

V-SAFE Reports with Symptom Keyword = NEUROPATHY

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN (<https://icandecide.org/v-safe-data/>) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

Data

Total number of V-Safe reports with symptom keyword NEUROPATHY = 945

Percentage of V-Safe reports with symptom keyword NEUROPATHY = 0.05192 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 645

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 0.05903 %

Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

Peripheral neuropathy, pain in calf

neuropathy : Case 27: ID HPS-29915-78317

Only thing I noticed was itchy throat and pain in my toes. I do have some neuropathy related to chemo. Could be unrelated but we're better now.

neuropathy : Case 28: ID NMJ-65533-67863

I have moderate cervical spinal stenosis and seem to have mildly impaired sensation at tips of digits. I guess I question whether or not mild swelling could have contributed to mild compression neuropathy. Also have what has previously been described as end stage fibromyalgia. From an energy standpoint I am doing well however.

neuropathy : Case 29: ID KDR-22243-72993

Peripheral neuropathy-I would really like to talk to someone from cdc about this

neuropathy : Case 30: ID BC8-34462-13805

Mild-I have a preexisting peripheral neuropathy that has been slightly worse since the vaccine

neuropathy : Case 34: ID 6HT-31216-90570

Neuropathy

neuropathy : Case 35: ID ADT-63736-17661

Burning feeling in eyes, eye with otic neuritis keeps blurring, eye neuropathy is worse than normal

neuropathy : Case 36: ID A47-63306-83371

I have a chronic pelvic neuropathy that usually mild but became very painful from about four hours to eight hours after the injection then abruptly went back to baseline

neuropathy : Case 37: ID D2C-39366-85378

I thought you should know that I have a history of chronic inflammatory demyelinating polyneuropathy , an autoimmune disease. It maybe helpful to know that I have not had any problems with the vaccine so far

neuropathy : Case 38: ID VGD-10087-38396

Left shoulder hurts on same arm I received injection-probably not related. Also, I didn't sleep well last night (night sweat) and I think that contributed to my fatigue. I am diabetic, have COPD, neuropathy, and I'm in menopause.

neuropathy : Case 39: ID BC8-34462-13805

Neuropathy

neuropathy : Case 40: ID KDR-22243-72993

Peripheral neuropathy

neuropathy : Case 41: ID 233-22721-29228

Oddly my hands are peeling, when nothing has changed in my hand washing, soap, hand sanitizer, or winter lotion routine. Noticed one finger the first days after vaccination but today it turned to sloughing my whole hands. Haven't had a space to report it here but the first two nights my pre existing neuropathy in hands and feet was so flared and intense I couldn't sleep. Started in my R arm/ hand, where it's normally very mild in outside fingers only, and moved throughout and to other limbs. Inflammatory process made sense to me given the vaccine doing its job, so other than being tired, I didn't worry about it. My hands also felt tight and subjectively swollen through the night, but was gone by morning and never objectively visible. I'm fine, but it's definitely odd.

neuropathy : Case 42: ID HHM-42324-20010

I have neuropathy from chemo and radiation.

neuropathy : Case 43: ID RDU-25056-13575

I am having a neuropathy in my hand on the arm I received the vaccine. I noticed on post vaccine day 1 approximately 28 hours after dose. Paresthesia in pinkie and ring finger following ulnar nerve. Has been constant for about 20 hours.

neuropathy : Case 44: ID 6HT-31216-90570

Neuropathy - seeing rhuemotologist tomorrow

I believe the vaccine kicks the immune response which triggers said response in the bodys weakest area. The day after the shot I felt achy in my lower back by my kidneys. I have had gastritis in the past and felt similar symptoms of that over the fast 4 days. An irritated stomach. I also have had neuropathy from shingles vaccine and felt that neuropathy in my right leg and foot yesterday. Painful. Gone today. I have a weakness in that area. Basically Im saying wherever your body is weakest thats where the vaccine reaction will manifest. Thats my opinion because Im familiar with the locations of discomfort I have felt since the first shot.

I have had terrible nerve pain in my feet for the entire week since my vaccination. This also occurred after my first vaccination. I have a medical diagnosis of Small Fiber Neuropathy. The vaccination exacerbated my nerve pain in my feet and hand.

neuropathy : Case 390: ID HV6-32881-93351

odd neuropathy. The morning after injection I was shocked awake with a sensation on my left thigh (opposite side from shot). An area about the size of my palm on the top of my thigh felt wet and the skin was painful, like acid was on it. It went away after a few minutes. A couple of hours later it recurred, but was less severe and went away quickly. This morning the same thing occurred in a far less painful way along the side of my thigh. It persisted a bit longer and in touching my thigh, the skin on new place and yesterdays felt numb. The feeling subsided over 30 min. At no time was the area hot to the touch or discolored, and moving or walking was not impaired.

Well - really not sure if related whatsoever - but (and I hadnt reported it) but 3 days ago on Tuesday - I had a bad night due to a lot of pain going from my left torso going down thru my left foot. Very sleepless night. Next day started Advil regiment thru today thus far which helped to lessen all symptoms except for minor pain still in the foot. Am assuming possible neuropathy that I have never had before.

Just a thought; given the side effects I had from Moderna could it be that the muscle weakness and neuropathy like symptoms effect the diaphragm. Muscle weakness decreasing coughing and deep breathing and air exchange leading to pneumonia and respiratory failure. If your nerves that are responsible for taste and smell can be effected then couldnt the nerve that controls your breathing/diaphragm? Other side effects like Bells Palsy are also neurological. It is well known that neurological symptoms are much harder to treat and are usually chronic.

As soon as I had the injection, I had a really bad taste in my mouth, this is the third day and it's getting better. Yesterday on my second day after the vaccination I began to have pins/needles feelings all over body. Hands tingled. During that time the bad taste in my mouth got worse. I felt itching in my arms/face/ and little in legs. The Neuropathy that I have, also seems to have gotten worse. I had to walk around for about 45 minutes because symptoms were so intense. Today, I'm better but still feel the pins/needles in upper body.
