Projects](#)
707.

[Arduino for Photographers: Building a Universal Intervalometer](#) Practicing the art of time-lapse photography without an intervalometer is doable, but not particularly efficient. And while any decent photo equipment store will be happy to sell you one, you can go the DIY way and build your own intervalometer based on the excellent Arduino platform. Theoretically, building..... Listed under: [LED Projects](#)
708.

[Connecting the ADXL337 to the Arduino](#) Today I'll write about the ADXL337 accelerometer. The ADXL337 measures the acceleration of the x, y and z axis. This means it measures the force acting on any of the axes at a specific moment in time. Because it's an analog device the measurement intervals are as short..... Listed under: [Other Projects](#)
709.

[Arduino Accelerometer mma7361](#) Hey guys, I am a teaching assistant for an introduction to engineering class for biomedical engineering majors at Vanderbilt University this semester. I created this video to explain analog-to-digital conversion to them because time ran out during class and I did not get to this..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#), [Sensor – Transducer – Detector Projects](#)
710.

[Arduino Compatible apc220 Wireless rf Module with Graphics LCD](#) 16 node mesh, up to 1000m between nodes, sample two analog voltages per node, link any node to any other node, display data on any node with either graphics or text display, turn on relays based on data at any node, fault tolerant with data..... Listed under: [RFID - NFC projects](#), [Wireless Projects](#)
711.

[Arduino DS1307 Clock](#) 1) Introduction and Images Hello friends, today I am going to build a Digital Clock using Arduino UNO and famous DS1307 Real Time Clock IC. Before we begin, here are some images of the completed project. You can find the YouTube video at the bottom..... Listed under: [Clock – Timer Projects](#), [LCD Projects](#)
712.

[MCP41100 an Arduino Controlled Potentiometer](#) We know the analog potentiometer , is a three-terminal resistor with a sliding contact that forms an adjustable voltage divider . MCP41100 an Arduino Controlled Potentiometer: 1)volume controls on audio equipment. 2) Control the amplifier Gain and offset . 3) Transducer " displacement transducers "..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#), [Sensor – Transducer – Detector Projects](#)
713.

[Arduino Bipolar Stepper Motor](#) It is a well known fact that Stepper motors are awesome! The only downside is that they can be a bit trickier to get going than servos and plain old DC motors. If you are interested in the inner mechanics and theory of stepper motors, check this..... Listed under: [Motor Projects](#)
714.

[How To Generate Square Wave Using Arduino](#) Any AVR microcontroller based board which follows the standard Arduino schematic and is flashed with the Arduino bootloader can be called an Arduino board. The Arduino is referred to as open source hardware and the Arduino IDE is also open source and anybody can contribute..... Listed under: [Development Board – Kits Projects](#)
715.

[Arduino and Transistors Question – RE: School Musical Production](#) One of the directors has asked me to create a special backdrop for our college musical. This particular backdrop has a particular design (see below) that includes LED strip lighting to give the feel of a 1920s casino sign – similar to what is seen..... Listed under: [LED Projects](#)
716.

[Build Arduino Based Home Security System Using PIR Motion Sensor](#) PIR sensors are widely applied in wireless residential security systems, home alarms

717.

[Temperature Sensing with Arduino](#) As part of the CanSat Primary Mission, we need to measure temperature. For this our starter kit has given us an Arduino Uno R3 micro-controller, as well as some resistors and an NTCLE101E3 NTC Thermistor. The thermistor is a special kind of resistor that changes..... Listed under: [Sensor – Transducer – Detector Projects](#), [Temperature Measurement Projects](#)

718.

[Arduino Basics #5 – Add SD storage to Arduino](#) Arduino Uno’s microcontroller board is great, but the one thing it’s not overly generous with is storage. Having 32KB of program flash storage, 2KB of RAM and 1KB of programmable EEPROM space at your disposal is fine for many Arduino projects, but it’s not enough..... Listed under: [Arduino Programmer Projects](#)

719.

[GSM Based Wireless Notice Board](#) ABSTRACT: There are several places which require vital notice to be displayed like colleges, railway stations, share-market, restaurants, hospitals etc. Looking into the present trend of information transfer, it is seen that vital notice take time to be displayed on the displaying boards. This latency..... Listed under: [Wireless Projects](#)

720.

[How to Make Phonecall From GSM Module Using Arduino](#) One can use a cell phone with any cellular networks around the globe if the proper SIM card is inserted in it. This is possible because there is some device inside the cell phone which follows a global standard enabling them to connect with different..... Listed under: [Phone Projects](#)

721.

[Arduino Digital Voltmeter 0V to 30V](#) Here is a useful circuit for Arduino lovers and experimenters. It is a simple digital voltmeter, which can safely measure input dc voltages in 0 to 30V range. The Arduino board can be powered from a standard 9V battery pack, as usual. As you may..... Listed under: [Metering – Instrument Projects](#)

722.

[Pololu Dual VNH5019 Motor Driver Shield for Arduino \(ash02a\)](#) Get your Arduino moving! This shield makes it easy to control two high-power DC motors with your Arduino or Arduino-compatible board. Its dual robust VNH5019 motor drivers operate from 5.5 to 24 V and can deliver a continuous 12 A (30 A peak) per motor, or a continuous..... Listed under: [Motor Projects](#)

723.

[Arduino Programming For Beginners: The Traffic Light Controller](#) Last week, we learnt about the basic structure of an Arduino program and took a closer look at the ‘blink’ example. Hopefully you took the opportunity to experiment with code, adjusting the timings. This time, we’ll be writing something from scratch. In fact, let’s make..... Listed under: [LED Projects](#)

724.

[Arduino Project 5: Digital audio player](#) So far in this series we’ve had a diverse look at how Arduino can interact with a range of real-world devices from servo motors to ultrasonic range finders TVs to humidity sensors. Now we’ll see if we could get the Arduino to make a few..... Listed under: [Sound – Audio Projects](#)

725.

[Arduino Project 4: Enhancing your mini robot](#) You’ll need these: HC-SR04 – Get this ultrasonic sensor from eBay.com.au for \$2. SG90 Servo Motor – We’ve seen this servo selling for around \$4 on ebay. Motor drive shield – You can get this expansion board for \$5 online. If you’re new to APC..... Listed under: [Robotics – Automation Projects](#)

726.

[Capacitive Touch Sensor on Arduino](#) If you ever wanted to integrate touch sensitivity into your project, this board could just do the trick. It's a capacitive touch sensor. These sensors are used in our everyday consumer electronics like notebook trackpads, video game consoles, touchscreens..just to name a few. They work..... Listed under: [Sensor – Transducer – Detector Projects](#)

727.

[Wireless Arduino Oscilloscope](#) In this guide I will explain how to use a Windows 8.1 phone, Arduino Uno board, and HC-05 Bluetooth module to build a wireless oscilloscope. The phone application has the critical functions of an oscilloscope, although the bandwidth is a measly 300 Hz. Still, if..... Listed under: [Wireless Projects](#)

728.

[Arduino 3.3V](#) This Lazy Old Geek (L.O.G.) loves Arduinos. I have noticed that a lot of sensors, like GPS, LCDs, magnetometers are 3.3Vdc sensors. But the standard Arduinos, Uno, RBBB are 5Vdc modules. So I decided I’m going to make more of my Arduino projects with 3.3Vdc..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)

729.

[Arduino Fridge Magnet](#) Do you have a habit of leaving notes on the fridge, now take it digital and add an Arduino to it. In this instructable I'm going to show you how to do just that. All you need is an Arduino, an LCD screen and a ..... Listed under: [LCD Projects](#)

730.

[Ultrasonic Range detector using Arduino and the SR04 Ultrasonic sensor](#) his is a preliminary instructable that will take you through the steps I took to get the SR04 ULTRASONIC SENSOR connected and working to the Arduino. It will then be incorporated to my mini environment monitor. Eventually, if it all fits, it will end up..... Listed under: [Sensor – Transducer – Detector Projects](#)
731.

[Kid-friendly PuppyDuino 0.31](#) OK, this is not a fully autonomous "get you a beer, open it for you and then tweet about it" robodog (yet 🐶 but if you're itching to get past the blinky lights on a breadboard stage with your Arduino and you're ten or know..... Listed under: [LED Projects](#)
732.

[David Bynoe works in progress](#) For an upcoming project I needed a pneumatic ram with a closed loop control system so I could position it accurately. Didn't have the budget for an off the shelf solution, so I bodged one together with an arduino, a couple air solenoid valves, and..... Listed under: [Other Projects](#)
733.

[How to Build an H-bridge Circuit with an Arduino Microcontroller](#) An h-bridge is a chip that allows DC motors to be run versatile, with bidirectional capability. With an H-bridge, motors can go forward or backward, left or right, up or down, etc, depending on the use of the motor(s) in the circuit. Without a microcontroller,..... Listed under: [Motor Projects](#)
734.

[Arduino passive IR trigger for Canon EOS](#) The other day I wanted to experiment with external triggers for my Canon EOS 550D camera. I stumbled upon a nice open source project called Arduino Camera Control from Oleg Mazurov, the creator of the USB Host Shield library for Arduino. The Arduino Camera Control..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
735.

[Internet connection indicator box with restart button](#) THE SETUP For an interface I thought 3 LEDs would be simple enough: Blue for everything is fine (as blue LEDs are cooler than green ones); red for something is wrong; and yellow for the modem and router are being restarted. I added a button..... Listed under: [Internet – Ethernet – LAN Projects](#)
736.

[Arduino Security Alarm with Reed Switch](#) How does the security alarm circuit works? When power is turned on, the circuit goes into standby mode, and this condition is indicated by "SECURITY ALARM" in the LCD screen.Note that here a N/O reedswitch + bar magnet combination is used to detect any mishaps,..... Listed under: [Security – Safety Projects](#)
737.

[Line Follower Robot using Arduino](#) A line follower robot using 8051 microcontroller is already published here and this time the same thing is done using arduino. This line follower robot is basically designed to follow a black line on a white surface. Any way the same project can be used..... Listed under: [Robotics – Automation Projects](#)
738.

[HOW TO MAKE CUSTOM GEAR FOR LINEAR MOTION](#) In the manufacturing industry, a wide variety of devices used at home or in the garden has been experiencing challenges in automating linear displacement of any of the items used. For instance, For example, an automatic opening of gates, automatic unlocking and changing positions of..... Listed under: [Metering – Instrument Projects](#)
739.

[Arduino Platform – SIMON Game Implementation](#) Introduction Having been a CodeProject member for several years, and not having got round to ever publishing an article, left me feeling a bit disappointed in myself. I have thought many a time on what kind of article I can produce. Then after coming across..... Listed under: [Game – Entertainment Projects](#)
740.

[Arduino Based Security System using GSM & PIR Sensor](#) In present time Home/Office and many other place security is most important. In our absence these places are not secure. For make these palaces secure many peoples keep guards and many people prefer electronic security systems. In present time many types of security systems are..... Listed under: [Security – Safety Projects](#)
741.

[Interface single and Dual IR Infrared sensor with Arduino and LCD](#) Interface single and Dual IR Infrared sensor with Arduino and LCD Introduction- Multiple Sensor Interface to Arduino In this another tutorial on sensors for beginners, we are going to interface single and multiple Infrared IR sensors with Arduino Uno development board, working simultaneously and have the..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#), [Sensor – Transducer – Detector Projects](#)
742.

[Getting Started with Arduino – LED Blinking](#) Arduino Uno is the best development board for beginners in the field of embedded systems. We can program Arduino board with less technical knowledge and programming skills. This tutorial is intended to beginners in the field of Arduino. Hope you already have an Arduino board. Then..... Listed under: [LED Projects](#)
743.

[LPD8806 SD/LCD Digital Light Wand! \(Last Update – 20 September 2014\)](#) I have gathered the information from the HL1606 Digital Light Wand Blog and brought

744.

[Interfacing LCD with Arduino Uno](#) 16×2 character LCD display is a very basic LCD module which is commonly used in electronic projects. 16×2 means it can display 2 rows of 16 characters (columns). Its other variants such as 16×1, 16×4 etc are also available. These LCDs are usually made using..... Listed under: [LCD Projects](#)
745.

[Analog to Digital Conversion in ARDUINO](#) Analog to digital conversion module of ARDUINO UNO has 6 input ports. The number of the port varies with your ARDUINO model but the coding remains the same. The analog reading in the analog inputs are converted into corresponding 10bit(0-1023). ARDUINO developers have made such an option that you..... Listed under: [Other Projects](#)
746.

[How to Convert an Arduino into an AVR Flash Programmer](#) In case you don't have an AVR programmer but you do have an arduino, the arduino can be converted into an AVR flash programmer, meaning it can program bare AVR microcontroller chips. Say if you have an AVR chip and you want to program the..... Listed under: [Arduino Programmer Projects](#), [How To – DIY – Projects](#)
747.

[How to Build an Infrared Distance Sensor Circuit](#) An infrared (IR) distance sensor is a sensor that can measure distance from a solid or physical object. An infrared distance sensor does this through light waves. It sends out infrared light and waits to receive it back at the receiver end. If it receives..... Listed under: [How To – DIY – Projects](#)
748.

[How to Build an HC-SR04 Distance Sensor Circuit](#) An ultrasonic distance sensor is a sensor that can measure distance from a solid or physical object. An ultrasonic range finder does this through sound waves. It sends out high-frequency sound waves and then waits to listen back for these sound waves. If it has..... Listed under: [Sensor – Transducer – Detector Projects](#)
749.

[How to Build a Servo Motor Circuit \(with Arduino\)](#) In this project, we will go over how to build a servo motor circuit using an arduino. This is a circuit which can control and rotate a servo motor to rotate a certain amount of degrees. Specifically, in our circuit, we will make it so..... Listed under: [Motor Projects](#)
750.

[How to Build an Ohmmeter Using an Arduino](#) In this project, we will show how you can build an ohmmeter using an arduino. An ohmmeter is a device that can measure resistance. Most of the times now, ohmmeters aren't standalone devices but appear as one of type of measuring device amongst many in..... Listed under: [Metering – Instrument Projects](#)
751.

[MQ-3 Alcohol Sensor Circuit Built with an Arduino](#) In this project, we will go over how to build an alcohol sensor with an arduino. The alcohol sensor we will use is the MQ-3 sensor. This is a sensor that is not only sensitive to alcohol, particularly ethanol, which is the type of alcohol..... Listed under: [Sensor – Transducer – Detector Projects](#)
752.

[MQ-2 Smoke Sensor Circuit Built with an Arduino](#) In this project, we will go over how to build a smoke sensor circuit with an arduino board. The smoke sensor we will use is the MQ-2. This is a sensor that is not only sensitive to smoke, but also to flammable gas. The MQ-2..... Listed under: [Sensor – Transducer – Detector Projects](#)
753.

[How to Build a Liquid Level Gauge Circuit with an Arduino](#) In this project, we will build a liquid level gauge circuit with an arduino. This is a circuit in which a liquid level can be monitored through a gauge. We read the liquid level from the gauge (low, medium, or high), just as you see..... Listed under: [How To – DIY – Projects](#), [Metering – Instrument Projects](#)
754.

[Arduino Light Meter Circuit](#) In this project, we will go over how to connect an analog volt panel meter to an Arduino so that it can measure and give us a readout of light striking the circuit. In this way, the circuit will function as a light meter. When..... Listed under: [Metering – Instrument Projects](#)
755.

[How to Build a Soil Moisture Sensor Circuit with an Arduino](#) In this project, we are going to build a soil moisture sensor with an Arduino microcontroller. A soil moisture sensor, also called a hygrometer, measures the amount of moisture, or water, in the soil. Therefore, we can tell whether the soil has enough moisture or..... Listed under: [How To – DIY – Projects](#), [Sensor – Transducer – Detector Projects](#)
756.

[How to Build a Night Light Circuit Using an Arduino](#) In this project, we will go over how to build a night light circuit using an arduino. A night light circuit is a

757.

[How to Build a Heat Detector Circuit Using an Arduino](#)

In this project, we will go over how to build a heat detector circuit using an Arduino. A heat detector circuit is a circuit, of course, which can detect the presence or absence of heat. This could be useful for a wide range of circuits..... Listed under: [Sensor – Transducer – Detector Projects](#)
758.

[How to Build a Color Sensor Circuit](#)

In this project, we are going to build a color sensor circuit with an Arduino microcontroller. A color sensor is a device that can detect and differentiate between certain primary colors. This sensor can detect and differentiate between the colors white, blue, green, and red..... Listed under: [How To – DIY – Projects](#), [Sensor – Transducer – Detector Projects](#)
759.

[Visual / Aural Guitar Tuner “The Tune Trainer” using arduino](#)

Build a strobe tuner with an integrated tone generator to teach tuning by ear. -  
=Background=- I have always dabbled in instruments. Over the course of my life, I've attempted (with varying success) Piano, Guitar, Banjo, Penny Whistle, Ocarina, Panpipes, Great Highland Bagpipes, Smallpipes, and Didgeridoo..... Listed under: [Sound – Audio Projects](#)
760.

[How to Build a Light Detector Circuit Using an Arduino](#)

In this project, we will go over how to build a light detector circuit using an arduino. A light detector circuit is a circuit which can detect the presence or absence of light, depending on how we write our code to respond to the varying..... Listed under: [How To – DIY – Projects](#)
761.

[How to Build an Infrared Proximity Switch Circuit Using an Arduino](#)

In this project, we will build an infrared proximity switch circuit using an arduino. This is a circuit in which a switch activates when the infrared sensor detects an object in its proximity. The infrared proximity switch sensor is a reflection-type photoelectric snesor which sends..... Listed under: [How To – DIY – Projects](#)
762.

[How To Build Your Own Ultrasonic Batgoggles using an Arduino](#)

Wish you were bat? Want to Experience Echolocation? Want to try to "see" with your ears? For my first Instructable, I will show you how to build your own ultrasonic Batgoggles using an Arduino microcontroller clone, Devantech ultrasonic sensor and welding goggles for around \$60..... Listed under: [Game – Entertainment Projects](#)
763.

[How to Build a Simple Force Sensing Resistor \(FSR\) Circuit](#)

In this article, we will go over how to connect a force sensing resistor, or force sensitive resistor, (FSR) to a circuit to build many different types of useful circuits with them. Force sensing resistors are variable resistors which change resistance according to the pressure..... Listed under: [How To – DIY – Projects](#)
764.

[How to Install the Arduino to the Lithium Backpack using arduino](#)

The Arduino is an open source hardware input and output circuit and the Lithium Backpack is a Ardino accessory that will power the Arduino when it is away from a computer or a wall power. These products are sold at Liquidware for under \$34 each..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
765.

[How to Connect a Microphone to an Arduino](#)

In this project, we will go over how to connect a microphone to an arduino so that the arduino can detect whether there is sound in the environment or not. This circuit is only capable of detecting whether there is sound in the environment or..... Listed under: [How To – DIY – Projects](#)
766.

[Spectrographic Auroral Indicator – A Northern Lights Warning Device using arduino](#)

3/16/2011 EDIT: The Wing Kp Predicted Geomagnetic Activity Index model is now deployed and operational. Costello is now considered non-operational and will be discontinued on 23 Mar 2011. Comments and questions are welcomed at SWPC.CustomerSupport@noaa.gov The Wing Kp Predicted Geomagnetic Activity Index model is known..... Listed under: [Security – Safety Projects](#)
767.

[How to Integrate a Temperature Sensor Circuit to an LCD](#)

In this project, we will go over how we can build a temperature sensor circuit and integrate it to an LCD so that we can get a readout of the temperature on the LCD. In previous projects with temperature sensor circuits, we built the circuit..... Listed under: [LCD Projects](#), [Sensor – Transducer – Detector Projects](#)
768.

[How to Build a LM335 Temperature Sensor Circuit](#)

In this project, we will demonstrate how to build temperature sensor circuit using a LM335 sensor. As a temperature sensor, the circuit will read the temperature of the surrounding environment and relay this temperature to us back in degrees Kelvin. The difference between an LM335..... Listed under: [Sensor – Transducer – Detector Projects](#)
769.

[How to Build a TMP36 Temperature Sensor Circuit](#)

In this project, we will demonstrate how to build temperature sensor circuit using a TMP36 sensor. As a

770.

[Hard Drive Persistence of Vision \(HDPOV\) using arduino](#)

The platter of a hard drive spins well over sixty times a second. If a narrow slot was cut into the platter to allow LEDs to shine through, we can achieve flicker fusion and trick the eye into seeing a stable image. This phenomenon is..... Listed under: [Memory – Storage Projects](#)
771.

[How to Drive a 7 Segment LED Display with an Arduino](#)

In this project, we will show how to drive a single 7 segment LED display with an arduino microcontroller. A 7 Segment LED Display is an electronic device housing 8 individual LEDs. Using this device, we can display all numerals and many alphabetical characters and many more..... Listed under: [LED Projects](#)
772.

[Low Cost Water Flow Sensor and Ambient Display using arduino](#)

Water is a precious resource. Millions of people do not have access to clean drinking water, and as many as 4000 children die from water contaminated illnesses every day. Yet, we continue to be wasteful with our resources. The overarching goal of this project is..... Listed under: [Home Automation Projects](#)
773.

[How to Build an RGB Full Color LED Module Circuit](#)

In this project, we are going to build an RGB Full Color LED module circuit. A full color LED module is a circuit in which an LED can be lit to any color. This is why it is called a full color LED module. By..... Listed under: [LED Projects](#)
774.

[Super Simple Beginners Robot! using arduino](#)

I created this Instructable for the absolute n00by robot wannabe. I have noticed a huge jump in the number of beginners getting into the hobby and the number of "how do I" questions seem to be mounting. Maybe this humble little Instructable will help one..... Listed under: [Robotics – Automation Projects](#)
775.

[How to Interface GPS with Arduino](#)

Every single location in the entire globe can be specified in terms of geographical coordinates. The geographical coordinate is a system which specifies any given location on the earth surface as latitude and longitude. There are devices which can read the geographical coordinates of a..... Listed under: [GPS Based Projects](#)
776.

[Create an Applescript/Arduino Alert flag. using arduino](#)

Have you ever felt like the mail sound on your Mac just wasn't enough? Simple sounds and alerts just don't cut it for you? You want something more apparent and rewarding? If so, this is the Instructable you've been looking for. In this Instructable, I'll..... Listed under: [How To – DIY – Projects](#)
777.

[Time Sensing Bracelet using arduino](#)

The Time Sensing Bracelet is a fabric potentiometer. You select your desired time of day by making contact in the corresponding position on your wrist - where your watch would normally be. There is no point to it but fun. Update: Using some wire wrapped..... Listed under: [Sensor – Transducer – Detector Projects](#)
778.

[YAHMS: Wireless Temperature Probes](#)

My wireless temperature probes work by using an Xbee module to transmit readings from a TMP36 down to the Arduino base station. The XBees aren't too cheap, coming in around £19 or \$23 so I tried to be cheap and ordered mine from Sparkfun, I..... Listed under: [Temperature Measurement Projects](#)
779.

[Simple mass storage for your microcontroller project using arduino](#)

Do you want gigabytes of storage for your microcontroller? Would you like a simple way to transfer files from your PC to your picaxe or arduino or other micro project? This little projects demonstrates the uDrive that can be set up as an extra drive..... Listed under: [Memory – Storage Projects](#)
780.

[How to make a solar iPod/iPhone charger -aka MightyMintyBoost using arduino](#)

I wanted a charger for my iPodTouch and the MintyBoost was definitely my first choice. I wanted to take it a bit further and make it not only rechargeable but also solar powered. The other issue is that the iPhone and iPodTouch have large batteries..... Listed under: [Solar energy projects](#)
781.

[TV-B-Gone Kit Using Arduino](#)

Tired of all those LCD TVs everywhere? Want a break from advertisements while you're trying to eat? Want to zap screens from across the street? The TV-B-Gone kit is what you need! This ultra-high-power version of the popular TV-B-Gone is fun to make and even..... Listed under: [Video – Camera – Imaging Projects](#)
782.

[Arduino Police Flasher Kit](#)

After reading about the famous Arduino programmable microcontroller using the "Getting Started with Arduino Kit (Jameco P/N

783.

[Tweet-a-watt – How to make a twittering power meter... using arduino](#) Tweet-a-watt - How to make a twittering power meter... This project documents my adventures in learning how to wire up my home for wireless power monitoring. I live in a rented apartment so I don't have hacking-access to a meter or breaker panel. Since I'm..... Listed under: [Metering – Instrument Projects](#)
784.

[Arduino Circuit to Dim LED with Potentiometer](#) In Lesson 8 you learned to write analog voltages on the Arduiono, and in Lesson 10 you learned to read analog voltages from the arduino. In this lesson we will combine what you did in lessons 8, 9, and 10 to create an LED with..... Listed under: [LED Projects](#)
785.

[LED Sunrise Alarm Clock with Customizable Song Alarm using arduino](#) My Motivation This winter my girlfriend had a lot of trouble waking up in the morning and seemed to be suffering from SAD (Seasonal Affective Disorder). I even notice how much harder it is to wake up in the winter since the sun hasn't come..... Listed under: [Clock – Timer Projects](#)
786.

[Arduino Lab 2 – Morse Code Generator](#) Introduction An excerpt from OmniGlot.com about the origin of Morse Code: Morse Code was invented by Samuel F. B. Morse (1791-1872), a painter and founder of the National Academy of Design. He conceived the basic idea of an electromagnetic telegraph in 1832, and produced the..... Listed under: [Development Board – Kits Projects](#)
787.

[Arduino robot kit – Wiring Diagram](#) I have created this wiring diagram for the connections between the motor controller, motors, and sensor shield. I'll update it later to include other components. And here is an update that includes the servo motor and the range sensor. And here are the detailed pin..... Listed under: [Robotics – Automation Projects](#)
788.

[How To Communicate With An Alien Artifact or using arduino](#) Close Encounters of the Curiously Minty Kind. This Instructable will show you how to build an Altoids version of the 'Close Encounters' mothership, and how to interact with it. This may be vital training for that day when the Bright White Beam comes to suck..... Listed under: [Game – Entertainment Projects](#)
789.

[Isolated mains power monitoring \(Arduino\)](#) All about power today.. For a while now, I've been looking around for a mains (220-240VAC) power monitoring circuit that I might be able to interface with an Arduino. There is of course the OpenEnergyMonitor solution, but they seem to use a transformer to isolate and measure..... Listed under: [Metering – Instrument Projects](#)
790.

[How to build an 8x8x8 LED cube and control it with an Arduino using arduino](#) There are a lot of LED cubes on Instructables, so why do another? Most are for small cubes consisting of 27 or 64 LEDs, rarely larger since they are limited to the number of outputs available on the microcontroller. This cube will be 512 LEDs,..... Listed under: [LED Projects](#)
791.

[Using A Bar Graph With The Arduino](#) Introduction This project explores a couple of ways of simulating and using a bar graph with the Arduino. Bar graph components like the following one can be used, This type of bar graph is basically just 10 LEDs in a row with anodes on one..... Listed under: [Other Projects](#)
792.

[Solderless Breadboard Layout Sheets \(plug and play electronics\) using arduino](#) Here's a fun system designed to take care of some of the headaches involved in breadboarding a circuit. It is a simple set of template files drawn to scale with real world electronic components. Using a vector drawing program you simply move the components..... Listed under: [Development Board – Kits Projects](#)
793.

[Arduino-Based Optical Tachometer](#) Over ten years ago, I put up a web page with detailed instructions on building a simple electric motor based on one from the Beakman's World TV show. I called it the "Beakman's Electric Motor" page and over the years it has had hundreds of thousands, if..... Listed under: [Metering – Instrument Projects](#)
794.

[USB NES controller with an arduino! using arduino](#) UPDATE 22-12-2014 Instructables user mattpbooth has updated the code and is hosting it on github: <https://github.com/mattpbooth/ArduinoNESController...> Thanks Matt! UPDATE 03-12-2011 Replaced a println with print (derp). UPDATE 01-12-2011 Remade all code from scratch. Remade 'ible code section; Now includes a 'Processing COM port config for..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
795.

[How to Build a LM35 Temperature Sensor Circuit](#) In this project, we will demonstrate how to build temperature sensor circuit using a LM35 sensor. As a

796.

[Tilt Sensor Tutorial using arduino](#)

What is a tilt sensor? Tilt sensors allow you to detect orientation or inclination. They are small, inexpensive, low-power and easy-to-use. If used properly, they will not wear out. Their simplicity makes them popular for toys, gadgets and appliances. Sometimes they are referred to as..... Listed under: [Sensor – Transducer – Detector Projects](#)
797.

[RFID with Arduino](#)

If you ever wanted to integrate RFID functionality into your project, this small tutorial might help you accomplish that. I used the RDM630 module from seeedstudio in its UART version. It comes on a small board with presoldered connectors which fits perfectly on a breadboard. You only..... Listed under: [RFID - NFC projects](#)
798.

[Ceiling Fan LED Display using arduino](#)

Seeing so many persistence of vision ideas on the web was too tempting not to try one. After considering several different motors to drive a display, a ceiling fan seemed to run at just the right speed, is out of the way, and very quiet..... Listed under: [Home Automation Projects](#)
799.

[Home Automation using Arduino and MATLAB](#)

n present time home office appliance controlling is common thing. Today for controlling home/offices appliances, machineries in companies/industries uses different types of automation systems like DTMF controlled, GSM controlled and many others. So here this project is made for interfacing MATLAB (Graphic User Interfacing) and Home/office/industries..... Listed under: [Home Automation Projects](#)
800.

[AVRSH: A Command Interpreter Shell for Arduino/AVR. using arduino](#)

Ever wanted to be "logged in" to your AVR microcontroller? Ever thought it would be cool to "cat" a register to see its contents? Have you always wanted a way to power up and power down individual peripheral sub-systems of your AVR or Arduino in..... Listed under: [Arduino Programmer Projects](#)
801.

[Acorn Chime using arduino](#)

By: Charlie DeTar, Christina Xu, Boris Kizelshteyn, Hannah Perner-Wilson A digital wind chime with hanging acorns. Sound is produced by a remote speaker, and data about chime strikes is uploaded to Pachube. Step 1: Brainstorming for a device that would represent ourselves Our goal was..... Listed under: [Game – Entertainment Projects](#)
802.

[Arduino Chandelier from Jars](#)

E-Edit: Thank you very very much for voting for me in Featured Author, Glue and Battery Powered Contests! Cheer up and wait for my project so special is coming... Edit: If you really like this project, you can vote for me on the top right corner, forFeatured..... Listed under: [LED Projects](#)
803.

[Bedazzler: DIY non-lethal weaponry using arduino](#)

Our first open source Homeland Security non-lethal weapon project - The "THE BEDAZZLER: A Do-it-yourself Handheld LED-Incapacitator". After attending a conference where the \$1 million "sea-sick flashlight" (named "THE DAZZLER") was demonstrated by the US Dept. of Homeland Security, we decided to create our own..... Listed under: [Home Automation Project Ideas](#)
804.

[Using Push Button Switch with Arduino Uno](#)

In this tutorial you will learn how to read the status of a digital pin of Arduino. I hope that you already go through our first tutorial, Getting Started with Arduino Uno – LED Blinking. In this example, a push button switch and an LED is connected to Arduino..... Listed under: [LED Projects](#)
805.

[Build A Binary Clock Using Arduino](#)

Introduction In this project, 16 LEDs are used to represent the time in binary. The time is read from a Real Time Clock breakout board - the same one used in the Digital Clock page. The binary clock uses 4 place values for the hour..... Listed under: [Clock – Timer Project Ideas](#)
806.

[Build an Arduino-powered talking robot head using arduino](#)

This robot head was originally built as a end of the year project for my physical computing class, but over the summer it has "learned" how to talk. The head is powered by two Freeduinos, 3 TLC5940NT chips and an Adafruit Industries Wave Shield found here: [www.ladyada.net/make/waveshield/.....](#) Listed under: [Robotics – Automation Project Ideas](#)
807.

[3x3x3 LED Cube with Arduino Lib using arduino](#)

There are other Instructables about building LED cubes, this one is different for several reasons: 1. It's built with a low number of off-the-shelf components and hooks up directly to the Arduino. 2. A clear, easy to reproduce circuit diagram is provided with plenty of..... Listed under: [Arduino LED Project Ideas](#)
808.

[Easy DIY Home Automation \(using servo switches\) using arduino](#)

This Instructable is all about one of life's simple actions, flipping a light switch on and off. At

809.

[DIY Arduino Pulse Sensor](#) So I mentioned in an earlier Instructable that I am a teaching assistant (TA) for an introductory engineering course for biomedical engineering majors at Vanderbilt University. My main task as a TA is to re-write a few laboratory exercises that the students will be performed..... Listed under: [How To – DIY – Project Ideas](#), [Sensor – Transducer – Detector Project Ideas](#)
810.

[Two Wire Arduino Knight Rider](#) This tutorial shows how to interface eight LEDs to an Arduino using only two Arduino pins. This is made possible by using a PCF8574 I/O expander IC. A "Knight Rider" display is shown on the LEDs. Prerequisites Complete tutorial 4 – Arduino Knight Rider. Be able..... Listed under: [LED Projects](#)
811.

[Arduino Lilypad Interactive Passion Sensing Scarf using arduino](#) This was my first time working with an Arduino Lilypad. I have been wanting to try something that dealt with soft circuits for awhile now. This project is what I came up with. The concept is based off my friend Ethan Dicks from theFusefactory.org's emergent..... Listed under: [Game – Entertainment Project Ideas](#)
812.

[Arduino Serial Thermometer](#) The Arduino reads temperature from a MCP9700 temperature sensor IC and displays the temperature in the Arduino IDE serial monitor window. Also see the Arduino LCD thermometer tutorial (tutorial 14). Prerequisites Complete Tutorial 9: Using the Arduino Serial Port before attempting this tutorial. Components Besides an Arduino Uno board,..... Listed under: [Metering – Instrument Projects](#)
813.

[The Ardweeny: the little friend of the Arduino \(and how to beef it up\) using arduino](#) Open-source hardware? Arduino(tm) is the first name to come to mind! As great as it is, sometimes we need a small microcontroller solution for a project, or a stripped-down version for cost-effectiveness. The Ardweeny is the solution. These small kits are 100% compatible with the..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Project Ideas](#)
814.

[Using the Arduino Serial Port](#) The Arduino Uno can send data (such as a text message) to the PC over the USB cable. The Arduino IDE has a serial monitor window that can be opened and will receive and display the data sent from the Arduino board. Data can also..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
815.

[Core3duino using arduino](#) This is an addon shield to an addon shield. That's right, you have to have the Core2duino on your Arduino to be able to understand why you would want this in the first place. So once you have your Core2duino saddled up, give this one..... Listed under: [Development Board – Kits Project Ideas](#)
816.

[Make A Dual LED Flasher Using Arduino](#) A two transistor circuit that flashes two LEDs on and off alternately. Prerequisites Complete tutorial two - Transistor Timer before attempting this tutorial. Components In addition to an electronic breadboard, wire links, a 9V battery and a battery clip, you will need: QTY PART DESIGNATOR NOTES TYPE..... Listed under: [LED Projects](#)
817.

[Building IllyClock – Arduino-based alarm clock in a coffee can using arduino](#) Updated Aug 4, 2011 A streamlined version is now described here. Beside the enclosure, the original feature of IllyClock is showing the time in colors: 3 hours before wake-up time, color changes from green to orange; 1 hour before wake-up, the time is shown in red. One..... Listed under: [Clock – Timer Project Ideas](#)
818.

[Arduino Melody](#) A very easy tutorial that uses only two components. The Arduino plays a short melody on a loudspeaker. The program to load to the Arduino is one of the programs that is built into the Arduino IDE. Prerequisites Complete tutorial 3 - Starting with Arduino..... Listed under: [Sound – Audio Projects](#)
819.

[Twitter Mood Light – The World’s Mood in a Box using arduino](#) How's the world feeling right now? This box tells you. Powered by: an Arduino, a WiFly wireless module, an RGB LED, Twitter.com and a 9v battery. I'm a news junkie. I want to know everything that is going on in the world as soon as..... Listed under: [Game – Entertainment Projects](#)
820.

[Arduino Knight Rider](#) In this tutorial, eight LEDs are interfaced to the Arduino Uno board. This is not complicated – it is just like interfacing a single LED to the Arduino as done in tutorial 3, but eight times over. A program is then loaded to the Arduino..... Listed under: [LED Projects](#)
821.

[Arduino LCD](#) In this tutorial you will connect a LCD (Liquid Crystal Display) to the Arduino Uno and then run the Arduino LCD example programs that are built

822.

[Arduino and Touchpad Tic Tac Toe using arduino](#) Or, an exercise in input and output multiplexing, and working with bits. And a submission for the Arduino contest. This is an implementation of a tic tac toe game using a 3x3 array of bicoloured LEDs for a display, a simple resistive touchpad, and an..... Listed under: [Game – Entertainment Project Ideas](#)
823.

[Make A Arduino LCD Thermometer](#) In this tutorial, a temperature sensor (MCP9700 linear active thermistor IC) and LCD are connected to the Arduino. The Arduino reads the temperature from the MCP9700 on analog pin A0 and displays the temperature on the LCD. This video shows the circuit operating. When touched..... Listed under: [LCD Projects](#)
824.

[How to wire an arduino-based 3-axis CNC machine using arduino](#) I've seen a number of tutorials about how to build the platform for a 3-axis CNC milling machine. I have not seen anyone tackle the tricky subject of the electronics. Here now is my attempt to do so. Step 1: Parts You'll need: - an..... Listed under: [CNC Machines Project Ideas](#)
825.

[Drive with PID Control on an Arduino Mega 2560](#) This example shows how to simulate a simple closed-loop control algorithm in Simulink and how to run it on an Arduino Mega 2560 board. Contents Introduction Prerequisites Required Hardware Task 1 – Build the Vehicle Task 2 – Build the Motor Controller Task 3 –..... Listed under: [Other Projects](#)
826.

[Musical MIDI Shoes using arduino](#) Like many people, I often find myself unconsciously tapping my feet, whether it's along to a song or out of some nervous habit. As fun as that is though, I've always felt as if something has been missing. If only I could trigger the sounds..... Listed under: [Sound – Audio Projects](#)
827.

[MIDI Linear Actuator](#) This project uses relays to control a Firgelli Automations linear actuator without feedback. The relays are controlled by the MIDI Volume (Control Change number CC7) command which is read by the microcontroller and converted into one of the only 3 states of operation: 1) The..... Listed under: [Other Projects](#)
828.

[Wallbots: Autonomous Magnetic Robots that Traverse Vertical Surfaces using arduino](#) This Instructable will teach you how to create magnetic robots that traverse vertical surfaces. These robots can move on any metallic walls, including elevators, whiteboards, refrigerators or metal doors. The robots are outfitted with several light sensors, allowing them to respond to simple user interactions..... Listed under: [Robotics – Automation Project Ideas](#)
829.

[LPG sensor using arduino](#) LPG sensor using Arduino with alarm and cutoff. A simple LPG sensor using Arduino is shown in this article. This circuit indicates the amount of LPG in the air. The circuit sounds an alarm and trips a relay when the concentration is above a predetermined..... Listed under: [Sensor – Transducer – Detector Projects](#)
830.

[Make a 8×10 L.E.D Matrix using arduino](#) UPDATE 1: I HAVE ADDED THE CODE FOR CONWAY’S GAME OF LIFE UPDATE 2: NOW YOU CAN SAVE SOME ARDUINO PINS WITH THE HELP OF 1 SHIFT REGISTER. In this instructable I will show you how to build a quite fancy 8 by 10 L.E.D matrix(with scrolling text and animations) using the Arduino and 4017 decade..... Listed under: [LED Projects](#)
831.

[IR Remote Controlled Home Appliances using Arduino](#) In present times there are many types of Home Automation Systems which are available in the market. Most of these are simple Home Appliances Controlling Systems like DTMF controlled Home Appliances, GSM based Home Appliances Controlling, RF based Home Appliances Controlling. Here we are going..... Listed under: [Home Automation Project Ideas](#)
832.

[Arduino Controlled Servo Robot \(SERB\) using arduino](#) What better way to start experimenting with open source micro-controllers ( Arduino ) then by building your very own open source robot ( CC (SA -BY) )? What to do with your SERB? (here) - How to connect your SERB to the internet and drive..... Listed under: [Robotics – Automation Project Ideas](#)
833.

[Build A Simple Robotics Breadboard Using Arduino](#) This Instructable shows you how to build a simple, inexpensive breadboard for robotics experiments. It is a companion to Cheap, Easy Robotics for the Non-Programmer. Here we'll learn how to build a Babuino robot to use for experiments with the Babuino/Blocos software environment. Using a..... Listed under: [Robotics – Automation Project Ideas](#)
834.

[An easy way to send your heartbeat to the Cloud using arduino](#) This cool (and very low price) sensor is attached on your ear and can detect your heart’s pulse

835.

[PIR Motion Sensor Tutorial using arduino](#)

Pyroelectric ("Passive") InfraRed sensors: ""What is a PIR sensor?"" PIR sensors allow you to sense motion, almost always used to detect whether a human has moved in or out of the sensors range. They are small, inexpensive, low-power, easy to use and don't wear out..... Listed under: [Sensor – Transducer – Detector Project Ideas](#)
836.

[A DIY photoplethysmographic sensor for measuring heart rate](#)

Meet Easy Pulse: A kit that includes all it needs to make a DIY heart rate sensor. Although it is not built using an Arduino, it is still open and easy to build. From the site: "This project is based on the principle of photoplethysmography..... Listed under: [Sensor – Transducer – Detector Project Ideas](#)
837.

[The Smuggie: Tweet straight from your Snuggie using arduino](#)

Want to tweet how satisfied you are cuddled up in your Snuggie? The Smuggie is a modified Snuggie, designed specifically for those who feel the need to express their smug satisfaction with a Snuggie to their friends on Twitter. Here's a list of everything you'll..... Listed under: [Internet – Ethernet – LAN Project Ideas](#)
838.

[Very simple ECG + Pulse Oximeter using arduino](#)

Scott W Harden has built an updated version of his ECG circuit for tracking his heartbeat. The main goal of the update is to provide a hack for collecting heartbeat with minimal h/w cost and circuit complexity. As you can see from the project photo above, the..... Listed under: [Medical – Health based Project Ideas](#)
839.

[The Lightning Simulator/Breathalyzer/Graphic Equalizer – Arduino Powered using arduino](#)

UPDATE: A portable version of the Talking Breathalyzer is here <http://talkingbreathalyzer.com> The LED strips are mounted on an outdoor trellace which functions as a lightning simulator, outdoor breathalyzer, graphic equalizer synced to music, and a few other effects with sound. Materials: 8 12v RGB Waterproof Flexible..... Listed under: [LED Projects](#)
840.

[Interfacing EM-18 RFID reader with Arduino Uno](#)

Arduino Uno is an opensource physical computing platform based on ATmega328 microcontroller and provides a development environment for writing software for the board. It can be used for a variety of projects. EM-18 RFID reader is one of the commonly used RFID reader to read..... Listed under: [Other Projects](#)
841.

[Arduino + WiFi, Music Responsive LED Light Fixture using arduino](#)

This instructable gives instructions for constructing a Saiko5 WiFi enabled LED light fixture based on the Arduino hobbyist platform. It includes step-by-step instructions from board design to soldering to case integration, as well as instructions explaining how the software and firmware can be used to..... Listed under: [LED Projects](#)
842.

[Trinket Audio Player using arduino](#)

Overview We usually think of the Adafruit Trinket as a tiny subset of a “real” Arduino; less RAM, less code space, less I/O. But this little chip has a couple tricks up its sleeve, things its larger brethren can’t do. One of these is a..... Listed under: [Sound – Audio Projects](#)
843.

[Beatfly : Make an illuminating blimp and control it with your voice, Keyboard, MIDI Controller, Garageband file, iPhone, Flash, and more! \[Mac OSX\] using arduino](#)

[Mac OSX Only] Because I use Quartz Composer, my program works only on Mac OSX. I am now extending and improving it toward cross-platform. If you have knowledge of computer programming, you can make your own system that connects to the blimp. The communication protocol..... Listed under: [LED Projects](#), [Sound – Audio Project Ideas](#)
844.

[Make A Arduino Solar Radio](#)

Solar charging, via the panel on the back. \* 12 position switch to select channel number \* Seek up / seek down controls and 'store' button \* RDS display of call sign \* Frequency display \* Battery voltage display \* Solar charging current display The..... Listed under: [Radio Projects](#)
845.

[Updating the Arduino Garage Door Circuit for the new Gliderol Garage Controller.](#)

We moved house recently and I was obviously very keen to continue the home automation routine. As described in Adventures with an Arduino – Part 1: The Business Problem, I created an Arduino based garage door interface to integrate with a BOSS BOL6 garage door controller..... Listed under: [Home Automation Project Ideas](#)
846.

[Intelligent Letter Box using Arduino and GSM](#)

In the days of technology postman still comes to our house for delivering the letters, couriers and parcels. Because some things like courier, parcels can’t sends via email and by using any other electronic media. So for getting notification of our letter delivery in our..... Listed under: [Other Projects](#)

847.

[LED Umbrella with Arduino using arduino](#)

The LED Umbrella with Arduino combines an umbrella, an 8x10 LED matrix and an Arduino microcontroller to create a controllable, programmable LED experience in the privacy of your own umbrella. This project was inspired by the Electric Umbrella by sockmaster and a number of LED matrix instructables..... Listed under: [LED Projects](#)
848.

[ARDUINO based IR remote control robot using arduino](#)

Hi everyone. This my new project IR remote control robot using arduino. This is a simple design robot you can easily build it. Step 1: Requirements: Project requirements: Arduino uno Tsop1738 (ir receiver) H bridge ic (L293D) Two dc motor A robot base 9v Battery..... Listed under: [Robotics – Automation Project Ideas](#)
849.

[Sleek word clock using arduino](#)

nspired by drj113's great instructable on making a word clock, I wanted to make my own. After seeing the (extremely overpriced) commercial "qlocktwo" word clock, I decided to borrow its smooth glossy black design while basing the innards of my clock on drj113's design. In..... Listed under: [Clock – Timer Project Ideas](#)
850.

[Project work3:Arduino code and the circuit diagram using arduino](#)

In order to realise the “music garden”,the most important part is the Arduino code and circuit diagram. First of all,I will present my Arduino code:(I will show you the way I think as a flow chart at first) Flow Chart: Details:this flow chart is a..... Listed under: [Sound – Audio Projects](#)
851.

[Haptic Feedback device for the Visually Impaired \[Project HALO\] using arduino](#)

I recently watched an episode of Stan Lee’s Superhumans which featured a blind man who used a series of clicks, like a bat, to echo locate his surroundings. I got to thinking about other blind people and their ability to navigate freely – without the..... Listed under: [Medical – Health based Project Ideas](#)
852.

[Hobbyduino Mini V1.0 using arduino](#)

Introduction The Hobbyduino Mini is a clone of the Arduino main-board. It contains a ATmega328 processor programmed with the Arduino bootloader. The Hobbyduino does not contain the circuitry for USB communication. I opted to rely on the FTDI232R serial boards to handle the USB-to-Serial protocol. Here..... Listed under: [Development Board – Kits Projects](#)
853.

[A simple DIY spectrophotometer using raduino](#)

What's all this? This instructable will explain how to build a fairly basic but working spectrophotometer out of easily sourceable parts. Of course, this device is nothing compared to a commercial spectrophotometer, but it will allow the builder to understand how such a device works..... Listed under: [Metering – Instrument Project Ideas](#)
854.

[Build Your Own Arduino & Bootload an ATmega Microcontroller – part 1](#)

There are many reasons to build your own Arduino circuit on a protoboard or a custom-designed printed circuit board. At the heart of the Arduino platform is an AVR microcontroller, in usual way you need a special hardware programmer and suitable hex files to program..... Listed under: [Interfacing\(USB – RS232 – I2c -ISP\) Projects](#)
855.

[High-speed Photography with Arduino and CHDK using arduino](#)

This project uses an Arduino microcontroller and a laser break-beam trigger to fire via USB remote a Canon camera modified with CHDK (Canon Hack Development Kit) firmware. Immediate influences are the high-speed flash photography triggered by sound or light project by Glacial Wanderer and the..... Listed under: [Video – Camera – Imaging Projects](#)
856.

[Arduino PWM Led Control using arduino](#)

Looking for a simple circuit to control the light intensity of Light Emitting Diodes (LEDs) or similar lighting sources? Here is an Arduino based circuit with three independent pulse width modulated (PWM) channels to fulfil your requirements! Just follow the schematic diagram to complete the..... Listed under: [LED Projects](#)
857.

[Lunchtime Clock using arduino](#)

Have you ever wished lunchtime were longer, but didn't know where to find those few extra minutes? Well, wish no longer! Thanks to great in advances in clock technology, I present to you a clock that speeds up 20% every day at 11:00 and slows..... Listed under: [Clock – Timer Project Ideas](#)
858.

[Arduino project: Stereo Peak Program Meter using arduino](#)

Previously, we introduced the Arduino’s analog-to-digital converter (ADC) in detail, looking at successive-approximation A-D conversion and how it’s the best compromise between speed and cost. This time, we start putting some of that theory into practice by building a stereo peak-program meter. Our Peak Program..... Listed under: [Metering – Instrument Project Ideas](#)
859.

[Simple Animatronics with Servos and Arduino using arduino](#)

Servos are surprisingly easy to use. Even more so than simple DC motors and steppers when you have a microcontroller. In this instructable we'll use a 'duino to drive five servos which will control a doll's limbs and neck. I bought the servos at HobbyPartz..... Listed under: [Game – Entertainment Projects](#)
860.

[MIDI Bass Pedal Arduino Encoder using arduino](#)

MIDI BASS PEDAL ARDUINO UNIT The MIDI Bass Pedal circuit is capable of encoding any number of momentary

861.

[Arduino + Laptop Touchpad using arduino](#)

Yes, this is more or less your average touchpad that one can find from inside a laptop. This model, like majority of touchpads out there operates with PS/2 standard. This means that it can be directly plugged in to a PS/2 connector and with proper..... Listed under: [Sensor – Transducer – Detector Project Ideas](#)
862.

[Electronic Circuit: photocell and LED](#)

The cmd\_response sketch is very general with respect to the ANALOG IN and DIGITAL I/O of the Arduino boards. We can use it to read a wide variety of sensors from remote computer systems. First, we demonstrate how the Arduino cmd\_response sketch works, we construct..... Listed under: [LED Projects](#)
863.

[Sending Message Using Alpha-Numeric Keypad with GSM and Arduino](#)

GSM is quite a common Device which is used in major Projects and Real Time Operations. There are many applications which are using features of GSM Module like the feature sending Messages, making a Voice Call, Reading Messages, attempting Call etc. Many at times you..... Listed under: [Development Board – Kits Project Ideas](#)
864.

[Arduino Wind Instrument using arduino](#)

I wanted to create an Arduino instrument that was easy to play, but would sound better with practice. This "wind" instrument combines the Sparkfun Electret Microphone breakout board with the Tone library and 5 buttons on one analog pin. The musician must make a sound..... Listed under: [Home Automation Project Ideas](#)
865.

[Peggy2: High And Low](#)

First and foremost, big thanks to Damien for her time and effort on soldering 265 LEDs on peggy2 circuit board, which made my programming part possible to continue. Instead of soldering LEDs directly onto the Peggy2 board, we have to use Ethernet cables as "extensions" ..... Listed under: [LED Projects](#)
866.

[Rechargeable Battery Capacity Tester using arduino](#)

Do you have a pile of AA rechargeable batteries in your drawer? Some are old, some are new, but which sets would you bring with your camera on your next trip, and which ones are past their useful life? I like using rechargeable batteries, but..... Listed under: [Battery Projects](#)
867.

[CMUcam3: Working Module But Not Working CMUcam3-Arduino System](#)

After over spending nearly 20 hours extra on fixing peggy2 board I mentioned in the previous post, there is only a few hours left for me to work on CMUcam3-Arduino system and its facial-recognition driven motor system. The basic programming architecture is shown below. When in..... Listed under: [Video – Camera – Imaging Projects](#)
868.

[NESBot: Arduino Powered Robot beating Super Mario Bros for the NES using arduino](#)

An Arduino Duemilanove (other boards will probably work, but you will have to adjust the steps for your device) Working NES Console Super Mario Bros. (Note: this must be only the single game, not the two- or three-in-one cartridge) A controller you can cut the..... Listed under: [Game – Entertainment Project Ideas](#)
869.

[Arduino Intervalometer Camera controller](#)

Intervawhat? An intervalometer is a camera controller that signals the camera to take a picture after some set interval. This is really useful for creating time-lapse videos. For a long time, I used my TI-89 calculator to create time-lapse videos with my Canon digital Rebel XTi. It..... Listed under: [Video – Camera – Imaging Projects](#)
870.

[Q&D-Poor man’s-Skinner-Sadist-Jeopardy game using arduino](#)

In this instructable you will learn how to make a Q&D-Poor man's-Skinner-Sadist-Jeopardy game . First off, the disclaimer: I'm not responsible of whatever you do. You have to know that with a great power comes...bla-bla-bla. Just be careful and remember that electricity reserves respect. While..... Listed under: [Game – Entertainment Project Ideas](#)
871.

[Radio Telemetry for a Model Rocket using arduino](#)

Flying model rockets is fun, but there is always the question of how high did it go. Using a programmable micro-controller and some sensors, you can monitor the entire phase of flight and measure acceleration and altitude, among other things. With this project, I'll show you how..... Listed under: [Radio Project Ideas](#)
872.

[Bubblebot: Gigantic Bubble Generator using arduino](#)

While being a bit lengthy and requiring experience with Arduino, this contraption is bound to grant you infinite glory among your friends, toddlers and grownups alike! Step 1: What You Need Here's a list of the materials and parts I used: The Frame \* 5..... Listed under: [Game – Entertainment Project Ideas](#)
873.

[New Arduino WiFi Shield \(Testing\) usign arduino](#)

The WiFi Shield was delivered by Amazon. The Arduino UNO Rev 3 was found at RadioShack... First you need to

874.

[Review – Maxim MAX7219 LED Display Driver IC using arduino](#)

Today we are going to examine the Maxim MAX7219 LED display driver IC. The reason for doing so is to show you how something that used to be quite complex can be made very simple – and that is what all this technology is for,..... Listed under: [LED Projects](#)
875.

[Arcade Button MIDI Controller using arduino](#)

Having a hardware interface to your favourite music / DJ / VJ software can really open up doors in your creativity. The most widespread form of hardware control to your PC for such applications is a MIDI based controller. A MIDI controller can send and..... Listed under: [Sound – Audio Project Ideas](#)
876.

[Brushless DC \(BLDC\) motor with Arduino. Part 3 – The Stroboscope Project](#)

It has been all dry theory in the Brushless DC (BLDC) motor with Arduino series up to this point. This is where it gets to be more fun. If you've just arrived, please check out the previous two installments: Driving a three-phase brushless DC motor..... Listed under: [Motor Projects](#)
877.

[Arduino Basics: Rctime using arduino](#)

Rctime is a function for the Arduino that finds its roots in Basic-based micro controller programming languages (such as the Basic Stamp). This function basically counts the amount of time it takes to charge a capacitor through a resistor and returns a digital value. In..... Listed under: [Sensor – Transducer – Detector Project Ideas](#)
878.

[Arduino Mega Pololu Shield using arduino](#)

RepRap Arduino Mega Pololu Shield, or RAMPS for short. It is designed to fit the entire electronics needed for a RepRap in one small package for low cost. RAMPS interfaces an Arduino Mega with the powerful Arduino MEGA platform and has plenty room for expansion..... Listed under: [Development Board – Kits Project Ideas](#)
879.

[The Wordclock Grew Up! using arduino](#)

Well, It had to happen. I first published my WordClock project in September 2009. It was a Microchip PIC based clock, using a PIC16F877A microprocessor. In the last year and a half, I have been constantly improving it, and have adapted it to the Arduino,..... Listed under: [Clock – Timer Projects](#)
880.

[Light Meter Using I2C Level Converter, LCD, and TSL2561using arduino](#)

I recently needed to measure how different materials affect light transmission for a gardening project. I decided this was the perfect opportunity to try out the new logic level converter to run both a 5v LCD and a 3.3v light sensor on a single i2c..... Listed under: [LCD Projects](#), [Metering – Instrument Project Ideas](#)
881.

[Arduino Laser Show with Full XY Control using arduino](#)

Update! See Step 32 to find out how to use this project with a green laser! Also - checkout the LaserTweet Instructable to make this project display data from Twitter: <http://www.instructables.com/id/LaserTweet-Twitter-Projecting-Laser-Show/> This project uses an Arduino and some cheap audio speakers to create a real..... Listed under: [Game – Entertainment Project Ideas](#)
882.

[Arduino GPS Clock usign arduino](#)

I had a Holux M-1000B Bluetooth GPS module that was just gathering dust in my room. I had bought it from DealExtreme back in the days when I had GPS-less (but external GPS capable) Nokia E51. Upgrading to a Nokia E52 has since made this..... Listed under: [Clock – Timer Project Ideas](#), [GPS Based Project Ideas](#)
883.

[DS1307 I²C Clock using arduino](#)

I wanted to learn how to interface with I²C devices using my Arduino, so I bought a DS1307 clock and crystal kit from Earthshine Electronics. I've no association to them, but I'd recommend having a look at their shop. Their prices are very reasonable, unlike..... Listed under: [Clock – Timer Project Ideas](#)
884.

[Lampduino – an 8×8 RGB Floor Lamp using arduino](#)

Lampduino is a computer-controlled free-standing floor lamp, comprised of an 8x8 RGB LED matrix. The lamp stands 45" high and 18" wide. Light emanates from both sides. It has various display modes, as well as an included editor for creating animations. The lamp is controlled..... Listed under: [Home Automation Project Ideas](#)
885.

[Room roving robot – phase 1 using arduino](#)

My second holiday project was a bit more fun than just blinking lights. I decided to tear apart a \$10 RC jeep and control it with the Arduino. For this project, I added a motor shield on top of the Arduino that I purchased at..... Listed under: [Robotics – Automation Project Ideas](#)
886.

[Make a simple platform and give mobility to your computer using arduino](#)

A computer is a very handy thing to use in your robots. If you start listing all the

887.

[Hacking Hex Bug Spider using arduino](#)

For the Smart Cities exhibition in Leeds in a couple of weeks, we've been building a physical representation of an agent based simulation. Hex Bug Spiders are relatively cheap hexapod robots that are controlled via an infra-red transmitter which has an A or B code so..... Listed under: [Game – Entertainment Project Ideas](#)
888.

[\(w/ Video\) Basic Arduino Robot, Light Seeker! using arduino](#)

Many times I have Googled for "Arduino Robot" in hopes of finding a robot to build. I end up finding many versions of a obstacle avoiding robot that uses either an infrared or a sonar range finder sensor mounted on a servo to detect objects..... Listed under: [Robotics – Automation Project Ideas](#)
889.

[Easy, Reversible Motor Control for Arduino \(or any Microcontroller\) using arduino](#)

This project uses just three main components to provide forward and reverse control for a single motor. You can easily interface it to an Arduino or any other microcontroller. It's so simple - you can wire it up "free-form" without a circuit board in about..... Listed under: [CNC Machines Project Ideas](#)
890.

[How To Use a Nokia Color LCD!](#)

Nokia manufactures a wide variety of cell phones and many of their cheaper phones contain simple LCD's which may be used in microcontroller projects. There is one particular LCD model that is used in a wide variety of their phones and is often referred to..... Listed under: [Phone Project Ideas](#)
891.

[Tutorial – Arduino and the MAX7219 LED Display Driver IC using arduino](#)

Use the Maxim MAX7219 LED display driver with Arduino in Chapter 56 of our Arduino Tutorials. The first chapter is here, the complete series is detailed here. Update – 4/1/15 – This article is pending a re-write, please refrain from comments and questions until the new version is published. Introduction..... Listed under: [LED Projects](#)
892.

[Ollie- a DIY autonomous robotic blimp using arduino](#)

Ollie is an open source blimp-based autonomous and ambient robot that dwells in human habitats. Ollie is observant, often flying in a manner suggesting curiosity for the world around him. Ollie reacts to voices by excitedly flapping his wings, communicating his friendliness and eagerness to..... Listed under: [Robotics – Automation Project Ideas](#)
893.

[PS1 Controller Joysticks with Arduino](#)

Idea: To take one of my old Playstation 1 controllers and extract the dual thumbstick setup so that it can be easily used in a microcontroller project (in my case: with the Arduino) without extra libraries or drivers that you would need if you want..... Listed under: [Game – Entertainment Project Ideas](#)
894.

[Arduino Binary Die using arduino](#)

After buying a Nanode (an Arduino-compatible board with ethernet built-in) last weekend, we've been trying to work it out by making a couple of simple examples, the 'Binary Dice' is the first one with input and outputs. A note, this code example is based on..... Listed under: [LED Projects](#), [Other Project Ideas](#)
895.

[Shaun The Noisy Sheep using arduino](#)

Make A "doorbell" using an Arduino Uno, a Wave shield from Adafruit, a small speaker, a plug, a Sharp distance sensor and a Shaun the Sheep. Our Shaun is used in an open doorway to alert store staff when a customer has entered. Step 1:..... Listed under: [Game – Entertainment Project Ideas](#)
896.

[Telecran \(Etch a Sketch\) + Arduino = Telecranduino ! using arduino](#)

I came across a bunch of stepper motors and I have since been looking for a project to do with the kids. An old Telecran (French for Etch-a-Sketch) later, we are in business ! What I used for this project: - an Arduino Uno -..... Listed under: [CNC Machines Project Ideas](#)
897.

[Boozeduino using arduino](#)

Now with more LED. Arduino mega powered breathalyzer using the MQ-3 sensor. A relative gauge for judging how intoxicated you are. NOT TO BE USED AS MEANS OF BREATHALYZING NEVER DRINK AND DRIVE. This is more of a device to encourage one to drink..... Listed under: [LED Projects](#)
898.

[Analog Sensors using arduino](#)

Analog sensors produce an analog (continuous) voltage that typically varies from 0 to 5 volts. They have three wires – ground, power, and signal (typically red, black, and white, respectively). Examples shown below include: Potentiometers Proximity Accelerometers Ribbon Bend Pressure Light Temperature Sound Multi-touch Touch..... Listed under: [Sensor – Transducer – Detector Projects](#)
899.

[LoL Shield Audio Spectrum VU Meter using arduino](#)

This is an audio spectrum VU meter using the LoL Shield for Arduino . The LoL Shield is a 14 x 9 LED matrix

900. [Flash trigger using arduino](#) his project is mainly based in this one from Glaciar Wanderer. I just liked his idea and worked it on my own. (I think this guy and me would be friends, as the projects he has in his photography category are things I've been wanting..... Listed under: [Video – Camera – Imaging Projects](#)
