

# WiMER 7

## Wireless Measurement Read Series 7

WiMER7 is a wireless transmitter for Series 5000 and 5400 temperature probes. Using Bluetooth Low Energy technology, along with our free software for iOS, Android, and PC, MultiGage, users can read and record temperature measurements remotely.

With WiMER7 and MultiGage, you can read measurements from multiple measurement devices at once, simultaneously, in real time.

WiMER7 can increase efficiency and safety by allowing users to read temperatures without looking at the temperature probe directly.

WiMER7 can work with any sensor/gage with USB output.

Contact us to make WiMER work for your measurement device.

### Features

- USB output compatibility
- Bluetooth Low Energy transmitter
- Multiple platform support (iOS, Android, and PC)

WiMER7	Specification
Measurement Range	-20°C to +130°C
Resolution	0.01°C
Accuracy	±0.05°C
Wireless Data Rate	2 Hz
Transmission Range	20 m (indoors)/30 m (outdoors)
Dimensions	4.09 x 2.20 x 0.91 in
Working Temperature	0 - 50 °C
Rechargeable Battery	3200 mAh
Battery Life	30 hrs
Charging	5 VDC USB

### More Features with our FREE Apps/Software\*

- Multiple devices simultaneous reading
- Data plot on iPhone/iPad/Android
- Continuous or single data point recording
- Max, Min, TIR measurement
- Remote zeroing from the app
- GO/NG judgment with green/red color indication
- Real-time cloud data streaming worldwide
- Custom formula calculator
- Large analog probe meter with adjustable range
- Data saving in local database
- Data export in CSV via email and cloud drives
- Keyboard entry to Excel or SPC software on PC
- Apple Watch support

Availability of features varies between apps/platforms.
