SKETCH EFFECT TUTORIAL
## ORIGINALLY WRITTEN BY TIRAMISU DESIGN
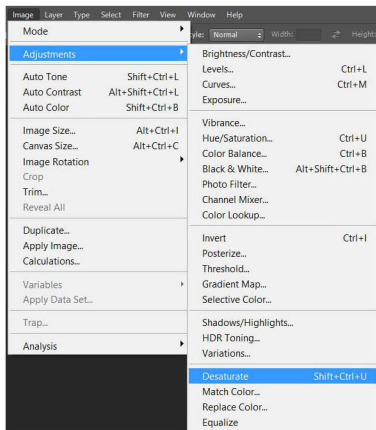

This is the original photo
(taken from the @pixabay)

STEP 1
a. Open you photo and
place it on your
background paper.
b. Make a copy of the
photo layer
and make it invisible.

**STEP 2**
Select Layer 1 and go to
Filter >Stylize >Find Edges

STEP 3
Go to Image > Adjustments >
Desaturate
(or just SHIFT+CTRL+U)

STEP 4
Go to Image > Adjustments > Curves
(or just CTRL+M) make the
curve as shown on the image

STEP 5
Change Layer's 1 blending
mode to MULTIPLY

STEP 6
Add to Layer 1 a vector mask
holding ALT button, after that
this layer become invisible, it's OK!

add vector mask
holding ALT button

STEP 7
Paint over the vector mask
using WHITE watercolor brush
with 40-50% opacity.
If you see to hard lines at the
edges of the photo, you can switch
the brush color to black
(just click X) and remove them.

brushes 1327 & 1192
opacity 40%

STEP 8
a. Make Layer 2 visible
b. Add a vector mask holding
ALT button to Layer 2, after
that this layer become
invisible, that's's OK!
c. Paint over the vector mask
usIng WHITE watercolor brush
with 40-50% opacity.
Start your painting from
the centre of the photo than
move to the edges reducing
the opacity of the brush,
and you will get a beautiful
watercolor effect.
If you see to hard lines
at the edges of the photo,
you can switch the brush color to
black (just click X) and remove them.

IMAGINATION
is more important
than
knowledge.
