

V-SAFE Reports with Symptom Keyword = OVAR

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN (<https://icandecide.org/v-safe-data/>) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

Total number of V-Safe reports with symptom keyword OVAR = 175

Percentage of V-Safe reports with symptom keyword OVAR = 0.00962 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 150

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 0.01373 %

Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

I do have lupus +ovarian cancet

ovar : Case 80: ID LN3-20905-18342

The day after the shot I had flu like symptoms without a fever. Achy, nauseous, weak, headache. I have also been having abdomen pain near my left ovary that Ive been thinking was a gynecological issue, but could this be related to COVID? Ive had it since the first shot.

ovar : Case 81: ID CKJ-15691-49039

In previous reports I told you that I happened to get my Keytruda infusion the day before my first COVID vaccine. You ought to know that I have lived for 16 y with stage IV ovarian cancer. I'm afraid I'm probably very different from the other people in the data set - I've had umpteen different chemotherapeutic drugs, chronic anemia, lymph node biopsies, surgeries and radiations, and other various side effects (e.g. cardiotoxicity) of the metastasized ovarian cancer. I am, however, still here, which I am THRILLED about!!!! And I still teach.
