

## V-SAFE Reports with Symptom Keyword = MENSTRU

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN ( <https://icandecide.org/v-safe-data/> ) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

### Data

Data Source : V-SAFE (CDC) : download (June 2024) @ <https://icandecide.org/v-safe-data/>

Total number of V-Safe reports with symptom keyword MENSTRU = 2235

Percentage of V-Safe reports with symptom keyword MENSTRU = 0.1228 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 1839

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 0.1683 %

### Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

## Sample of 2235 Reports with Symptom Keyword = MENSTRU

menstru : Case 1: ID SYL-26545-24389

menstru : Case 196: ID NU7-26831-38661

Menstruation started 8 days early, unusual

menstru : Case 197: ID 3KL-19933-41122

I started my menstrual cycle 3 weeks too soon

menstru : Case 198: ID UHW-41272-71653

Menstrual cycle stopped. Just about 36 hours of bleeding started about 36 hours after vaccine.

menstru : Case 199: ID WKQ-13349-24920

I think the headache is likely related to my menstrual period that started today.

menstru : Case 200: ID W6K-99906-49783

did initially have menstrual spotting on day 1 with vaccine, though on OCPs - birth control

menstru : Case 201: ID ANZ-23587-70771

Started menstrual cycle.. maybe coincidence?

menstru : Case 202: ID LFW-13265-17004

Intermittent abdominal cramping, similar to menstrual cramps but I'm not on my cycle. 1-2 times a day since vaccination

menstru : Case 203: ID ZDY-28265-91865

My menstrual cycle started 5 days early within 24 hours of receiving the vaccine, but unsure if this is related.

menstru : Case 204: ID L5C-19896-39205

Probably unrelated but I was at the tail end of my menstrual cycle and flow had pretty much stopped and then last night about 8 hours after the shot, I started experiencing heavy menstrual bleeding with clots that lasted about 4 hours.

menstru : Case 205: ID RHA-40999-75981

coincided w/ my menstrual period

menstru : Case 206: ID 9NW-15137-72401

I started my menstrual cycle today which is a week and a half early and it is nothing at all like my normal periods.

menstru : Case 207: ID 9N4-17345-07197

Headache may be related to menstrual cycle

menstru : Case 208: ID FWS-32965-12555

menstru : Case 232: ID Q23-28487-15883

Menstrual spotting

menstru : Case 233: ID RV4-19235-92273

I am menstruating, and it started a week earlier than it should. This period involves a lot more heavier bleeding add well as producing more (and larger clots) which I am attributing to the vaccine as it is the only new "medication" I have received.

menstru : Case 234: ID 4HS-27491-47292

Began menstruating after 19 months of no menstruation postpartum/breastfeeding. Could be totally unrelated!

menstru : Case 235: ID RHG-19048-35140

menstru : Case 366: ID WJY-15348-84449

Muscle/deltoid is very mildly sore today and also a bit swollen. It was like this the first couple of days after I got the injection. It may be because I started to do upper body exercises again and may have triggered that muscle to flare a bit. Very mild but just wanted it noted. Also, headache may possibly be hormone migraine and not related to the vaccine. I get them with my menstrual cycle either before or during and it is right before. Took migraine medication and headache is gone..

Menstrual cramps

menstru : Case 423: ID 64V-30407-73182

Headache may be due to starting menstruation. Cycle began early which is rare. Was too busy at work to do this update on day 3, 1/7/21- that day I felt "out of it" and quite

spacey. A bit lethargic. My neck hurt which possibly had to do with sleeping awkwardly from the arm pain from vaccine but maybe vaccine-related. Felt foggy all day but arm pain improved a bit.

I am in severe pain right now. Got a sharp pain in my back about 2 hours ago when I bent over to put clothes in the washer. I do not know if this is related to the moderna vaccine. I took 2 extra strength tylenol at about 4 50 pm. It hurts to walk. I can hardly stand up. The

pain feels like menstrual cramps , but I have been in menopause for about 3 years. I have had other health issues that this could be related to. Just had emergency surgery for scar tissue and bough obstruction in August 2020; but was cleared as completely healed about a week and a half ago. Yhe pain is in my center lower back and extremely debilitating.

Again -not able to not work. Have to take migraine meds and keep going. My menstruated cycle started one week early. Ive been regular for 20+ years

menstru : Case 1004: ID 9RX-13515-31992

More painful than usual menstrual cramps

menstru : Case 1005: ID RQW-24538-34278

The first 2 days after receiving the Moderna vaccine my arm was sore at the injection site. I had about a 2cm in diameter red spot at the injection site for 1 week. I started my menstrual period thr weekend of 1/15 so it's unclear if feeling tired was due to the vaccine or my menstrual period. Ibfelt better after a nap.

menstru : Case 1006: ID Y2Y-14257-68142

Early menstruation. It also occurred after the first vaccine and I thought it was coincidental at that time.

menstru : Case 1097: ID A7G-17676-71026

7 days straight menstruation since receiving vaccine

menstru : Case 1098: ID 89B-97890-97005

Might be unrelated, but I did notice a change in my menstrual cycle. My cycle ended three days before getting the vaccine, but two days after getting the vaccine, I had vaginal bleeding again that is still continuing. Again, it could be unrelated. I am currently using nexplanon for birth control, I dont know if that could have an effect either, but it is atypical for me to have vaginal bleeding immediately after completing a full (6 day) menstrual cycle.

Am 8 days late on my menstrual period. There's no chance of pregnancy.

menstru : Case 1260: ID G33-26221-48000

The fatigue was not today; the day after my vaccine, I was incredibly fatigued and thought it was due to something else (bad sleep, menstrual cramps) so I didn't report it. But in hindsight it was very pronounced fatigue and may have been vaccine related. The next day I felt much better.

menstru : Case 1261: ID 4CU-33460-04452

Cramping. I haven't had menstrual cramps in months since my IUD insertion however since my Pfizer vaccination I have been very easily, and painfully cramping in my uterus, legs, arms, and more.

Currently menstruating

menstru : Case 1582: ID FKG-19646-19874  
My period is 3 days late and pregnancy tests are negative. Is it possible that the vaccine has delayed my menstrual cycle?

menstru : Case 1583: ID EAX-96566-87918  
Made menstrual symptoms much worse than normal. Same with initial dose of vaccine.

menstru : Case 1584: ID UK2-20457-25465  
Heavy menstrual bleeding 2 days after injection (period 2 weeks early also)

menstru : Case 1585: ID ZNU-12576-30055  
I had REALLY HEAVY menstrual bleeding for 48 hours post 2nd vaccine. I also had an extra cycle post

menstru : Case 1586: ID E36-63627-73597  
I am also menstruating currently (for context).

menstru : Case 1587: ID TQW-12259-49358  
I got my 2nd vaccine 2/4/21 and got my menstrual cycle 2/4 I am regular 2/10. I am mentioning it because some of my colleagues have mentioned the same thing happened to them. But over all feeling great.

menstru : Case 1588: ID YS3-27483-14891  
Menstrual cycle early onset by 4 days; slightly swollen and mildly painful axillary lymph nodes in injected arm

menstru : Case 1589: ID XA7-20113-80722

Not sure if this is related, but I've been peri-menopausal for the past 12 months - 10 months of no period and 2 months of spotting for a few days, but the day after I got my shot (2/21) I woke up with massive body aches all over, including horrible cramps, and I discovered I had a full-blown period. I still have it today with heavy flow and menstrual cramps. My period hasn't been like this for over a year. Technically I haven't had a "real" period for 12 months, until now, the day after my 2nd dose. My period was not expected because it's been over a month since the most recent bout of spotting.

menstru : Case 2147: ID PTW-26212-35815

I am planning on trying to conceive in the next few months, so I have been tracking my menstrual cycle. I messaged my maternal fetal medicine physician to see what his thoughts were.

Early menstrual period. It started 24 hours after I was vaccinated. I have been very regular for the last 2 years and this was the first time I got my period two weeks early. I additionally got chills and fever overnight after receiving my first dose that day. I didnt immediately register on vsafe, but I wanted to report my symptoms from then.
