NETRONIC

WHO WE ARE

The GALAXY, a part of a group of companies called NETRONIC, has been on the market for over 15 years. Our team has gone from a paintball club to a world-known manufacturer of laser tag equipment, VR attractions, and inflatable bunkers.

The GALAXY is a laser tag system for mall arenas or separate premises. Game kits with realistic recoil, safety rules control system, and unique modes will make your visitors feel like superheroes. A set of ready-made scenarios, mobile software for set configuration, statistics collection, and game broadcasting on a big screen.

Our team has come to the conclusion that we need to rethink the company's structure to align with what we are doing today and represent something more than just a product.

WE ARE NETRONIC NOW

NETRONIC is a group of companies encompassing the following trade brands: LASERTAG.NET, GALAXY, VION VR, Airbunker. This Universe includes all the branded equipment we produce and our premium service.

We don't just develop products and services, we provide comprehensive business support at all stages, from consulting on the choice of game sets to opening a laser tag center with its further promotion. With renaming, we claim that we are more than just manufacturers, we are business partners.

EMPOWERING DESIGN IGNITES PROGRESS

A safe game in which there
is no place for aggression

UNLOCK YOUR HERO POTENTIAL
WITH UNIQUE MODES

Touch Sensor

activation occurs through touch.

Interactive RGB event lighting

changes its color and overall pattern according to events.

Shock-resistant casing

capable of enduring many hours of intense daily gaming

Vibration

provides haptic feedback corresponding to events on the gaming field.

Superpowers

the sensor can activate superpowers selected for each specific game.

GAME KIT

Game kit

Galaxy ECLIPSE

Galaxy Eclipse is an innovative and cutting-edge indoor laser tag game kit that brings a whole new level of excitement to the world of laser tag. Designed with advanced technology and features, this game kit takes the traditional laser tag experience to a whole new dimension.

Another impressive aspect of the Galaxy Eclipse is its motion control capabilities. With motion sensors integrated into the game kit, players can now interact with the game in a more physical and engaging way. This feature not only adds a layer of realism but also encourages players to be active and move around, enhancing the overall experience. The Galaxy Eclipse offers a wide range of unique game modes that cater to different playing styles and preferences.

Whether you're a fan of team-based battles, capture the flag scenarios, or free-for-all matches, this game kit has something for everyone. These diverse game modes provide endless opportunities for players to showcase their skills, collaborate with teammates.

\$ 1740

BLASTER

Galaxy ECLIPSE

* Actual product color may differ

LENGTH — 15.7in

Makes the game comfortable even for children from 5 years old.

CAPACITIVE HAND SENSOR

Prevents players from swinging a blaster or shooting one-handed.

RECOIL IMITATION

Vibration in the buttstock blaster lets players feel every shot.

HALO TECHNOLOGY

Double illumination of the shot accompanied by the team color.

COLOR IPS SCREEN

Displays kit parameters and game statistics.

Bright shots with team color

HALO TECHNOLOGY

Thanks to the HALO technology, a shooting blaster sends a red beam and a flash of the team color. Double shot illumination makes the game safer and also allows players to better distinguish between allies and opponents.

Color IPS screen

INDICATES EVERYTHING

The IPS display allows visitors to track health units, weapons, superpowers, and other indicators.

IPS TECHNOLOGY

Provides wide viewing angles, as well as a bright and high-contrast display of all information.

GAME STATISTICS

After the session, the screen displays the number of deactivations, score and other game statistics.

PROTECTIVE GLASS

A 0,2 in thick glass protects the screen from mechanical damage.

ECLIPSE Vest

5 VIBRATION INDICATION MODULES

Spot vibration of the zone hit by an enemy and a powerful shock imitation when the player is completely deactivated.

LENGTH — 17 in

Due to the small area of contact with the body, the player does not overheat during the session.

WEIGHT — 2,65 lb

The minimal weight of the vest allows even the smallest children of 5 years to play.

2 SPEAKERS

The speakers are installed in the shoulders of the vest so that visitors stay informed about all game events.

* Actual product color may differ

3 sound sources

The speaker in the blaster is responsible for the sound indication of shots.

2 speakers on the shoulders of the vest alert players about wounds, flag capturing, respawn, and other game events.

Thanks to surround and parallel playback of sounds, the visitor hears each notification.

Game kits come in 6 available languages.

Ready for active use

WEAR-RESISTANT ECO-LEATHER

The base of the vest is made of eco-leather which does not get dirty or worn out, maintaining a presentable outer appearance after years of use.

SHOCK-PROOF SENSORS

The sensor bodies are made of polycarbonate, and also have stiffening ribs, which makes them resistant to drops and impacts.

ARMORED CABLE

An armored cable is used to firmly connect the vest and blaster. The attachment spots are fitted with overlays that prevent kinks.

MOISTURE-REPELLANT LINING

The inner lining of the vest is made of a material that does not absorb moisture or odors. It takes less than a minute to treat the kit with an antiseptic!

PROTECTED ELECTRONICS

All electronic components can withstand drops and rough handling, as they are fixed on metal brackets and shock-resistant plastic modules.

Feel ECLIPSE

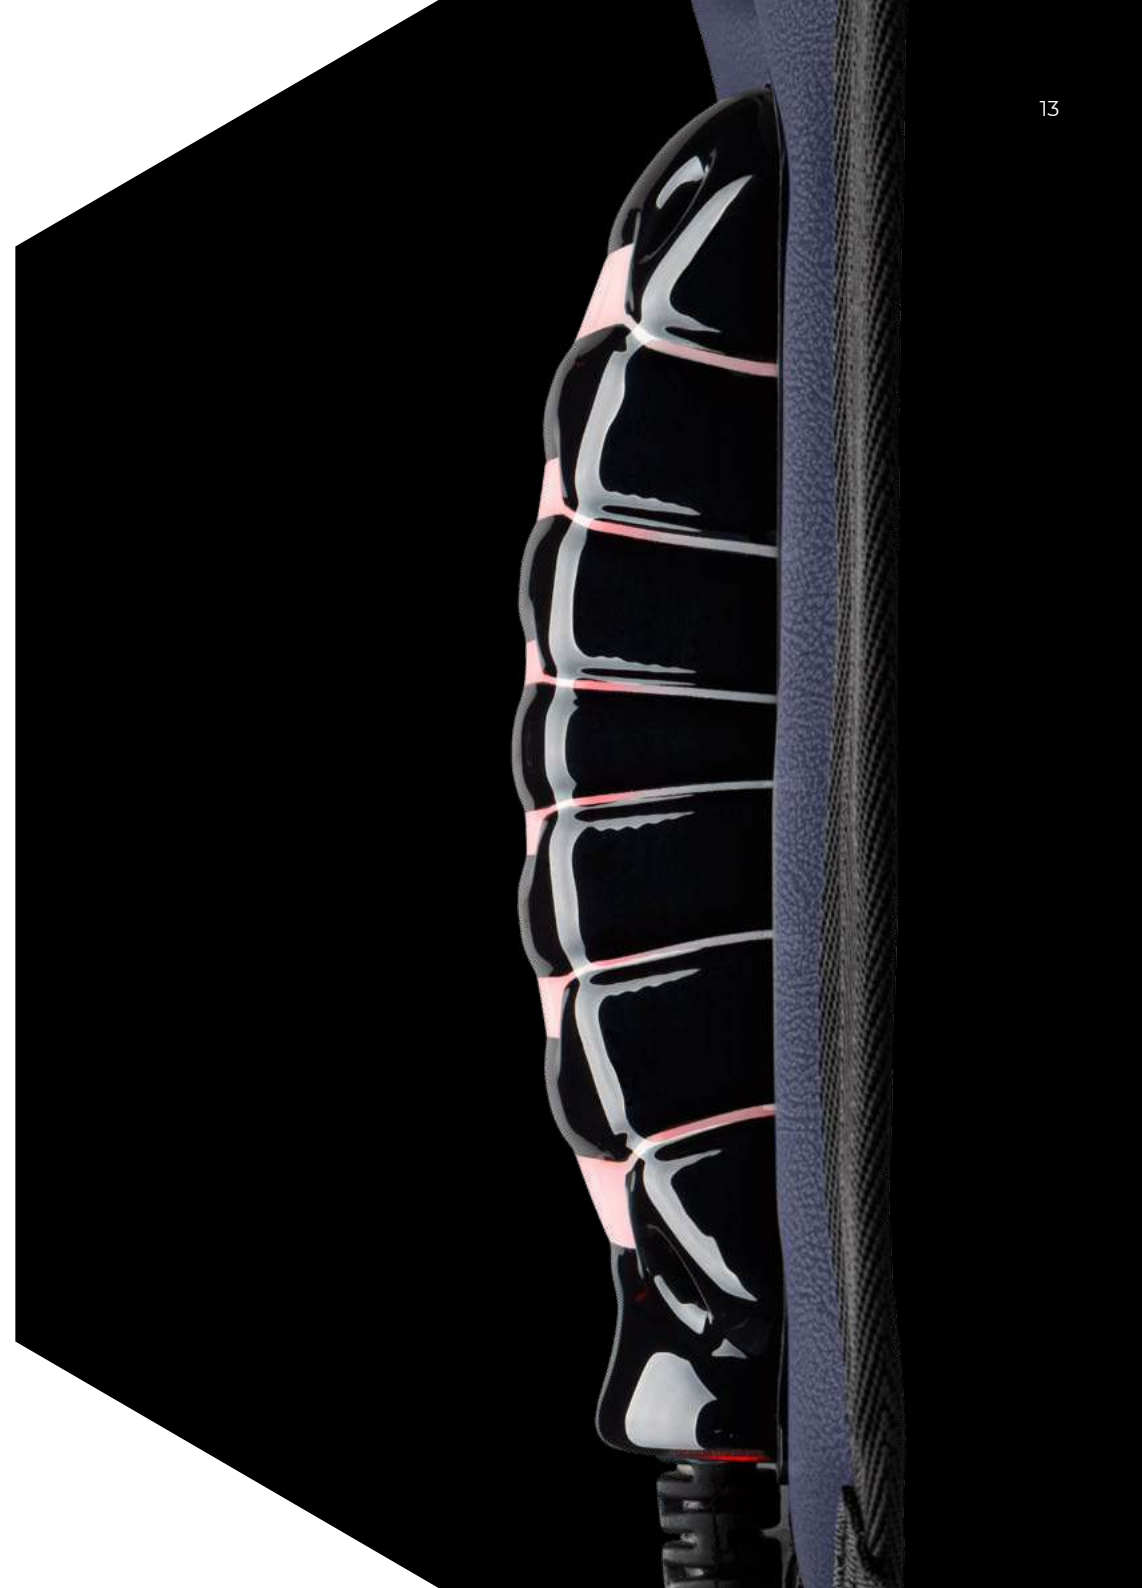

SMART LIGHT INDICATION

The Eclipse kit takes immersion to a whole new level by intuitively and dynamically displaying every crucial game event. Whether it's an injury, a change of lead, or a virtual explosion, players will be visually engaged and fully immersed in the action. This impressive solution is made possible through the intricate geometry of the sensors and the seamless coordination of over 50 LEDs, ensuring a visually stunning and captivating gameplay experience. The carefully designed complex geometry of the sensors allows for precise detection and tracking of game events, ensuring accurate feedback to players in real-time.

SIMULATION OF SHOCK

In addition to its impressive features, the Galaxy Eclipse incorporates a shock imitation module that adds an extra layer of realism to the gameplay. Located at the back of the vest, this module delivers a powerful vibration to the deactivated player, simulating the impact of a hit and creating an immersive experience. Moreover, when a player is injured, the sensor corresponding to the affected area triggers a spot vibration indication, providing immediate feedback on where the opponent hit. The shock imitation module enhances the overall gameplay experience by creating a physical sensation that matches the virtual action.

Players can feel the intensity of the game as their vests vibrate in response to hits, making each encounter more exhilarating and lifelike. This powerful vibration feature adds a tactile element that heightens the immersion and further connects players to the game world.

Choose your superpower!

By placing a hand on the sensor on the stomach, the player can activate one of the superpowers for a limited time.

HEALER

Allows you to restore health for yourself and all allies nearby.

NINJA

Turns off the vest illumination, allowing you to sneak up on opponents.

POWER SHIELD

Temporarily makes a player invulnerable to all types of damage.

BOMBER-MAN

deactivates all the enemies nearby with an explosion.

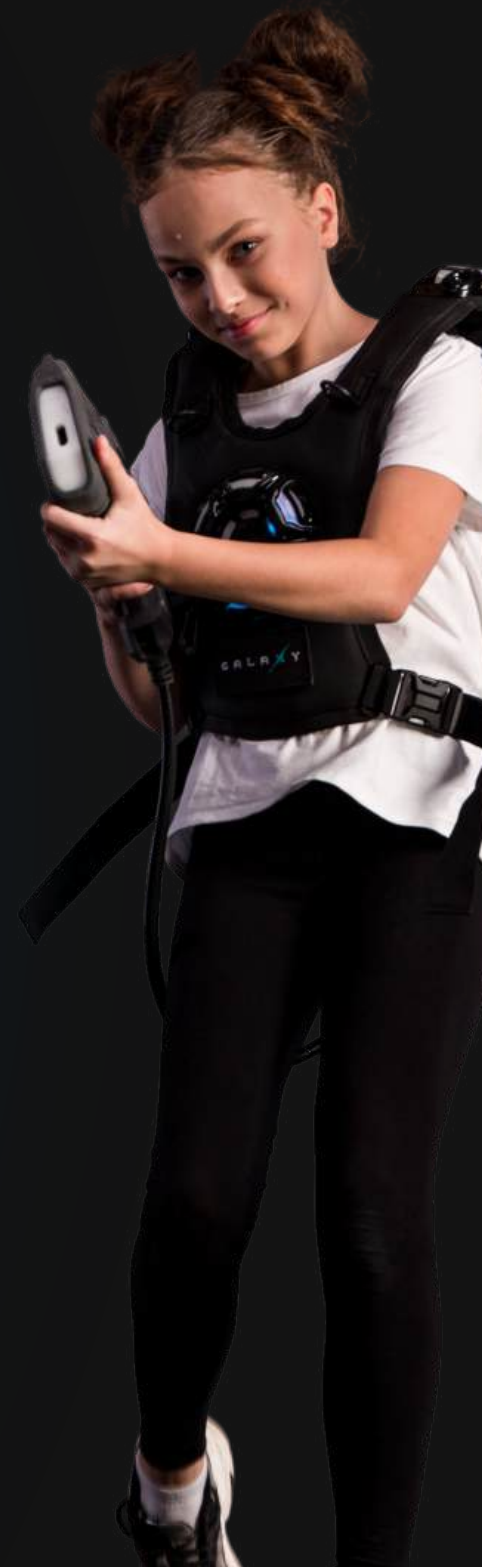

MAX DAMAGE

Increases blaster damage up to 100 units.

* Random - assigns a random superpower each time.

GAME KIT CAPABILITIES

Stop Aggression

Incorporating advanced safety measures, the Galaxy Eclipse introduces the innovative Stop Aggression technology. This cutting-edge feature is designed to detect sudden and aggressive movements of players during gameplay. With the primary goal of ensuring a safe and enjoyable experience for all participants, the technology acts as a proactive safeguard against potential security violations.

When the Stop Aggression technology detects any signs of aggressive behavior, such as rapid and forceful movements, it immediately triggers an alert on the blaster screen. This visual alert serves as a reminder for players to maintain a fair and respectful gameplay environment. It prompts individuals to be mindful of their actions and encourages them to engage in the game with a focus on sportsmanship and camaraderie.

Not only does the technology notify the player directly through the blaster screen, but it also goes a step further by notifying the instructor or game operator. The instructor receives a notification in the accompanying app, allowing them to promptly address any potential security violations and maintain a safe gaming atmosphere. This real-time monitoring capability empowers instructors to intervene when necessary, providing guidance and support to ensure that the gameplay remains fair, enjoyable, and free from any aggressive behavior.

Step statistics

In addition to its immersive gameplay features, the Galaxy Eclipse kit offers a unique activity monitoring function that adds an extra layer of engagement and motivation for players. Throughout the game, the kit keeps track of each participant's activity, including the number of steps taken. This data is then displayed for everyone to see after the round, creating a sense of competition and encouraging players to be more active throughout the gameplay.

By showcasing the number of steps taken by each player, the Eclipse kit fosters a friendly competition among participants. It adds an element of physical activity to the game, motivating players to move more, strategize their movements, and accumulate the highest value on their pedometers. This feature not only enhances the overall gameplay experience but also promotes a healthy and active lifestyle among players.

Software for a quick solution to every task!

The Galaxy Eclipse kit features Android-exclusive software that provides full control and customization options through the accompanying app. With just a few clicks, game operators can remotely control and disconnect game sets, ensuring a smooth gaming experience.

The app offers a range of ready-made game scenarios and a flexible constructor for unique modes, allowing for endless possibilities. It also includes a character creation system with over 40 parameters for personalized heroes. The software tracks team and personal statistics, providing unique achievements. It is available as a free download with regular updates for an evolving laser tag experience.

Galaxy Eclipse offers a software solution that assists business owners in tracking fiscal statistics. This software provides valuable insights for monitoring the performance of the laser tag business. With Galaxy Eclipse's software, owners can effortlessly analyze the correlation between the usage hours of their gaming kits and the corresponding number of games played, ensuring accurate tracking and efficient management.

Use ready-made scripts

WARM-UP

A simple game to familiarize yourself with the arena maze and game kit before more interesting scenarios.

THE VIRUS ELIMINATION

Destroy all the virus sources faster than opponents by freezing their weapons with shots.

BASE ASSAULT

Storm the base which is actively protected by the enemy team, while not forgetting about your own defense.

ULTIMATIVE WEAPON

Your blaster becomes your ultimate weapon that fires single shots with high damage.

DEATHMATCH

Combat with automatic respawn and a limited number of ammo magazines.

ENCOUNTER

Team mode with simple rules for beginners and young players.

MIND CONTROL

You capture the minds of deactivated opponents and they become a part of your team.

ARENA KING

A battle in which the last player wins.

TEAM DEATHMATCH

Team battle with automatic respawn.

VAMPIRE FEUD

Striking opponents, just like a vampire, you take away their health units and restore yours.

EXPLORATION

Find ancient artifacts faster than the opposing team.

DOMINATION

A game with a limited amount of ammo and the ability to replenish health and supplies only at the base.

SCENARIOS BUILDER

You can develop your own rules, edit the rules of existing scenarios. This will provide new opportunities for content diversification, which leads to repeated returns of customers.
