

## V-SAFE Reports with Symptom Keyword = TREMOR

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN ( <https://icandecide.org/v-safe-data/> ) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

### Data

Data Source : V-SAFE (CDC) : download (June 2024) @ <https://icandecide.org/v-safe-data/>

Total number of V-Safe reports with symptom keyword TREMOR = 814

Percentage of V-Safe reports with symptom keyword TREMOR = 0.04473 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 666

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 0.06095 %

### Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

## Sample of 814 Reports with Symptom Keyword = TREMOR

30 minutes after the vaccine I collapsed and 911 was called. started with a tightness in throat, then pain up to right ear. about 30 minutes later I collapsed with a heart rate of 168, could not swallow or breath right, very dizzy, weak. I then started with bilat arm tremors. In hospital I was given IV with Ativan. I had taken 50 mg of Benadryl at home when I felt a reaction was starting. today Im very fatigue. I just started itching all over and burning of my skin so I just took another benadryl.

None of my symptoms are getting any better they are getting worse. I am having the shakes still and its getting worse its like tremors my hands shake my tongue shakes. I have also developed a rash not anywhere close to the injection site. Tylenol or Advil do not bring the fevers down nor do they help the pain. I am unable to sleep. My blood sugar which is usually well controlled has been quadruple what it normally is. My blood pressure is elevated very high and my pulse is racing constantly. I am experiencing vertigo. I am experiencing shortness of breath hard to catch my breath and have constant pressure in my chest like someone is sitting on it. Symptoms are getting worse and i am more and more fatigued. I have passed out twice. My face is having muscle spasms.

I received my 1st dose on February 8th and had mild effects for about 24 hours of chills, lethargy, site soreness. One out of the norm side effect was experienced around 3am Wednesday evening. During the night, my left arm (injection arm) felt like an electrical shock was happening inside. Almost like an internal tremor. It was not painful, but was a strange feeling. This went on for about two hours and I stayed awake and monitored it. No swelling or rash and my arm did not appear to be shaking, my eyes could not see my arm moving-- it was all internal.

tremor : Case 560: ID 49T-18669-77434

tremor : Case 637: ID NG6-18153-17123

I experienced extreme, uncontrollable tremors throughout my body last night until sometime this morning. I could not put toothpaste on my toothbrush or do other things that required fine motor skills. It started as sporadic muscle jerks throughout my body until I was shaking from head to toe. I did not have a fever at that time, although I did develop one shortly thereafter. I also experienced swelling at my lower legs and wrists which resulted in poor blood flow (my hands and feet were like ice and felt numb). My skin was also hypersensitive. Many of the same things I experienced when I actually had COVID-19. This was miserable.
