

THROMBOSIS in EUDRA

By Craig Paardekooper

DATA SOURCE : Eudra Safety Signal Dataset (ESSD) : <https://howbad.info/essd.zip>

ESSD Online : <https://knollfrank.github.io/HowBadIsMyBatch/SymptomsCausedByDrugs/>

SAFETY SIGNALS GENERATED

• VAXZEVRIA	17
• COMIRNATY	7
• TOZINAMERAN	3
• MODERNA	1
• SPIKEVAX	0
• ELASOMERAN	0

Covid Vaccines :

VAXZEVRIA – commonly referred to as “**the clot shot**”, had the highest number of safety signals for thrombosis.

It was withdrawn in Dec 2021 in the UK, and also in several other countries following safety issues.

COMIRNATY also had several safety signals for thrombosis, but was not withdrawn.

ORGANS EFFECTED

• VAXZEVRIA	cerebral, sinus, mesenteric thrombi
• COMIRNATY	ophthalmic, limb thrombi
• TOZINAMERAN	pulmonary, cerebral thrombi

KEY

- LCL = lower confidence limit of PRR
- PRR = proportional reporting ratio
- LCL > 2 = Safety Signal
