

## V-SAFE Reports with Symptom Keyword = HERPES

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN ( <https://icandecide.org/v-safe-data/> ) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

### Data

Data Source : V-SAFE (CDC) : download (June 2024) @ <https://icandecide.org/v-safe-data/>

Total number of V-Safe reports with symptom keyword HERPES = 855

Percentage of V-Safe reports with symptom keyword HERPES = 0.04698 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 662

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 0.06058 %

### Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

I saw the doctor 3 days after getting vaccine.

A large red swollen area with clear vesicles erupted on my back 2 days after receiving vaccine. Cultures of the fluid were positive for herpes 1 virus. Rash looked a lot like shingles. Taking antiviral medication improved it a lot. Hopefully that will not hinder vaccine. I have a picture in my phone if wanted. The scab on the blistered area has now peeled off. There is still some surrounding redness today.

I have herpes II and occasionally have cold sores. I think for the first 48 hours but last night around midnight my neck and face have broken out (swelling, redness, dry skin, some weeping from the sores. Always in the past it has been just one localized area, perhaps 1-2 times per year, with stress as a trigger. But this is in several spots, my ears, and under my jawline, and a fairly strong reaction. No fever, no pain other than the itchiness. I dont know that this is related to the vaccine, it I wanted to mention it because of the timing.

herpes : Case 562: ID 26C-19871-73083

This is the 2nd time I e got herpes zoster after I got the Covid vaccine. The first one, I got a huge spot in my chin, and the 2nd one a week later (same as first one) I got another outbreak. It causes great discomfort but better than getting Covid. I want to know if this is normal. It is for me and maybe should be noted. Is it because my immune system is trying to fight it off? Is it because my immune system is down because of the vaccine?

I have 5 spots 4weeks durations. Also face dry and flaky (1st time in my life), and sore throat. Throat was also sore with 1st shot. I feel like Ive been run over by a truck. I have fibromyalgia and it feels like an acute attack. But Im ok. It is worth it for the vaccine.

Doctor office. I was in danger of losing sight in the eye if I did not get medication.

Two days after the shot my left eye became dry and have been putting in eye drops three times a day. The first shot... after a day .. needed to be seen by a dr. I had a herpes ulcer on my iris. It took a few weeks to heal. Now have a scar in its place.

herpes : Case 788: ID UFR-69593-84382

My herpes virus I have had since I was 2 years old started to appear yesterday approximately 24 hours after the vaccine was received. Spoke with my doctor and put on my medication for it today. Doctor believes the vaccine left my immune system reacting to the vaccine and left the virus not suppressed.
