Kick-Start Your Career in Clean Energy

Are you looking for a good-paying, meaningful career with growth potential?

Come learn about our free training for jobs with average salaries of \$53k+ per year.

Train to Become a Heat Pump Technician

Goodwill® now offers hands-on training for air source heat pumps. This innovative heating and cooling equipment is three to five times more efficient than traditional systems and is leading the way in the transition to clean energy. Knowledgeable technicians are in high demand.

If selected for this training course, you will participate in an intensive five-week program, which includes a commitment of 40 hours per week. At the conclusion, you will earn industry-recognized certifications and receive job placement support.

You will also benefit from a host of wraparound support services to meet your unique needs. From access to childcare, transportation, mentoring and other services, we can connect you with what you need before, during and after your training.

This opportunity provides paid, hands-on training that will allow you to begin your new career.

Here's what you'll learn:

- Construction and safety basics
- Heating, cooling and refrigeration basics
- Building science and air sealing
- HVAC diagnostic and service equipment interpretation
- HVAC Installation and maintenance
- Troubleshooting, mechanical operation and electrical components

You'll also earn industry certifications in Workplace Safety (OSHA-10, CPR/First Aid/AED), Refrigerant Handling (EPA 608) and Heat Pump Installation (from Climate & Community Lab).
