Guardian Mail

## Keep Malicious Messages Out of Your Mail Server and Your User's Inboxes

OVERVIEW

Mail system operators see as much as 95% of the mail hitting their mail servers as spam and fraud, thus need a first line of defense for their server and user's inboxes. Abusix is recognized as the most effective commercial blacklist for blocking spam, fraud, and suspicious senders, in the market today.

Over 20 Billion Threat Indicators Processed Per Day

DESCRIPTION

Abusix provides Guardian Intel to mail operators, security providers, and enterprises to allow them to block mail-borne threats and protect their customers. Using our proprietary sensor networks, Abusix has an unparalleled view of threats. Our detection and blocking of compromised IP addresses and domains found recurring in spam at the edge, allows upstream message heuristics and antivirus engines to run more efficiently.

A FEW OF OUR CUSTOMERS
KEY BENEFITS

1. Guardian Mail blocks real-time emerging threat identification in less than 10 seconds, where our competitors' block new emerging threats by 10 minutes or more

2. Guardian Mail provides simple fast drop-in integration into your existing mail servers and antispam filters.

3. Guardian Mail costs on average, 25% less than similar competitors, and provides rapid ROI through both direct cost savings and through a dramatic reduction in malicious traffic

virus BULLETIN

Spam Catch Rate: 99.02%
Malware Catch Rate: 99%

GUARDIAN MAIL: DATA IS POWER

Block sophisticated mail-borne cyber-attacks:

Mail Operators

- Our broad sensor network allows us to detect compromised IP addresses and domains sending spam faster

- Our state of the art architecture process and identifies new threats in 1/10th of a second validates and issues a final decision in less than 10 seconds across DNS.

- Better source data provides a 3x increase in blocking of known malware at the edge than other blocklists.

Network Service Providers

- Transparent blacklisting, delisting process, and support resolution helps relieve your postmaster of work

- One stop information source allows network administrators to understand the reason for a block, thus giving them a clear signal to help a user on their network or shut down an open relay, bot or bad actor.

- Clear delisting processes help legitimate senders understand their problems and thus secure their outbound servers faster.

Security Vendors

- Guardian Mail relieves the security vendor's anti-spam and anti-virus filters of the noise and the need to evaluate mail from known sources of spam; thus freeing up these filters to work on the harder more specific problem.

- Guardian Mail is designed to help the legitimate sender who has a bad configuration understand what they need to do, to make email work better.

- Guardian Mail is specifically designed with the security vendor reseller model in mind.

"Because of its high SPAM catch rates and low false positive rates, switching to Guardian Mail was a no-brainer. Working with a bunch of fun, smart people, doing really cool stuff and who have great ideas is just icing on the cake."

– Guardian Mail Customer

ABOUT US

Abusix is an industry-acclaimed leader in network abuse management and email security solutions. With advanced technology, Abusix helps telecommunications, technology enterprises, and network providers fight spam, phishing, and other cyber threats, ensuring operational integrity and network protection. Abusix is the go-to partner for securing digital environments and safeguarding against evolving online risks.
