LOTS OF HAPPY CLIENTS

Nothing pushes us more than learning that we've accomplished our clients' goals and vision just as or better than what they imagined.

Below, we've included a list of client testimonials to demonstrate their satisfaction with the projects that we have undertaken and fulfilled as per their needs-

Niranjan Gupta
PR Manager

ACMASOFT TECHNOLOGIES is a highly professional company. They did an excellent job for me, exceeding my expectations. I will definitely hire them again.

Ranjan Sahay
Marketing Manager

They are the BEST at creating apps. They consistently go above and beyond in their delivery, they are my go-to team for all my app projects. I highly recommend them!

Dr. Vivek Dubey
Founder

A great company for various projects. They excel technically and always meet or exceed expectations. Surely recommend them..

Sheetal Murudkar
Project Head

Highly professional and accommodating team. Timely delivery and very satisfying results. Strongly recommended.

Even they are pretty responsive post project delivery as well.

Dr. Sanjeev Mishra
Consultant

A proficient group of developers who delivers once requirements are clear. Delighted with the end result.

keep it us guys , you're doing great work.

Sunil Keshri
Brand Consultant

Highly professional, experienced, and excellent project manager. They did a fantastic job. Strongly recommend.

They know how to take the project ahead.

OUR DEVELOPMENT METHODOLOGY

Today modern businesses have the biggest challenge and it is amalgamating multidisciplinary and multipurpose expertise to ensure global success. If they have not marketing team to run research on their targeted audience and bring them on website/mobile app as well as convert them successfully into their loyal customers, the only web designing or programming team is useless.

Have an awesome idea? We will provide a quick analysis and free proposal for it. Don't worry, it is secure and confidential. [LET'S TALK](#)

MODELS LIST

We take unique approaches when the selection of development methodology is in question by considering aforementioned factors in evaluation of the project. No doubt, standard and popular development methods are our preferences, but required modifications are essential in each case. If we are going to list some of our development methodologies, we can enlist it in following ways:

WATERFALL MODEL

No doubt, this one is classic model among modern popular development methodologies because it favours the process lifecycle with linear and sequential development methods. We generally apply this methodology in case of the businesses of any scale, be it small, medium, or large, which comes with definite goals and budget. As, we need to have definite goals for each development phase, we prepare project scopes with utmost care and define our understanding as well as functionality for the project or product. Our clients feel swift flow of development process from the concept to release and for post-production services. We accomplish each stage perfectly before jumping on the next and leave no scope to turn back.

AGILE MODEL

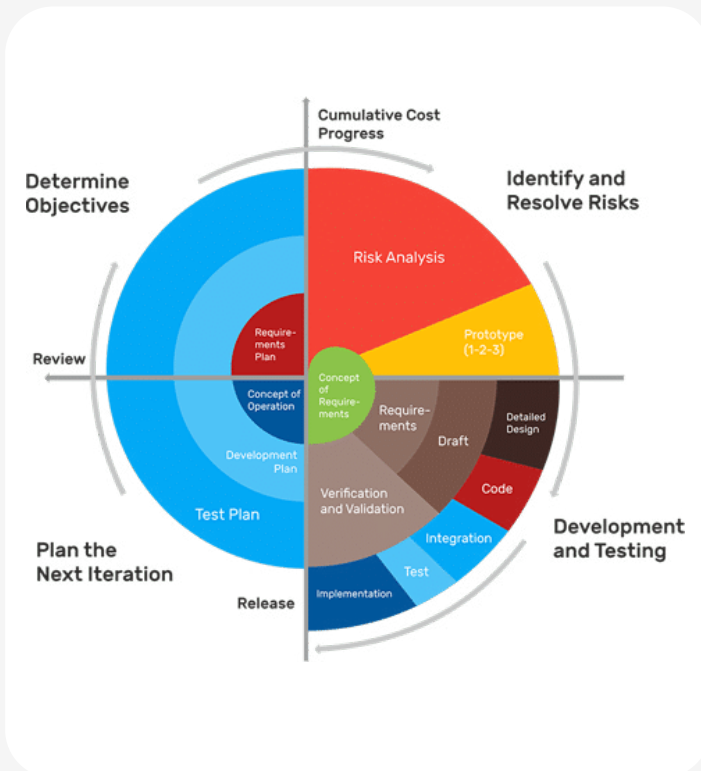

We use this methodology in majority of cases as it offers a time-boxed approach and suitable for modern projects. For the projects, we apply the methodology we predefine each step and most possibly divide major steps in to the smaller ones and bifurcate into phases with time duration to accomplish each phase. In this methodology, we target the objectives of clients and try to leverage the software or final product in the existing ecosystem at the client side. We keep coordination and communication between clients and our teams through a designated point of contact to drive process further and achieve defined goals. Therefore, we run highly planned strategies and create streamlined environment.

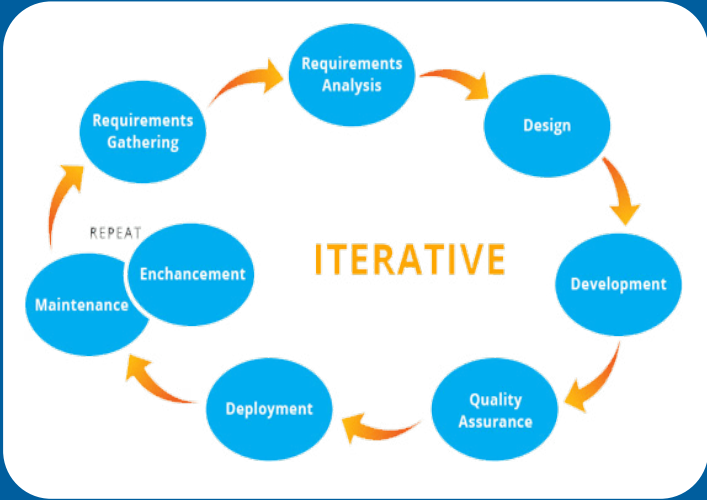

SPIRAL MODEL

At AcmaSoft, when we approach big, expensive, and intricate project proposals, we take route of spiral model as our development methodology. Through this model, we combine designing and programming elements in all stages. Therefore, designing and prototyping processes are visible on each stages of project lifecycle and remain up to end.

Thus, we combine advantage of top-down as well as bottom-up concepts through this model or say system development method. In this method, we divide development process in four major stages like planning, risk analysis, programming, and customer evaluation.

ITERATIVE MODEL

We know iterations are good for the software development because through iterations we correct previous mistakes and bugs in repetitive manners and tests the product frequently until we reach at the desire level of quality. Therefore, our majority of mobile and web development projects involve iterative model along with other development methodologies or as an independent model in many cases.

LET US SERVE YOU

We appreciate you taking the time and checking out our company's business pattern. If you have any business related idea or query, then feel free to discuss it with our experts. We guarantee a profitable service outcome to all our clients.

We'd love to hear from you, and invite you to contact us without hesitation.
