

V-SAFE Reports with Symptom Keyword = SLEEP

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN (<https://icandecide.org/v-safe-data/>) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

Data

Total number of V-Safe reports with symptom keyword SLEEP = 22994

Percentage of V-Safe reports with symptom keyword SLEEP = 1.26341 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 21082

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 1.92932 %

Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

sleep : Case 109: ID J3A-32056-02833

Cold sensation of right hand periodically during the night waking me from my sleep. Mild tenderness at the injection site.

sleep : Case 110: ID HJD-61580-27203

Called and talked to the doctor who injected the Botox yesterday.

Last night I had numbness of my right cheek, from above my right eyebrow, around my eye socket, along my cheekbone and my cheek. It went away after 2 hours and was kind of a hot or cold or tingly sensation, which moved lower along my jawline, and then decreased. I went to sleep and woke up and it was gone and have not had it or anything else all day. I also got Botox injection yesterday evening between my eyebrows for the first time. That doctor said those symptoms were not related to the Botox. I have my doubts about that.

sleep : Case 194: ID KJ3-19275-43545

Trouble falling asleep last night

sleep : Case 195: ID PDD-25321-75065

For approximately 4 hours during the night after I got vaccinated I experienced leg and lower back aches. Then dizziness and blurred vision and was diaphoretic. Leg and back ache were resolved with ibuprofen. Was able to fall asleep and woke up feeling normal again.

sleep : Case 196: ID RQV-63703-06249

May have sleeping issues not related to vaccinate

sleep : Case 197: ID V7M-33063-82206

I have had absolutely no changes except the next day i was pretty sleepy, i slept, then after that, i was fine...I feel great!

sleep : Case 198: ID WMC-80692-77260

Woke up at midnight. Couldn't get back to sleep. Never happens

sleep : Case 199: ID 6TF-30304-28675

Did not sleep well pain woke me up

sleep : Case 200: ID ZCY-10044-98138

Awoke at 4:30 a.m. with numbness and tingling of my entire right arm that lasted for about 40 minutes then faded. I don't think I was sleeping in an odd position, either. Very bizarre. The knee aches were persistent all day. And I feel more tired than usual.

sleep : Case 201: ID ZHK-81200-01655

Sweating in my sleep

sleep : Case 202: ID CTZ-32257-80437

Much more tired than usual. Needing more sleep and less motivated to exercise

sleep : Case 203: ID H2U-17859-23185

Sleepiness. I slept 10 hours plus 2 naps

sleep : Case 204: ID KT6-31331-89274

sleep : Case 207: ID QRT-28396-90700

Sore arm, mild but could not sleep on the left arm where shot was administered.

sleep : Case 208: ID 2KN-58711-45592

Yes. Yesterday I felt exhausted. Friday evening I took one Benadryl to stop phlegm and took another one last night so I could sleep without coughing up phlegm. That worked! No Benadryl today, so far.

sleep : Case 209: ID QW5-38798-07532

Didn't sleep well during the night

sleep : Case 210: ID 22W-10604-50811

Sleeping more than usual

sleep : Case 211: ID 65V-30436-12589

Tightness and a bruising pain at base of throat last night that woke me from sleep, no SOB, no chest pain, no difficulty swallowing, no n/v. 7/10 without radiation, no prior episodes. Resolved after Tylenol.

sleep : Case 212: ID G7N-23497-15211

Tremors at night; injection site arm kept trembling when i was trying to sleep and couldnt sleep much

sleep : Case 213: ID 9KJ-28168-30650

Restless legs while sleeping

sleep : Case 215: ID ALD-10605-34410

Deeper sleep than usual

sleep : Case 216: ID 4U9-22301-38143

I couldn't fall asleep and stay asleep! I only got about 3 hours of sleep

sleep : Case 217: ID R2X-71883-36763

I do feel fatigued but I feel it is more from working and limited sleep than from the injection

sleep : Case 218: ID AME-15884-74655

My arms and legs kept going to "sleep" while I slept both last night and the night before. Probably nothing but doesn't normally happen.

sleep : Case 219: ID 5B9-14216-94535

Probably fever and diaphoretic while sleeping overnight

sleep : Case 220: ID YTQ-29732-02316

Sleep disturbance

sleep : Case 221: ID 964-12705-02741

I felt a headache for a split second this morning and it went away immediately. I felt tired later last night (after my initial check-in) during work. I also did not sleep that much the night before so it could be just because of lack of sleep the night before. I went to the bathroom twice last night (defecate) and I normally don't go that often. I had a change in diet the day prior so I believe it was due to the diet change (mexican food).

sleep : Case 222: ID K6X-79568-87869

sleep : Case 235: ID F7J-46633-00841

My headache was actually last night and it was pretty bad! Tylenol wouldn't work. Only sleep made it go away

sleep : Case 236: ID DKP-21823-09782

Difficulty sleeping

sleep : Case 237: ID S6U-32230-06507

I'm breastfeeding and I think you should add that as a question on this app. Baby is doing great by the way. Seemed a little more sleepy yesterday but today is perfect. No changes noted to my milk supply.

sleep : Case 238: ID KB7-77035-52275

I had nausea, headache , sleepiness , 6 hrs after vaccination. On the second day when I woke up, it was so itchy and sore by the site

sleep : Case 239: ID BC2-19248-46778

My upper arm where I got the injection feels tingly or "asleep"

sleep : Case 240: ID VWP-19657-38280

I was unable to report my symptoms on 12/18. I woke with vertigo, nausea and vomiting, and fatigue. Sleep for 6 hours during the day. Could not find a way on your website to go back and document.

sleep : Case 241: ID J3A-67046-93702

sleep : Case 264: ID ZAD-24759-61011

Last night i was having trouble sleeping from total body muscle aches. Took 3 ibuprofen and when woke up fine. Had my first headache around noon today...still present.

sleep : Case 265: ID WMC-80692-77260

Felt my heart pounding in chest while trying to sleep last night. Felt very stimulated in general

sleep : Case 266: ID W32-14974-24440

Note-I worked last night and am sleep deprived, which probably explains my fatigue!

sleep : Case 267: ID ATE-17495-97073

Feels like it's lack of sleep though, not vaccine related

sleep : Case 268: ID RH3-16955-78200

Tingly leg- felt asleep. opposite leg of arm injection

sleep : Case 277: ID 3DQ-27214-97852
I did take Xyzal allergy medicine last night so I am drowsy/sleepy today.

sleep : Case 278: ID 8EN-32675-14710
* I actually rate my symptoms as very low mild. I don't feel abnormal because I only got a few hours of sleep.

sleep : Case 279: ID KDD-33568-70756
Sleepless night but may not be associated to the vaccine.

sleep : Case 280: ID FAH-10712-43135

Sleepiness

sleep : Case 282: ID L4C-78163-63561
But I think I just didn't sleep well. I'm not sure it's related to the vaccine

sleep : Case 283: ID 67C-28018-58071

No, but I think my mild fatigue is unrelated to the vaccine. I've had several short nights of sleep in a row (also unrelated to the virus).

sleep : Case 284: ID DHF-87466-14387

Sleepiness

sleep : Case 293: ID JF9-82336-68574

The soreness in muscle of the injection site cannot be entirely contributed to the vaccine. I work night shift and got the vaccine after work then went home and went to sleep. I tend to sleep in the recovery position. When I awoke I was lying in the recovery position on the side of the injection site.

sleep : Case 294: ID AEY-14807-48175

I had my shot a few days ago and am just now checking in. The day after I was tired but did t sleep well so I don't know if the vaccine has anything to do with that

sleep : Case 309: ID YMC-16625-19162

Fingers feeling like the are "asleep" on rt hand, which is side the vaccine was received on.

sleep : Case 310: ID EF8-14421-20833

While sleeping last night, my deltoid hurt severely, to the point I was just letting my arm flop as I turned over (I toss and turn quite a bit at night) because it hurt so much to actually lift it. It has gotten much better as the day has progressed and I was able to complete weight lifting exercises without really noticing the soreness. Would rate it currently rate it 1/10 soreness at 27 hrs post shot.

sleep : Case 832: ID 6XS-48682-09035

Overnight woke up from sleep coughing (suspect reflux) but then developed tingling in ipsilateral arm at prior injection site radiating into left breast. This event then led to bilateral arm/hand numbness which self resolved after ten minutes. No swelling or pain to injection site, mainly these neuropathic symptoms with same distribution but less intensity compared to day prior (when numbness occurred during exercise)

sleep : Case 833: ID 9HY-31512-26741

Continued shoulder pain from injection site making it difficult to use my arm and second night of poor sleep due to position of arm.

back. Abdominal pain, facial flushing and diaphoresis off and on. Afebrile. Call in to PCP to see about a repeat potassium check. Everyday I have been unable to work.

sleep : Case 840: ID 8RX-28883-35099

Felt mild tingling in the vaccinated arm approximately five minutes after injection. Kind of felt like when your arm falls asleep and it's waking up. It was mild though

sleep : Case 841: ID Z8C-31306-77151

did not sleep well, but believe it is due to a back condition which was aggravated by the chair used while registering for the vaccine; I do not attribute my fatigue to the vaccine.

sleep : Case 842: ID GKC-16239-78057

I'm surprised that I still have arm pain 2.5 days later; I've listed as mild only bc it doesn't interfere with ability to work, but it wakes me from sleep and tonight it is throbbing, which it hasn't been throbbing just the aching pain itself

Oddly my hands are peeling, when nothing has changed in my hand washing, soap, hand sanitizer, or winter lotion routine. Noticed one finger the first days after vaccination but today it turned to sloughing my whole hands. Haven't had a space to report it here but the first two nights my pre existing neuropathy in hands and feet was so flared and intense I couldn't sleep. Started in my R arm/ hand, where it's normally very mild in outside fingers only, and moved throughout and to other limbs. Inflammatory process made sense to me given the vaccine doing its job, so other than being tired, I didn't worry about it. My hands also felt tight and subjectively swollen through the night, but was gone by morning and never objectively visible. I'm fine, but it's definitely odd.

sleep : Case 1072: ID 3C9-93563-22485
The pain at injection site was x 10 as painful as a flu shot in the 24 hours following. Negatively affected my sleep night-of. I assume the shot has to be given up really high on the arm? Mine was several inches above flu shot locations over the years. I hope that was necessary as it feels it may be contributing to the pain.

sleep : Case 1073: ID GTF-49395-35216
Mild nausea like acid reflux right afterward BUT i was already hungry. Slight chest tightness around upper sternum unexplained. I took a nap 2 hours after getting the shot, but I honestly blame that on poor sleep the night before. The tiredness does not feel unusual. Soreness of deltoid is a 0.5 on a scale of 10.

sleep : Case 1124: ID G3D-15907-18349

So late last night I started feeling very crummy as I developed aches and low back pain on top of a headache. I was compliant with my bp medications so I know the headache was not from not taking my medications. I was only able to get some sleep after 400mg of ibuprofen and then I started to feel better especially in terms of the aches. To be clear I have experienced similar symptoms minus the headaches when taking previous flu vaccinations as well.

sleep : Case 1125: ID G3E-32611-82939

sleep : Case 1137: ID AHS-33854-90724

I feel a little tired but I didn't sleep great last night so that's probably the more likely cause.

sleep : Case 1138: ID 3LZ-23144-55698

I felt like my allergies were triggered. My lips usually feels tingly when something triggers my allergies, but it did not last long. As for being fatigued or tired, I did get very sleepy, but not sure it was due to the vaccine. I ate after the vaccine and then I had a long drive home in heavy traffic. When I arrived home, I was no longer tired. Just thought I would mentioned it since it did happen after receiving vaccine.

sleep : Case 1171: ID GPF-22158-13653

The day of first dose I experienced mild dysarthria lasting a few seconds. It happened twice while I spoke on the phone. I was able to speak in full sentences but I found myself

speaking a word which I had to repeat three times. This episode happened again one time on 12/27 while at work. Also, on evening of 12/21, I felt a sense of doom and was afraid to fall asleep because I might not wake up. Perhaps it was stress but I thought I'd mention it.

Difficulty sleeping

sleep : Case 1219: ID BRD-19815-74636

I had severe pain at the site of injection throughout the night, bad enough that it woke me up and kept me up from 1:30am to 5am when I went into the vaccination clinic to volunteer. During that time, it was difficult for me to do much of anything with my right arm including lift my phone due to the pain and weakness that I felt all in my right arm, it improved somewhat with 400mg ibuprofen. At work, I was not able to do much as I found it difficult to lift much, my range of motion was affected as well, anything strenuous would send sharp pain shooting up and down my arm, so I ended up leaving early, went home, took more ibuprofen and went to sleep. I recently woke up after approx 4 hours, my arm is still sore (not as bad as it was last night/early this morning), but enough that I feel I need another dose of ibuprofen.

I got the pfizer covid vaccine. I had been dealing with some of the adverse reactions to the vaccine. They are the typical reaction, but reaction nonetheless. It started 24 hours after I received the vaccine. I started to get body aches with some dizziness while working Monday. I expressed my concern with a coworker that I was worried it was from the

vaccine. By Monday night I had severe aches and pains with chills so bad my whole bed was shaking and my husband couldn't sleep in it with me. Tuesday morning I awoke with a fever of 101.4° , taking 800 mg Motrin I was only able to get it down to 101.0° . The body aches continued all day with fatigue. Yesterday, I started out having the body aches, but they actually went away in the afternoon. About 48 hours of discomfort. I know these are typical reactions, but they sucked nonetheless. All of the residents in the facility I work at and 50 some odd employees received the vaccine, and I appear to be the only one that has issues. My luck!! Oh and I had COVID the end of October.

I had more symptoms yesterday after my first check in. Today was less-so but yesterday, I had overly high energy for a couple of hours then later had a couple of hours when I was super sleepy and felt lightheaded and dizzy - some vertigo, almost feverish (I should have said yes to the feverish question prior to this), mild sore throat, muscle aches, might headache lije a band of pressure around my head around the forehead area, a bit buzzy. It felt to me like I was about to get sick with a cold or flu but then didn't. Slept fine and intentionally slept in. Woke with a headache and had mild nausea and low energy all day with one instance of loose stools but not full diarrhea. Feeling better throughout the day, just not fully back to normal yet. Interesting to have experienced my body's immune system clearly revving up to respond to this!

I sent a note to my doctor, explaining my symptoms and asking whether it is wise for me to get the second shot. I am concerned about any potential for lasting neurological damage.

Had a sharp rise in blood pressure five hours after the injection. At about the same time, widespread paresthesia started in my abdomen, legs and arms. This was very concerning, as I hadn't heard of blood pressure spikes or paresthesia. The tingling escalated to pins and needles that made it impossible to sleep last night.

If I really palpated the night injection site, there has probably been some minor tenderness, that is already better. Also did not sleep well the first night post vaccine, but I feel that as due to the excitement of getting the vaccine. And my chronic bursitis in my rt. hip was a little worse, which was probably because I was noticing it more because I was not sleeping as well. It only bothers me at night.

I had my hair colored and as I was finishing my head started to burn terribly, I felt nauseated, and a bit of a sore throat. My hair dresser washed out the dye and I got a large canker sore on my bottom lip. I have been coloring my hair for 6 years and never had a problem before. The canker sore got really big and large in the night. My head feels like it has a chemical burn and I was unable to pull it into a ponytail because of the pain. I did see online when I could not sleep that people with COVID are having a hypersensitivity to hair dye. This was concerning and scary to me. If I would have known I would have waited or done the dye before I got my COVID vaccine. I think people should be told about it. I had a hard time sleeping because of my head being sore and the large canker in my mouth.

I felt sleepy the first night (12/22/20) and the second day (12/23/20), but after that I felt fine. The first day my arm was sore at the injection site, and then it was slightly more painful that night and the next day. On the third day (12/24/20) these symptoms were gone. I noticed on 12/31/20 that my arm at the injection site was itching. On 1/1/21 I noticed a circular rash around the area where I received the injection. It is also slightly raised. It is the same today 1/2/21

Woke up early a.m. with chills and aches and had trouble going to sleep. Feel fine today.

sleep : Case 1911: ID 424-30072-44929

Yesterday, after filing my report with no symptoms, I developed a slight fever (99.2) and a headache and felt crummy. I isolated from my partner. By this morning I felt fairly normal, without any fever and only a trace of the headache and lethargy (both of which are not uncommon for me). I was able to get an early antigen test and with the rapid negative result, proceeded to a normal day at work. However, I was unable to amend my report yesterday, which was frustrating. And of course I still wonder whether the mild symptoms I had yesterday were a late reaction to the vaccine (yesterday was day 5) or just a result of a poor nights sleep and pushing myself to a long walk in the cold... which is entirely possible in my experience.

the stiffness and pain in my neck continues to cause discomfort and is beginning to interfere with my sleep

sleep : Case 2093: ID THH-15677-97947

A little sore throat from 2pm to 4:30pm, I took ibuprofen around 3pm. This may have been because I didn't sleep well last night or because I spent all day talking at work, but it was pretty sore.

sleep : Case 2094: ID NLG-30224-56654

Unable to sleep

sleep : Case 2095: ID UQ4-82519-09317

My fever was in the night. I felt pretty yucky for a couple of hours until my fever went down. I woke up feeling much better. Just mild chills and a slight headache. I'm tired today but it's probably from not sleeping well due to having a fever in the night.

sleep : Case 2096: ID P93-17904-10195

My arm (where the injection was) feels weak and has a feeling of a "dead arm" like when your arm falls asleep and feels weak for a bit of time. I also have developed a weird bump near my neck that seems like it could be from a knot from tightness in my L arm.

sleep : Case 2097: ID X6G-20435-79320

When I answered the questionnaire on 1/3/ 2021, Sunday.. I did not know I would also be sleeping away the day.. that is not normal for me to do .. but not really sure it was vaccine

related.. just thought I would let you know I slept a great part of my day on Sunday..which I never do... ..

Could get to sleep until very late. No idea if it's related.

sleep : Case 2118: ID 39J-20016-93882

The muscles that I use feel exhausted when I use them for normal things, like when doing that last rep and your muscle refuses to comply) - lifting arms to put up hair, jogging up steps. My neck muscles felt extra tired and crampy last night which is weird. I sleep extra and feel slightly mentally off, forgetful.

sleep : Case 2119: ID RTC-49656-01391

I do not believe there is a connection between my symptoms today and the vaccine. During dinner last evening I had a liquid go down the wrong way and have had a cough ever since last night and did not sleep well.

sleep : Case 2120: ID WXA-56028-67828

sinus headache but not sure if its related to the shot, has been off and on for a few days and affected my sleep last night

sleep : Case 2121: ID GAP-49672-44331

Trouble sleeping last night, woke up multiple times very thirsty

sleep : Case 2122: ID GUX-27526-53141

I had significant pain in my underarm on the same arm where I got the injection. It interrupted my sleep and bothered me most of the night. Seemed better in the morning; only mild now. There seemed like there was slight swelling in my underarm this morning.

sleep : Case 2236: ID FUU-23053-34046

I did not mention this previously because I thought it unrelated and it may still be. However, on day 4 after the vaccine, I experienced what I thought was a panic attack. I felt as if my entire abdomen and chest were under pressure. I had felt severely bloated but was not visually. I could not get a deep breath. I have breast implants and get routine botox injections. A friend who is a pharmacist and has been giving the vaccine at her pharmacy expressed she had heard this from other woman with implants and botox use. She said it was considered an adverse reaction and a systemic inflammation. I felt better after sleeping and the next day (day 5). By day 6 the symptoms were completely gone and I felt fine. I also experienced an ache between my shoulder blades that was not muscular, bilateral flank pain and just random sharp, gas like pains all in the same day I was short of breath. (Day 4) I have had panic attacks in the past but it has been quite a few years now. I didn't feel particularly stressed but bodies do weird things sometimes. I am feeling fine Day 6, Day 7 and today Day 8. It does concern me a little about the second vaccine if this was an adverse reaction.

While it seems to be slowly improving, the pain in my injection arm was so severe last night that I couldn't raise my arm and barely got any sleep last night. While my temperature has not gone above 99.4, I have fluctuated between being cold and hot throughout the day. My biggest complaint would be the pain in my arm. It was severe last night. I'm not sure that I've ever experienced that level of muscle soreness from a vaccine before.

sleep : Case 2472: ID U8U-33571-91230

Today, the pain in left arm (injection site) is very mild, like a normal vaccine. The evening of 1/4/2021, after receiving the vaccine, the pain in my left arm went from moderate to severe through the evening and overnight. Yesterday (1/5/2021), my ROM in left arm was affected, and the pain ranged from moderate to severe. On 1/4, about three hours after receiving the vaccine, I felt as though my throat was starting to slightly swell, but did not affect my breathing, and didn't not progress. On 1/4, about four hours after vaccine, I became really tired. I felt sick to my stomach immediately after dinner, and I fell asleep on the couch right away. This morning (1/6/2021) I woke feeling much better. The pain in my left arm is very mild, like you would feel after a normal vaccine. Still have some nausea and diarrhea today.

Difficult to lift or move arm, and pain woke me from my sleep, but dissipated once I massaged the area and elevated my arm and shoulder. I am 24 weeks pregnant and experienced severe round ligament pain today, as well (24 hours post injection), and mild Braxton-Hicks contractions, but don't think that's related, though I have not experienced such extreme ligament pain prior to today.

I would like to report that on the evening I received the shot, I had heart palpitations. My heart rate dropped down to the upper 50s. I could not take a deep breath because the right up chest area hurted so much. The pain in the chest lasted for two days. By the 3rd day it was gone. My heart rate went back into the 80s by the next day. The soreness in the upper left arm where I had the injection lasted for approximately 3 days. I am afraid to take the second injection. The palpitations were so bad until my family wanted me to go to the ER. I was afraid to go to sleep that night. I had a similar episode on Sunday night (1/3/2021).

Day 1 woke up during the night with my whole arm (injection arm) and hand numb. Leg on the same side felt a little numb and tingly as well. I was sleeping on the opposite side so I do not attribute this to a sleeping position. The leg improved but my arm still felt Nam until I fell asleep again about 10 minutes later. I have not felt any numbness since then. Also had intermittent headache but it would only last a few minutes for the first 2 to 3 days. Significant muscle pain at injection site on day one and two so I took two ibuprofen on the evening of day one and morning and evening of day two.
