WHO WE ARE

NETRONIC has been on the market for over 19 years. Our team has gone from a simple paintball club to a world-renowned manufacturer of laser tag equipment, VR attractions, and inflatable shelters.

NOW WE ARE THE NETRONIC UNIVERSE

Today's NETRONIC is a group of companies including following trade brands: LASERTAG.NET, GALAXY, VION VR, AIRBUNKER. Our company produces innovative laser tag equipment and provides a full business support at every stage, from evaluating and developing your business idea to help with the opening of your own laser tag center and its further development.

WE PRODUCE EQUIPMENT FOR 4 BUSINESS AREAS

NETRONIC

FALCON — FOUNDATION FOR MORE THAN 2000 LASER TAG CENTERS WORLDWIDE

- 01 FUTURISTIC**
Body frame is not of an aggressive design, which is adapted for the work with the laser tag business target audience. There are no sharp protruding parts on the tagger that may injure players.
- 02 RELIABLE**
Tagger's body frame is made of impact-resistant ABS-plastic, and the electronic components are placed in specially designed areas. All this allows for the equipment to be operated in rental mode for many years.
- 03 MULTIFUNCTIONAL**
The FALCON gaming kit combines 10 virtual weapon types. Primary and secondary weapon modes, which differ in characteristics such as damage size and rate of fire, are available to users. It can be an assault or sniper rifle, a pistol, or even a grenade launcher.

FALCON TAGGER IS AVAILABLE IN F1, F2, LUX AND LUX2 VERSIONS FALCON

FALCON F1

Universal model that is suitable for both children from 5-6 years old and adults

FALCON F2

Full-size model that will be convenient for children from 12 years old and adults

LUX

Compact tagger with bright illumination for working with children and indoor playing

LUX F2

A full-size version of the compact tagger with a stock, suitable for children aged 12 and up, as well as adults

AR-15 MAVERICK

Tactical outdoor tagger with authentic AR-15 design, dual recoil, and mechanical reload – for teens and grown players

 3 built-in hit sensors

 Color IPS Display

 Dual recoil (impulse + vibration)

FALCON TAGGER

IMPULSE RECOIL

IPS SCREEN

The 1.5-inch color screen displays 20 gaming and technical indicators of the gaming set

TWO-HAND SENSOR

The sensor blocks the tagger when it is held with one hand, which makes players' movements less swifty

STREAMLINED SHAPE

There are no sharp or protruding elements on the body, which makes it as safe as possible to use

PICATINNY RAIL

Allows to install a laser targeting device, collimator or optical sight on the tagger

PROTECTIVE BUMPER

Absorbs impacts, making collisions safer, and also serves as additional protection for the emitter

BUILT-IN DAMAGE SENSORS

Three sensors are installed in the body of the tagger to register hits, just like a headband or vest

DUAL RECOIL SYSTEM

Impulse module delivers shoulder kick when shooting. Grip vibration activates on hit, enhancing immersion and feedback.

FALCON
OVERVIEW:

MAVERICK

ERGONOMICS

Combines classic AR-15 silhouette with futuristic accents. Matte-gloss body and textured grip provide a secure, comfortable hold.

AUTHENTIC AR-15 RELOADING

Mechanical charging handle in the classic position. Fire modes are switched using a dedicated button, ergonomically placed for the left thumb.

CONTACTLESS TRIGGER

The trigger with a Hall sensor system ensures zero mechanical wear and long-term reliability. Smooth and light activation provides a comfortable gameplay experience for hours.

IPS DISPLAY

Full-color IPS screen shows health, ammo, and game statistics. Visible even in sunlight.

DUAL RECOIL SYSTEM

Impulse module delivers shoulder kick when shooting. Grip vibration activates on hit, enhancing immersion and feedback.

ADDITIONAL HIT SENSORS

Includes two side sensors and one front sensor. Hits on the sensors are counted the same as hits on a headband or vest, improving fairness and game dynamics.

NFC SYSTEM

NFC enables quick pairing of the tagger with headbands, vests, and a shock bracelet. Simply bring the devices close to each other in pairing mode.

MAVERICK

NETRONIC HEADBAND

The ultra-lightest headband in the laser tag industry that features five autonomous operating modes for various game scenarios, and a detachable design for easy maintenance.

Weight	150 g
Number of Sensors	4
Battery Life	up to 24 hours
Material	CORDURA MAXI

\$ 249

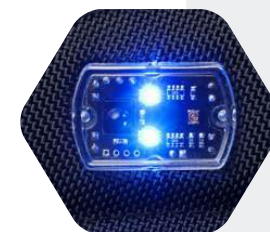

COMPACT AND IMPACT-RESISTANT HIT SENSORS

The hit sensors are housed in a robust polycarbonate casing, measuring just 5 mm in height.

WEAR-RESISTANT TEXTILE BASE

Both the vest and headband are made of high-strength CORDURA MAXI fabric, retaining their appearance even after years of active use.

INVERSE MODE

In this mode, the headband or vest continuously glows in the team's color, making it ideal for low-light laser tag arenas or nighttime gameplay.

WATER-REPELLENT VEST LINING

The vest's lining is designed to resist moisture and odors, before playing it is enough to simply wipe the vest with a sponge or apply an antiseptic to the inner surface, taking less than a minute.

\$ 410

VEST NETRONIC

The vest features an expanded hit zone with 6 sensors on the front and 3 on the back, eliminating blind spots and ensuring accurate gameplay, even in close-quarters combat. The outer part of the vest is made of wear-resistant CORDURA MAXI fabric, while the inner lining is crafted from moisture-wicking PVC material.

Weight	700 g
Number of Sensors	9
Battery Life	up to 24 hours
Material	CORDURA MAXI

ONE HEADBAND OR VEST — 5 AUTONOMOUS GAME MODS

NETRONIC vest and headband can operate independently without the tagger, allowing one to implement unique game mechanics and recreate the most popular scenarios.

There are five mods available, which can turn your players into zombie who deactivates the nearby players, or a hostage whose life is to be saved, or medics who can heal the teammates, or even implement a game target in Frontier mode.

FRONTIER

Is a target

ACTIVATOR

Restores deactivated allies

MEDIC

Restores nearby players' health

HOSTAGE

Records hostage deactivation

ZOMBIE

Deactivates players as they approach

SCORPION SHOCK-BAND

\$ 270

It is a unique device in a shape of wrist bracelet , every hit of which is accompanied with vibration or electrical impulse, allowing to feel the same adrenaline rush that players experience while playing paintball or airsoft. Launch the exclusive SHOCK-FIGHT service at your laser tag center to make it more exciting for adults

STAND OUT FROM THE COMPETITION

SHOCK-FIGHT – is a unique entertainment unavailable in other laser tag centers, encouraging customers to choose yours

+16

ATTRACT NEW CUSTOMERS

This new game will appeal to adult players, paintball and airsoft fans, as well as parents bringing their kids to play.

INCREASE YOUR AVERAGE BILL

Statistics from our own laser tag center and clients who implemented SHOCK-FIGHT show that the average bill for games with shock bracelets is roughly 20% higher than classic laser tag

SUPERNOVA LASER TAG-BOMB COUNTER-STRIKE STYLE

New laser tag bomb SUPERNOVA gives an opportunity to recreate popular scenarios from computer games, when group of players is divided into terrorist and counter-terrorist teams, with one team supposed to deliver, place a bomb onto the special NFC-platform and to activate it, while the other team must have the bomb deactivated.

FLEXIBLE SETTINGS

Create your own scenarios and easily adjust the bomb settings for each of them, with the LASERTAG OPERATOR mobile app, you can change the activation and deactivation time of the bomb, as well as the countdown to detonation

SHOCKPROOF HOUSING

The rubberized shell of the laser tag bomb is resistant to drops, shocks, and other loads. The bomb is also moisture and dust resistant, so you can use it in any weather

NFC PLATFORM

NFC platforms allow you to install and activate the bomb only in predefined locations. One platform is included with the laser tag bomb, but you can also purchase additional NFC platforms separately to increase the variability of your game scenarios

\$ 680

LASERTAG- NEBULA GRNADE

DISCOVER ENDLESS POSSIBILITIES WITH REALITY

Our grenade allows you to easily expand the number of scenarios in your games. It closely simulates the operation of a real combat grenade with all stages: activation, holding, throwing, detonation. All players in the affected area will be deactivated.

 Well-thought-out
vandal-resistant design

 Rubberized body for
player comfort and safety

 Water resistant, can be used
in all weather conditions

RELIABILITY AND SERVICE LIFE

The grenade is able to withstand intensive use and drops on a hard surface.

SOUND AND VIBRATION INDICATION

Each mode of the grenade operation, from the moment of activation, explosion and subsequent transition to the search mode, is accompanied by sound signals, vibration and light indication.

\$ 175

NEBULA
OVERVIEW:

CHOOSE A CONVENIENT WAY FOR YOU TO SET UP EQUIPMENT AND PLAY THE GAME

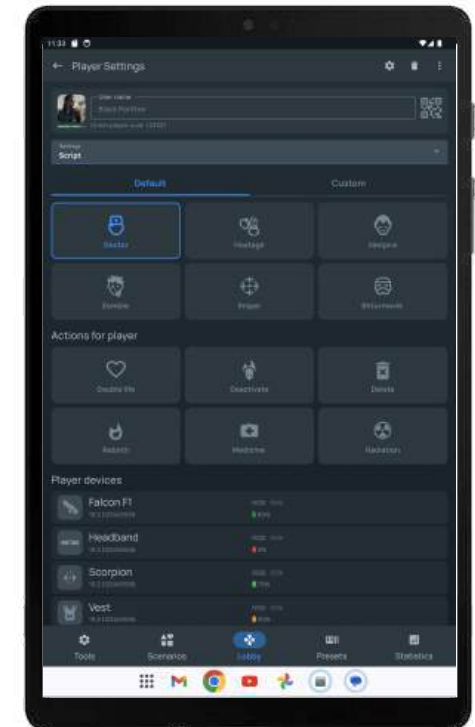

Use Lasertag Operator mobile app to configure equipment, control the game and get statistics. If you launch game with the remote control, you will not be able to store statistics or to set up the most of the equipment settings.

Remote control is used for basic set up of the game kits and scenario devices. Using it, you can set the color of the player's team, select a preset, start and end the game, configure the operating mode of the Sirius station and the Smart Domination Box, and activate the autonomous operating modes of headbands and vests.

A tablet with the Android operating system and the installed LASERTAG OPERATOR mobile application. The app allows you to combine all game sets and scenario devices into a single ecosystem and conduct the game from anywhere on the playfield.

You will be able to individually configure all equipment, create your own unique scenarios, and receive online game statistics.

LASERTAG OPERATOR – LASER TAG CENTER CONTROL AND MANAGEMENT

FREE SOFTWARE

Lasertag Operator mobile application is available on the Play Market. We are constantly working on improving and expanding the functionality to meet the needs of laser tag center owners and operators. All further updates to the application will be free.

BUILT-IN LEARNING

Before using the mobile application for the first time, users are offered a short training course so that they can easily master the basic functions of LASERTAG OPERATOR.

7 LANGUAGES

The Lasertag Operator interface is translated into 7 languages, which provides convenient working conditions for instructors.

BUSINESS CONTROL

A function for owners and managers of a laser tag center, which allows you to track the number and duration of game sessions, the number of game sets used, and to prevent unauthorized use of equipment.

SET OF READY-MADE SCENARIOS

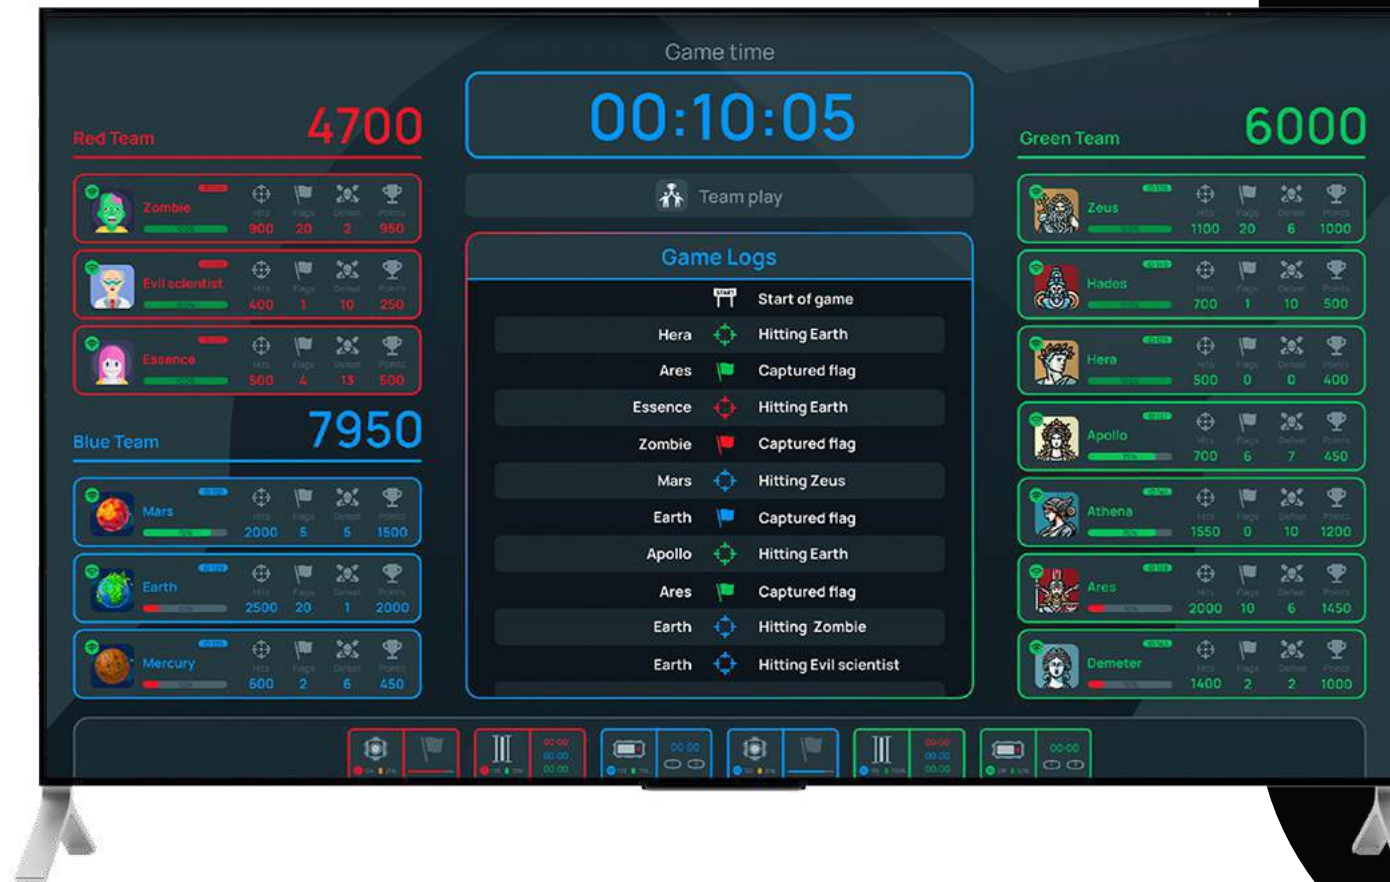

The application already contains a variety of ready-made scenarios that can be adapted to your target audience, plus you have the ability to create and save your own unique scenarios and equipment settings.

THE APP CAN BE DOWNLOADED
HERE:

GAME BROADCAST ON TV-OUT

TV-OUT — is an Android application that allows to display statistics and the laser tag game course in real time on the big screen.

To broadcast the game on a TV or external monitor, you need to connect your Android box to the TV-OUT app.

STABLE COVERAGE WITHOUT LIMITS

The connection between the game sets and the LASERTAG OPERATOR mobile application is maintained via the Wi-Fi channel. Starting the equipment through the application gives you access to advanced settings, automated control, and the collection and transmission of statistics in real time.

To cover a standard playing field with a Wi-Fi signal, one router is sufficient. If you do not have a 220V network on the playing field to power the Wi-Fi router, you can use a special power bank. Connecting the router to the Internet is not required!

Our Powerbank provides an autonomous operation of the Wi-Fi router for playing games on any playground where there is no 220V network to power the Wi-Fi router.

Capacity 15600 mAh

FAST EQUIPMENT CHARGING NEW VORTEX CHARGING STATION

STABLE 2A CHARGING POWER

per channel ensures the shortest possible charging time for each device without overloading it or reducing battery lifespan.

INTELLIGENT ACTIVE COOLING

automatically stabilizes the temperature of the power supply unit and internal components under load, ensuring efficient operation without overheating.

THE USE OF A MODERN

high-quality power supply ensures stable operation in any region of the world with different input voltage ranges, whether in Europe or Asia (230 V) or in the USA (110 V).

REMOVABLE 2 M CHARGING CABLES AND A 10 M POWER CABLE

make operation more convenient, allowing you to position the charging station where needed. Wall mounting is also possible.

THE MODERN ENCLOSURE DESIGN

aesthetically integrates into the overall concept of NETRONIC scenario devices and can be harmoniously placed in equipment distribution and storage areas.

STATUS INDICATORS WITH STEP-BY-STEP COLOR CHANGE:

up to 25% charge → red; 50%, 75%, and 100% charge → green. This allows convenient monitoring of each device's charging level.

VORTEX is a new-generation charging station from NETRONIC, designed for intensive daily operation in a laser tag center. The new charging station allows simultaneous charging of up to 20 devices of any type from the NETRONIC indoor and outdoor equipment lines.

VORTEX is intended for indoor use. This ensures optimal conditions for stable operation of the new charging station. We do not recommend using the charging station outdoors to prevent dust, dirt, and moisture from entering the unit.

TECHNICAL PARAMETERS:

OUTPUT VOLTAGE — 8.4 V
 OUTPUT CURRENT — 2 A PER CHANNEL
 MAX. POWER — 450 W
 POWER SUPPLY — 110–230 V / 50–60 HZ

SIMULTANEOUS CHARGING — UP TO 20 DEVICES
 COOLING — ACTIVE
 CHARGING CABLE LENGTH — 2 M
 POWER CABLE LENGTH — 10 M

2A charger

Voltage: 8,4V
 Current: 2mA

ACCESSORIES

Transport bag for 6 taggers

The bag allows convenient and safe transport and storage of FALCON F1 and F2 taggers, along with collimators and bands. This bag is not suitable for transporting FALCON LUX taggers.

ADAPT TO YOUR NEEDS

The padded dividers inside the bag are fastened with Velcro that can be adjusted to suit your needs.

RELIABLE MATERIALS

The bag is made of CORDURA MAXI - a material that is resistant to wear dirt and moisture.

\$ 199

\$ 10 /
15

Protective rubber bumper

The bumper for the FALCON F1 and F2 taggers is made of soft rubber, so it protects players from possible injuries in case of accidental collisions on the playground. The bumpers are available in black, blue and red, which can also be used for easy team identification.

\$ 90

Collimator sight

The Collimator Sight is installed on the standard Picatinny rail in FALCON F1 and F2, and helps players shoot more accurately, and adds more realism to the game. We recommend using this accessory as an additional paid option to increase the average bill per game.

MOBILE INFLATABLE COVERS FOR OUTDOOR GAMES

Inflatable shelters are made of PVC material. They are inflated and used as covers when setting up outdoor playing fields.
